Mikhail Shamolin, President and Chief Executive Officer of Sistema, commented:

"2012 was marked by several accomplishments and substantial progress was made on our new investment ideas. In the transportation segment, we established a leading presence in the sector only months after acting on our initial interest, whilst in our agriculture business, our partnership has delivered a promising set of maiden results. The period was also dominated by prolonged uncertainty in India. However, despite these difficulties, our perseverance paid off in the first quarter this year when we managed to secure superior licences for SSTL at no immediate cost, thereby strengthening its investment case.

In 2012, our businesses continued to expand as existing investments implemented their growth strategies, driving the Group's solid topline and adjusted OIBDA growth. Moreover, our net income increased 334% to US\$ 947 million, reflecting stronger profitability in a number of our smaller investments. Most of these investments delivered positive OIBDA and four businesses have now reported positive net income.

To reflect the strength of our financial position, management intends to seek the Board's approval for a substantially higher dividend for 2012. We have a well-established track record for consistently increasing cashflow to the holding level and for executing on our strategy for each of our portfolios, leaving us well positioned to reward our shareholders and drive higher returns in 2013."

GROUP OPERATING REVIEW

In 2012, Sistema's consolidated revenues increased by 3.9% and 9.9% year-on-year in US dollar and rouble terms, respectively, as a result of organic growth at MTS, higher sales at Bashneft, RTI's consolidation of NVision Group, as well as strong performance at Detsky mir and MTS Bank. In the fourth quarter, the Group's revenues were up 13.0% year-on-year.

Selling, general and administrative expenses (SG&A) decreased by 1.6% to US\$ 3,855.8 million in 2012, mainly due to the cost efficiency measures taken at MTS, as well as lower costs at the Corporate Centre's level. Depreciation, depletion and amortisation expense decreased by 3.4% to US\$ 3,159.4 million in 2012.

The Group's adjusted OIBDA increased by 3.3% year-on-year in 2012, largely as a result of MTS' growing profitability, as well as improved OIBDA in Detsky mir and MTS Bank. Year-on-year decline in adjusted OIBDA by 1.9% in the fourth quarter was mainly due to higher tax expenses at Bashneft. The Group's adjusted OIBDA margin was 21.9% in the fourth quarter and 25.0% in 2012.

Adjusted consolidated net income attributable to Sistema grew by 80.0% year-on-year in 2012, reflecting excellent underlying results across most portfolio companies. The Group reported a 36.9% year-on-year increase in adjusted net income in the fourth quarter of 2012.

Despite the weakening of the Russian rouble against the US dollar and the mid-year suspension of the company's operations in Uzbekistan, MTS' revenues increased by 0.9% year-on-year in 2012 primarily due to the growth in sales of handsets and data products. The total subscriber base (including Belarus subscribers) decreased to 101 million customers as of December 31, 2012, following the suspension of MTS' operations in Uzbekistan. Excluding customers in Uzbekistan, the company's subscriber base grew by 4.4% year-on-year due to resumed operations in Turkmenistan, as well as the growing subscriber base in Russia and Ukraine.

In 2012, MTS' OIBDA decreased year-on-year due to recognised loss relating to impairments and provisions in Uzbekistan. MTS' adjusted OIBDA increased slightly year-on-year in 2012 as a result of growing income from data services and a reduction in marketing expenses.

The average monthly service revenue per subscriber (ARPU) in Russia increased to RUB 306 in the fourth quarter of 2012, compared to RUB 284 in the corresponding period of 2011, as a result of MTS' on-going efforts to stimulate voice and data usage. Russian subscribers' monthly minutes of use (MOU) increased by 35.7% to 323 minutes in the fourth quarter of 2012, compared to 283 minutes in the fourth quarter of 2011, as MTS continued to focus on increasing voice usage to drive loyalty and customer value.

In the fixed broadband business, the number of households passed increased by 3.0% year-on-year to 11.7 million at the end of the fourth quarter of 2012. The Pay-TV customer base totalled 2.9 million subscribers at the end of the reporting quarter. The number of broadband Internet subscribers increased to 2.3 million year-on-year.

In November 2012, MTS announced a strategic initiative with Microsoft, the global IT leader, to promote innovative mobile solutions by launching Windows 8 "Ecosystem Demo Zones" in MTS retail stores.

In October 2012, Sistema, MTS and MTS Bank signed a non-binding indicative offer regarding the issuance of up to a 25.095% stake in MTS Bank to MTS through an additional share issue by MTS Bank. In March 2013, the transaction was concluded in line with the terms announced on October 25, 2012.

Bashneft's revenue increased by 3.5% year-on-year in 2012 due to an increase in export volumes, and by 10.2% year-on-year in the fourth quarter of 2012, as a result of higher exports of oil products, particularly to non-CIS countries.

Bashneft's OIBDA decreased by 7.1% year-on-year in 2012, primarily due to higher tax expenses.

