2.3.3 The issuer's liabilities arising from securities provided to third persons

The total amount of securities provided by the issuer in the total amount of third parties' obligations on which the Company provided securities both in the form of pledge or surety.

Value of securities as at September 30, 2002: RUR 4,990,607,347

of which:

value of pledge (mortgage) as at September 30, 2003: RUR4,167,651,586

value of surety at September 30, 2003: RUR784,646,315

There are no securities provided by the issuer to third parties in the third quarter, included those in the form of pledges or surety, valued at least 5% of the assets over the reporting period.

2.3.4 Other liabilities of the issuer

No other liabilities

2.4 The objectives of securities issues and channeling the proceeds from placement of issued securities

Proceeds from placement of the issuer bonds are planned to be used for financing ongoing operations of the issuer.

2.5 Risks related to purchases of outstanding issued (to be placed) securities

2.5.1 Risks in the telecommunications industry

Recently passed entering into force the Federal Telecommunications Act may be considered as an industrial risk connected to JSC CenterTelecom. Summing up the Act the following should be noted:

First. The government is expected to increase pressure on CenterTelecom toward solving social problems setting priorities in favor of customers.

Second. Pursuant to the new issue of the Act licensing shall be significantly simplified becoming more transparent and open, resulting in lower market entrance barrier for alternative new entrants and consequently, stiffer competition.

Third. Antimonopoly legislation of the pricing policies is a catalyst and facilitates tougher competition in the industry.

Development of telecommunications technology also lowers the market entrance barrier for new players resulting in fierce competition.

It should be noted that CenterTelecom anticipates likely negative consequences of growing competition and undertakes necessary measures to alleviate the consequences. In particular, new services will be promoted more actively. Market driven customer focused business will also help the Company secure substantial competitive advantages.

The following internal and consequently more yielding to control negative influences can be mentioned: sales organization of the Company is not efficient enough, customer care and marketing levels are not sufficient.

Macroeconomic overview of the regions where JSC CenterTelecom does business:

The Central Federal District (CFD) is the focus of the Company's interests and consists of 17 regions accounting for 20% of Russia's population. The share of the CFD in the national GDP (excluding Moscow) is estimated by experts at 12.8% - a fairly significant share as compared to other federal districts of Russia. The Districts is rated fourth in terms of living standards, but only seventh in terms of per capita income. Differences in the regional economic development are evident. The district comprises both well-developed regions like Moscow, Yaroslavl, Belgorod, and less developed regions, like Kostroma, Ivanovo, Orel regions.

The district development follows the basic generic Russian scenario, anticipating moderate economic growth rates.

As compared to 1999, the GDP of the Central Federal District grew 2.5 times, while average wages

and salaries grew by 2.4 times. Industrial output, retail trade volume and housing facilities construction experience modest growth.

Russia's GDP in 2002 reached some RUR10863.4 billion (*Source*: State Committee for Statistics), with experts forecasting GDP of RUR20804.6 billion in 2006. Taking into account inflation rates projected by the Ministry of Economic Development the GDP in dollar terms should be some USD500 billion.

The Russian rouble continues its rally and becomes stronger. By 2001 end Russian rouble valued at 80% of its level in 1995. Compounded appreciation of the Rouble over 2002-2003 will amount to about 18%.

General economic and demographic parameters of the regions of CenterTelecom's business operations. (in 2002 and forecast for 2006)

* Data does not take into account Moscow (*Source*: State Committee for Statistics)

In 2002 the regional gross product of CFD (excluding Moscow) reached RUR1390.4 billion.

In 2006 it is forecast to reach RUR2522.1 billion, growing by 30% (taking into inflation rates forecast by the Ministry of Economic Development).

According to projected by MinED GDP growth rates of 5% on average over the period from 2000 to 2010, the GRP should grow by 70-80% by 2010 (as compared to 1999). In some years the growth rates may be faster reaching 8-10%, resulting in higher GDP by 2010.

Thus, general economic situation in the territory of the CFD is favorable and in keeping with Russian economic growth trends in general.

2.5.2 Sovereign and regional risks.

The Central Federal District (CFD) is a political, administrative, and ecological entity of a paramount importance, featuring numerous industrial production facilities, pipelines for various products, a lot of rivers, forests, peat fields, and fairly high population density, resulting in a possibility of various emergencies.

Depending on specific natural, climatic and environmental conditions and heliophysical factors in each year (or a number of years in a row), some natural (industrial) processes may be more risky, while other may run a lower risk.

Regarding feasibility of taking some precaution preventive measures, dangerous natural processes as sources of emergencies can be predicted only short time before they may really happen.

The most significant damages to the economy of the CFD and heightening social tension can result from flooding and river overflows, forest and peat fires, fires in populated areas and industrial facilities, interruptions and disruptions in functioning of utilities and power supply, road and railroad accidents.

Potential risks and dangers in various constituent entities of the CFD (regions) have distinctive differences.

The issuer's actions in case of unfavorable changes of the situation in the CFD are confidential information.

ASSESSING THE DANGERS CAUSED BY EMERGENCIES

1. Natural disasters and emergencies

1.1. Floods, river overflows

It should be noted that while general features of these emergencies remain stable, there is an evident trend toward larger scale and more serious consequences of them, heavier casualty toll, substantial damage, destruction of industrial and infrastructure facilities.

Due to growing wear of fixed production assets, lack of adequate financing of water managing and hydrotechnic facilities and their timely replacement, the danger of flooding (river overflows) **still remains**.

5 regions may be flooded: Tver, Yaroslavl, Kostroma, Ivanovo, and Moscow (partially).

1.2. Natural fires

Natural fire situation is tense with little changes over years. The following regions face the highest risk of natural fires: Shatura, Orekhov-Zuevo, Klin areas in the Moscow region, Ivanovo, Vladimir, Tver, and Smolensk regions.

1.3. Earthquakes

Earthquakes in the territory of the CFD at the moment are highly unlikely.

1.4. Climatic condition

Deviations of climatic conditions from normal (severe frosts, blizzards, hurricanes, storms, heavy rains, hail) may cause disruptions in the normal life of communities and localities, and functioning of economy.

The most likely dangers are:

- failures of gas-, oil-, heat pipelines and other pipelines;
- failures of power lines, boiler plants, water intake facilities;
- failures of wireline broadcasting network;
- failures of urban telephone networks;
- destructions (damage) of infrastructure facilities;
- breaking of rules for oil and lubricants storage, inflammable and toxic substances;
- explosions of gas distribution grids, high pressure tanks and vessels.

Higher volatility of weather observed over recent years makes it more difficult to reliably forecast natural hydro meteorological phenomena, delaying warnings and to a larger degree limiting possibility of predicting their consequences.

All the regions in the CFD run such risk of emergency:

1.5. Sinkholes development

These processes are widely spread in Moscow, Tula, Kursk, and Voronezh regions.

An increased danger of emergencies caused by higher intensity of sinkhole development processes is inherent to urban areas suffering from man-induced waterlogging.

The risk of sinkhole occurrences in 2003 is fairly high in Moscow. As a rule it is caused by non-compliance with regulations governing construction and operation of underground ducts and pipelines in cities, as well as by non-compliance with safety applied to mining of mineral resources.

1.6. Other dangers (landslides, avalanches, mud avalanches, bank erosion).

These are not dangers in the territory of CDF, with the exception of water reservoir coastal lines in the Yaroslavl region (the town of Rybinsk).

The forecast number of natural disasters in the territory of the CFD in 2003 is 1-3 emergency situations per year.

2. Man-induced emergency situations

2.1. Disruptions of all transportations means

Transportation failures may result in high rate of casualties, land contamination, and huge damages. The CFD features a well-developed transportation network, therefore, Moscow, the Moscow, Ryazan, Voronezh, Belgorod, Tula regions are carrying the highest risk of this type.

No significant decrease of the risk is predicted for 2003.

2.2. Disasters at plants using highly poisonous substances.

Moscow, and the Moscow, Tula, Ryazan regions suffers from this risk. In case of a failure at one of the production sites, a huge area of chemical contamination with significant life losses.

2.3. Radiation and chemical pollutions (contaminations).

Areas subjected to high radiation risks are those where nuclear plants are installed: Moscow, the Kursk, Voronezh, Smolensk, Tver, Kaluga regions.

The general evident trend is toward reduced number of accidents at nuclear plants and improved operation standards.

According to expert estimates the general safety state of nuclear sites and power plants is the same as in 2002.

2.4. Failures (fires) and explosions at pipelines.

In 2003 there is an evident trend toward a lesser number of pipeline accidents, however risks involved in this remain the same as pipelines incur a greater risk of danger.

3. Biological and social emergency situations

3.1. Sanitary and epidemiological situation

There is certain probability of contagious diseases forecast for 2003.

- in spring 2003: flu viruses A and B type in the Moscow, Tver, and Smolensk regions; during winter and demi-season time a surge of diphteritis, meningococcosis is likely, particular in the CFD.

In the territory of the CFD regions there are some areas with high natural concentration of deer fly disease, hemorrhagic fever, tick-borne encephalitis, salmonellosis, with no clear boundaries of the focus in the spread of the disease.

3.2. Plant and sanitary situation

Situation with allergic plants in the territory of the CFD is normal with remaining possibility of a local or limited emergency situation.

4. Regional risks

4.1. Risks related to possible military conflicts, imposition of a state of emergency in the territory of the CFD, where the issuer is registered as a taxpayer or performs core activities are fairly low.

2.5.3 Financial risks

Key terms and conditions of credit agreements concluded by the issuer, interest rates, amount, maturity and repayment conditions, securities and collateral provided for liabilities are generally accepted in the normal practice of loan facilities.

Amendment of interest rates is a financial risk factor. As refinancing rates set by the CB of Russia diminish starting from the beginning of the year, the cost of capital raised by the issuer through bank loans and bond issues also decreases, as the CB refinancing rates are the basis for interest rates charged in the market. The issuer takes measures to amend terms and conditions of the concluded loan agreements towards lower interest rates of the granted loan facilities.

Both local and foreign currency denominated bank loans are granted to the issuer. Therefore the issuer ability to meet its obligations under its foreign currency denominated credit agreements depends on the performance of the exchange rates (RUR/USD and RUR/Euro).

2.5.4 Legal risks

Tax legislation.

1. As of October 12, 2003 an instruction #375-r of July 12, 2003 of the State Customs Committee of the RF came into force regulating VAT exemption of equipment, components and spares imported into the tax territory of the RF and intended for a contribution into the legal (joint stock) capital of organizations, there is a certain legal risk related to receiving a permit from the said State Committee on the eligibility for VAT tax exemption of the said goods imported into the tax territory of the RF as provided by Article 150 of the Tax Code of the RF, as a contribution into the legal (joint-stock) capital of organizations

having a legal capital in excess of RUR1.5 million.

