The value of the Company's net assets grew in the third quarter, reaching RUB 230 bln at 30.09.2006, which is 20% higher than the level reported on 30.06.2006. Compared to the beginning of 2006, net asset value increased by 10%. 22% decrease in the net asset value in Q1 2006 (from RUB 226 bln to RUB 177 bln) was caused by the transfer of a portion of OJSC MMC Norilsk Nickel's assets to OJSC Polyus Gold, a spun-off company established under the resolution of the Extraordinary General Meeting of Shareholders dated September 30, 2005, on the Company's reorganisation.

The main factor contributing to the growth of net assets in 2006 is the growing amount of retained earnings.

Debt to equity and short-term debt to equity ratios reached in 2006 their minimum levels: 34.65% and 26.62%, respectively, which is the result of two factors: diminishing external borrowings and rising equity value. Changes in these indicators over time show with evidence that the Company's dependence on external financing gradually becomes lower.

Share of overdue amounts in the total accounts payable by the end the third quarter is 1.1%.

Receivables turnover ratio had a stable positive trend in the first nine months of 2006 (+98%), which is caused by the growth of the Company's revenues while the accounts payable go down.

The growing revenues explain also the positive trends in the following indicators: depreciation to revenue ratio (-36%), and labour efficiency (+67%).

All these performance indicators show that the Company has a high solvency level, low credit risks and good financial standing.

<i>Loan agreement</i>	<i>NORILSK NICKEL FINANCE LUXEMBOURG S.A</i>	<i>498,300,000</i>	<i>September 28, 2009</i>	<i>The loan is being repaid according to the schedule.</i>

No commitments under loan or credit agreements where the Issuer acts (acted) as borrower, and where the principal accounts(accounted) for 5 or more per cent of the balance sheet value of the Issuer’s assets were made within the reporting quarter.

2.3.3. Liabilities of the Issuer under guaranties given to third parties

At September 30, 2006, total liabilities of the Issuer under guaranties given, and the total amount of third party liabilities secured by the Issuer (by collateral or surety) was RUB 34,572 mln.

No such liabilities representing more than 5% of the balance sheet value of the Issuer’s assets were undertaken within the reporting period.

2.3.4. Other liabilities of the Issuer

The Issuer has no other liabilities.

2.4. Purpose of Security Issuance and Application of Security Placement Proceeds

Fifth- issue securities.

These securities were issued as part of Norilsk Nickel corporate restructuring. MMC Norilsk Nickel became a new centre of capitalization (instead of RAO Norilsk Nickel) through the issuance of additional MMC Norilsk Nickel shares that were placed among RAO Norilsk Nickel shareholders under private offering and paid by the shares of RAO Norilsk Nickel.

No cash was involved in paying for the ordinary shares of this issue. The assets (i.e. ordinary and preferred shares of RAO Norilsk Nickel) were recorded on the balance sheet of OJSC MMC Norilsk Nickel.

2.5. Risks associated with investments in equity securities

Described below are risk factors that may affect the performance of MMC Norilsk Nickel. These risks may materially affect the Company's operations, sales, profits, assets, liquidity and capital resources, and they should be taken into account when reviewing all estimates and forecasts presented herein. Furthermore, certain risks presently deemed insignificant may become material with time.

2.5.1. Industry risks

OJSC MMC Norilsk Nickel is the world-leading producer of palladium and nickel, a major producer of platinum and one of the world 10 top copper producers.

The prices for metals produced by OJSC MMC Norilsk Nickel and the world's demand are highly dependent on the global economy growth. The Company's financial standing is directly affected by the prices of such metals.

The Company is also subject to the risk of metal price fluctuations as most of metal sales revenues are received under long-term contracts for actual delivery of fixed metal tonnages at prices tied to the delivery period.

Risks of possible changes in prices for raw materials that the Company purchases are immaterial as the Company uses its own sources of raw materials, and the proportion of purchased raw materials is insignificant. Moreover, the Company has entered into a number of long-term contracts for raw material supply.

The Company has a number of contractors engaged in such services as processing of non-ferrous and precious metal concentrates into final metals, production of advanced metal products, transportation and insurance of concentrates and final metals. Risks associated with changing costs of such services are also very low due to the following:

- services are performed under long-term contracts with fix prices ensuring the required profitability;*
- there is an option to engage alternative contractors.*

2.5.2. Country risks and regional risks

Business performance of all companies, including OJSC MMC Norilsk Nickel, is subject to a number of political and economic risks. Among the typical features of today's Russian economy are foreign currency control, low liquidity on capital markets and ongoing inflation.

Sustainability and further development of the Russian economy are strongly dependent on the efficiency of the economic policy being implemented by the Government.

Business operations of OJSC MMC Norilsk Nickel might be affected by severe climat conditions of the Far North or by any Force Majeure circumstances. Delivery of materials and products might be suspended because of bad weather. Major power supply failures, accidents at mines, concentrating mills and metal plants may entail negative effects on the Company's performance.

In matters that the Company may control, significant efforts are made to limit any possible effects of such adverse events. This means establishing long-term relations with local authorities to boost efficient and integrated economic development of the regions of the Russian Federation; promotion of mutually beneficial social partnership with due respect to the opinions of the Company employees; accumulation and maintenance of sufficient material and technical resources in hard-to-reach areas; minimization of damages caused by ice drifts and snowmelt floods.

2.5.3. Financial risks

The major part of the Company's metal sales is denominated in US Dollars whereas most of its expenses are paid in Russian Rubles. Therefore, the strengthening of Ruble may produce adverse effect on the Company's financial results. This risk is partially reduced for the Company on account of negative correlation between metal prices and Ruble exchange rate.

The risk of interest rate fluctuation, which may adversely affect the Company's financial results, is currently insignificant to the Company due to a low level of the Company's indebtedness and a high level of fixed rate debts.

Credit risk is the risk of financial loss due to a debtor's non-payment of a loan. OJSC MMC Norilsk Nickel minimizes such credit risk by dispersing it among a larger number of counterparties and by setting credit limits that are based on the analysis of counterparties' financial standing.

Price risk is a risk of possible loss due to revaluation of open positions on metal markets. Fluctuation of prices for the Company's metal products may adversely affect the sales revenues.

Liquidity risk means a possibility of the Company's failure to pay its liabilities at their maturity. To mitigate this risk, OJSC MMC Norilsk Nickel forms a reserve of liquid assets sufficient for compensating any possible variations in sales revenues depending on price, currency and interest rate risks.

2.5.4. Legal risks

The major part of the Company's sales is denominated in US Dollars. Therefore, any changes in foreign currency exchange regulations may affect the Issuer's financial results.

There is nothing in the current Russian tax law that could pose any risk to investing in the Company's outstanding securities.

No risks resulting from the change of licensing requirements to the Issuer's core operations or licensing the right to exploit limited resources (including natural resources) can presently be identified.

No risks have been identified so far that could be a result of changes in judicial practice in matters relating to the Issuer's operations (including licensing matters), and which might adversely affect the Company's business results or the outcome of pending proceedings in which the Issuer is involved.

2.5.5. Operational risks

No risks have been identified so far in relation with litigations where the Issuer is a party.

Nor are there any current risks of non-extension of licenses for any of the Issuer's operations or exploitation of limited resources (including natural resources).

Total liability of the Issuer under third party commitments including those of subsidiaries cannot significantly affect the Issuer operations.

The Company has no customers accounting for at least 10 per cent of total sales revenue. The Company is not economically dependent on a limited number of customers since all products manufactured by OJSC MMC Norilsk Nickel may be sold on commodity markets.

3.1.3. Background information

"Norilsk Mining Company" Open Joint Stock Company was founded in 1997 through the reorganization of A.P. Zavenyagin Norilsk Mining and Metallurgical Combine, Open Joint Stock Company, a member of OJSC "RAO "Norilsk Nickel".

In 2001 by resolution of the general shareholders meeting the Company's name was changed to Open Joint Stock Company "Mining and Metallurgical Company "Norilsk Nickel" (OJSC MMC Norilsk Nickel).

In 2000 the Norilsk Nickel Group launched a restructuring program aimed at the efficiency improvement and growth of its attractiveness to investors. Key objectives of this program include the following:

- *provide investors with direct access to the capital of the company, which is the owner of produced commodities and the main profit centre of the Group;*
- *make the Group's corporate structure much more transparent for shareholders;*
- *enhance the economics of operations to increase dividend income ;*
- *integrate foreign distribution channels into the corporate structure;*
- *improve the efficiency of corporate management system.*

Since 2003 the Group has acquired a number of gold assets, and this resulted in the creation of the largest Russian gold mining company, one of the top 15 gold producers of the world. To maximize the shareholder value, in 2005 the Group decided to spin off its gold mining assets. As part of MMC Norilsk Nickel's reorganization through the spin-off of the gold mining assets, a new company was incorporated on 17 March 2006: Open Joint Stock Company Polyus Gold. Polyus Gold shares were distributed among the shareholders of record of MMC Norilsk Nickel at 1:1 ratio to their interests in the MMC Norilsk Nickel as at 1 January

2006. In this spin-off process, Polyus Gold received 100% of the shares in Close Joint Stock Company Polus ("ZAO Polus"), which consolidated all the gold mining assets of the Group, and a cash consideration of RUB 10 billion.

Open Joint Stock Company Mining and Metallurgical Company Norilsk Nickel with its subsidiaries is the leading producer of nickel and palladium, one of the largest producers of platinum and one of the top ten producers of copper in the world. The Group also produces a variety of by-product metals such as cobalt, rhodium, silver, gold, tellurium, selenium, iridium and ruthenium.

The Norilsk Nickel Group is involved in prospecting, exploration, extraction, beneficiation and metallurgical processing of minerals with further production, marketing and sale of base and precious metals.

The main structural divisions of the Group are the Polar Branch and OJSC Kola Mining and Metallurgical Company (Kola MMC). The Polar Branch is located above the Polar Circle, in the 69th latitude. This territory is connected with the other regions of the Russian Federation via the Yenisei river and the Northern Sea Route, as well as by air. MMC Kola is located in the Kola Peninsula and is the largest industrial complex in the Murmansk Area.