In 2012, Bashneft's oil production increased by 2.2% year-on-year to 15.4 million tonnes. The company sold 4.9 million tonnes of oil products in the fourth quarter of 2012, a 2.1% year-on-year increase, with exports amounting to 1.1 million tonnes of crude oil and 2.2 million tonnes of oil products.

Refining volumes from the company's refinery in 2012 slightly decreased to 20.8 million tonnes of crude oil following the planned repairs to the Ufimsky refinery plant. In 2012, the average refining depth was 84.9% and light-product yield amounted to 59.7%, while the Nelson complexity index increased from 8.3 to 8.55 as a result of the process of increasing the capacity of a delayed coking Branch "Bashneft Ufaneftekhim" from 1.2 million to 1.6 million tonnes per year.

As at December 31, 2012, Bashneft operated a total of 488 petrol stations.

In December 2012, Bashneft acquired LLC Garsar and LLC Mobel-Neft holding licences for oilfields and promising subsoil areas in the Ermekeyevsky district in the west of the Republic of Bashkortostan.

In November 2012, the Consortium comprising Bashneft (70%) and Premier Oil (30%) signed the exploration, development and production service contract (EDPSC) with South Oil Company acting on behalf of the Republic of Iraq for Block 12 in Baghdad. In accordance with the signed contract, the Consortium will conduct an obligatory geological exploration programme at Block 12 for the 2D seismic survey totalling 2,000 linear kilometres and drilling one exploration well. In addition, the Consortium will invest US\$ 120 million in geological exploration over a five-year period.

In October 2012, Bashneft completed its reorganisation through the consolidation of its subsidiaries (OJSC Ufimsky refinery plant, OJSC Novoil, OJSC Ufaneftekhim, OJSC Bashkirnefteprodukt and OJSC Orenburgnefteprodukt), resulting in the transition to a single share.

Bashkirian Power Grid Company⁶

⁶ On November 7, 2012, Bashkirenergo was split into JSC Bashkirian Power Grid Company, which combines transmission and distribution grids, and OJSC Bashenergoactiv, which integrates power generation assets. Sistema-Invest obtained a 92.48% voting stake in Bashkirian Power Grid Company. In accordance with US GAAP requirements all operations of the power generation segment were excluded.

Bashkirian Power Grid Company's revenues decreased by 5.2% year-on-year in the fourth quarter and by 3.8% year-on-year in 2012, mainly due to changes in the payment procedure for power transmission services effective from July 1, 2012, as well as rouble depreciation against the US dollar.

The company's OIBDA grew significantly year-on-year in the reporting quarter and increased by 29.9% year-on-year in 2012, mainly due to the optimisation of the company's organisational structure and decreased operating expenses. The OIBDA margin expanded to 34.6% in 2012, compared to 25.6% in 2011.

In 2012, distribution grid losses decreased by 0.6 p.p. year-on-year as a result of the reduced commercial losses, an increased number of installed electricity meters, and tests conducted to detect non-contractual and non-metered consumption and control over electricity meter readings. Transmission grid losses increased in 2012 mainly due to decline in consumer demand and operational factors.

The effective transmission grid output remained stable year-on-year in the fourth quarter of 2012, while the effective distribution power output was up 2.6% year-on-year.

In July 2012, the EGM of Bashkirenergo's shareholders approved the decision to reorganise the company by splitting it into two companies: generating company Bashenergoactiv, and Bashkirian Power Grid Company. Following the completion of the reorganisation process in November, Sistema-Invest obtained a 92.48% voting stake in Bashkirian Power Grid Company and received RUB 11.2 billion in cash and promissory notes from INTER RAO UES, payable in installments by September 29, 2013. Sistema no longer has any interest in the power generation assets.

Sistema Shyam TeleServices Ltd. (SSTL)

In 2012, SSTL's revenues increased by 15.5% year-on-year in US dollar terms and by 31.0% in local currency terms mainly due to the growth in revenue share from non-voice and mobile value-added services (VAS).

SSTL's total wireless (voice and data) subscriber base reached 15 million customers as of December 31, 2012. Blended mobile ARPU for the fourth quarter and the full year of 2012 amounted to US\$ 1.48 and US\$ 1.52, respectively. The data card subscriber base increased by 36.9% year-on-year in 2012 and amounted to 1.78 million subscribers.

Non-voice revenues from both data and VAS in 2012 increased to US\$ 109 million. The share of non-voice revenue as a percentage of total revenue stood at 36%.

In February 2012, the Supreme Court of India revoked 122 licences issued to eight Indian operators in 2008, including 21 out of 22 licences held by SSTL.

In October 2012, Indian mobile operators were due to submit their applications to bid in the country's upcoming 2G spectrum auction. SSTL did not submit its application.

In March 2013, SSTL participated in new spectrum auctions, acquiring licences in eight circles, resulting in a nine circle footprint, including Rajastan circle.