2. Order # БГ-3-24/453 dated August 13, 2003 of the Ministry for Taxes and Levies regarding approval of a form for declaration (calculation) on tax on operations with securities and instructions for its completion, which set forth the Form for tax on operations with securities and Guidelines for completion of the Form for tax on operations with securities.
3. Order # БГ-3-24/453 dated September 1, 2003 of the Ministry for Taxes and Levies on introducing amendments and alterations into order БГ-3-06/756 of the same Ministry dated December 31, 2002 approving general common requirement applied to compilation and formalization of tax declarations.
4. As of January 1, 2004 Chapter 27 (Sales Tax) of Part 2 of the Tax Code of the RF – Federal Law # 148-FZ of November 27, 2001 expires.
5. A draft Federal Law on instruction of amendments and alterations in Part 1 of the Tax Code of the RF of May 24, 2001 the Council of the State Duma passed a resolution on sending the draft law to the State Duma. The bill features risks connected to changing established and newly introduced concepts, and terms and conditions of inter independence of persons, price setting, taxation issues. Until recently the bill was examined by the State Duma's Budget and Tax Committee.

Thus, risks related to changes in the tax legislation basically concern with changing guidelines of executing documents.

In the area of tax legislation:

1. As of January 1, 2004 the Tax Code of the RF (as passed by the Federal law of May 28, 2003 # 61-FZ) comes into effect and at the same time some legal acts and statutes will be terminated while appropriate amendments and changes will be introduced as required in the applicable legislation, including Parts 1 and 2 of the Tax Code of the RF.

During the reporting period about 300 legal acts were inaugurated which carried no significant legal risks for the Company business.

In the area of currency regulations.

1. The national government issued instruction #434 of July 17, 2003 introducing amendments and changes into instruction #574 of July 27, 2002 of the government of the Russian Federation regarding write off and restructuring of debts of legal entities, constituent entities of the Russian Federation and municipal bodies related to target foreign credit (borrowing) and loans in foreign currencies granted from the federal budget funds and extended the term of validity of it for 2003.
2. Instruction #435 of July 17, 2003 of the government of the Russian Federation regarding write off and restructuring of debts of legal entities, constituent entities of the Russian Federation and municipal bodies related to target foreign credit (borrowing) and loans in foreign currencies of the Russian Federation granted from the federal budget funds approved Guidelines and rules for restructuring and write off of debt of legal entities, constituent entities of the Russian Federation and municipal bodies related to target foreign credit (borrowing) and loans in foreign currencies of the Russian Federation granted from the federal budget funds.
3. Order #304 of September 30, 2003 of the Ministry of Finance on the enforcement of Clause 113 the Federal Law on the national budget introduced changes in Order #327 of December 30, 2003 of the Ministry of Finance, including amendments of Guidelines for calculating net present value of sovereign debt securities of the RF, denominated in foreign currencies.

The legal acts listed above are essential for the Company operations connected to repayment of this type of debts.

Legal risks incurred due to changes in requirements on licensing the issuer core activities or licensing the right of use of sites with limited scope of transactions:

In 3Q2003 regulations of the licensing in telecommunications were not changed.

Changes in the licensing rules may happen in the form of imposing additional requirements on activities in the telecommunications, licensing may be introduced of activities which currently require no licenses. Those requirements may result in raising costs of licensee to carry out the related activities.

In particular, as of January 1, 2004 a new Federal Telecommunications Act will come into effect. Pursuant to the Act the list activities subject to licensing and respective licensing requirements shall be set by the national government and are subject to annual revisions.

The Company was not involved in any legal litigation related to licensing.

2.5.5 Risks related to the issuer activities

The Company has no licenses issued by the Ministry of Natural Resources on using sites with limited scope of transactions.

Risks are described connected with:

ongoing court proceedings where the issuer takes part;

possible liabilities of the issuer for third parties' debts, including those of daughter companies of the issuer.

Risks related to the lack of opportunity to extend the license granted to the issuer to carry out certain activities or to use some sites with limited scope of transactions:

Difficulties in extending licenses may arise in renewal of licenses to carry out activities in the field of telecommunications for the purposes of TV and radio broadcasting, as those activities linked to mass media functioning. The broadcaster must have a license issued by the Ministry of Publishing, TV and Radio of the RF.

III. Detailed profile of the issuer

3.1. Background and history of the Issuer

3.1.1. Registered corporate name of the issuer.

Information about corporate name (designation) of the issuer

According to the Charter of JSC CenterTelecom as approved by the general meeting of shareholders (minutes #10 of February 10, 2003) the corporate registered name of the issuer is "Joint-Stock Central Telecommunication Company", abbreviated to JSC CenterTelecom.

The company emerged in June 1994 (state registration certificate #127 of June 20, 1994) as a result of a transformation of state enterprise for telecommunications and informatization Rossvyazinform (GPSI) of the Moscow region into a public joint-stock company Elektrosvyaz of the Moscow region. On June 1, the Company was given a new name – Joint-Stock Central Telecommunication Company, or JSC CenterTelecom in short.

3.1.2 Information about registration of the issuer with state authorities

State registration of the issuer:

The Company was registered pursuant to ordinance # 567-r dated June 9, 1994 of the Chief of Administration of the Moscow region, state registration certificate # 127 of June 20, 1994.

The Company is newly registered with the Moscow region registration chamber, state registration certificate of a legal entity # 50:10:00124 of July 23, 1997.

Pursuant to the Federal Law On the state registration of legal entities the Company is registered with the Inspection of the Ministry for Taxes and Levies of the RF for the town of Khimki in the Unified register of legal entities on November 1, 2002, a generic number of 1025006174710.

The certificate confirming making an entry in the Unified register of legal entities registered before July 1, 2002 is # 001494534 and dated November 1, 2002.

3.1.3. Evolvement and development of the issuer

JSC CenterTelecom – a telecommunications carrier in Center of the European part of Russia was established on October 1, 1886. At that time a postal and telegraph service district was organized in the territory of the Moscow and Ryazan provinces of the tsarist Russia functioning as a telecommunications operator. As of May 12, 1890 the service took over the country telephone network of the Moscow region; since then the Moscow regional operator offers the full range of customer telecommunications services. In 1994 postal services were separated; and during the privatization process the company was transformed into a public joint-stock company. As of December 1, 2002 the service area of JSC CenterTelecom covers 17 regions in the Central and Central Black Soil parts of the Russian Federation. Public operators which serviced these regions in 1994-2000 became the Company's branches (wholly owned subsidiaries).

CenterTelecom is one of Russia's largest fixed line telecoms, accounting according to the Company analysts' estimates for 20% of the combined revenues and 24% of access lines of operators, included in the holding Svyazinvest. The Company has over 6 million access lines and owns a telecommunications infrastructure in Russia's most populated Federal districts with 20% of Russia's total population, fairly well developed manufacturing industry, agriculture, innovative ventures. CenterTelecom's customers and subscribers in 17 constituent entities of the RF are government agencies and bodies, general public and a prevailing majority of businesses. CenterTelecom was granted licenses to provide a wide range of telecom services: traditional POTS, Internet access, data, air and cable TV, wireline and UHF sound program broadcasting, lease of channels and other facilities, to offer public network interconnection to other operators.

Domineering in the traditional service sector the Company has bright developments prospects, as the effective demand for its services runs well ahead of the supply.

The Company rapidly develops its business based on modern digital technologies in all its service area, laying fiber-optic cable lines, deploying SDH and ATM networks, new wireless access systems. Experienced and skilled labor force is determined to realize new potential of the united company in network development and for improvement of business efficiency.

Official statistics estimate the telecommunications market volume in Russia in 2002 at RUR265 billion or USD 8.34 billion.

According to the Company analysts the share of companies in the central and central black-soil areas is USD4.6 billion, of which USD3.99 are ascribed to Moscow based operators. Sales of telecom services in the area served by CenterTelecom is about USD600 million, or 7% of the total sales with the Company's sales accounting for USD4.94 billion (combined sales of the merged subsidiaries), or 83% of the total in the service area.

Actual telecommunications service market volume in the CFD is significantly higher and CenterTelecom's share is lower, as the official data does not account for sales of Moscow based operators in the district. According to CominfoConsulting report the total market share of CenterTelecom in the district tends to be lower. In 1999 it was 89%, while in 2002 it was estimated at 52%; and the trend will persist in the near future due to high growth rates of alternative operators, cellular companies in the first place, unregulated by the government: revenues of these operators grew by over 5 times over the same period.

In the sector of traditional telephony CenterTelecom's share on the whole and in each region is just above 85% and slightly diminishing. With the service growth rates anticipated by the Company, and subject to the declared government tariff policies a prominent position in this sector will be maintained.

Internet access – competition in this sector is particularly tough. Regional branches – subsidiaries of CenterTelecom still manage to maintain leading positions with 60% of business and 70% of residential market shares respectively.

Competition is fiercer in Voronezh, where the regional carrier's share is 20%.

JSC CenterTelecom is set up for an unlimited term.

The Mission of JSC CenterTelecom

to ensure uninterrupted operation and development of telecommunications infrastructure in the regions of the Central Federal District;

to put in place foundation for implementing state-of-the-art information technology in all spheres of public life and functioning of the state;

to create favorable conditions conducive to satisfying to the utmost extent customers' demand for telecommunications and information services, improving the quality of life of the Russian people.

3.2.2 Core business activities of the issuer

Rendering telecommunications services is the core business activity of the issuer.

Types of services generating over 10% of the revenues (income) over the three past fiscal years:

- provision of access to telephone network;
- local telephone call (connection set-up);
- set-up of international and domestic long-distance telephone calls (connections), direct-dialed or operator assisted.

Break down of CenterTelecom revenues from core activities in 3Q2003, %

7.	Mobile communications	100.7
8.	ISDN	102.2
9.	Intelligent networks	120.9
10.	Interconnection and routing of traffic	321.0

The reasons for the changes reflected in the tables above, are as follows:

- item 3 – a hike in the monthly rentals as of August 2003;
- item 10 – streamlining interconnection settlements with JSC Rostelecom;
- items 1,2,4,5,6,7,8,9 – expansion of volume of services rendered.

Seasonal variations in the provision of telecom services reveal themselves in a larger volume of international and long-distance calls in the summer season, and higher number of telegrams, and decrease in the number of pay-per-minute telephone calls.

3.2.3 Principal types of products (services, works)

As it is impossible to provide the data in a single uniform format pursuant to a table supplemented to quarterly reports, the information is suggested for presentation in the following form:

3.2.5 Markets for sales of the issuer's products (works, services)

Customers (major accounts) accounting for at least 10% of revenues from sales of the issuer's products (works, services):

No such customers (major accounts).

Customers using services rendered by JSC CenterTelecom are legal entities and individuals (general public) in the territory of CFD. As the residential sector accounts for the bulk (70%) of the issuer revenues, the key negative factor that might adversely affect sales of the issuer's products (works, services) is a decline in effective demand for telecommunications services offered by the issuer.

It should be additionally noted that rates charged by JSC CenterTelecom from the residential customers are regulated by the government (MAP) hindering timely response to rising costs and changes in the solvent demand. Other factors are stiffer competition resulting in lesser market share of JSC CenterTelecom and aggressive marketing policy of the alternative operators.

Possible negative factors that are likely to adversely affect sales of the issuer's services.

economy downturn, decline in solvency of businesses and organizations, and purchasing power of population in the regions of the RF due to worsening of economic situation in the country.

In such a case the Company will take the following measures:

Completion of the build-out of multiservice networks (MSN) enabling a significant expansion of the range of offered services with simultaneous improvement of quality of service.

2. Continuing the policy of reducing the share of debt financing in the investments and giving up foreign currency denominated loans, raising long-term credit funds.

3. Increasing the activated switching capacity and raising the number of subscribers.

4. Making use of locally manufactured equipment.

5. Utilizing open code software products to enable the workflow (particular to ensure functioning of switching equipment).

6. Making use of leasing for expanding the output.

7. Provision of substitute services (In particular, there is a surge observed in proliferation of IP-telephone, that under certain changes in market situation may become a substitute for long-distance service). Migration to packet switching from circuit switching for long-distance service.

8. Cutting down on cross-subsidizing of government regulated rates.

3.2.6 Policies of using current assets and inventories

By "the current assets" the Issuer means the bottom line of section 2 of the asset items in the balance sheet. The issuer's policies with respect to current assets for the reporting and the following periods aim at cutting down of accounts receivable, sales of non-core assets, inventory reduction and cost cutting, accelerating the current assets turnover.

Description	Recommended guidelines for calculation (notes to the issuer's reports)	9 months 2003
Turnover ratio (days)	365/Costs/Inventory	62.19

3.2.7 Raw materials

As JSC CenterTelecom core business is provision of telecommunication services, there are no "raw materials" used in the process.

3.2.8 Major competition

Currently CenterTelecom is doing business in the territory of the Central Federal District in 17 regions (Belgorod, Bryansk, Vladimir, Voronezh, Ivanovo, Kaluga, Kostroma, Kursk, Lipetsk, Moscow, Orel, Ryazan, Smolensk, Tambov, Tver, Tula and Yaroslavl regions).

Market share of CenterTelecom regional subsidiaries for telecom services in 2002 was 52% (including cellular

operators).

Main competitors of CenterTelecom are national carriers. Their combined market share depending on the service type and the region is varying from 1 to 18%. Comincom company is successfully promoting its services in the Black-Soil area.

Private network operators are less threatening. Their share is significant in the long-distance market and Internet access, while in the local telephony market their exposure is fairly limited. Particularly, TransTelecom pursues aggressive policy. As these operators are focused on corporate interests, CenterTelecom does expect tough competition on their part.

As far the cellular companies are concerned they are searching for entries to other market segments, particularly for routing long-distance traffic originated by their subscribers, though the volume of drawn traffic is rather small. Despite rapid development of cellular operators further shift in long-distance communications in their favor is not expected, as the solvent demand under the effective rates are virtually satisfied. Cellular operators may present a serious threat to CenterTelecom in local telephony and long-distance service only if they drastically cut their rates. Analysts do not expect such changes in the tariff policies to happen.

Local operators themselves are not competitors of the MegaRegional Company JSC CenterTelecom (henceforth MRC), as their operation areas are limited, though they are prospective partners for national and private network operators. It should be noted that CenterTelecom strategic plan envisage changing terms and conditions of interconnection with these carriers to use local operators as channels for promotion of CenterTelecom's services (if the ownership structure of local operators does not ensure control of national operators over them).

Despite active pushing of competitors of CenterTelecom to regional markets CenterTelecom continues to gather substantial infrastructural and financial capacity while for majority of alternative operators this is impossible to do.

The table below lists most serious players in the telecom service industry and posing the largest threat to CenterTelecom. These companies completely covered the market in Moscow and started expanding into other regions.

Largest alternative operators in the Central Federal District (CFD) (Moscow is not included)

	Company	Market share in the territory of MRC in 2002	Market share in the territory of MRC, 9 months 2002
1	JSC CenterTelecom	52%	47%
2	Equant	1%	1.2%
2	Golden Telecom	3%	3.6%
3	TransTelecom	1.4%	2.4%
4	Comincom	0.2%	0.4%
6	MTS	10%	13%
7	BeeLine	6%	10%

Source: Regional statistics bodies

Strengths of these competitors:

- technical, financial and intellectual potential;
- expertise in aggressive business policies;
- flexible pricing and tariff policies;
- customer focused;
- carry no social obligation.

Weaknesses of the competitors:

- poor network infrastructure or total lack of it, and as consequence resorting to leased circuits from CenterTelecom;
- as subscriber base expands quality of service suffers;
- companies are undergoing certain state of confusion due to mergers (a merger of Global One and Equant, integration of Teleross and Sovintel creating Golden Telecom).

Competitiveness analysis

Company name	Factor						Competitiveness rating
	Brand recognition	Price	Quality	Sales network	Lead time	Post sales service	

<i>Factor priority</i>	3	4	5	4	3	5	-
CenterTelecom	5	3	4	4	3	3	87
GoldenTelecom	3	4	5	1	5	4	89
Comincom	3	4	5	2	5	4	93
TransTelecom	4	5	4	4	4	5	95
MTS	5	5	4	5	5	5	115
BeeLine	5	5	4	4	5	5	111
Equant	4	4	5	5	4	5	110

Factor priority was assigned based on the customer preferences, and on the analysis of criteria for selecting a telecom provider performed by CominfoConsulting

Estimates for each factor were made on the basis of the following:

Brand recognition:

- aggressive advertising;
- customer base;
- period of the company presence on the market.

Price:

- tariff plans of the company.

Quality:

- equipment;
- current state of the network.

Sales network:

- estimated number of sales points.

Lead time:

- expert estimate made on the basis of customer survey.

Post sales service: service and support announced by official information sources of the company (advertising booklets, promotional leaflets, sites, etc.).

Consolidation of companies-operators in telecom market poses a real threat: Equant took over Global One, TeleRoss and Sovintel merged with Golden Telecom. Analysts believe there is likelihood of a merger between Combella, Comincom and Golden Telecom. However, so far the consolidated companies are not strong enough to target general customers en masse, and in the foreseeable future will continue to concentrate their effort on corporate customers, expanding their presence in regions, and on servicing other operators, in the first place more powerful cellular operators (projects for the sake of Megafone and BeeLine); thus capturing more lucrative market segments.

Market position of the Company

At the moment MRC is virtual monopoly in the Central Federal District, with market share across the regions of CFD varying from 31% to 71%, taking into account cellular operators' market shares.

CenterTelecom's market share in various services.

1. Local telecommunications – 93%.
2. International and domestic long-distance telecommunications, taking into account traffic outflow to cellular and IP-telephony operators) – 89%.
3. Internet access and data – 60%.
4. Cellular service market share is insignificant.

b) Telecommunications networks

• **Local telecommunications**

JSC CenterTelecom is the principal operator in the telecom market of central Russia for provision of an access to the local telephone network.

JSC CenterTelecom is the largest among MultiRegional telecommunications companies created in 2002. The Company owns a well developed telecommunications infrastructure in the most densely populated area of Russia, accounting for 20% of Russia's total population.

The Company operates in 17 constituents entities of the Russian Federation.

JSC CenterTelecom provides a wide range of services, like POTS, Internet, data, on-air and Cable TV, wireline and UHF radio, lease of channels and other resources, etc. The Company also offers public network interconnection to other operators.

At the moment switching capacity of JSC CenterTelecom telephone network is over 6.5 million lines.

Nowadays local telephone networks constitute a complex multi-node system with some 9,000 switches of different makes. Telecommunications network of JSC CenterTelecom is constantly improved and modernized. New digital exchanges and switching nodes are brought into service, digital links and microwave lines are built. Capacity of digital switches accounts for 38.1% of the total installed switching capacity. Installation of modern digital switches both locally made and from foreign vendors not only expands network switching capacity but also makes it possible to offer a wider range of services, including Internet, ISDN, data, etc.

Urban telephone lines account for 84.5% of the total PSTN capacity of JSC CenterTelecom, while capacity of rural networks makes up the rest; evidencing a clear dominance of rural telephone networks in the overall structure of local telecommunications of the Company.

Cable and linear assets of the local networks of JSC CenterTelecom are installed and used for provision of services according to licenses. Total length of the cable links is in excess of 700 thousand km, of which some over 3 thousand are fiber-optic links, and the figure is constantly growing.

• **Long-distance telecommunications**

JSC CenterTelecom offers domestic long-distance and international telecommunication services based on agreements with Russia's leading long-distance carrier – OJSC Rostelecom.

Traffic between local telephone networks and trunk network of Rostelecom is routed via long-distance exchanges. At the moment JSC CenterTelecom has 25 such switches. Both fiber-optic and microwave links are used for trunk links and distribution networks.

The length of area distribution network links is over 20 thousand km x channel of which 15 thousand are fiber-optic, laying a solid foundation for provision of high quality digital circuits and links. Only certified fiber-optic cables meeting highest standards are used.

All local centers and key regional cities have an access to IDD telephone service. The Company bills its customers for long-distance services, collects payments in respect of the services rendered, and settles accounts with Rostelecom for carrying long-distance traffic.

SUMMARY

of radio frequencies allocated by State radio-frequency agency for provision of telecommunications services using radio-electronic means in the Central Federal District of the Russian Federation,

The State radio-frequency agency assigned to JSC CenterTelecom frequency resources in order to provide telecommunications services using means of radio-electronic communications:

Additionally, 450 frequency assignments were secured for provisioning of transmission systems on local and trunk lines using microwave facilities.

3.4 Plans of future activities of the issuer

(related to development of new products)

Expanding the range of offered services is at the moment one of the paramount tasks of the business development.

Packet switching services are among the most promising, as comprising the whole range of services offered by the Company, and contribute to raising customer value and profitability. The following priorities can be identified on the context of packet services:

- bundling services in pre-set packages using multiservice network capabilities targeting specific broad user groups (small and medium businesses in the first place);
- Internet plus telephony via xDSL, and fixed and mobile service integration can be offered as basic packages.

Intelligent Network services (IN service)

Western telecom companies observe exponential growth of IN (Call Centers in particular). Experience of national operators – competitors of JSC CenterTelecom, robust interest of mass media to IN prove that some demand for them is expected to appear in Russia shortly. It would seem sensible to anticipate the demand and even now start to prepare services like personal portable number, toll free 800-numbers, Virtual Private Networks (VPN). Call Centers are particularly promising, as such a Center can be efficiently used initially for the Company's own needs, like telemarketing, HelpDesk, support of card platforms, and generating new revenues through offering outsourcing to businesses. Some of the subsidiaries have already expressed their intention to consider provisioning of a Call Center at their facilities.

Establishing Call Centers based on multiservice networks should be viewed as a priority in development of new services. The issue may become extremely vital on the eve of forthcoming elections. The service may target both general public and business sector.

Pre-paid phone cards are convenient and accepted for making payments. Besides it is a beneficial way of collecting payments, as payments are made in advance improving profit margins. Cards are on sale in various locations, in addition to points of making payments, thus the latter will be less likely overloaded.

A universal card is particularly promising, as in addition to other benefits it will drive the demand for various services.

Putting in place a multiservice network offering beside broadband access to data network Intelligent Network services and packaged services will help increase the volume and expand the sphere of information service offer and corporate network provisioning. Transition to a multiservice network is not the end in itself, but a response to market demand and growing user requirements.

Latest revaluation of fixed assets and leased for long-term fixed assets performed during the past five years:

Before the consolidation of the Company taken place on November 30, 2002, there was no revaluation of the issuer's fixed assets. Fixed assets of the merged companies were valued for accounting purposes at their depreciated book value as at November 30, 2003. Though it should be noted that in some of the merged companies in 2000-2002 revaluations were actually taken place. As revaluations were made by independent at that time companies and due to different revaluation times (Voronezh, Orel, Tambov – 2000, Tula, Kaluga, Kostroma – 2001, Tver – 2000-2002) and various valuation techniques (different appraisers) the issuer does not think it makes any sense to report detailed data on revaluation history for each of the merged companies before the consolidation.

3.7.2 Value of immovable property of the issuer

The total value of real estate property (land plots, buildings, facilities) of the issuer as at October 1, 2003 was RUR11,981.4 million

Charged depreciation was RUR5,788.3 million.

Within 12 months before the reporting quarter end there had been no valuation of estate property owned by the issuer or leased by it for long-term.

Productivity of labor in 3Q2002 went up by 12.8% as compared to 2Q2002 and reached RUR77,747.6

Sales profit margin also increased in 3Q2002 by 2.31% as compared to 2Q2003 and reached 28.67%. Revenues from sales of goods, products, works, services in 3Q2002 were RUR5,558,641 thousand (growth by 15.61% as compared to 2Q2003), of which RUR5,470,558 thousand received from telecommunications services rendered.

Gross profit in 3Q2003 amounted to RUR1,593,507 thousand (growth by 26.66% as compared to 2Q2003).

Growth of profit from telecom services in 3Q2003 was first of all due to hike in rates charged for local telephone service and growing sales volume of telecom services.

4.1.2. Causes of changes in the issuer's revenues from sales of goods, products, works, services and profit (losses) from recurrent operations.

Revenues in 3Q2003: RUR5,558,641 thousand

Revenues in 2003 (projected): RUR19,850.3

Changes in revenues of JSC CenterTelecom from sales of telecom services in 2003 are mainly attributed to:

- growth in sales volumes of core services: 48%;
- increased tariffs and other influencing factors: 52%.

4.2. Liquidity of the issuer

Insufficiency of own current funds the issuer compensates by debt financing resulting in growing financial dependence and declining own funds autonomy. Growing value of the permanent asset indices in the reporting period as compared to the previous period is attributed to growth of the value of non-current asset in the course of technical upgrade and modernization of the Company. Liquidity ratios show positive trends as compared to the previous period.

4.3 Amount, structure and sufficiency of the issuer's capital and current assets

4.3.1 Value and structure of the issuer's capital and current assets

As at September 30, 2003:

- the legal (charter) capital of the issuer: RUR631,199,896.5 according to founding documents of the issuer.
- Share bought back by the issuer for release (transfer): no
 - reserves: RUR31,560 thousand
 - additional capital: RUR6,337,481 thousand
 - undistributed profit of the previous year: RUR6,789,103
 - undistributed profit of the previous year: RUR1,294,703 thousand
- total capital: RUR15,084,047 thousand

Funds allocated for target financing of JSC CenterTelecom are recognized in Section Short-term liabilities (line 640), not in Section Capital of Form 1 the balance sheet.

- current asset: RUR7,228,153, of which inventories: RUR1,848,899, VAT on acquired assets: RUR989,088, accounts receivable: RUR3,049,685, short-term financial investments: RUR17,288 thousand, cash and cash equivalents: RUR1,323,193 thousand.

The total value of the issuer's own capital grew as compared to the previous year due to increased undistributed profit of the reporting year.

In the reporting period current assets increased because of growing inventories. Higher net profit growth rates in the reporting period than that of over the previous period is positive trend reflecting improving efficiency of own funds of the issuer.

The sources of financing the current assets are own and debt funds, the latter primarily being short-term bank loans.

4.3.2 Sufficiency of the capital and current assets of the issuer

Following guidelines recommended by the Standards of bind issues and their prospectuses approved by FCSM of Russia, the issuer has enough capital available to meet its short-term liabilities and cover current operating expenses (figure in line 490 form 1 of the balance sheet for 9 months of 2003 is 2.78 times more than figure in line 590 of form 1). Average daily operating expenses and debt servicing expenses of the issuer in 2Q2003 was RUR12,028 thousand, while in 3Q2003 it was only RUR7,009 thousand, with projected amount for 4Q nearing RUR8,000 thousand. Current assets of the issuer according to the balance sheet for 9 months of 2003 are enough to cover current operating expenses projected for 4Q2003.

4.3.3 Cash and cash equivalents

Cash fund requirements for 4 Q 2003 are estimated at RUR2,500,000 thousand, for 2004 the forecast is RUR8,200,000 thousand.

There are no blocked bank accounts of the issuer or overdue accounts payable in banks on the watch.

One of the financing sources to draw on for financing the investment program of the issuer is loan facilities of commercial banks. Loan facility agreements are concluded on basic terms and conditions accepted for practicable cooperation of the issuer with credit organizations; interest rates, principal, maturity and terms of repayment, securities/collaterals. Violation of basic terms for provision of loan facilities is a barrier to the disbursement of funds.

4.4 Policies and expenses of the issuer in respect of R&D, licenses and patents, new designs and research reports

The Company pursues policies aimed at development of its capacity and technical potential. In order to increase the Company's intangible assets a draft contract is reviewed for identifying and accounting for goodwill and other intangible items.

The Company employees developed a technical solution to be possibly covered by legal protection under patent law. To have a patent issued for the solution will cost RUR45 thousand.

Patent validity term, trademarks (service marks) registration is defined according to applicable law. Effective legislation provides for extension of validity term of patents and registered trademark (service mark) registration.

The Company was issued Trademark Certificate # 200257 of March 11, 2001. The trademark is used by the Company to differentiate and make distinct and recognizable its products, works and services. The registration of the Company trademark is effective across the whole of the Russian territory for 10 years as of October 16, 2000.

There are risk factors related to possible expiry of patent rights, licenses for trademark use, as the Company has no patents or licenses for using trademarks.

4.5 Trend analysis of the core business of the issuer

Market development.

Telecommunications is one of rapidly evolving industries of the nation's economy with growth rates significantly surpassing that of other industries. Share of the telecommunications in the GDP persistently grows (1999 – 1.8 %, 2000 – 2.1%, 2001 – 2.39%, 2002 – 2.7%).

Growing share of telecommunications services in Russia's GDP

(Figure of the share of telecom services in GDP in 1998 is not meaningful due to the economic crisis at that time).

According to CominfoConsulting forecast the total Russian telecommunications market volume by 2006 will jump 2.6 times (as compared to 2002) and reach over RUR550 billion. Data market will grow 5 times through expansion of Internet access and acceptance of new services, like IP-telephony, VPN, etc.

Mobile communications market will grow by 2.8 times (from 2002 level) due to expansion of subscriber base. All industry analysts agree that further mobile market growth will be in the regions. The number of household fixed line telephone sets connected or having an access to PSTN per 1,000 people in urban areas of Central Federal District grew in 2002 by 8% (by 7% in rural areas). Though the growth rates are not particularly high, they become faster. From 1998 the number have grown almost 1.5 times.

Sales of basic telephone services in CFD steadily grow, with number of telephone calls increasing by 195.2% from the level of 1998. International telephone calls rose by some 233.2%.

Over several past years revenues generated by various services are naturally rebalanced in favor of advanced services, mostly mobile services. The CFD is not an exception. Starting from 1999 the share of fixed line telephony in revenues fell from 87% to 66% due to evolving new technologies.

Revenues generated by telecommunications services tend to grow steadily; according to Goscomstat data average annual growth rates of revenues from core business of telecommunications companies were 140% (or around RUR40 billion per year).

General positive trends in the development of telecommunications invariably affect operations of JSC CenterTelecom.

Excerpts from the report of R. Amaryan, General Director of JSC CenterTelecom at the annual meeting of shareholder of JSC CenterTelecom on June 24, 2003.

The year of 2002 marked a breakthrough in the development of our Company. With completion of Svyazinvest restructuring seventeen regional telecommunications companies of the Central and Central Black-Soil regions were joined to JSC CenterTelecom, making it a leading company in the nation's economy with RUR16 billion of annual turnover.

JSC CenterTelecom is a transparent market driven company, its securities are traded on the Russian Trading System, MICEX, and its Level 1 ADRs are available on foreign stock markets. The market closely watches developments in the Company.

Successful wrap up of consolidation was positively perceived on the market. At the start of trading in shares of the consolidated company its market capitalization was USD480 million and robust growth of the share price continues at the moment.

Officially JSC CenterTelecom as a MultiRegional company has been in operation since November 30, 2002; nevertheless some conclusions may be drawn at the present moment, setting priorities and immediate tasks of becoming a mature company, a modern telecom operator on equal footing with leading European providers by scale of operations.

The Company possessed a well-developed telecommunications infrastructure in Russia's most

densely populated area, with 6 million subscriber numbers of installed switching capacity, 27 long-distance exchanges, 3.9 million subscribers of wireline sound program broadcasting, 125 thousand subscribers of Cable TV, 1,700 internet hosts, other telecom facilities.

2002 fiscal year was successful for all the regional subsidiaries and the Company as whole.

Revenues reached RUR16.4 billion, profit from sales – RUR4.26 billion, net profit – RUR1.84 billion, of which RUR260 million or 24% according to recommendation of the Board of Directors was allocated for dividend payments.

Some RUR4.79 billion were invested into development of the core business.

It should be noted that during the reorganization growth rates of subsidiaries and the Company remained robust and high. In 2002 total sales grew 28% over the previous year level, while expenses rose only by 21.4%, resulting in 51.8% growth of profit from sales as compared to the aggregate figure of the regional operators in 2001 before the merger.

Revenues from telecom services in 2002 rose by RUR3.6 billion as compared to 2991, with RUR1.8 billion growth owing to expanded sales. Noticeably, by 1.6 times grew the share of revenues generated by new services.

Generic business efficiency indices of the Company greatly improved.

Revenues per line in 2002 reached RUR227.4 thousand growing 30% and reaching 125% of 2001 level, unit costs were only 95% of the 2001 level. Improved productivity resulted from growing sales and personnel reduction by 3.8%.

During 2002 the Company put into operation switches with total switching capacity of 497.6 thousand lines, of which 40 thousand in rural areas and 30 thousand of mobile networks.

Over 3 thousand km of cable trunk lines were laid, over 10 thousand of IDD circuits, radio transmitters having total transmitting power of 1.8 kW.

Growing investments in fixed assets are justified by bright outlook for future business development of the Company. In the liberalized market environment and toughening competition CenterTelecom manages to maintain dominating position in traditional telephony market: the Company's share in the CFD (excluding Moscow) is around 85%, the position being kept by aggressive investment policies. The demand for traditional services in virtually all regions is running ahead of the supply.

There is also a pent-up demand for new services. CenterTelecom captured leading positions in Internet market in the majority of regions. Growing household computer penetration creates favorable prospects for sales.

Results of the year evidence impressive general potential of business development of the consolidated Company. However much needs to be done to realize the growth potential. Pooling capitals, legal registration are merely the first, formal stage of the reorganization. The Company faces some complex problems on the way to become a seasoned consolidated company. Some of the key issues are:

Implementation of an efficient corporate management system.

Even now it can be said, that the most immediate measures to cope with the problem involving the "human factor" were carried out smoothly and efficiently. The Company is stable, as the first quarter results witness.

Creating a sound management system we are guided by principles accepted by the world business community and recommendations of Code of Corporate Behavior, approved by the Russian government. The Board of Directors passed relevant Declaration of adherence to these principles.

New issues of the Charter and internal regulations of the Company approved by the general meeting of shareholders held on February 20, 2003 take into account provisions of the Code.

This approach gives us grounds to expect a corporate governance score to be assigned. To this end in November 2002 an agreement was signed with Standard&Poor's and a CGS of 5.3 was assigned to CenterTelecom. Though the score is just slightly above medium level due to difficulties of restructuring, it helped us have another look at our work and resolve some management issues that can be directly influenced by the Company's executives.

In particular, much was done to ensure transparency and openness of the Company. The Board approved investor and public relations programs to pursue policies in line with strategic objectives of the Company.

In the reporting year the Company undertook serious effort to accept a unified budgeting technique approved by Svyazinvest. A sound and balanced budget was drawn up for this year, but instability of external factors made us amend it. In streamlining and improving management of the Company we intend to more extensively use techniques of target planning making the management more stable and decisions more transparent.

The first step in introducing unified principles of pricing was elaborated in 2002 and supported by MAP unified rates for international telephone services in the territory of the Central Federal District. Monthly rate were made significantly more even. Pricing should be streamlined taking into account specific features of regional markets and marketing policy of the Company.

Implementing our technical policies we initiated process of unification of equipment and technologies. Technical audit of the united company revealed that in the regional subsidiaries there are over 20 makes of switching equipment only supplied both by Russian and foreign vendors. This is also the case for transport and data networks.

Even next year the range of switching equipment makes will be significantly reduced. Then unification of billing systems for account settlement with subscribers, creation of unified billing and payment centers.

Deployment of corporate network for the Company is particularly vital, as it is virtually impossible to implement modern system integration methods in operation and management.

For the future a task of a paramount importance is technological interaction of networks built on the regional principle, creation of a technical basis for managing these networks and regional subsidiaries as whole. In this respect we work closely with industrial design institute Giprosvyaz.

In general, the Company should work out a common corporate development strategy. Bearing in mind features of regional markets we need to put a place an efficient decision-making chain, starting from market research through investment planning to service offer. Only within such framework it is feasible to ensure efficiency of capital expenditures and satisfying the demand to the utmost degree possible.

As a public joint-stock company profit making, improving business efficiency of the Company and building-up shareholder's value are indisputably top priority in the development of the Company. Meanwhile, expanding the telecommunications infrastructure in 17 constituent entities of the Russian Federation one should not ignore social needs. Even this year the installation of telephone sets for disabled war veterans should be completed, solutions to grant requests of long-waiting applicants should be found, installation of phones in rural areas should be continued.

From CenterTelecom previous experience successful operations in the regions, fulfillment of social tasks greatly rely on productive cooperation with authorities both in federal and local. Constructive relationship with governmental authorities and agencies is another cornerstone of our strategy.

Initial operating results of the united company assure us of stable future. Despite complexity and variety of problems facing the company-operator in the Central Federal District, I am absolutely confident that 70 plus thousand strong personnel of CenterTelecom will successfully fulfill the tasks facing the Company.

13.5 The Company must each year hold an annual General Meeting of Shareholders.

The annual General Meeting of Shareholders shall be held not earlier than four months and no later than six months after the end of the financial year.

At the annual General Meeting of Shareholders [the following] matters must be resolved: election of the Company's Board of Directors; election of the Company's internal audit commission; approval of the Company's auditor; approval of the Company's annual reports and annual accounts, including the Company's profit and loss reports (profit and loss accounts) and distribution of profit, including distribution (declaration) of dividends and Company losses according to the results of the financial year; other matters within the authority of the General Meeting of Shareholders.

13.6 Shareholders (a shareholder) holding a total of at least 2 percent of voting shares of the Company may put items on the agenda of the annual General Meeting of Shareholders and nominate candidates for the Company's Board of Directors and the Company's internal audit commission the number of which may not exceed the number of members of the relevant body provided herein. Such proposals must be submitted to the Company not later than 60 days after the end of the financial year.

13.7 General Meetings of Shareholders other than the annual General Meeting of Shareholders are extraordinary. An extraordinary General Meeting of Shareholders shall be held pursuant to a resolution of the Board of Directors, adopted at its own initiative or pursuant to a request from the Company's internal audit commission, the Company's auditor or shareholders (a shareholder) holding a total of at least 10 percent of voting shares of the Company on the date that such request is presented. An extraordinary General Meeting of Shareholders held pursuant to a request of the Company's internal audit commission, the Company's auditor or shareholders (a shareholder) holding a total of at least 10 percent of voting shares of the Company shall be convened by the Company's Board of Directors.

13.8 An extraordinary General Meeting of Shareholders convened pursuant to a request from the Company's internal audit commission, the Company's auditor or shareholders (a shareholder) holding a total of at least 10 percent of voting shares of the Company must be held within 40 days from the

moment the requested for an extraordinary General Meeting of Shareholders is presented.

13.9 An extraordinary General Meeting of Shareholders convened pursuant to a request from the Company's internal audit commission, the Company's auditor or shareholders (a shareholder) holding a total of at least 10 percent of voting shares of the Company must be held within 70 days from the moment the request for an extraordinary General Meeting of Shareholders is presented, if the agenda of such meeting includes election of the Company's Board of Directors.

In the event that the number of members of the Company's Board of Directors falls below the quorum for conducting sessions of the Company's Board of Directors, an extraordinary General Meeting of Shareholders convened pursuant to a resolution of the Company's Board of Directors adopted at its own initiative to elect the Company's Board of Directors must be held within 70 days from the moment the Company's Board of Directors adopts the resolution to hold the meeting.

13.10 In preparing for an extraordinary General Meeting of Shareholders the agenda of which includes election of the Company's Board of Directors, shareholders (a shareholder) holding a total of at least 2 percent of voting shares of the Company may nominate candidates for the Company's Board of Directors the number of which must not exceed the number of members of the Board of Directors provided herein. Such proposals must be submitted to the Company no later than 30 days before the date of the extraordinary General Meeting of Shareholders.

13.11 The list of persons entitled to participate in the General Meeting of Shareholders shall be compiled on the basis of information from the Company's register of shareholders.

The date of compilation of the list of persons entitled to participate in the General Meeting of Shareholders shall be no earlier than the date on which the resolution to hold the General Meeting of Shareholders is adopted and no more than 50 and no less than 45 days before the date on which it will be held.

The date of compilation of the list of persons entitled to participate in an extraordinary General Meeting of Shareholders the agenda of which includes election of the Company's Board of Directors shall be no earlier than the date on which the resolution to hold the extraordinary General Meeting of Shareholders is adopted, no more than 65 days before the date on which the General Meeting of Shareholders is held and no later than the date of the notice of the extraordinary General Meeting of Shareholders.

13.12 Notice of a General Meeting of Shareholders must be given no later than 20 days before the date on which it is held and notice of a General Meeting of Shareholders the agenda of which includes reorganization of the Company – no later than 30 days before the date it is held.

In the event that the proposed agenda for an extraordinary General Meeting of Shareholders includes election of the Company's Board of Directors, the notice of the extraordinary General Meeting of Shareholders must be given no later than 50 days before the date on which it is held.

Within such deadlines the notice of a General Meeting of Shareholders must be given to each party included in the list of persons entitled to participate in the General Meeting of Shareholders by registered post or delivered to each of the persons against signature or be published in *Rossiiskaya Gazeta*.

13.13 Persons entitled to participate in the General Meeting of Shareholders shall be provided with the following information (materials) through the procedure and at the address (addresses) specified in the notice of the General Meeting of Shareholders: annual accounts, including auditor's statement; statement of the Company's internal audit commission on the results of the audit of the annual accounts; information on candidates nominated to the Company's Board of Directors and the Company's internal audit commission; draft amendments and addenda to the Company Charter or the draft of a new version of the Charter; drafts of internal regulations of the Company; drafts of other documents adoption of which is stipulated in draft resolutions of the General Meeting of Shareholders; draft resolutions of the General Meeting of Shareholders; other information (materials) that must be presented in accordance with effective legislation; other information (materials) presented in order to adopt resolutions on items of the agenda of the General Meeting of Shareholders that the Board of Directors has included in the list of information (materials) to be presented to shareholders in preparation for the General Meeting of Shareholders.

13.14 The General Meeting of Shareholders will be competent (quorate), if shareholders holding a total of more than half the votes conferred by placed voting shares of the Company participate in it.

Shareholders registered for participation in the General Meeting of Shareholders and shareholders whose ballots have been received no later than 2 days before the date of the General Meeting of Shareholders will be deemed to have participated in the General Meeting of Shareholders. Shareholders whose ballots have been received prior to the date of acceptance of ballots will be deemed to have participated in the

General Meeting of Shareholders held through *in absentia* voting.

13.15 If the agenda of a General Meeting of Shareholders includes matters upon which different groups of voters are to vote, the quorum for adoption of resolutions on each of such matters will be determined separately. If there is no quorum for adopting a resolution on matters to be voted upon by one group of voters, this will not impede adoption of a resolution on matters to be voted upon by another group of voters for which there is a quorum.

13.16 If there is no quorum for the conduction of an annual General Meeting of Shareholders a repeat annual General Meeting of Shareholders must be held with the same agenda. If there is no quorum for the conduction of an extraordinary General Meeting of Shareholders a repeat extraordinary General Meeting of Shareholders may be held with the same agenda. A repeat General Meeting of Shareholders will be competent (quorate), if shareholders holding a total of at least 30 percent of votes conferred by placed voting shares of the Company participated in it. Notice of a repeat General Meeting of Shareholders shall be given and ballots delivered no later than 20 days before the date of the repeat General Meeting of Shareholders. Notice of a repeat General Meeting of Shareholders the agenda of which includes reorganization of the Company shall be given no later than 30 days before the date of the repeat General Meeting of Shareholders. In the event that a repeat General Meeting of Shareholders is held less than 40 days after date of the non-quorate General Meeting of Shareholders, the persons entitled to participate in the General Meeting of Shareholders shall be determined according to the list of persons entitled to participate in the non-quorate General Meeting of Shareholders.

13.17 Unless otherwise resolved by the Company's Board of Directors, the General Meeting of Shareholders shall be chaired by the person performing the functions of Company's General Director.

13.18 Other matters connected with preparation for and conduction of the annual or extraordinary General Meetings of Shareholders, including the procedure for conducting the General Meeting of Shareholders, shall be determined by the Regulations on the General Meeting of Shareholders of the Company, to be approved by the General Meeting of Shareholders.

Powers of the Board of Directors (Supervisory Board) of the issuer pursuant to its charter (founding documents):

Article 14 (the Charter of JSC CenterTelecom) Company's Board of Directors

14.1 The Board of Directors is the Company's collective management body and carries out general management of the Company's activities.

14.2 The 11 members of the Company's Board of Directors are elected each year by the annual General Meeting of Shareholders, by cumulative voting.

Rights of an owner of this type (category) of shares:

Article 9 (Charter of JSC CenterTelecom). RIGHTS AND DUTIES OF SHAREHOLDERS HOLDING TYPE A PREFERRED SHARES

9.1 Each Type A preferred share in the Company confers upon the shareholder holding it an identical volume of rights.

9.2 Holders of Type A preferred shares have the right to receive an annual fixed dividend, subject as herein. The total amount payable as a dividend on each Type A preferred share shall be 10 percent of the Company's net profits according to the results of the last financial year divided by the number of shares that comprises 25 percent of the Company's charter capital.

If the amount of dividend payable by the Company on each common share in a given year exceeds the amount of dividend payable on each Type A preferred share the amount of dividend on the latter must be increased to the amount of dividend payable on common shares. These payments shall be made additionally on the date of payment of dividends on common shares.

9.3 Holders of Type A preferred shares have the right to participate in the General Meeting of Shareholders with the right to vote on resolutions concerning the reorganization or liquidation of the Company and also concerning addenda and amendments to the Company Charter, if such amendments restrict the rights of such shareholders.

9.4 If the Meeting of Shareholders, for whatever reason, has not adopted a resolution to pay dividends on Type A preferred shares or has adopted a resolution not to pay those dividends in full, holders of Type A preferred shares have the right to participate in the General Meeting of Shareholders and vote on all matters on the agenda of the meeting. Such right of holders of Type A preferred shares arises as of the meeting following the annual Meeting of Shareholders at which a resolution was not adopted to pay dividends and ceases to apply as of the first payment of dividends in full with respect to such shares.

9.5 Holders of Type A preferred shares have the rights of holders of common shares of the Company provided in Clauses 8.2.3, 8.2.4, 8.2.5, 8.2.6, 8.2.7, 8.2.8, 8.2.10, 8.2.11, and 8.2.12 herein. Shareholders holding Type A preferred shares also have such rights notwithstanding that such shares are not voting shares.

9.6 Holders of Type A preferred shares have the rights of holders of common shares of the Company provided in Clauses 8.3, 8.6, 8.7, 8.8 and 8.9 herein in cases where Type A preferred shares confer the right to vote on all matters within the authority of the Company's General Meeting of Shareholders.

9.7 Holders of Type A preferred shares have the right to demand that the Company repurchase all or a part of the shares belonging to the shareholder in the cases and through the procedure provided by effective legislation of the Russian Federation.

9.8 Holders of Type A preferred shares that have at least 1 percent of votes at the General Meeting of Shareholders have the right to demand that the Company provides the list of persons entitled to participate in the meeting. The details of documents and postal addresses of shareholders included in such list shall be provided only upon their consent.

9.9 Shareholders holding Type A preferred shares shall have other rights provided by effective legislation of the Russian Federation and herein.

Income on the issued bonds:

In percentage of the par value: Each bond carries 5 coupons. Payments of the income on five

coupons of the issued bonds are made on the following dates:

Coupon income on the first coupon shall be paid on the 95th day from the start of placement of the bonds. Coupon income on the second coupon shall be paid on the 186th day from the start of the bonds placement.

Coupon income on the third coupon shall be paid on the 368th day from the start of the bonds placement.

Coupon income on the fourth coupon shall be paid on the 550th day from the start of the bonds placement.

Coupon income on the last coupon shall be paid simultaneously with redemption at maturity on the 732nd day from the start of the bonds placement.

If the date of the end of the coupon period of the bonds coincides with public or bank holiday payment of the amounts due shall be made on the first business day following the holiday. The bond owner is not entitled to demand any late payment charges to be accrued or any other compensation to be paid in the event of such delayed payment.

The starting date of the first coupon period is the starting date of the placement period of the bonds. The starting date of all the following coupon periods is the payment date of the preceding coupon income.

The end of each of the coupon periods is the payment date of the income on that coupon.

a) Determination of the yield on the first coupon. The yield on the first coupon of the bonds shall be set forth by a decision of the issuer's Board of Directors after the state registration of the bond issue, but not later than five business days before the start of the bonds placement.

b) Determination of the yield on the second and the rest of the coupons. The yield on the remaining coupons of the bonds shall be determined by a decision of the issuer's Board of Directors and reported to Securities Section of MICEX according to the Section's rules not later than at least ten business days before cancellation of the preceding coupon and informing of other potential buyers via public media.

c) Calculation of the amount payable on each coupon is to be performed according to the following formulae:

$$K_j = C_j * Nom * (T(j) - T(j-1)) / 365 / 100 \%$$

where:

j – coupon period number, j=1,2,3,4,5;

K_j – amount payable on coupon for each bond;

Nom – the bond par value;

C_j – coupon yield in percent of coupon number j as determined by the decision of the issuer's Board of Directors;

T(j-1) – starting date of the jth coupon period;

T(j) – end date of the jth coupon period.

The amount payable is calculated with accuracy of RUR0.01 (round-off follows the rules of mathematics).

Coupon yield payable on the first coupon was set by the issuer's Board of Directors on October 29, 2001 at 22%.

Coupon yield payable on the second coupon was set by the issuer's Board of Directors on October 29, 2001 at 21.5%.

Coupon yield payable on the third coupon was set by the issuer's Board of Directors on October 29, 2001 at 20.5%.

The issuer is entitled to appoint additional payment agents and cancel such appointments of agents. An official announcement of the said appointments shall be published by the issuer at least 10 (ten) business days before such appointments or cancellations take effect in the dailies Daily News. Podmoskovie and Vedomosti.

Redemption and income payments on the bonds are made in the local currency of the Russian Federation by bank transfer in favor of the bonds owners to assigned customers of NDC. A bond owner who is not an assigned customer of the NDC shall authorize a bondholder who is an assigned customer of the NDC to receive amounts due in respect of income payment and redemption of bonds.

Payments of bonds redemption and/or income payments on bonds shall be made to assigned customers of the NDC in favor of bonds owners as registered at 6.45 pm Moscow time on the business day preceding the seventh business day before the due date of income payments on the bonds and/or bonds redemption (hereinafter the date is referred to as the "record date"). As of the record date for bonds redemption the Depository shall stop all transactions related to bond trading on the depo accounts until the bonds redemption.

As of the record date for coupon income payment (except payments of income on the last coupon) the Depository shall stop on the depo accounts all transactions related to bond trading. The Depository shall resume accounting for transactions related to bond trading on depo accounts on the payment day of the relevant coupon income.

Not later than 3 business days before maturity or date of income payment the Depository shall provide the Issuer and/or its payment agent a list of the bonds owners as finalized on the record date. The list shall contain the following data:

- a) the full name of the bondholder;*
- b) number of bonds as stated on the depo account of the holder;*
- c) the holder's location and postal address;*
- d) the holder's bank details:*
 - the holder's account current*
 - the holder's individual taxpayer number*
 - the holder's bank name*
 - correspondent account number of the holder's bank*
 - bank identification number of the holder's bank.*

It is the holder's duty to check the accuracy and timeliness of the bank details submitted by him to the NDC. In the event that these bank details were not submitted by the holder to the NDC on time, the Issuer shall not be responsible for any delayed payments on the bonds.

Not later than 2 business days before maturity and/or income payments on the bonds the Issuer shall remit the necessary amounts to the payment agent. Based on the list of holders provided by the Depository the payment agent calculates the amounts payable to each bondholder authorized to

receive redemption and income payments.

At maturity and/or on the date of income payments on the bonds the payment agent shall remit the amounts due to the accounts of the bondholders in favor of the bond owners.

In the event that one person is authorized to receive redemption amounts and income payments on the bonds by several bond owners the person in question shall receive the total amount without break down on each of the authorizing bond owners.

There is no redemption before maturity.

Terms and arrangements of the redemption: **Terms and arrangements of the redemption at maturity:**

The bonds redemption shall be effected by a payment agent (hereinafter the payment agent) pursuant to the order of the bond issuer.

The duties of the payment agent shall be performed by:

Private Joint-Stock Company Raiffeisenbank Austria

Registered office at: 17/1 Troitskaya Street, Moscow, 129090, Russia;

Postal address: 17/1 Troitskaya Street, Moscow, 129090, Russia;

General license #3292, issued February 9, 2001.

The issuer is entitled to appoint additional payment agents and cancel such appointments of agents. An official announcement of the said appointments shall be published by the issuer at least 10 (ten) business days before such appointments or cancellations take effect in the dailies Daily News. Podmoskovie and Vedomosti.

Redemption payments on the bonds are made in the local currency of the Russian Federation by bank transfer to depositors of NDC performing central storing of the bonds in favor of bond owners. A bond owner who is not a depositor of the NDC may authorize a bondholder who is a depositor of the NDC to receive amounts due in respect of income payment and redemption of bonds.

Bonds redemption payments shall be made to depositors of the NDC in favor of bonds owners as registered at the end of business day of the NDC, preceding the seventh business day before the

bonds redemption date (hereinafter the date is referred to as the “record date”)

Not later than 3 business days before redemption the NDC shall provide the Issuer and/or its payment agent a list of the bonds owners as finalized on the record date. The list shall contain the following data:

- a) **the full name of the bondholder;**
- b) **number of bonds as stated on the depo accounts of the holder in question;**
- c) **the holder’s location and postal address;**
- d) **the holder’s bank details:**
 - **the holder’s account current**
 - **the holder’s individual taxpayer number**
 - **the holder’s bank name**
 - **correspondent account number of the holder’s bank**
 - **bank identification number of the holder’s bank.**
- e) **The taxpayer status of the bondholder (resident, non-resident with a permanent representative office in the Russian Federation, non-resident without a permanent representative office in the Russian Federation, etc.).**

It is the holder’s duty to check the accuracy and timeliness of the bank details submitted by him to the NDC. In the event these bank details were not submitted to the NDC or were not provided on time, these obligations shall be met toward a person who requested to fulfill the obligations and recognized as the bondholder on the date of filing the request. The issuer shall perform the obligations on bonds as per the data of the NDC.

Not later than 2 business days before maturity the Issuer shall remit the necessary amounts to the payment agent account.

Based on the list of bondholders provided by the Depositary the payment agent calculates the amounts payable to each bondholder authorized to receive redemption payments on the bonds.

At bond maturity the payment agent shall remit the amounts due into the accounts of the bondholders in favor of the bond owners.

In the event that one person is authorized to receive redemption amounts on the bonds by several bond owners the person in question shall receive the total amount without break down on each of the bond owners.

There is no redemption before maturity.

Bonds are issued in a documented form by execution of a bond certificate for the whole issue to be kept centrally at Not-for-profit partnership National Depositary Center (“NDC”) and not to be handed over to bondholders. Records of transactions involving the bonds are entered by Not-for-profit partnership National Depositary Center centrally keeping the bond certificate, and by depositaries in the capacity of a depositor with respect to the Center (collectively “the depositaries”). Rights related to bonds kept and/or recorded by the depositaries are deemed transferred as of the moment of entering by depositaries of a relevant record on the customer’s depo account. Upon the bond redemption bond certificates are withdrawn from custody and cancelled.

Depositary must conduct transactions involving the customers’ securities only upon an order of these customers or duly authorized representatives thereof, including account trustees, and in timelines set out by the deposit agreement, concluded by and between the bondholder and NDC or other depositary – depositor of NDC (“the deposit agreement”). A depositary shall make records on the customer depo account only subject to availability of documents serving as a legal basis for making such entries according to applicable effective legislation, other regulations and statutes. A basis for making records on a customer’s depo account is provided by:

- the order of customer or duly authorized by him person, including account trustee, meeting the requirements stated in the deposit agreement;

in the event of transfer of ownership rights for securities resulting not from civil legal deals – documents confirming the transfer of ownership rights for the securities in accordance with applicable law and other regulatory legal acts.

Depositaries shall register any lien of a customer’s securities by pledge and other third party rights as provided for in the deposit agreement and Russian Law.

The rights on the securities kept by and/or being accounted for in a depositary are deemed transferred as of the moment of making the relevant record on the customer’s depo account.

Nevertheless, if the relevant record is missing from the customer’s depo account the affected person is not deprived of the possibility to prove his/her rights for the securities in question based on other evidence.

In order to exercise a customer’s rights for his/her securities the depositary shall:

undertake all measures as provided for by Federal Laws and other legal acts to protect rights of a bona fide purchaser on the owned by him securities and to prevent any seizure of securities owned by a bona fide purchaser.

To ensure transfer upon a customer’s order and pursuant to the deposit agreement of securities to depo accounts specified by the customer both with the depositary in question and other depositary.

Upon cancellation of the bonds of the issue by the issuer the Depositary shall:

- write off the bonds from depo accounts;

- remove the bond certificate from custody and cancel it.

terms and conditions of redemption of the issued securities

Redemption payments of the issued bonds are made by remittance in Russian Roubles.

Terms and conditions of redemption of the issued bonds including redemption period.

Bond redemption shall be executed by a payment agent upon the issuer's order ("the payment agent"), the functions being performed by:

Joint-Stock Commercial Bank Moscow Business World (Moskovski Delovoy Mir) (Public Joint-Stock Company),

- c) **the location and postal address of the person authorized to receive bond redemption amounts;**
- d) **the bank details of the person authorized to receive bond redemption amounts:**
 - **account number;**
 - **the name of the bank with which the account is opened;**
 - **the holder's individual taxpayer number;**
 - **correspondent bank account number;**

- **bank identification number of the holder's bank.**

- e) **Taxpayer Identification Number of the person authorized to receive bond redemption amounts;**
- f) **tax status of the person the person authorized to receive bond redemption amounts (resident, non-resident with a permanent representative office in the Russian Federation, non-resident without a permanent representative office in the Russian Federation, etc.)**

Bond owners, their duly authorized persons, including NDC depositors are responsible for timely and accurate provision of bank details to NDC. If the information is not available or provided to NDC after time, such obligations are performed toward the person who filed the request to perform the obligation and recognized as a bond owner as on the date of filing the request. The issuer shall perform obligations under the bond issue based on NDC data.

Not later than on the 2 (second) business day before bond redemption the Issuer shall remit the necessary amounts to the payment agent. Based on the list of bond owners and/or nominal holders, provided by NDC, the payment agent calculates the amounts payable to each person listed in the list of bond owners and/or nominal holders.

At the bond redemption date the payment agent shall remit as required the necessary funds into accounts of persons authorized to receive bond redemption amounts listed in the list of bond owners and/or nominal holders.

In the event that one person is authorized to receive bond redemption amounts by several bond owners the person in question shall receive the total amount without breakdown on each of the authorizing bondholders.

Payment procedure for coupon (interest) payments:

Income payments due on the bonds of the issue on all coupons are made in the currency of the Russian Federation by remittances to NDC depositors. A bond owner who is not an NDC depositor, is entitled to authorize a bond owner – NDC depositor to receive amounts payable in the respect of bond income. Income payments on bonds shall be made in favor of the bond owners who own bonds as at the close of business of NDC on the day, preceding the 6 (sixth) business day before the income payment day (henceforth the “record day” to finalize the list of bondholders). Performance of the obligations toward a bond owner listed in the list of bond owners is deemed appropriate, including the situation where bonds were reassigned (alienated) after the bond owners record date. Not later than 3 (three) business days before the bond income payment date NDC shall provide the Issuer and/or its payment agent a list of the bondholders as finalized on the bondholders record date. The list shall contain the following data:

- a) *the full name of the bondholder;*
- b) *number of bonds as stated on the depo accounts of the relevant bondholder;*
- c) *the location and postal address of the bondholder;*
- g) *the bank details of the bondholder:*
 - *account number of the bondholder;*
 - *the name of the bank with which the account is opened;*
 - *the holder's Individual Taxpayer Number (INN);*
 - *correspondent bank account number;*
 - *bank identification number of the holder's bank.*
- h) *tax status of the NDC depositor (resident, non-resident with a permanent representative office in the Russian Federation, non-resident without a permanent representative office in the Russian Federation, etc.)*

A bondholder is responsible for timely and accurate provision of bank details to NDC. If the information is not available or provided to NDC after time, such obligations are performed toward the person who filed the request to perform the obligation and recognized as a bond owner as on the date of filing the request. The issuer shall perform obligations under the bond issue based on NDC data.

Not later than 2 (two) days before bond income payment date the Issuer shall remit the necessary amounts to the payment agent.

Based on the list of bondholders, provided by NDC, the payment agent calculates the amounts payable to each bondholder authorized to receive bond income payments.

On the bond income payment day the payment agent shall remit as required the necessary funds into accounts of bondholders in favor of the bond owners.

In the event that one person is authorized to receive bond income payments by several bond owners the person in question shall receive the total amount without breakdown on each of the authorizing bondholders.

If the redemption day is a public holiday, whether a state public holiday or a non-operational day for making settlements, the payment of the payable amount shall be effected on the first business day following the holiday. A bond owner is not entitled to seek interest accrual or any other compensation for such delayed payment.

8.8 Taxation of income incurred on placed and to be placed issued securities

Taxation of income received from participation in the organization in the form of dividends

Taxation of income incurred from participation in an organization in the form of dividends follows stipulations of the effective legislation. According to Article 43 of the Tax Code of the Russian Federation (the TC RF) for the taxation purposes dividends are recognized as any income received by a shareholders (participant) from distribution of profits left after taxation for shares (interest) owned by the shareholder (participant) pro rata to shares (interests) of shareholders (participants) in the charter (contributed) capital of the organization in question. In accordance with items 12 subitem 2 Article 149 of the TC RF VAT shall not be levied on income received from securities transactions.

1) Taxation of natural persons' income

Income incurred from sources in the Russian Federation is dividends and interest received by natural persons from a Russian organization. According to Item 4 Article 210 of the TC RF the tax base for dividends is determined as the monetary value of such income. Tax rate levied in dividend income are set out in Article 224 of the TC RF, viz.:

- at 30 % of all income received by natural persons who are not tax residents of the RF (item 3 of Article 224);
- at 6 % with respect to income incurred from having interests in organizations by natural persons who are tax residents of the RF (item 4 of Article 224).

Calculation and payment of taxes on income from dividends received by individuals from a Russian organization are carried out by the organization – payer or the source of the income received by the taxpayer. Such organizations are called tax agents according to item 1 of Article 226 of the TC RF. The tax agent calculates the payable tax separately for each accrued income item payable to the income earner (item 3 of Article 226, the TC RF). Pursuant to item 4 of Article 226 of the TC RF tax agent shall deduct the tax from the income earned when making the payment. The tax amounts are deducted by the tax agent from any funds payable by the tax agent to the taxpayer or to his/her order, provided that the deducted amount does not exceed 50% of the paid out amount. Tax agents shall remit the calculated and deducted tax amounts not later than the actual date of receiving the cash in the bank to pay the earned income, and the date of remitting income from taxpayers' bank accounts to the taxpayer's bank account or third party's bank account on the taxpayer order (item 6 of Article 226 of the TC RF). As stipulated by item 7 of Article 226 of the TC RF the total tax amount calculated and deducted by the tax agent from a taxpayer for which the tax agent is recognized as an income source shall be paid at the point where the tax agent is registered with the tax authorities, and for organizations with separately located units both at their domicile and at the location of each its separate unit. The tax amount payable to the local budget at the locality of the separate unit shall be calculated based on the taxable income amount earned and paid to the employees of these separately located units.

2) Taxation of legal entities

Special features of tax base determination for income of legal entities received from having interests in other organizations are set forth in Article 275 of the TC RF.

According to item 3 of the said article in the case of dividend payment to a foreign organization the tax base for the taxpayer – dividend recipient is defined as the sum of the payable dividend and a

15% tax rate shall be applied (item 3 of Article 284 of the TC RF).

As far as taxpayers – Russian organizations are concerned, if the income source is a Russian organization the latter is recognized as the tax agent and shall determine the tax amount pursuant to provisions of item 2 of Article 275 of the TC RF. The tax amount to be deducted from the income of a taxpayer – dividend recipient shall be determined by the tax agent based on the total tax amount calculated as set out in item 2 of Article 275 and share of each taxpayer in the total dividend amount. The total tax amount is determined as the tax rate set forth in subitem 1 item 3 of Article 284 of the TC RF (6%) multiplied by the difference between the dividend amount to be distributed between the shareholders (participants) in the current tax period less the dividend amount payable by the tax agents to foreign entities in the current tax period and the sum of dividend amounts received by the tax agents itself in the current reporting (tax) period and the preceding reporting (tax) period unless these dividend amounts were not taken into account earlier for the calculation of a taxable dividend income. If the difference is negative there is no tax liability and no compensation from the relevant budget shall be paid.

Tax on dividends earned on shares and payable to unit investment funds is neither calculated, no deducted. A unit investment fund is a separate property holding entity which is not a legal entity. Subject to a document confirming that relevant shares were purchased by a unit fund managing company the tax on income received as dividends on these shares shall not be deducted.

According to par. 1 item 4 of Article 287 the tax on income paid to taxpayers as dividends deducted when the income was paid, shall be remitted to the relevant budget by the paying tax agent within 10 days from making the payment. Tax on income received as dividends shall be credited to the Federal budget account (item 6, Article 284 of the TC RF).

Bond income taxation

According to subitem 12 item 2 of Article 149 of the Tax Code of the Russian Federation VAT is not levied on operations related to circulation of placed bonds except services of intermediaries.

a) Taxation of legal entities-resident of the RF with respect to transactions involving the issuer bonds. Profit tax is levied on income of legal entities earned from transactions involving bonds issued by the issuer.

Income derived from sources in the Russian Federation is:

- receipts from exercising property rights (proceeds from realization);
- not related to realization proceeds as interest earned on securities and other debt obligations.

Profit (loss) of bond sale is defined as the difference between the sale price and purchase price taking into account expenses incurred for brokerage services related to sale and purchase deals.

A tax rate of 24% is set for profit tax with a tax amount calculated at the tax rate of 6% being credited to the federal budget; a tax amount calculated at 16% tax rate being credited to the budget of the relevant constituent entities of the Russian Federation, and a tax amount calculated at 2% tax rate being credited to the local budgets.

Legal entities – residents of the Russian Federation shall themselves calculate and effect payments of the profit tax on proceeds from operations with bonds based on accounting information and reports.

Losses incurred from securities operations involving securities traded on the organized securities market for the previous tax period (previous tax periods) preceding the current may be posted to tax base reduction resulting from operations involving sales of the relevant type of securities.

Losses incurred from securities operations involving unlisted securities or securities not traded on the organized securities market can be posted to reduction of income derived from sale of this type of securities.

Income derived from securities operations is recognized as proceeds realized from securities sale pursuant to the sale contract. Income earned from interest bearing (coupon) securities shall be posted taking into account special provisions set out in item 2 of Article 280 of the TC RF, i.e. a taxpayer income from sale or other disposal of bonds (including redemption) is calculated based on the sale price or price of other disposal deal of bonds and amount of earned interest (coupon) paid by the buyer to the taxpayer and interest (coupon) paid to the taxpayer by the issuer. Amount of interest (coupon) already

factored into taxation earlier shall not be included in the taxpayer income from sale or other disposal of securities.

Losses from securities sale-purchase deals shall be transferred for 10 years according to Article 283 of the TC RF, but the total transferred loss in no reporting (tax) period can exceed 30% of the tax base for securities deals.

Income and loss date of bond deals according to Article 329 of the TC RF is the realization date of the securities.

Concerning bonds traded on the organized securities market for taxation purposes the realization price is the actual price of realization or other disposal of bonds if the price is in the interval between the minimal and maximal prices of deals (price spread) with the relevant securities registered by the organizer of trading at the date of the deal execution. If the actual price of realization or other disposal of bonds is lower than the minimal price of deals with this type of securities the difference between the minimal price of the deals and purchase price is taken for the taxation purposes. If at the stated date deals with securities of one and the same type were made through two or more organizers of trading on securities market the taxpayer is entitled to select himself the trade organizer whose price spread should be chosen by the taxpayer for taxation purposes.

Expenses of sale (other disposal) of securities are defined based on the acquisition of the securities, acquisition expenses, sale expenses, accumulated interest (coupon) paid by the taxpayer to the securities seller; earned interest (coupon) amounts already taken into account for taxation purposes earlier shall not be included in the expenses according to provisions of Article 272 of the TC RF. Expenses related to acquisition of securities before sale do not result in tax base decrease. Proceeds derived from sale (realization) of securities (at the reporting date) shall be reduced by the amount of expenses related to the acquisition and sale (realization) of the securities removed from the balance sheet.

b) Income taxation of legal entities non-residents of the Russian Federation with respect of transactions involving the issuer bonds

Tax levied on proceeds from transactions involving the issuer bonds and conducted by non-residents of the Russian Federation shall be calculated and paid by the income source in the currency of the payment at the rate of 20% on effecting each payment. If coupon income is paid by the payment agent the latter is the tax agent for the purposes of calculation, deduction and payment of tax to the budget.

If bond transactions are covered by international treaties on avoiding double taxation non-residents of the RF may pay taxes levied on proceeds derived from bond deals pursuant to provisions of such treaties.

b) Taxation of natural persons-residents of the RF with respect to income from deals involving the issuer bonds.

Proceeds derived from deals involving the issuer bond by individuals are:
- dividends and interest received from a Russian organization, as well as interest received from individual entrepreneurs and/or foreign organization in connection with operations of its permanent representative office in the RF;
- proceeds from sale (realization) in the Russian Federation of shares or other securities and contributed capital in the charter capital of organizations.

Pursuant to item 3 of Article 214.1 of the Tax Code of the Russian Federation income (loss) related to sale-purchase deals of securities is defined as the sum of proceeds from transactions with securities of the relevant type closed in the tax period, less the relevant expenses.

Income (loss incurred) from securities sale-purchase deals is determined as the proceeds derived from sale of securities less expenses on acquisition, sale and keeping of the securities, actually incurred by the taxpayer (including expense reimbursed to the professional participant of the securities market) and

confirmed by documents. Such expenses include:

- amounts paid to the seller according to the contract;
- payment for services rendered by the depositary;
- commissions to professional participants of the securities market;
- exchange fee (commission);
- payment for services of the registrar;
- other expenses directly connected with purchase, sale, and storage of securities paid for services rendered by professional participants of the securities market performing their business duties.

Income from a sale-purchase deal of securities traded on an organized securities market shall be reduced by the amount of interest paid for using cash funds raised for closing the securities sale-purchase deal calculated on the basis of effective refinancing interest rate set by the Central Bank of the Russian Federation.

For deals with listed securities losses are defined taking into account the limits of the relevant securities market price fluctuations.

When a taxpayer expenses on acquisition, sale, and storage of securities cannot be posted as acquisition, sale, and storage expenses for specific securities these expenses shall be allocated pro rata the assessed value of the securities for which the expenses are allocated. The assessed value of the securities is defined at the date the expenses were incurred.

In the event that the taxpayer's expenses cannot be supported by source documents the taxpayer is entitled to make use of property tax allowance (tax rebate) as provided for in subitem 1 of tem 1 of Article 220 of the TC RF (As applied for the proceeds derived by the taxpayer from a securities sale held by the taxpayer for at least 3 years, but not exceeding RUR125 thousand).

The tax allowance or rebate to the amount of actually incurred and substantiated by documents expenses is applicable for calculation and payment by a taxpayer of tax to the budget at the tax payment source (a broker, trust manager, or other person carrying out operations based on an agency deed or other similar deed in favor of the taxpayer), or upon termination of a tax period with filing a tax declaration with the tax authorities.

If tax calculation and payment are carried out at the tax payment source (by a broker, trust manager, or other person carrying out operations based on an agency deed or other similar deed in favor of the taxpayer), in the tax period, the property tax allowance or tax rebate is provided by the source of the income payment with a possibility of subsequent settlement upon termination of the tax period and filing a tax declaration with the tax authorities.

If there are several sources if income payments the property tax allowance is provided by only one income payment source chosen by the taxpayer.

Tax base for securities sale-purchase deals is defined as the income derived over the tax period from closed securities deals.

A loss incurred as a result of deals with listed securities closed over the tax period in question reduces the tax base for sale-purchase deals of the given type of securities.

According to item 1 Article 224 of the Tax Code of the Russian Federation income received as coupon payments, bond redemption or sale of bonds before maturity is tax at 13% tax rate on income received by RF residents.

d) Taxation of income of natural persons – non-residents of the RF with respect to deals involving the issuer bonds.

A tax rate at 30% (thirty per cent) is set for income received by natural persons – non-tax residents.

The tax base for securities sale-purchase deals is defined at the tax period end. Calculation and payment of the tax are carried out by the tax agent at the tax period end or when making cash payment to the taxpayer before the current tax period end.

For the purpose of this paragraph by payment of funds is meant cash payment, remittance of funds to a natural person's bank account or into a third party's bank account pursuant to the natural person's order.

If the tax agent is unable to deduct from a taxpayer the calculated tax amount the tax agent shall within a month as of the occurrence of such event advise the tax authorities at its domicile of the inability to deduct the tax and of the tax amount it failed to deduct from the taxpayer income. The tax is then paid pursuant to Article 228 of the Tax Code of the Russian Federation.