Mission

MMC Norilsk Nickel aims to strengthen its leadership in the global mining and metals industry and the role of a responsible producer and supplier of base and precious metals through:

- effective use of unique mineral resources and sound management of operating costs;*
- further exploration and development of world-class mineral deposits, thus ensuring future growth;*
- support of sustainable development in the regions where the Group's operations are located.*

Strategic goals

Effective use of unique mineral resources and management of operating costs:

- effective use of the mineral resource base and optimization of capacity utilization at the Group's mining and processing plants;*
- modernization of production facilities in ore beneficiation and metallurgy in order to ensure the most effective processing of mined ore and better metal recovery;*
- sustainable cost-effective production based on continuous refining of knowledge and skills required for industry operation and development of innovative technical solutions;*
- higher level of independence in terms of stable supply of low-cost services and resources, including energy supply, transportation and logistics;*
- further improvements in corporate governance through restructuring of assets and optimization of management processes.*

Growth in exploration and development of worldclass mineral deposits:

- active participation in prospecting, geological investigation and exploration of new promising world-class mineral deposits both in Russia and abroad;*
- creation of strategic alliances, leveraging best practices in exploration, mining and production of base and precious metals;*
- search for growth opportunities for the existing business through strategic acquisitions and establishing partnerships in prospective sectors of the mining industry.*

Support of stable development in the regions in which the Group operates:

- personnel development, creating a proper environment for growth of highly skilled professionals, ensuring safe labor environment, competitive staff remuneration and social benefits in accordance with the scope and quality of their work;*
- compliance with both Russian and international environmental standards, implementation of new technologies allowing to comply with the limitations imposed on pollutant emissions, implementation of socially advantageous environmental protection projects on a regional, national and international level;*
- implementation of projects in social and economic development of communities in cooperation with the regional and municipal authorities.*

3.2.2 Core business operations of the Issuer

Key business of OJSC MMC Norilsk Nickel is to produce non-ferrous and precious metals. The share of operating income for the reporting period is 95 %.

Indicator	3 Q 2005	3 Q 2006
Revenues from sales of products (works, services), mln RUB	40,635.5	71,373.5
<i>Including those from core operations</i>	39,622.5	70,652.8
Share of core products in total revenues, %	97.5	99.0
Change in operating income, %		+78.4

The total amount of operating income in 3Q2006 increased by RUB 31 bln. (29%) as compared to 3Q 2005, which is the result of the increase in the world prices for nickel (+85%) and copper (115%).

OJSC MMC Norilsk Nickel carries out its core business operations on the territory of the Russian Federation only.

OJSC MMC Norilsk Nickel's business activity is not of seasonal nature.

3.2.3 Key products (works, services)

OJSC MMC Norilsk Nickel's main products accounting for at least 10% of sales include nickel, copper, platinum and palladium.

Indicator	1Q 2006	2Q 2006	3 Q 2006
Revenues from sales of products (works, services), mln RUB			
TOTAL, incl.:	43,711.7	52,742.9	71,373.5

- copper	18.2	15.9	18.9
- platinum	7.3	8.2	5.7
- palladium	11.0	10.4	6.9

The world's market prices and, consequently, the actual selling prices for all base metals exceeded substantially in 3 Q 2006 the price levels of prior years.

Information on revenues from sales of products (works, services) has been prepared in accordance with the Russian Accounting Standards for the Entity's Income approved by Order of the Ministry of Finance of the Russian Federation dated 06.05.1999 No. 32n, and the accounting policies of the Company.

	Total goods production costs	100.0	100.0	100.0
	Sales revenues to cost of goods sold ratio, %	261.8	334.1	397.8

Production cost structure as presented reflects the costs in the production of core products, which account for 85% of the total costs of the Company.

The existing system of cost accounting doesn't allow reflecting the costs structure for individual products, since the Company mines and processes multicomponent ore, with a great deal of returnable and recyclable metal-containing products and has a well-developed network of auxiliary (service) production facilities. The rate of internal product circulation within all subdivisions of the Company is quite considerable, which complicates the determination of production costs for individual product types.

There are three major cost items in the presented cost structure: labor (25.7%), production services (23.3%), raw materials and supplies(17.9%).

Increased share of production service costs is explained by the growth of old concentrate processing (beneficiation) by subcontractors, and by a larger scope of repair works (as a results of delays in contract finalizing). Increase in the cost of auxiliary materials can also be explained by growth of repair works.

The presented structure of production costs is based on the accounting statements, which were prepared according to the Instruction for completing Form No. 5-3 of the federal state statistical monitoring and the accounting policies of the Company.

3.2.4. Materials (supplies) and suppliers

The Company's sources of raw materials include sulfide copper-nickel ore deposits which are developed by the Polar Branch of OJSC MMC Norilsk Nickel. The share of purchased raw materials is insignificant. No raw materials are imported.

During the period under review the Company had no suppliers accounting for more than 10 per cent of total material supplies.

As compared to the same period of the previous year, the prices for nonferrous mill products and oil products increased in the third quarter of 2006 by more than 10 per cent.

During the period under review 84.2% of materials and supplies was purchased on domestic market and 15.8% imported.

The forecasts regarding the availability of foreign raw material and supplies are favorable; however, in case of any negative changes in the market situation, it will be necessary to look for alternative sources offering the best delivery terms (including price and product quality).

3.2.5. The Issuer's markets

Nickel market

Primary nickel producers — Canada, Russia, Japan, Australia, New Caledonia, Norway.

Major nickel consumers — China, Japan, USA, Germany.

Nickel prices increased dramatically in Q3 2006 due to higher demand by stainless steel producers, and activation of speculative demand for the metal. Metal exchange stocks reduced gradually over the period. LME prices went higher and higher, and the quarter's average Ni price reached USD 29,178/ton (against USD20,036/ton in Q2 2006 (a 45.63% growth)).

Key nickel markets — EU, Japan, USA, People's Republic of China, Taiwan, Korea.

Copper market

Major producers of refined copper — Chile, China, Japan, USA, Russia.

Major consumers — China, USA, Japan, Germany.

The growth of copper prices became much slower in Q3 2006. Total exchange stocks increased by 20 thousand tons but still remained on the low level. Stable industrial demand was offset by higher supply and wait-and-see position of speculative funds. Average LME copper price for the quarter was USD7,670/ton, compared to USD7,251/ton in the second quarter of 2006 (5.78% growth).

Key consumers of refined copper— Russia, EU, USA, China.

PGMs market

Major PGM producers — South Africa, Russia, USA, Canada. PGM market is basically influenced by South Africa and Russia.

Major consumers — USA, Japan, China, Western Europe.

Palladium price in the beginning of Q3 2006 remained at the level of the second quarter end, with a gradual growth. Closer to the end of this quarter the price decreased on account of profit taking by investment funds; however, it stabilized by the end of the quarter at a lower level, than in the beginning of the period. Demand

from traditional sectors of consumption remains steady. Average palladium price on LME in the third quarter 2006 was USD 323.50/oz. against USD 345.50/oz. in the first quarter of 2006 (- 6.37%).

The situation on the world's platinum market in Q3 2006 was similar to the situation on the palladium market: price fluctuations were mainly caused by speculative demand supported by fundamental factors. Changes in Pt prices went hand in hand with changes in the prices for other precious metals. Moreover, Pt price was certainly affected by weakening of US dollar. Despite a dramatic drop in the end of the quarter, average platinum price on the London platinum and palladium market (LPPM) in Q3 2006 amounted to USD 1,215.77/oz. against USD 1,189.30/oz. in the second quarter of 2006 (+2.23%).

The markets of OJSC MMC Norilsk Nickel may be adversely influenced by the world market changes (high volatility of exchange prices), implementation by competitors of major mining and metallurgical projects and development of new highly efficient technologies. To prevent possible adverse influence of market fluctuations the Company performs continuous monitoring and review of the world market and competitor operations including the identification of the most advantageous markets, acquisition of new businesses and highly profitable deposits, expansion of long-term direct sales, entry in new consumption areas, cost reduction and manufacture of high value added products.

"Kotselvaara and Semiletka" ore deposit		Copper-nickel sulphide
"Kaula-Kotselvaara"	Underground	Disseminated

Notes:

- (1) High-grade ore is high in non-ferrous and precious metal content while cupreous ore has a high copper-to-nickel ratio. Disseminated ores are characterized by lower content of all metals.
- (2) The "Komsomolski" mine is mining ore at the "Talnakhskoye" ore deposit and in the western part of the Oktyabrskoye ore deposit.
- (3) In 2005 "Severny-Gluboki" mine was united with Severny mine.

Seven mines of the Polar Branch produce sulphide copper-nickel ores at the Oktyabrskoye, Talnakhskoye and Norilsk 1 ore deposits. Ores of different value contain nickel, copper, cobalt, platinum, palladium, gold and other useful components.

The Kola MMC mines ore at the Zhdanovskoye, Zapolyarnoye, Kotselvaara and Semiletka ore deposits. At 4 mines of the Kola MMC, sulphide disseminated ores containing nickel, copper and other useful components are produced.

Ore and mineral deposits as of December 31, 2004 are given as certified by the independent audit performed by Micon International Co. Ltd. The audit was carried out according to internationally accepted principles of the Australasian Code for Reporting of Identified Mineral Resources and Ore (JORC Code).

In addition to the audit of non-ferrous metal reserves of the Talnakhskoye ore cluster (Taimyr Peninsula) and the Zhdanovskoye ore deposit (Kola Peninsula), an audit of non-ferrous metal reserves of the Norilsk-1 ore deposit (Taimyr Peninsula) and platinum-group metals of the Talnakhskoye ore cluster and the Norilsk-1 ore deposit was carried out during 2005. Inclusion of platinum-group metals in the audit became possible due to changes in the Russian laws. Information on platinum-group metal reserves include data on the reserves of platinum, palladium, rhodium, ruthenium, osmium and iridium.

Information on platinum-group metal content at the ore deposits developed by the Company was disclosed for the first time in history of OJSC MMC Norilsk Nickel in February 2006. The Company has carried out a serious and continuous work so that publication of information on platinum-group metal reserves becomes possible. This is an important stage in series of actions performed by MMC Norilsk Nickel aimed at ensuring transparency expected by investors, customers and the mining and metallurgical community in general, which would allow for more accurate assessment of the Company competitive ability and mineral resources base longevity.

Proved and probable ore reserves of ore deposits situated on Taimyr and Kola Peninsula contain about 6 mln. t of nickel and 9 mln. t of copper. Measured and indicated reserves of Taimyr and Kola Peninsula contain about 8 mln.t of nickel and 16 mln. t of copper.

Proved and probable ore reserves of ore deposits situated on Taimyr and Kola Peninsula contain 62 mln oz. Of palladium and 16 mln. ounces of platinum. Total content of platinum and palladium in underground Taimyr ore deposits is 5.5- 11.1 g per t.

Measured and indicated reserves of Taimyr Peninsula deposits contain 141 mln. oz. Of alladium and 40 mln. oz. of platinum.

In the course of the audit Micon International reviewed all aspects of the estimation of reserves of the mentioned ore deposits such as geological survey including the methods of geological data collection and deposit location by drilling and sampling as well as the methods of reserves estimation and classification. The auditor interviewed officers in charge of every mine and every unit involved in the audit and inspected operating mines, ancillary geological facilities and analytical laboratories. Micon also studied drilling techniques and relating equipment, the core log and sampling techniques, methods of chemical analysis and quality control applied to check the drilling sample database. Micon thoroughly inspected reserve estimation logs and techniques metal volume and content estimation and checked some of the estimates. No material differences between the results and the Company's accounts were discovered.

Notes:

- (1) *The Talnakh ore cluster and the Norilsk-1 ore deposit on the Taimyr Peninsula and the Zhdanovskoye ore deposit on the Kola Peninsula were classified according to the principles of the Australasian Code for Reporting of Identified Mineral Resources and Ore (JORC Code) developed by the Joint Ore Reserves Committee of the Australasian Institute of Mining and Metallurgy, the Australian Institute of Geoscientists and the Minerals Council*

of Australia (JORC). The competent specialist responsible for the classification: Stanley C. Bartlett, PGeo, Managing Director of Micon International Co Limited. The reserves data is derived from the current 2-3 year mining plan and the basic mining concept scenario to the expiry of the mines' depletion period determined based on the cost-effective extracted ore reserves relating to the Russian A, B and C1 grades as of the end of the calendar year. The audit did not take into account ore and mineral resources of "Zapolyarnoye", "Semiletka" and "Kaula-Kotselyaara" deposits on the Kola Peninsula.

- (2) The figures in the "Total" lines may differ from the sum of components due to rounding. Individual figures in some cases may slightly differ from those previously disclosed.
- (3) 6PGM means platinum, palladium, rhodium, ruthenium, osmium and iridium. Pd and Pt data are included into 6PGM
- (4) No proved and probable ore reserves are included in mineral resources.
- (5) Includes ore reserves and mineral resources of "Severny-Gluboki" underground mine and "Tsentralny" open-cut ore mine.

Current reserves of the licensed deposits of OJSC "Norilskgasprom" (grades A+B+C) as of the end of the reporting period are as follows:

Deposit area description: *The licensed site has a mine claim status and is situated in the Dudinski District of the Taimyr Autonomous District 30 km to the north-west of Norilsk, on the western bank of Pyasino Lake where holes drilled for the purpose of geological survey revealed Norilsk-type intrusions with vein-disseminated sulfide copper-nickel manifestation. The site area is 270 sq km.*

The Issuer's commitments:

1. *Approval of the operation plan by December 30, 2003.* Executed.
2. *Beginning of field survey by June 30, 2004.* Field survey began in 2003.
3. *Completion of the exploration stage — by December 30, 2006.*
4. *Completion of the evaluation stage — by December 30, 2007.*
5. *Presentation of the final report on calculated reserves and expected resources — by July 30, 2008.*

Licensed operations: *Ore mining at Oktyabrskoye copper-nickel ore deposit*

Grounds for issue: *Decision of the Governor of the Taimyr (Dolgano-Nenets) Autonomous District and the authorized representative of the Russian Ministry of Natural Resources "On the renewal of licenses for the use of underground natural resources of the Taimyr (Dolgano-Nenets) Autonomous District"*.

Site description: *Mineral resources consist of sulfide copper-nickel ore containing precious metals extracted by the underground mining method at "Oktyabrski" mine (rich and cupreous ore); "Taimyrski" mine (rich ore); "Komsomolski" mine ("Zapad" shaft cupreous ore). The State Reserves Balance (Minutes No. 7542 of the USSR State Reserves Committee, 1975) records nickel, copper, cobalt (primary raw material), platinum, palladium, rhodium, osmium, iridium, ruthenium, gold, silver, selenium, tellurium and sulfur all of which are extracted from the ore.*

Possibility of and reasons for license renewal: *Subject to the mines' capacity and planned processing volume the reserves of copper-nickel ore at Oktyabrski deposit go beyond the term of this license which may be extended for the depletion period or other period specified by then applicable law.*

Ore output *depends on the level of non-ferrous and precious metal consumption, prevailing prices, mines' capacity, condition of rock in place and mining safety considerations.*

In 2005 output *of sulfide copper-nickel ore was 9,172.3 thousand t.*

The Issuer's commitments: *To limit as far as possible selective mining of the most efficient resources; comply with applicable standards, regulations for the protection of mineral resources, surface and subsurface water, the atmosphere, wild life; provide for conservation of resources; carry out field prospecting. The license does not specify definite periods. The Issuer continuously performs all assumed responsibilities.*

Licensed operations: *Geological exploration of the Monchegorski ore zone for platinum metals (Murmansk Region).*

Grounds for issue: *Resolution of the Russian Ministry of Natural Resources No. 492-r of November 5, 2003 "On granting the right to use underground natural resources for the purpose of geological study of PGM-bearing minerals at the Monchegorsky ore field of the Murmansk area".*

Deposit area description: *The licensed site has a mine claim status and is situated to the south of Monchegorsk. The site area is 39 sq km. In 1999-2000 OJSC "Kola Mining and Metallurgical Company" performed PMG exploration of the area including the licensed site under License No. MUR 00460 TP (registration date — September 29, 1999, expiry date — March 30, 2003). Within the area a range of geophysical and drilling operations relating to the geological exploration stage and floatation testing of small laboratory samples were performed resulting in the discovery of a number of sites with low-sulfide platinum manifestation. At present improvement of processing flowsheets is continued. The State Reserves Balance records for the site off-balance copper-nickel ore reserves and inferred PMG reserves of several ore manifestations.*

The Issuer's commitments:

1. *Preparation and approval of the operation plan -- by April 30, 2004. Executed.*
2. *Beginning of field survey -- by June 30, 2004. Executed.*
3. *Completion of the exploration stage -- by December 30, 2006.*
4. *Completion of the evaluation stage — by September 30, 2008.*
5. *Presentation of the final report on calculated reserves and expected resources — by October 30, 2008.*

Licensed operations: *Geological exploration of the "Generalskaya Mountain" site for copper-nickel ore and platinoids (Murmansk area).*

Grounds for issue: *Resolution of the Russian Ministry of Natural Resources No. 491-r of November 5, 2003 "On granting the right to use underground natural resources for the purpose of geological study of Cu-Ni ores and PGM-bearing minerals at the "Generalskaya Mountain" site of the Murmansk area".*

Site description: *The licensed site has a mine claim status and is situated in the Pechengski District of the Murmansk Region near the town of Zapolayrny. The site area is 10.4 sq km. Before 2002 exploration there was performed by Murmansk Surveying Company of SZGTU and Pechenga Integrated Surveying Company funded by the Government. The 2002 exploration was funded and performed by Pechenga Integrated Surveying Company and OJSC Kola MMC and included magnetic prospecting, IP-MG electrical prospecting, transient electromagnetic exploration, field exploration, mining operations, drilling of holes 50 m to 1,700 m deep. The exploration showed that the mountain of Generalskaya is of a fundamentally laminated type and includes 3 to 7 horizons with 0.5 m to 10 m low-sulfide platinum manifestation traced to the depth of 1,500 m. Additionally, PMs manifestation was also discovered in cross-cutting bodies represented by vein-disseminated copper manifestation presumably of the stockwork type. AO "Institute Gipronickel" tested 5 laboratory samples of the ore to determine its processing properties. Within the site undiscovered P₁ platinoid, nickel and copper resources are recorded.*

The Issuer's commitments:

- 1. Preparation and approval of the operation plan by June 30, 2004. Executed.*
- 2. Beginning of field survey by June 30, 2004. Executed.*
- 3. Completion of the exploration stage by December 30, 2006.*

Grounds for issue: *Order of the Russian Federal Agency for the use of underground natural resources No. 1260 of 09.12.2005 "On granting the license for geological study (exploration and evaluation) of Cu-Ni ores at the Yuzhno-Monchegorski site of the Murmansk area".*

Site description. *The licensed site is situated within the municipal formation "the town of Monchegorsk with subordinate area" in Murmansk region, 60-10 km to the south of Monchegorsk. The licensed site has a mine claim status. The site area is 257.2 sq km. The main factor determining the site exploitability is availability in its limits of large layered intrusions of ultrabasic-basic formations: the Monchetundrovki massif, the massif of lake of Ostrovski, the Umbarechenski complex massifs which are associated with copper-nickel, vanadium-containing titanomagnetite and chromite ore manifestations.*

The Issuer's commitments:

1. *Preparation and approval of the exploration and evaluation project -- by July 1, 2006.*
2. *Beginning of geological survey -- by September 1, 2006.*
3. *Completion of the exploration stage and report preparation by June 1, 2009.*
4. *Completion of the evaluation stage and presentation of the report by November 1, 2010.*

Geological exploration. *Office processing of geological and geophysical data. Development of a preliminary exploration program.*

Grounds for issue: *Order of the Russian Federal Agency for the use of underground natural resources No. 1255 of 09.12.2005 “On granting the license for geological study (exploration and evaluation) of Cu-Ni ores and PGM deposits at the at the Solozerski site of the Murmansk area”.*

Site description. *The licensed site is situated inside the “Kolski District” municipal formation of the Murmansk Region, near the township of Verkhnetulomski, 60 km to the north-east of the town of Cola. The site has a mine claim status. The site area is 215 sq km. In the site area, massifs of basic-ultrabasic rocks have been discovered which relate to the Allarechenski, Monchegorski, Karikyavrski, Lovnoozerski and Kambaldinski (Komatiitov) ore-bearing formations. Some of them bear established copper-nickel, chromite and platinometal ore grade mineralization. The most explored area is a laminated massif in the vicinity of Lake of Solozero. The massif was explored by test hole drilling (50-180 m), has a dimension of 0.5x1.5 km in plan, is divided by fractures into three blocks, contains a scarce sulphide impregnation.*

The Issuer’s commitments:

1. *Preparation and approval of the exploration and evaluation project -- by July 1, 2006.*
2. *Beginning of geological survey -- by September 1, 2006.*
3. *Completion of the exploration stage -- by May 1, 2009.*

Grounds for issue: *Order of the Russian Federal Agency for the use of underground natural resources No. 1259 of 09.12.2005 “On granting the license for geological study (exploration and evaluation) of hardrock gold deposits at the Solozerski site of the Murmansk area”.*

Site description. *The licensed site is situated inside the “town of Kirovsk with subordinate area”, “Lovozerki District” and “Terski District” municipal formations of the Murmansk Region and extends to the south-west of Mount of Kirovskaya for more than 90 km. The site has a mine claim status. The site area is 706 sq km. In geologic and tectonic terms, the site relates to the Western and Central Block of the Imandra-Varzugski structural and tectonic zone created by the early Proterozoic volcanogenic-sedimentary complex. The area is*

considered to be exploitable for search of gold due to development in this area of black-shale formations which are attributed to the most gold-bearing rocks. Within this area, direct prospecting indicators of gold mineralization have been registered – gold-sulphide, gold-quartz-sulphide, gold-antimonic-arsenic manifestations in sulphide-carbon shales.

The Issuer's commitments:

- 1. Preparation and approval of the exploration and evaluation project -- by July 1, 2006.*
- 2. Beginning of geological survey -- by September 1, 2006.*

Site description. *The licensed site is situated inside the Pechenega District of the Murmansk Region at a distance of 6-15 km to the south-west of the district center – the township of Nickel and 9-10 km to the east of the state boundary with Norway. The site has a mine claim status. The exploration site area is 53 sq km. Within the Pechenega structural zone, by operations previously carried out in 1970-1994, increased content of platinum-group metals was discovered. In this area, during geochemical explorations a contrasting anomaly extending up to 13 km at a width of 1.5-3.5 km was discovered, which was associated with effusive-sedimentary formations of the Pechenega structure western side.*

The Issuer's commitments:

Licensed operations: *Sulfide copper-nickel ore mining at the Zhdanovskoye deposit to extract nickel, copper, cobalt, sulfur, gold, silver, platinumoids.*

Grounds for issue: *Resolution No.78/90-p of 24.12.1998 passed by Murmansk Area Administration and the Committee for Natural Resources of the Murmansk Region (on the renewal of licenses)*

Deposit area description: *The Zhdanovskoye deposit was discovered in 1947 and has been developed since 1959. Open-pit mining is expected to the minus 99 level after which it will be replaced by underground mining. The available reserves were approved by the USSR State Reserves Committee in 1952, 1955 and 1962. Additional exploration revealed new deposits — Bystrinskoye (1983), Tundrovoye (1986) being a geological extension of the Zhdanovskoye deposit. In 1990 a general reestimation of reserves was performed approved by Minutes No. 63 of the State Reserves Committee of the Russian Ministry of Ecology dated June 26, 1992 resulting in a 1.8 times increase of total reserves. Nickel, copper, cobalt, sulfur, platinum, palladium, rhodium, gold, silver, selenium and tellurium reserves were approved.*

Ore output *depends on the level of demand and designed capacity of the mines. 2005 output: sulfide copper-nickel ore — 4,774 thousand t.*

The Issuer's commitments: *To apply state-of-the art technology, comply with applicable environmental standards and regulations, safety standards and regulations; to protect tailing dumps, spoil banks, substandard ore storage and record basic useful components contained therein; to provide for disturbed land rehabilitation.*

Licensed operations: *Sulfide copper-nickel ore mining at the Kaula, Kotselvaara-Kammikivi, Semiletka deposits to extract nickel, copper, cobalt, sulfur, gold, silver, platinumoids.*

Grounds for issue: *Resolution No.78/90-p of 24.12.1998 passed by Murmansk Area Administration and the Committee for Natural Resources of the Murmansk Region (on the renewal of licenses)*

Deposit area description: *The Kaula, Kotselvaara-Kammikivi, Semiletka deposits are situated in the Pechenga District of the Murmansk Region near the township of Nickel forming a single ore field. All deposits are developed through underground mining by "Kaula-Kotselvaara" mine, open pit deposits has long been depleted. Mining operations were started: at Kaula in 1945, at Kotselvaara-Kammikivi in 1951, at Semiletka in 1966. The reserves of the Semiletka and Kotselvaara-Kammikivi deposits were approved in 1966.*

Ore output *depends on the level of demand and designed capacity of the mines. 2005 output: sulfide copper-nickel ore — 726.1 thousand t.*

The Issuer's commitments: *Produce sulfide copper-nickel ores in accordance with the following basic conditions: develop the ore deposit according to the approved plan agreed with the State Environmental Expertise Committee and the State Expertise for Industrial Safety with annual mine capacity of 600 thousand tons of ore, prepare and approve the plan of liquidation (conservation) of the mining enterprise in the prescribed manner not later than 6 months prior to expected term of completing development of the ore deposit; carry out an advance geological survey of the natural resources; comply with applicable environmental standards and regulations, safety standards and regulations; protect tailing dumps, spoil banks, substandard ore storage and record basic useful components contained therein; provide for disturbed land rehabilitation; take measures prescribed by law and applicable regulatory documents in the field of industrial safety and labor protection, in the field of environmental and resources protection as well as for participating in socio-economic development of the Pechenega area and the Murmansk Region.*

Grounds for issue: *Resolution No.78/90-p of 24.12.1998 passed by Murmansk Area Administration and the Committee for Natural Resources of the Murmansk Region (on the renewal of licenses)*

Deposit area description: *The deposit is situated in close vicinity to the town of Zapolyarny in underlaying phyllites of the Zhdanovskoye deposit sheet. Discovered in 1966. Reserves were twice approved by the USSR State Reserves Committee — in 1974 and 1982. Developed since 1975 through underground mining by the "Severnny" mine. The copper-nickel deposits of Zhdanovskoye, Zapolyarnoye, Tundrovoye, Bystrinskoye, Verkhnee and Sputnik are a part of the East ore knot of the Pechenga ore field and have a common underground mining mode (to the level of minus 920 m) within a common mine take including also open-cut mines of the Zhdanovskoye deposit. The last update of the deposit opening and mining project was approved on December 6, 2001.*

Ore output *depends on the level of demand and designed capacity of the mines. 2005 output: sulfide copper-nickel ore — 675.5 thousand t.*

The Issuer's commitments: *to apply state-of-the art technology, comply with applicable environmental standards and regulations, safety standards and regulations; to protect tailing dumps, spoil banks, substandard ore storage and record basic useful components contained therein; to provide for disturbed land rehabilitation.*

Licensed operations: *Additional geological survey and chromite ore mining at the Sopcheozerskoye ore deposit.*

Grounds for issue: *Resolution No. 146-r/45 of December 9/20, 2000 on conversion of License No. MUR 00383 TE of the Murmansk Region Administration and the Committee for Natural Resources of the Murmansk Region.*

Deposit area description: *The Sopcheozerskoye ore deposit is situated 9 km to the south-west of the town of Monchegorsk, its total area being 5 sq km and depth limitation minus 500 m from the surface. The site should be considered excluding the Sopchyavr lakescape and the water protection area around the lake and along inflowing streams. The deposit was investigated in 1995-1996 at the explorations stage by magnetic and gravimetric prospecting, drilling of holes 70 to 490 m deep and laboratory testing of processing properties. During the period of 1997 to 2000 the deposit was subject to prospect evaluation survey which showed that the blanket ore body extended under morainic deposits 20 to 40 m thick. The deposit's total reserves and grades $C_1 + C_2 + P_1$ undiscovered potential resources were approved by the Regional Reserves Committee of the Committee for Natural Resources of the Murmansk Region (Minutes No. 42-2000 dated August 17, 2000). The deposit's reserves and resources may increase along the boundaries.*

The Issuer's commitments:

1. Additional geological survey (evaluation and prospecting) shall be completed and obtained data shall be submitted for state appraisal by Quarter IV 2000. The survey has been completed. The deposit's total reserves and grades $C_1 + C_2 + P_1$ undiscovered potential resources were approved by the Regional Reserves Committee of the Committee for Natural Resources of the Murmansk Region (Minutes No. 42-2000 dated August 17, 2000).

2. The report on calculated reserves shall be presented by Quarter IV 2002. Since the idea of the deposit's geological structure and area changed, the scope of exploration work and timing of work performance were increased.

3. The starting date of commercial development and the period of reaching design capacity shall be specified in a supplementary license agreement subject to the results of state appraisal.

4. Pilot mining of up to 50 thousand t. The Department of Natural Resources of the Murmansk Region approved amendment of the license agreement as regards pilot mining of 150 thou t for the purpose of continued improvement of the opening scheme and performance of an additional technological study.

Other responsibilities of the Issuer: *To perform mining operations in accordance with applicable environmental standards; to apply technology preventing pollution of the lake of Sopchyavr and the creek of Petlanditovy, to arrange the monitoring of adverse effects of geological survey and mining operations on environment; to provide for land rehabilitation upon mining completion.*

Ore output. *According to the bidding terms the Issuer shall annually increase the output of chromite ore by at least 200 thousand t according to the duly approved mining project. The output and the period of reaching design capacity shall be specified in a supplementary license agreement. The supplementary license agreement established commencement of commercial deposit development not later than Quarter I 2005. The period of reaching design capacity of the mining company is Quarter I 2007. No ore is presently mined.*

Recurring payments: *Regular payments for the use of underground natural resources and mining tax as provided for by the legislation in force.*

Licensed operations: *Titan-magnetite – ilmenite ore exploration and mining in the south-east part of the Gremyakha-Vyrmes Massif.*

Grounds for issue: *Joint Resolution of the Russian Ministry of Natural Resources (No. 17 of May 3, 2001) and the Murmansk Region Administration (No. 186 PP of May 25, 2001) "On Results of Bidding for Exploration and Development of titano-magnetite – ilmenite ore deposit at the South-East Part of the Gremyakha-Vyrmes Massif".*

Deposit area description. *The site is located in the Kolski District of the Murmansk Region, 30 km to the south-west of the township of Murmashi. Explored in 1994-1995 at the stage of exploration and evaluation by magnetic prospecting, drilling of holes 120 to 360 m deep and laboratory testing of the ore processing properties (11 small samples and 1 laboratory technological sample). The deposit consists of 6 steep ore bodies. Since August 2000 the site was explored under License No. MUR 00483 issued to OJSC "Kola Mining and Metallurgical Company" and valid to March 31, 2003 which was cancelled on the date of issue of the license under review. The site has a mine take status, its area being 3 sq km and provisional depth limitation minus 500 m from the surface.*

The Issuer's commitments:

1. Geological exploration shall be completed by September 30, 2002, its results used to prepare a feasibility study and "provisional" conditions. If found feasible the project of geological exploration shall be developed by December 31, 2002. Executed.

2. Geological exploration shall include two stages. Stage 1 — exploratory drilling for future mining to the depth of 200 m, approval of C₁ (possibly B) grade reserves, preparation of the mine technical project, presentation of the report on reserve calculations by December 31, 2003. Stage 2 — additional exploration of the deposit area – 2004-2006; the scope of mining and drilling operations to be determined by a supplementary project. Since the idea of the deposit's geological structure and area changed, the scope of exploration work and timing of work performance were increased. The feasibility study of exploration conditions has been approved.

Ore output. *The output and the period of reaching design capacity shall be specified in a supplementary license agreement. No ore mining is presently performed.*

Other responsibilities of the Issuer: *To perform mining operations in accordance with applicable environmental standards; to apply technology preventing pollution of surface and subsurface water; to arrange the monitoring of adverse effects of geological survey and mining operations on environment; to provide for land rehabilitation upon mining completion.*

Recurring payments: *Regular payments for the use of underground natural resources and mining tax as provided for by the legislation in force.*

Licences operations: *Geological study of Cu-Ni and PGM-bearing ores in the Tunguska zone using the methods of pit sampling, trenching and core hole drilling.*

Grounds for license issue: *Resolution of the Tender Commission that reviews applications filed by entities willing to obtain the right to use underground natural resource in the Krasnoyarsk Territory, dated 22.06.2006.*

Site description: *The license site is situated near Bor settlement, in the estuary zone of Podkamennaya Tunguska river (Turukhansky district of the Krasnoyarsk territory and Evenkiysky municipal region of the Evenkiysky Autonomous District). The site status is that of geological concession with total area of 4,800 sq.km, without any limitations as for the depth of exploration.*

The Issuer's commitments:

1. *Develop and agree project documentation for the exploration of Tunguska zone – before 30.12.2006.*
2. *Ensure the implementation of approved exploration program (study of Cu-Ni ores and associated PGM minerals in the Tunguska zone) – 2006 – 2011.*

Geological exploration. *Development of project documentation and cost estimates.*

Mandatory payments: *Regular payments for the use of underground natural resources at the rate of RUB 85/sq.km.*

OJSC "Taimyrgas"

Number: DUD 00093 NE

Date of issue: December 29, 1998

Valid to: January 1, 2020

Licensed operations: Gas and gas condensate recovery from Lower Cretaceous deposits (Sukhodudinskaya suite) and geological exploration for the purpose of new resources development in Cretaceous and Jurassic deposits at the Pelyatkinskoye gas-condensate field.

Grounds for issue: Resolution of the Administration of the Taimyr (Dolgano-Nenets) Autonomous District and the Committee for Natural Resources of the Taimyr Autonomous District on the conversion of License No. DUD 00040 NE "Gas and condensate recovery and additional prospecting at the Pelyatkinskoye gas-condensate field" based on paragraph 4, Article 10-1 and paragraph 3, Article 17-1 of Law of the Russian Federation No. 27-Φ3 "On Mineral Resources" of March 3, 1995.

Deposit site description: The licensed site is situated in the Ust-Yeniseiski District of the Taimyr (Dolgano-Nenets) Autonomous District 210 km to the west of Dudinka and has a mine claim status restricted by the bottom of Jurassic deposits. The site area is 28,875.56 ha.

Responsibilities: Pursuant to the license agreement the license holder shall construct the Pelyatkinskoye field – Severo-Soleninskoye field gas pipeline, the field exploitation rate being specified by the pilot development project subject to the demand of consumers within the Taimyr Autonomous District consumers and the areas under supervision of the Norilsk City Administration.

Recurring payments: Statutory payments: gas — 147 Rubles per 1,000 cu m, condensate — 17.5%.

Messoyakhsky subsoil plot

Number: DUD 13583 NE

Date of issue: April 25, 2006

Valid to: June 2018

Licensed operations: Hydrocarbon gas production from Dolgan deposits, geological exploration of Lower Cretaceous and Jurassic deposits at the Messoyakhskoye gas field followed by development of new deposits.

Grounds for issue: The Order by the Federal Agency of Subsurface Use under Article 17-1 of the Russian Law *On Mineral Resources* in view of the change in the name of the legal person authorized for subsurface use.

Deposit site description: The site is situated at the township of Tukhard, Ust-Yeniseiski District of the Taimyr Autonomous District, Tazovski District of the Yamalo-Nenets Autonomous District.

The site with a mine claim status has an area of 23,982.3 ha.

Responsibilities: Compliance with applicable standards (GOSTs, regulations and rules) for operating safety, field development control and protection of subsoil; utilization of mineral resources solely for approved purposes; development of the field in accordance with the approved project and technical maintenance rules; application of the most efficient recovery methods to produce mineral resources and extract all of their useful components; prevention of above-standard losses of mineral resources, selective reservoir development, operation of nontight wells, gas crossflow between beds and gas escape to the surface; recording of the condition and changes of reserves and losses of mineral resources; development drilling and maintenance of geological, surveying and engineering documentation; prevention of any damage to the developed field and adjacent fields, protection of temporarily preserved mineral resources; providing for operations safety for employees and local population, protection of the field from fire and other hazards deteriorating the quality of mineral resources and the field's commercial value or impeding development thereof; preparation and approval of emergency response plans; prevention of the construction within the mine take of buildings, structures and other facilities without consent of supervisory authorities; providing for conservation and abandonment of the field or a part thereof in case of development suspension or discontinuation upon approval by supervisory authorities; reclamation of the sites disturbed by the development of mineral resources as specified by applicable law; entry into land use agreements with land owners; obtaining licenses for utilization of water resources.

Performance of responsibilities:

Land lease agreements with district administrations were made. The license for utilization of water resources was obtained. The license for a water intake was obtained.

Regular basis payments: gas – 147 Rubles per 1,000 m³, condensate – 17.5%.

North-Soleninsky subsoil plot

Number: DUD 13582 NE

Date of issue: April 25, 2006

Valid to: June 2018

Licensed operations: Production of hydrocarbon gas and condensate, geological survey and consequent development of new deposits in Lower Cretaceous and Jurassic deposits at North-Soleninskoye gas condensate field.

Grounds for issue: The Order by the Federal Agency of Subsurface Use under Article 17-1 of the Russian Law *On Mineral Resources* in view of the change in the name of the legal person authorized for subsurface use.

Subsoil plot description: The subsoil plot is situated near township of Tukhard, Ust-Yenisei Municipality, Taimyr Autonomous District, Tazovsky District of Yamalo-Nenets Autonomous District.

The site with a mine claim status has an area of 12,651.3 ha

Responsibilities: Compliance with applicable standards (GOSTs, regulations and rules) for operating safety, field development control and protection of subsoil; utilization of mineral resources solely for approved purposes; development of the field in accordance with the approved project and technical maintenance rules; application of the most efficient recovery methods to produce mineral resources and extract all of their useful components; prevention of above-standard losses of mineral resources, selective reservoir development, operation of nontight wells, gas crossflow between beds and gas escape to the surface; recording of the condition and changes of reserves and losses of mineral resources; development drilling and maintenance of geological, surveying and engineering documentation; prevention of any damage to the developed field and adjacent fields, protection of temporarily preserved mineral resources; providing for operations safety for employees and local population, protection of the field from fire and other hazards deteriorating the quality of mineral resources and the field's commercial value or impeding development thereof; preparation and approval of emergency response plans; prevention of the construction within the mine take of buildings, structures and other facilities without consent of supervisory authorities; providing for conservation and abandonment of the field or a part thereof in case of development suspension or discontinuation upon approval by supervisory authorities; reclamation of the sites disturbed by the development of mineral resources as specified by applicable law; entry into land use agreements with land owners; obtaining licenses for utilization of water resources; upon completion of exploration follow the standard procedure to provide the results of calculating hydrocarbon reserves in Low Heta and Jurassic deposits for expert evaluation.

Performance of responsibilities:

Land lease agreements were made with district administrations. The license for utilization of water resources was obtained. The license for a water intake was obtained.

Regular basis payments: gas – 147 Rubles per 1,000 m³, condensate – 17.5%.

b) Mineral processing

Polar Branch

The ore from the Polar Branch's mines is concentrated by Talnakh and Norilsk Concentrating Mills. Talnakh Mill processes high-grade ores of the Talnakhskoye and Oktyabrskoye deposits producing nickel, copper and pyrrhotite concentrate. Norilsk Mill processes the total output of disseminated ore, cupreous ore of the Talnakhskoye and Oktyabrskoye deposits and stored pyrrhotite concentrate into nickel and copper concentrates.

The Polar Branch operates three metallurgical plants: Nadezhda, Nickel Plant and Copper Plant.

Nadezhda Metallurgical Plant processes all nickel and pyrrhotite concentrate produced by Talnakhskaya Concentrating Mill, about 15% of nickel concentrate produced by Norilsk Concentrating Mill, and all copper concentrate produced by the Converter Matte Separation Shop of the Nickel Plant. Final products include converter matte, copper anodes and elementary sulfur.

Nickel Plant processes about 85% of nickel concentrate produced by Norilsk Concentrating Mill, the total output of beneficiated store pyrrhotite concentrate, and a part of converter matte produced by Nadezhdinski Metallurgical Plant. Final products include marketable nickel and cobalt.

Copper Plant processes all copper concentrate from Norilsk and Talnakhskaya Concentrating Mills and copper anodes of Nadezhdinski Metallurgical Plant into marketable copper, elementary sulfur and sulfuric acid. The Metallurgical Shop of the Copper Plant produces concentrates of precious metals, metallic silver, selenium and tellurium from electrolysis sludges generated at the Nickel Plant, Copper Plant and Kola MMC's copper production.

The Polar Branch's precious metals are refined at the Krasnoyarsk non-ferrous plant under tolling contracts.

The Company outsources a subcontractor for partial processing of mineral products (separation of gravity concentrate during ore concentration).

The cost of mineral processing by subcontractors over the reporting period amounted to USD 640.3 thousand excluding VAT.

Kola MMC

The ore from Pechenganickel Combine's mines is processed at the concentrator into collective copper-nickel concentrate. The calcination shop became a division of the concentrating mill in 2004. Pellets and briquettes which are the final products of the concentrator, are processed in the smelting shop into converter matte. This matte is then transported to Severonickel Combine for further treatment. Severonickel Combine processes converter matte received from the Polar Branch of MMC Norilsk Nickel and Pechenganickel Combine

producing electrolytic nickel and copper, carbonyl nickel, precious metal concentrates, cobalt concentrate and sulfuric acid.

Precious metals produced by Kola MMC are refined by Krasnoyarsk non-ferrous plant under tolling contracts.

OJSC "Norilskgasprom"

The processing of gas condensate was not carried out in the third quarter of 2006.

OJSC "Taimyrgas"

The processing of gas condensate was not carried out in the third quarter of 2006.

c) Product marketing

OJSC MMC Norilsk Nickel holds licenses required for export of precious metals and individual types of carbonyl nickel powder. PGM sales are governed by the Russian Government's Decree No. 51-4 dated January 24, 2002.

License No. 4000717 issued by the Russian Ministry of Energy on November 29, 2002 authorizes OJSC "Taimyrgas" to sell oil, gas and processing products under Resolution No. 425 of the Russian Ministry of Energy dated November 29, 2002. The license is valid to November 28, 2007.

3.2.10. Additional requirements to issuers whose core activities include communication services

To be left blank.

3.3 The Issuer's plans for the future

The business priorities of MMC Norilsk Nickel for 2006 and following years include: construction and commissioning of mining facilities to ensure timely replacement of retired capacities and maintain the existing ore grade levels; modernization and retrofitting of concentration and metallurgical facilities; implementation of automated systems to control production processes; implementation of nature protection measures to reduce pollution and improve environmental conditions.

The adjusted development strategy of OJSC MMC Norilsk Nickel is aimed at optimization of the Company structure and modernization of production facilities. Plans for 2006 and subsequent years include:

- Continue the development of the Polar Branch's Skalisty mine, to get ready for the development of deep deposits;
- Improve capacity utilization at Taimyrsky and Komsomolsky mines after the reconstruction of hoisting machinery;
- Launch the modernization of Talnakh Concentrator to improve ore dressing results;
- Expansion of Nadezhda Metallurgical Plant smelting facilities, which will allow to shut down initial-stage facilities of the Nickel Plant;
- Development of Severny-Gluboky mine and retrofitting of Kola smelters.

In 2006 the Company focuses on maintaining the ore output, upgrading and reconstruction of production facilities and further reduction of unit costs.

At the Oktyabrsky mine works are under way related to the reconstruction of existing facilities at – 650 m level, which will allow mining of solid sulfide ores at the western wing of the X-1(0) ore body (completion of the project – 2014). For 2006 it is planned to commission the 1st startup complex with a capacity of 1,100 thousand tons per year of high-grade ore, and to reconstruct the facilities necessary for stripping and mining of cupreous ores (completion of the project – 2007).

At the Taimyrsky mine there are works under way related to the reconstruction of existing capacities and the stripping of new levels: – 1,100 m and -1,300 m (C-2 ore body), -1,400 m (X-1(0) ore body), which will allow compensating the output from the facilities under de-commissioning. The 2006 target task is to commission the

second phase of the 1st startup complex with a capacity of 500 000 t/year, to mine the reserves of C-2 ore body at – 1,300 m level.

By 2009 it is planned to complete the upgrading of the Komsomolsky mine's skip winding equipment.

The basic activities scheduled for 2006 include further increase of ore output at the Severny-Gluboky mine (Kola Peninsula) with a view to ensuring the commissioning of the 2nd startup complex facilities by 2007 and increase in ore production capacity up to 6.0 mln tons per year. There are works under way at the Severny mine (Kola Peninsula) related to stripping and mining of the remaining ore at the Zapolyarnoye deposit, thus providing efficient feed supply for the Pechenganickel concentrating and smelting shops by 2013.

In 2006 the Polar Branch of the Company continues reconstructing the Lebyazhye tailing pit, which will allow to provide the concentrating mills of the Polar Branch with sufficient capacity for rock tails disposal, taking into account future increases in ore output and processing. Completion of the project – 2007.

In 2006 the Kola MMC (Kola Peninsula) finishes the reconstructing of the Concentrator-1's pump station, which will improve the process flow sheet reliability and environment protection against pollution with the tailings of ore processing.

In 2006 the Polar Branch will provide finances for purchasing process equipment required for the renewal of automation and energy supply systems of the Vanukov Furnace No.3 at the Copper Plant, which will allow to make the process more stable, improve smelting results and reduce air pollution with nonorganic particles. Construction will begin in 2007. By 2007 new air separation units will be commissioned at the Copper Plant, which is necessary to offset the de-commissioning of out-of-date facilities of two existing Oxygen Plants.

As for energy complex development in the Norilsk Industrial Region (NIR), a primary goal for 2007-2008 (under the approved Energy Development Strategy) is to increase the capacity of the power line between Ust-Khantaiskaya HPS and Norilsk from 600 MW to 700 MW.

In 2006 the construction of facilities at the Pelyatkinsky gas condensate field (Taimyr Peninsula) was continued. Pilot operations were started in 2003 and they will continue until 2008, when full-scale operation will begin. This reserves of this gas field are sufficient for meeting NIR's requirements in the long run. 2006-2007 targets include design and exploration necessary for the laying of gas condensate pipelines from Pelyatkinskoye field to Dudinka and construction of a processing plant for gas condensate and natural gas liquids.

Within the frameworks of the Transport System Optimization Concept, the Company continues its activities (started in 2004) aimed at ensuring transportation reliability, with regards to corporate goods shipments by the Northern Sea Route. In April of 2006 the first ice-breaker vessel *Norilsk Nickel*, delivered by Aker Finnyards shipbuilding company, set off from Murmansk under the Russian state flag. Besides, MMC Norilsk Nickel entered into a shipbuilding agreement with Aker MTW Werft GmbH (Germany) for the construction of four ice-breaker container vessels. Under this agreement, the new arctic vessels are to be delivered to MMC Norilsk Nickel between Q3 2008 and Q1 2009. The agreement envisages a Client's option for the construction of the fifth Arctic-class container vessel.

One of the most important objectives pursued by the Company is to reduce hazardous emissions and improve the ecological situation in the Taimyr and Kola peninsulas. In particular, the *Production Development Strategy* approved by the Board of Directors provides a set of measures for solving environmental problems.

3.4. The Issuer's membership in industrial, banking and financial groups, holdings, associations

International Platinum Association e.V.

The International Platinum Association e.V. (hereinafter referred to as the International Platinum Association or the Association) was registered in 1988 in Frankfurt am Main (FRG) as a non-profit non-governmental organization. The Association unites major players of the world market of platinum metals and relating products.

Before 1999 Russia was represented in the International Platinum Association only by GUPVO "Almazyuvelirexport". In 1998 the session of the International Platinum Association was first held in St. Petersburg, Russia. The Association's management offered that OJSC "RAO "Norilsk Nickel" join the

Association. The offer was accepted and OJSC "RAO "Norilsk Nickel" became a member of the Association in 1999.

In the course of restructuring of OJSC "RAO "Norilsk Nickel" as capitalization centre was replaced by OJSC MMC Norilsk Nickel which became a member of the Association instead of OJSC "RAO "Norilsk Nickel".

A major objective of the International Platinum Association is to form a forum of the leading world producers and processors of platinum metals to expand utilization thereof.

To this end the International Platinum Association implements programs of platinum metals promotion on global market and coordinates activities of a number of organizations for the benefit of its members. For instance, the International Platinum Association collaborates with the International Platinum Guild, a non-profit organization promoting platinum jewelry.

Of special interest is the experience gained by the members of the International Platinum Association in prevention of crime in this sphere, analysis of the effect of platinum metals and compounds on production personnel's health.

The membership in the International Platinum Association is also expected to be used for the promotion of platinum metals including palladium and offering new solutions for this metal utilization.

The Issuer's membership in the International Platinum Association is perpetual.

Euro-Asian Transport Union

The Euro-Asian Transport Union (hereinafter referred to as the Transport Union or the EATU) was registered in 2001 in Moscow as a non-profit organization. The Transport Union comprises major carriers.

According to the concept of development of international transportation corridors the Russian Ministry of Transport pursues a policy of cooperation with all market players. Participants of the International Euro-Asian Conferences on Transport conducted in St. Petersburg in 1998 and 2000 held a lively discussion of different aspects of cooperation and motivation of private investor involvement in the implementation of the government's transit policy.

As the realization of transit potential is a long-term priority of the government, an element of the economic program and geopolitical doctrine of the Russian Federation to implement the Declarations adopted by the above Conferences a number of Russian companies resolved to combine their efforts within the framework of a non-profit organization — the Euro-Asian Transport Union.

The EATU's major objective is to coordinate cooperation of Russian and foreign business with government authorities and international organizations, to create a common space of interaction among carriers, insurers, freight owners and financial institutions in logistics and investment operations. The EATU was formed to:

- coordinate national and international activities of government authorities and private carriers for the implementation of decisions and recommendations of the International Euro-Asian Conferences on Transport;
- assist the Ministry of Transport of the Russian Federation and the Ministry of Railways of the Russian Federation in the development of transport infrastructure and laying out international transportation corridors within the Russian Federation;
- involve international and national organizations in the implementation of investment projects presented to the Conferences, adapt the projects to investor requirements, render advise in project financing;
- arrange conferences and symposia in Russian regions involved in the Euro-Asian transportation;
- hold training seminars and refresher courses for transport personnel.

The Ministry of Transport of the Russian Federation welcomes private initiatives in the transport sector and strongly supports the resolution to form the Euro-Asian Transport Union.

The Issuer's membership in the Euro-Asian Transport Union is perpetual.

Nickel Institute

The Nickel Institute was incorporated on March 1, 2004 through amalgamation of two entities — the Nickel Development Institute (NIDI) and the Nickel Producers Environmental Research Association (NiPERA).

The Nickel Institute may be joined by any nickel producer.

At present its full-fledged members are all leading nickel producers such as BHP Billiton, Codemin/Anglo Base Metals, Empress Nickel, Eramet, Falconbridge, Inco Limited, Inco TNC, Nippon Yakin Kogyo, OM Group, P.T. International Nickel, Sherritt International, Sumitomo Metal Mining, Umicore, WMC Resources accounting for 70% of the world nickel output.

The Institute provides its members with results of the latest research and lends them scientific and technical support. The NiPERA remains an independent unit within the Institute furnishing expert opinion on environmental matters and the effect of nickel on human health. The NiPERA continuously promotes nickel and assumes social responsibility for safe utilization of nickel and nickel-containing materials. The Nickel Institute stands an important and established forum for the promotion of Russian nickel on international market.

The Nickel Institute focuses its attention on rapidly developing consumers of stainless steel (transport, power engineering, telecommunications, etc.) for the purpose of maintaining steady production and consumption of primary and secondary metal.

The Issuer's membership in the Nickel Institute is perpetual.

Cobalt Development Institute

The London-based Cobalt Development Institute (CDI) was established in 1957 as a non-profit non-governmental organization and has been operating in its present form since 1982. Currently the CDI has 60 members from 18 countries including all leading cobalt producers and a number of major consumers.

The Institute's principal objective is to develop a package of measures aimed at the improvement of market performance and promotion of cobalt utilization. The Institute monitors research and development of new cobalt production processes and/or new applications. The Company may greatly benefit from the cobalt safety research performed by the Institute given law tightening in industrially advanced economies consuming cobalt (in the first place the EC).

The Issuer's membership in the Institute is perpetual.

Information on the methods of depreciation calculation by groups of fixed assets is given in the chapter "Depreciation of fixed assets" of the Issuers' Accounting Policy.

No revaluation of fixed assets of OJSC MMC Norilsk Nickel has been performed.

Encumbrance of fixed assets:

209 lease agreements were executed for movable and immovable property. Total rent under the agreements amounts to RUB 97,554,900.

During the reported period no fixed assets accounting for 10 or more per cent of fixed assets value have been acquired, replaced or decommissioned.

IV. Financial and Business Operations of the Issuer

4.1. Financial and Business Results of the Issuer

4.1.1 Profit and loss

Indicators showing the Issuer's profits and losses:

Item	2001	2002	2003	2004	2005	1 Quarter 2006	2 Quarter 2006	3 Quarter 2006

Turnover of capital, %	62.48	49.68	67.27	68.86	69.75	22.37	24.99	28.67

Item	31.12.2001	31.12.2002	31.12.2003	31.12.2004	31.12.2005	31.03.2006	30.06.2006	30.09.2006
Uncovered loss at the reporting date, RUB 000'	-	-	-	-	-	-	-	-
Ratio of uncovered loss at the reporting date to balance-sheet currency, %	-	-	-	-	-	-	-	-

The Company's net profit for the first nine months of 2006 is RUB 40.7 billion. Profits of the second and third quarters offset 1Q's losses connected with recognition of expenses in the redemption of the company's own shares as operating expenses.

Production of key products at OJSC MMC Norilsk Nickel's operations is profitable. Cost to revenue rate has been growing for the last five years and in the third quarter of 2006 it reached a peak value at 74.86%. This growth reflects first of all an increase in sale profits: as compared with 2Q profit, in the third quarter their amount rose by RUB 17 bln (+44%), mainly due to higher sale revenues.

The net profit ratio also reached its 5 years' maximum of 53.5% in the third quarter of 2006.

Profitability ratios for the Company's assets and equity also show positive dynamics throughout 2006 due to quarter-on-quarter growth of the Company's net profit.

Under the Company's Charter and other internal document, the Issuer's Quarterly Report doesn't require an approval of the Board of Directors or Management Board.

4.1.2. Factors affecting the Issuer's sales revenue and operating profit

The basic factors affecting the amount of revenues in the sales of products (works, services) by OJSC MMC Norilsk Nickel are selling prices, sales volumes, and fluctuations of RUB/USD exchange rate.

The extent to which the above mentioned factors influence the amount of revenues in 3Q 2006 as compared to 2Q is shown in the table below:

Item	% to previous period
Selling prices	+88.6
Sales volumes	+15.9
Ruble to US dollar exchange rate	-4.5

Neither the Charter nor any internal documents of OJSC MMC Norilsk Nickel require that the Issuer's Quarterly Report should be approved by the Board of Directors or the Management Board of the Company.

4.2. Liquidity

Indicators characterizing the Issuer's liquidity:

Indicator	As of 01.01.2006	As of 31.03.2006	As of 30.06.2006	As of 30.09.2006
Working capital, RUB 000'	-10,577,977	-2,516,922	9,541,727	43,054,484
Working capital ratio	0.67	0.64	0.67	0.74
Permanent asset index	1.05	1.01	0.95	0.81
Current liquidity ratio	1.09	1.19	1.37	2.00
Quick liquidity ratio	0.59	0.64	0.74	1.23

The table suggests that all liquidity indicators demonstrate positive progress and describe the high liquidity level of the Company.

The Company's working capital by the end of the third quarter amounts to RUB 43 bln. The following factors have backed this positive trend in the first nine months of 2006: reduction of long-term financial investments (-37%) with increase in the Company's capital by 1%.

Permanent asset index shows the share of non-current assets and long-term debt in the Company's own capital. Overall decrease of this ratio by 23% in 2006, including 15% in the reporting period, is the result of non-current assets reduction and increase in the Company's capital.

Growth of liquidity ratios over the nine months of 2006 is caused by a substantial reduction of short-term liabilities, mainly credit and loan balances: 8% in the third quarter and 44% since the beginning of 2006.

Neither the Charter nor any internal documents of OJSC MMC Norilsk Nickel require that the Issuer's Quarterly Report should be approved by the Board of Directors or the Management Board of the Company.

4.3. Amount and structure of the Issuer's Capital and Current Assets

4.3.1. Amount and structure of the Issuer's capital and current assets

Amount and structure of the Issuer's capital

9	Total capital value, RUB 000'	186,916,568	100.0	225,103,565	100.0

The amount of the authorized capital given in this section is consistent with the constituent documents of OJSC MMC Norilsk Nickel.

The total value of the Company's capital as of September 30, 2006 amounts to RUB 225.1 bln; the 3Q 2006 growth is RUB 38 bln (20%). The main factor underlying this growth is the increase in net profits over the reporting period

Amount and structure of current assets:

No.	Items	As of 01.01.2006		As of 30.09.2006	
		Amount RUB 000'	Structure, %	Amount RUB 000'	Structure, %
1	Stocks	39,739.8	39.9	42,192.5	34.3

6	Other current assets	224.2	0.2	191.3	0.2
7	Total	99,724.9	100.0	123,154.2	100.0

As of January 1, 2006, the share of high-liquidity current assets (Nos. 4-5) was 17.6%, and by September 30, 2006 it grew to 35%, mainly due to the increase in short-term investments.

The Company policy with regards to current asset financing consists in the following:

1. *Financing of operating activity using own capitals.*
2. *Use of non-expensive borrowed funds for strategic investments.*

4.4. The Issuer's Policy and Investments in Scientific and Technological Development, Licenses, Patents, New Research and Developments

The Company management (Protocol of the Management Board No. ГМК/24-нп-н of May 16, 2006 and Protocol of the Board of Directors No. ГМК/14-нп-сд of June 30, 2006) approved «The Summary of MMC Norilsk Nickel's Strategic Development in the Period to 2020»

The Issuer's research and development activity is intended to support the Strategic Guidelines implementation by the results of research and development, feasibility studies, design and exploration.

With a view to improve cost-efficiency in applying the results of research and development, and to create a background for transition to a new qualitative level of technological development management, activities have been continued related to the implementation of a new reporting system, which will be based on certificates of comprehensive assessment of the results of research and development. Also under development are "The Corporate Standard of OJSC MMC Norilsk Nickel for professional competence of employees involved in implementing innovative projects" and a set of training and methodical materials on the subject "Principles of innovative technological activity".

The Company's Head Office has finished developing and implementing the Integrated Quality Management and Environmental Control System in accordance with the requirements of international standards ISO 9001:2000 and 14001:2004. Based on the results of certification audit conducted by one of the leading international certification authorities, BVQI, in December a certificate of conformance was issued to OJSC MMC Norilsk Nickel in the field of "Management of production and projects, sales and deliveries of products (nickel, copper, cobalt, precious metals, sulphur, selenium, tellurium)". In 2005 the quality management system in accordance with the requirements of ISO 9001:2000 in the certification domain "Production of nickel, copper and cobalt" was also implemented and successfully certified in the Company's Polar Division.

In cooperation with executive authorities and the Metallurgy Committee of the Chamber of Commerce and Industry of Russia, the Company participated in the development of a technical supervision and regulation system for the Russian mining industry. The Company performs a review of the Company's technical standards and their harmonization with requirements of the Federal Law "On Technical Regulation". Within a working group the Company's specialists take part in development of the special technical regulation: "On safety of processes of extraction, concentration and processing of mineral resources" and the general technical regulation: "On environmental safety".

Twelve patent applications for inventions are currently under consideration in the Federal Institute of Industrial Property. Four of these applications were approved and Russian patents will be granted.

At the time of this report preparation no information was available as for the invention implementation results. Their economic effects will be determined upon the completion of all calculations.

Total R&D expenses of the Issuer in the third quarter of 2006 amounted to RUB 7.5 mln Rub

No risks related to possible expiration of trademark licenses were identified.

4.5 Analysis of Development Trends Existing in the Industry where the Issuer operates

The world's market prices for non-ferrous and precious metals represent the main factor, which is able to change considerably the Company's performance results.

Metal prices generally depend on the following:

- *economic and political situation in the world and in some of its parts;*
- *global and regional metal supply and demand, and demand forecasts;*
- *stock accumulation or sale by central banks and other major stockholders;*
- *application of new technology;*
- *adoption of new regulative documents and legal acts; measures undertaken by Russian and foreign governments for market regulation including the introduction of export quotas;*
- *currency exchange rates;*
- *inflation and interest rates.*

All of the above may affect the Company's operations, sales, profits, assets, liquidity and capital reserves.

To protect the Issuer from potential damaging influence of these factors, the following is being done: analysis of the world's markets and competitors' activities and selection of most interesting markets; search and acquisition of new operations and cost-efficient mineral deposits; expansion of direct sales to metal end-users on the basis of long-term contracts; study of new application areas for the Company's metals; production cost reduction and production of value-added products.

In 2006 world market prices and, accordingly, actual sales prices for all major metals are way above their historical levels.

Overall performance of OJSC MMC Norilsk Nickel is in line with the industry's development trends.

Major competitors of OJSC MMC Norilsk Nickel are:

On the nickel market — INCO (Canada), Falconbridge (Canada), Jinchuan (China);

On the copper market — Codelco (Chile), Phelps Dodge (USA), BHP Billiton (Australia), Urals Mining and Metallurgical Company (Russia);

On the PGM market — Anglo Platinum (South Africa), Impala (South Africa), Lonmin (South Africa).

Factors that support the competitiveness of the Company products:

In logistics:

- *availability of own raw materials with high contents of basic elements;*
- *availability of cheap power sources.*

In production:

- *application of highly efficient production processes;*
- *operation of state-of-the-art equipment;*
- *affiliated specialized research institute;*
- *high-skilled personnel.*

In marketing:

Instruction of the Central Bank of Russia No. 1441-U of June 10, 2003;

Resolution of the State Customs Committee of the Russian Federation "On Export Duty Rates" No. 865 of August 6, 2003.

8.8. Tax Assessment of the Issuer's Regular Securities Issue Proceeds

Tax on regular securities issue proceeds is assessed as specified by applicable tax regulations of the Russian Federation (Tax Code of the Russian Federation, Chapter 23 "Personal Income Tax" and Chapter 25 "Corporation Income Tax").

1. Tax on securities transactions

1.1. Tax on personal income from transactions in the Issuer's securities

The procedure of tax assessment of personal income from securities transactions is specified in Chapter 23 of Russian Tax Code (Chapters 214-1, 220, 224).

Income (loss) from securities transactions shall be determined for all transactions in securities of a particular class executed during the tax period under review less losses.

Income (loss) from securities transactions shall be determined as the difference between total proceeds from securities sale and documented cost of securities acquisition, sale and holding actually incurred by taxpayers or material deductions intended to reduce proceeds of securities transactions.

If the taxpayer cannot produce a documentary evidence of its expenses it may take the advantage of material deduction as provided for the Tax Code of the Russian Federation.

The taxpayer shall be entitled to material deduction of the full amount of proceeds received from transaction in securities held for a period of three or more years; in case the taxpayer held securities for less than 3 years such material deduction shall not exceed 125 thousand Rubles.

The taxpayer may take the advantage of material tax deduction or deduction of documented incurred expenses if the tax is calculated and withheld by the income source (broker, trustee, management company holding in trust the assets constituting a unit investment fund or other party executing transactions for the benefit of the taxpayer under a contract of agency or other similar contract) or upon expiry of the tax period at the time of filing tax return with tax authorities.

If income is paid by several sources material deduction may only be made by one source at the taxpayer's option.

Individuals who are not tax residents of the Russian Federation shall not be entitled to material deductions.

The tax on income of individual tax residents of the Russian Federation shall be assessed at the rate of 13 per cent.

The tax on income of individual tax non-residents of the Russian Federation shall be assessed at the rate of 30 per cent.

The tax base for securities transactions shall be defined as proceeds from securities transactions over the tax period under review.

The tax agent shall assess and pay tax upon expiry of the tax period or at the time of cash disbursement to the taxpayer before expiry of the tax period.

If the assessed tax cannot be withheld from the taxpayer by the income source the tax agent (broker, trustee or other party executing transactions for the benefit of the taxpayer under a contract of agency or other similar contract) shall within one month notify in writing local tax authorities of the impossibility of withholding and the sum due from the taxpayer.

In that case if an individual executed securities transactions unassisted by parties deemed to be tax agents (broker, trustee or other party executing transactions for the benefit of the taxpayer under a contract of agency or other similar contract) such individual shall assess and pay tax and file tax return.

1.2. Tax on legal entities' income from transactions in the Issuer's securities

The procedure of determining the tax base for securities transactions is specified in Chapter 25 of the Russian Tax Code (Article 280, Articles 309, 310, 329). The Tax Code specifies a special accounting procedure of profit and loss relating to securities transactions.

The taxpayer's proceeds from sale or other disposal of securities (including redemption thereof) shall be calculated based on the selling of disposal price and accrued interest income (coupon yield) paid by the purchaser to the taxpayer and accrued interest income (coupon yield) paid by the issuer (promisor) to the

taxpayer. The assessment of tax on the taxpayer's proceeds from securities sale or other disposal shall not include interest income (coupon yield) earlier included in tax assessment.

The cost of securities sale (or other disposal) including units in unit investment funds shall be determined based of the acquisition price (including acquisition costs), cost of sale, any discounts from the estimates unit value, accrued interest income (coupon yield) paid by the taxpayer to the seller of securities. Such costs shall not include interest income (coupon yield) earlier included in tax assessment.

The market price of securities traded on organized securities market shall mean the actual price of securities sale or other disposal if such price falls within the interval between the maximum and minimum prices (price interval) of transactions in such securities recorded by the market maker on securities market on the date of the relevant transaction. If on that date the same securities were traded on securities market by two or more market makers the taxpayer may select the market maker whose price interval shall be used for tax purposes.

If the taxpayer sold securities traded on organized securities market and the transaction price is within the price interval recorded by the market maker such price shall be deemed market price for tax purposes.

If securities traded on organized securities market are sold at a price lower than the recorded minimum price the minimum price of transactions on organized securities market shall be assumed.

Profit (loss) from transactions in securities traded and not traded on organized securities market shall be accounted separately for tax purposes.

Russian business entities and foreign business entities acting through permanent establishments within the Russian Federation shall pay tax at the rate of 24 per cent as provided for by applicable law of the Russian Federation.

Foreign entities not engaged in business in the Russian Federation shall pay tax at the income source; in particular such tax shall be paid on stock sales proceeds by Russian entities holding assets in the Russian Federation more than 50 per cent of which consist of immovable property and other similar proceeds. Proceeds from sale of securities or relating derivatives on foreign stock exchanges shall not be deemed income received from sources within the Russian Federation.

Tax base of foreign entities trading in shares of Russian business entities holding assets in the Russian Federation more than 50 per cent of which consist of immovable property may be reduced by the sum of documented expenses as provided for by applicable law of the Russian Federation. In that case the difference between the foreign entity's sales proceeds and expenses shall be taxed at the rate of 24 per cent.

In other instances tax on such income of foreign business entities shall be assessed at the rate of 20 per cent.

1.3. If international treaties of the Russian Federation containing provisions relating to taxation specify other tax regulations than provided for by applicable Russian law provisions of such international treaties shall apply.

2. Tax on dividends

2.1. Tax on dividends received by individuals

Tax on income received by individuals in the form of dividends on the Company shares is assessed according to Part Two of the Tax Code of the Russian Federation (Chapter 23).

Dividends received by individual tax residents of the Russian Federation shall be taxed at the rate of 9 per cent.

Dividends received by individual tax non-residents of the Russian Federation shall be taxed at the rate of 30 per cent.

Business entities from which the taxpayer receives income (tax agents) shall assess, deduct and pay tax.

If the assessed tax cannot be withheld from the taxpayer the tax agent shall within one month notify in writing local tax authorities of the impossibility of withholding and the sum due from the taxpayer.

Tax agents shall pay assessed and withheld tax by the date of actual money receipt from the bank and the date of income transfer from tax agents' bank accounts to the taxpayer's account or third party bank accounts on the taxpayer's instruction.

Tax agent shall otherwise pay assessed and withheld tax on the day following the date of actual income receipt by the taxpayer.

2.2. Tax on dividends received by legal entities

Tax on income received by legal entities in the form of dividends on the Company shares is assessed according to Part Two of the Tax Code of the Russian Federation (Chapter 25).

Dividends received by legal entity tax residents of the Russian Federation shall be taxed at the rate of 9 per cent.

Dividends received by legal entity tax non-residents of the Russian Federation shall be taxed at the rate of 15 per cent.

The source of income (tax agent) shall deduct and pay tax within 10 days of income payment.

If dividends are paid to a foreign legal entity and/or individual who is no tax resident of the Russian Federation the taxpayer's tax base for each payment of dividends shall be equal to received dividends and subject to taxation.

2.3. Total tax shall be calculated by multiplying the applicable tax rate and the difference between dividends to be distributed among shareholders during the tax period under review reduced by dividends payable by the tax agent to foreign legal entity and individual tax non-residents during the tax period under review and dividends received by the tax agent during the tax period under review and the previous tax period unless such dividends were included in dividend tax assessment.

Tax agents shall assess tax to be withheld from the taxpayer's income based on total tax and the share of each taxpayer in total dividends.

2.4. If international treaties of the Russian Federation containing provisions relating to taxation specify other tax regulations than provided for by applicable Russian law provisions of such international treaties shall apply.