Sistema Mass Media's revenues decreased by 19.8% year-on-year in 2012 largely due to the closure of studio in Moscow as a result of business restructuring, changes in the accounting methods for revenue at the advertising segment and the rouble depreciation against the US dollar.

Sistema Mass Media's OIBDA stabilised in 2012 due to the cost optimisation programme, business restructuring and organic growth in key high-margin segments.

The Stream-TV subscriber base increased by 21.0% in 2012 to 7.5 million subscribers, while the share of revenue from advertising on Stream-TV as a percentage of total revenue grew by 0.6 p.p. year-on-year to 15.4%. RTI revenues were up 13.5% year-on-year in 2012 due to the consolidation of NVision Group in the third quarter of 2012 and growing revenue in Defence Solutions BU.

⁷ Financial results of Stream.ru are included into SMM segment for all periods presented.

⁸ Financial results of OJSC "Concern "RTI Systems" and OJSC SITRONICS are included into RTI segment for all periods presented.

The OIBDA loss in the fourth quarter and in 2012 is the result of recognised loss from impairment of investments in INTRACOM in Greece, as well as higher operating expenses following the restructuring.

In December 2012, RTI, X5 Retail Group N.V. and RUSNANO launched the trial operation of Perekrestok Store of the Future. The project benefited from the interaction of NVision Group, and NIIME⁹ and Micron.

In November 2012, RTI and its subsidiaries acquired 83.54% of the voting shares in OJSC NIIDAR. Following the transaction, RTI made a mandatory offer to acquire up to 100% of NIIDAR's ordinary shares.

Binnopharm's OIBDA demonstrated significant growth in 2012, mainly due to improvements in operating efficiency, and as a result of completing the government contract for delivering the Hepatitis B vaccine ahead of schedule.

During the reporting year, a new bio-technology product Erythropoietin β 2000 ME was added to the company's product portfolio. In 2012, Binnopharm also reopened the production lines for tablets and aerosols.

Intourist reported a decrease in revenues for the full year of 2012, as a result of the change in accounting method for the company's tour operating and retail sales businesses following the transaction with Thomas Cook. Year-on-year revenue growth by 14.3% in the fourth quarter was mainly due to the success of the company's hotel division, which saw an increase in sales and improved quality of services.

Intourist reported an OIBDA loss in 2012 due to recognised losses from the tour operating business in its JV with Thomas Cook.

The termination of a management contract with the owners of Oktyabrskaya Hotel (Nizhniy Novgorod) and Severnaya Hotel (Petrozavodsk) led to a decrease in the number of rooms owned, managed and rented in 2012. The number of tourists travelling through the Thomas Cook JV fell by 19.4% in 2012, mainly due to a decrease in package sales to travel agencies as a result of the growing trend for tourists to make their travel arrangements independently.

Medsi revenues increased by 57.7% year-on-year in the fourth quarter and by 12.5% in 2012, reflecting the wider range of services provided and growth in patient's visits.

Medsi's OIBDA declined year-on-year in the fourth quarter and for 2012, due to increased expenses relating to the integration with the assets of Medical Center for the Mayor and Government of Moscow (MCMGM), and consultancy services expenses.

In 2012, the number of patient visits and services provided increased by 20.9% and by 47.6% year-on-year, respectively, while the average cheque amounted to RUB 1,400. In the fourth quarter of 2012, the number of services provided increased by 77.0% year-on-year, while the number of patient visits were up 25.5%, and the average cheque grew by 28.6% to RUB 1,800. This is mainly due to an increase in the range of services and an expansion in the number of hospitals, clinics and rehabilitation centres operated by Medsi.

In April 2012, Medsi agreed on a merger of its assets with SUE, a large group of healthcare institutions in Moscow, which now holds a 25% share in the enlarged company. Following the completion of the merger in the fourth quarter of 2012, Medsi manages 22 medical clinics in Moscow and 11 clinics in the regions, 3 in-patient clinics with a total bed count of 1160, more than 80 first aid stations across Russia, an ambulance service, 3 wellness centres in Moscow and 3 sanatoriums in Moscow and Crimea. Non-GAAP financial measures. This press release includes financial information prepared in accordance with accounting principles generally accepted in the United States of America, or US GAAP, as well as other financial measures referred to as non-GAAP. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information prepared in accordance with US GAAP.

Operating Income Before Depreciation and Amortization (OIBDA) and OIBDA margin. OIBDA represents operating income before depreciation and amortization. OIBDA margin is defined as OIBDA as a percentage of our net revenues. Our OIBDA may not be similar to OIBDA measures of other companies; is not a measurement under accounting principles generally accepted in the United States and should be considered in addition to, but not as a substitute for, the information contained in our consolidated statement of operations. We believe that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our ongoing business operations, including our ability to fund discretionary spending such as capital expenditures, acquisitions of businesses and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under generally accepted accounting principles, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies. OIBDA can be reconciled to our consolidated statements of operations as follows:
