1.3. Data on the issuer's auditor(s):

Full company name: **HLB Vneshaudit Closed Joint Stock Company**

Abbreviated company name: **HLB Vneshaudit CJSC**

Location of the auditor company: **123610, Moscow, KARNopresnenskaya embankment, 12, entrance 3, office 701**

Phone and fax numbers: **(495) 967 04 95, 967 04 97**

e-mail: info@vneshaudit.ru

Number, date of delivery and date of expiry of the license for realization of the auditor activity: **license for realization of auditor activities E 000548; issued on 25 June 2002 by The Ministry of Finance of the Russian Federation, valid till 25 June 2012.**

The financial years, for which the auditor held independent check of book keeping and financial (accounting) statements of the issuer: the financial years **2005, 2006, and 2007.**

Factors which may influence independence of auditors from the issuer, including the information on presence of the essential interests connecting auditors (officials of auditors) with the issuer (officials of the issuer): none.

Presence of stakes of auditors (officials of auditors) in the issuer's authorized capital: none;

The issuer did not grant borrowed funds to auditors (officials of auditors);

Presence of close business mutual relations (participation in promotion of issuer's products (services), participation in joint enterprise activities, etc.), and family ties between the issuer and auditors: none;

The issuer's officials who are simultaneously auditors' officials: none.

The measures undertaken by the issuer and auditors to decrease the specified factors:

The main measure undertaken by the issuer to decrease the issuer and the auditor's dependence from each other is a process of thorough examination of the auditor's candidate to ensure its independence from the issuer. The auditor is completely independent from the issuer's governance body according to the requirements of Article 12 of the Federal Law "On Auditor Activity"; the amount of remuneration of the auditor is not made dependent on the results of the check held.

The procedure of the issuer's auditor selection:

The procedure of the tender connected with selection of the auditor, is not applied now:

Under the Decision of OJSC "MOESK" as of 13 December 2006 (Minutes 37 as of 15 December 2006), the Company created the Audit Committee under the Board of Directors of OJSC "MOESK", the competence of which among other issues includes "issue of preparation for the Company Board of Directors of the recommendations concerning a nominee of the Company Auditor, which shall be elected from among the independent auditors possessing high professional reputation, for the subsequent approval of this nominee by the Company General Shareholder Meeting; development of recommendations on the conditions of carrying out of the competitive selection of the Company Auditor, participation in carrying out the competitive selection of the Company auditor in case of its carrying out".

The procedure of nomination of the auditor, including the governance body, making the corresponding decision:

According to item 10.2., Article 10, the issuer's Charter, the competence of the issuer's general meeting of participants includes:

«approval of the Company Auditor».

According to item 15.1. of Article 15 of the issuer's Charter, the competence of the issuer's Board of Directors includes the item:

"Recommendations to the Company General Shareholders Meeting on the amount of remuneration and compensation paid to members of the Company Checkup Committee and definition of the amount of payment for the Auditor's services".

The information on the works held by the auditor within the limits of special auditor tasks:

The Auditor did not hold works within the limits of special auditor tasks.

The procedure of definition of the auditor's remuneration amount:

According to item 23.9. of Article 23 of the issuer's Charter, the amount of payment for the auditor's services is defined by the Board of Directors.

Actual amount of the auditor's remuneration paid by the issuer to the auditor following the results of each financial year, for which the auditor held an independent check of the issuer's book keeping and financial (accounting) statements:

For the year 2005: RUR 280,000, VAT excluded

For the year 2006: RUR 280,000, VAT excluded

For the year 2007: RUR 2,100,000, VAT excluded

There are no deferred and back payments for services rendered by the auditor

In the 3rd quarter 2007, the 2005 and 2006 audit reports on the financial reporting of OJSC "MOESK" were prepared in accordance with the International Financial Reporting Standards.

The auditor who carried out an audit of the financial reporting of OJSC "MOESK" for 2005 and 2006 prepared according to the International Financial Reporting Standards:

The full company name: ***KPMG Limited***

The shortened company name: ***KPMG Limited***

The location of the auditor organization:

The Moscow representative office: 119019, Moscow, Gogolevsky boulevard, 11

The auditor rendered to the issuer the service on carrying out of an audit check of the financial reporting of OJSC "Moscow United Electric Grid Company" for 2005 and 2006 prepared according to the International Financial Reporting Standards.

1.4. Data on the issuer's appraiser:

In the 1st quarter 2007, the issuer involved the appraiser for definition of the market value of the fixed assets, in relation to which the issuer carried out the reassessment of the value reflected in subitem 3.6.1 of the quarterly report.

The full company name of the appraiser: ***Closed Joint-Stock Company "CIS Deloitte & Touche"***

The shortened company name of the appraiser: ***CJSC "CIS Deloitte & Touche"***

The location of the appraiser: ***125009, Moscow, Vozdvizhenka street, 4/7, bld. 2, Business Center "Mokhovaya"***

The number of the license for realization of valuation activities: ***004646***

Telephone and fax number: ***(495) 232-99-66, 203-96-47, fax (495) 956-47-00***

The Internet website used by the financial adviser for disclosing the information on the issuer: ***http://www.broker.open.ru***

The number, date of issuance and validity of the license for realization of professional activities on the securities market; the agency that granted the specified license:

The license of the professional participant of the securities market for realization of broker activities No. 177-06097-100000 as of 28 June 2002; issued for an indefinite time; issued by the FCSM of Russia;

The license of the professional participant of the securities market for realization of dealer activities No. 177-06100-010000 as of 28 June 2002; issued for an indefinite time; issued by the FCSM of Russia

The services rendered by the adviser:

- Rendering assistance to the issuer at compilation and registration of the issuer's prospectus for securities;
- Signing the issuer's Prospectus for Securities;
- Rendering consultancies to the issuer
 - on the issues of information disclosure;
 - other issues connected with issuance of the issuer's securities.

The financial adviser for the securities market, and other persons rendering consulting services to the issuer, which are connected with the issuance of securities (bonds) and who signed the prospectus for securities were not involved by the issuer.

1.6. Data on other persons who signed the quarterly report:

Chief Accountant of the issuer: *Lydmila Alekseevna Sklyarova*

Contact tel.: *(495) 980-1294*

Fax: *(495) 980-1266*

There are no other persons who signed the issuer's quarterly report and who were not mentioned in the above items of this section:

II. Main information on the issuer's financial and economic standing

2.1. Indicators of the issuer's financial and economic activities

Indicators of the issuer's financial and economic activities for the past 5 completed financial years are not specified in connection with the fact that the issuer was registered as a legal entity on 01.04.2005. The indicators of the financial and economic activities for as of the end of the years 2005, 2006 and 2007 and at the date of the end of the first quarter of the current financial year are specified. The indicators describing the issuer's financial standing:

<i>Indicator</i>	<i>2005</i>	<i>2006</i>	<i>2007</i>	<i>Q 1 2008</i>
<i>Net asset value of the issuer, RUR '000</i>	<i>27,135,086</i>	<i>30,863,843</i>	<i>48,930,597</i>	<i>51,028,413</i>
<i>Relation of the borrowed funds to the capital and reserves, %</i>	<i>19.20</i>	<i>57.20</i>	<i>93.96</i>	<i>100.45</i>
<i>Relation of the short-term liabilities amount to the capital and reserves, %</i>	<i>18.69</i>	<i>25.48</i>	<i>60.88</i>	<i>68.86</i>
<i>Cover of payment for debt service, %</i>	<i>43.54</i>	<i>38.17</i>	<i>36.38</i>	<i>11.35</i>
<i>Level of the debt overdue, %</i>	<i>1.64</i>	<i>0</i>	<i>0</i>	<i>0</i>
<i>Receivables turnover, times</i>	<i>5.51</i>	<i>3.25</i>	<i>1.39</i>	<i>0.67</i>
<i>Share of dividend in the profit, %</i>	<i>3.86</i>	<i>1.61</i>	<i>*</i>	<i>*</i>
<i>Labour productivity, RUR '000/person</i>	<i>1,204.68</i>	<i>2,428.20</i>	<i>3,762.01</i>	<i>1,704.74</i>

Depreciation to the amount of proceeds, %	8.47	6.96	11.11	7.45
---	------	------	-------	------

** the indicator "Share of dividend in the profit" for 2007 will be calculated after approval by the annual general shareholders meeting of the final amount of the dividend.*

The issuer's net assets as of the date of the end of the year 2007 equaled RUR 48,930,597 thousand. The sizable amount of net assets is explained by the issuer's activities peculiarities. The primary business of OJSC "MOESK" is rendering paid services on transmission of electric energy to the city of Moscow and the Moscow region. The company structure includes more than 600 high-voltage substations (they belong to the company on the basis of a right of ownership), over 16 thousand km of overhead and cable high-voltage transmission lines, nearby 60 thousand km of distribution grids. The year 2007 saw a growth of the issuer's net asset value in comparison with 2006 (by more than 58.54%), which is a positive factor.

The substantial growth of the issuer net asset value is explained reassessment of the fixed capital of OJSC "MOESK" performed at 01.01.2007, input of fixed capital in operation and growth of the Company's Investment Program in 2007, the volume of which is essentially more than in 2006 and is caused by a necessity of liquidation of deficiency of electric capacity in the Moscow region.

At the date of the end of the 1 quarter 2008, the issuer's net asset value was RUR 51,028,413 thousand.

As from the date of the state registration of the issuer (01.04.2005) up to the date of the end of the first quarter 2008, the issuer's authorized capital remained constant. As of 31.03.2008 the issuer's authorized capital was RUR 14,124,679,850. The structure of the issuer's authorized capital has no preferred shares.

The additional capital of OJSC "MOESK" for 2007 increased due to reassessment of the fixed assets by the group of "machine and equipment" and totaled RUR 23,401,503 thousand at 01.01.2008; the reassessment was held in the beginning of the year 2007.

As of the date of the end of the 1 quarter 2008, the issuer's additional capital was RUR 23,401,503 thousand.

The issuer uses both own sources and short-term and long-term sources of extra financing.

The "Capital and Reserves" article takes up a significant space in the structure of the issuer's balance. It consists, according to the issuer's reporting, of the authorized, additional capital and unallotted profit. The share of the "Capital and Reserves" in the structure of the balance is 51.56%. Long-term loans and credits are 12.61% of the balance sheet assets at the date of the end of the year 2007.

As of the date of the end of the 1st quarter 2008, the share of the "capital and reserves" in the balance sheet structure is 49.89%. The long-term loans and credits are 11.57 %.

The indicators of the relation of the borrowings to the capital and reserves and the relation of short-term liabilities to the capital and reserves are indicators of financial dependence. The less these indicators are, the less the company financial lever is; this proves a greater financial independence of the company.

The indicator of the relation of the borrowings to the capital and reserves at the date of the end of the year 2007 was 93.96%. The increase in the indicator of the relation of the borrowings to the capital and reserves in comparison with the similar period of the previous year is connected with a growth of long-term obligations in the form of attraction of the long-term extra capital for the purposes of the investment activities.

Relation of the borrowed funds to the capital and reserves at the end of the 1st quarter 2008 was 100.45%.

The indicator of the relation of the short-term obligations amount to the capital and reserves shows dependence of the Company from short-term borrowings.

At the date of the end of the year 2006, the indicator of the relation of the amount of short-term obligations to the capital and reserves was fixed at the level of 25.48 %, and in 2007 - 60.88 %. A growth of short-term obligations of the issuer is not a negative factor. Occurrence of short-term accounts payable is caused by advance payments received under contracts of engineering connection.

The short-term debts will not be repaid by money resources; they will be closed after performance of works on connection of consumers.

At the date of the end of the 1 quarter 2008 the indicator of the relation of the amount of short-term obligations to the capital and reserves was fixed at the level of 68.86 %.

The indicator of covering of payments for servicing debts during the considered period is stable enough and is around 40%, which characterizes the ability of the issuer to cover the obligations using net profit as follows: approximately RUR 40 of the covering by net profit of the reporting period and the depreciation charged in the reporting period fall to RUR 100 of obligations (in view of interest per obligations).

The indicator of a covering of payments for servicing debts at the date of the end of the 1 quarter 2008 was 11.35 %.

As of the date of the end of the 2007 and 1 quarter 2008, the issuer has no delayed debts.

The positive factor describing financial and economic activity of the Company is the increase in labour productivity in 2007 in comparison with the similar period of previous year.

In order to calculate the specified indicators, the method recommended by the Regulations for the Information Disclosing by Issuers of Equity Securities was used, which was approved by Order of Federal Financial Markets Service as of 10 October 2006 No. 06-117/pz-n (06-117/n3-n).

Net assets are calculated according to the procedure of estimation of the net asset value of the joint-stock company approved by Order of the Ministry of Finance of Russia and Federal Commission for the Securities of Russia No. 10n/03-6/pz (No.10n/03-6/n3) as of 29 January 2003.

The issuer's financial standing in the considered period is stable.

2.2. Issuer's market capitalization

The information on the issuer's market capitalization as of the date of the end of the years 2005, 2006, 2007 and as of the date of the end of the reporting quarter of the current financial year.

Since the issuer's shares as of 31 December 2005 on the organized markets were not outstanding, it is not possible to define market capitalization of the issuer under the method provided in Regulations for the Information Disclosing by Issuers of Equity Securities approved by Order as of 16 March 2005 No. 05-5/pz-n (No.05-5/n3-n) (as amended by Order of FFMS of Russia as of 1 November 2005 No. 05-57/pz-n (No.05-57/n3-n)).

For the purposes of this paragraph, the issuer's market capitalization at 31 December 2005 is defined on the basis of the net asset value. Calculation of net asset value of OJSC "Moscow United Electric Grid Company" is made under the method specified in "Procedure of estimation of net asset value of joint-stock companies" approved by Order of the Ministry of Finance of Russia and Federal Commission for the Securities of Russia as of 29 January 2003 No. 10n/03-6/pz (10n/03-6/n3).

The issuer's market capitalization as of 31 December 2005 was RUR 27,135,086 thousand.

The market capitalization of OJSC "Moscow United Electric Grid Company" at the date of the end of the years 2006, 2007 and at the date of the end of the previous completed reporting period:

<i>Period</i>	<i>Quantity of shares, pcs</i>	<i>Market value of one share at the date of the last day of the reporting period, RUR</i>	<i>Capitalization, RUR</i>
---------------	--------------------------------	---	----------------------------

2006	28,249,359,700	2.704	76,386,268,628.80
2007	28,249,359,700	2.460	69,493,424,862.00
1 quarter 2008	28,249,359,700	2.053	57,995,935,464.10

The market capitalization at the date of the end of the years 2006, 2007 and at the date of the end of the reporting period of the current financial year is calculated as product of total of shares of the respective category (type) and the market price of one share disclosed by the securities market trade organizer and defined according to the Procedure of Calculation of the Market Value of Equity Securities and Investment Units of Unit Investment Funds Admitted to be Outstanding through Trade Organizers approved by the Decision of Federal Commission for Securities of Russia as of 24 December 2003 No.03-05/ps (No.03-52/nc).

In order to calculate the Company market capitalization, the data on the market value of one share disclosed by Closed Joint Stock Company "Moscow Interbank Currency Exchange" are used.

The Company's shares are included in "B" quotation lists in Closed Joint Stock Company "Moscow Interbank Currency Exchange" and Open Joint Stock Company "Russian Trading System" Stock Exchange.

2.3. Issuer's liabilities

2.3.1. Accounts payable

The structure of the issuer's accounts payable with a specification of the term for liabilities execution as of the date of the end of the third quarter of the current financial year:

The structure of the issuer's accounts payable for 2007:

<i>Accounts payable name</i>	<i>Maturity term</i>	
	<i>Up to one year</i>	<i>Over one year</i>
<i>Accounts payable to the suppliers and contractors, '000 RUR</i>	<i>8,388,414,184.72</i>	<i>-</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Accounts payable to the personnel of the organization, '000 RUR</i>	<i>1,369,355.66</i>	<i>-</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Accounts payable to the budget and state non-budgetary funds, '000 RUR</i>	<i>1,302,404,641.96</i>	<i>-</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Credits, '000 RUR</i>	<i>7,018,746,575.34</i>	<i>5,779,263,421.83</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Loans, total, '000 RUR</i>	<i>-</i>	<i>6,146,884,952.00</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>including bonded loans, '000 RUR</i>	<i>-</i>	<i>6,146,884,952.00</i>
<i>including bonded loans overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Other accounts payable, '000 RUR</i>	<i>12,840,818,784.64</i>	<i>3,633,148,968.25</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Sum total, '000 RUR</i>	<i>29,551,753,542.32</i>	<i>15,559,297,342.08</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>

No accounts payable overdue are present as of 31.12.2007.

Creditors which owe at least 10 percent of the total amount of accounts payable:

None.

The structure of the issuer's accounts payable for 1 quarter 2008:

<i>Accounts payable name</i>	<i>Maturity term</i>	
	<i>Up to one year</i>	<i>Over one year</i>
<i>Accounts payable to the suppliers and contractors, '000 RUR</i>	<i>12,235,785,259.7</i> <i>2</i>	<i>-</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Accounts payable to the personnel of the organization, '000 RUR</i>	<i>228,210,596.89</i>	<i>-</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Accounts payable to the budget and state non-budgetary funds, '000 RUR</i>	<i>374,703,135.18</i>	<i>-</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Credits, '000 RUR</i>	<i>6,928,531,014.93</i>	<i>5,756,175,301.96</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Loans, total, '000 RUR</i>	<i>-</i>	<i>6,026,465,760.00</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>including bonded loans, '000 RUR</i>	<i>-</i>	<i>6,026,465,760.00</i>
<i>including bonded loans overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Other accounts payable, '000 RUR</i>	<i>14,976,489,661.5</i> <i>1</i>	<i>3,582,929,749.60</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>
<i>Sum total, '000 RUR</i>	<i>34,743,719,668.2</i> <i>3</i>	<i>15,365,570,811.5</i> <i>6</i>
<i>including those overdue, '000 RUR</i>	<i>-</i>	<i>X</i>

No accounts payable overdue are present as of 31.03.2008.

Creditors which owe at least 10 percent of the total amount of accounts payable:

None.

2.3.2. Issuer's credit history

The information on credit contracts operating at 31.03.2008, the amount of the principle debt under which exceeds 5% of the balance sheet assets of OJSC "MOESK" at the date of the last completed quarter prior to making the respective contract as of 30 September 2008 is presented in table 1.

Table 1.

<i>Liability name</i>	<i>Creditor (debtee) name</i>	<i>Amount of the principle debt (RUR '000)</i>	<i>Term of repayment</i>	<i>Presence of a delay in execution of the liability with regard to the payment of the</i>

				<i>amount of the principle debt or interest</i>
<i>Credit line</i>	<i>JSC Bank VTB</i>	<i>3,500,000,000.00</i>	<i>23.06.2008</i>	<i>None</i>

The information on the credit contracts which operated earlier, the amount of the principle debt under which exceeded 5% of the balance sheet assets of OJSC "MOESK" at the date of the last completed quarter prior to making the respective contract, is presented in table 2.

Table 2.

<i>Liability name</i>	<i>Creditor (debtee) name</i>	<i>Amount of the principle debt (RUR'000)</i>	<i>Term of repayment</i>	<i>Presence of a delay in execution of the liability with regard to the payment of the amount of the principle debt or interest</i>
<i>Credit line</i>	<i>Open Joint-Stock Company "ALFA-BANK"</i>	<i>2,350,000,000.00</i>	<i>12 September 2006</i>	<i>None</i>

In 2006, the issued placed unconvertible interest certificated bearer bonds of series 01 (state registration number is 4-01-65116-D as of 22 June 2006) with the repayment term on the 1820th day from the date of the beginning of placement of bonds of the issue.

The volume of the securities issue at par value: *6,000,000,000 (six billion) rubles, 17.75% of the issuer's balance sheet assets as of 31 March 2006*

The date of the state registration of the report on results of the securities issuance: *24 October 2006*

The number of securities of the issue: *6,000,000 (six million) pieces*

The par value of each security of the issue: *1,000 (one thousand) rubles*

The total amount of the income per the first coupon paid under the issuer's Bonds is 240,840,000 (two hundred and forty million, eight hundred and forty thousand) rubles; the amount of interest and (or) other income paid under one Bond of the issuer is 40 (forty) rubles and 14 (fourteen) kopecks.

Date, at which the obligation on payment of the income per the first coupon under the Bonds was executed:

13 March 2007

The total amount of the income per the second coupon paid under the issuer's Bonds is 240,840,000 (two hundred and forty million, eight hundred and forty thousand) rubles; the amount of interest and (or) other income paid under one Bond of the issuer is 40 (forty) rubles and 14 (fourteen) kopecks.

Date, at which the obligation on payment of the income per the first coupon under the Bonds was executed:

11 September 2007

The total amount of the income per the third coupon paid under the issuer's Bonds is 240,840,000 (two hundred and forty million, eight hundred and forty thousand) rubles; the amount of interest and (or) other income paid under one Bond of the issuer is 40 (forty) rubles and 14 (fourteen) kopecks.

Date, at which the obligation on payment of the income per the first coupon under the Bonds was executed:

11 March 2008

The issuer's obligation on payment of the income per the first, second and third coupons under the Bonds was executed.

2.3.3. Liabilities of the issuer from the securing granted to the third parties

The issuer did not grant securing to the third parties for the reporting period.

For the period from the date of the beginning of the current financial year up to the date of the end of the reporting quarter, the issuer did not grant securing to the third parties for the amount which is at least 5 percent of the issuer's balance sheet assets at the date of the end of the last completed quarter prior to the granting of the securing.

2.3.4. Issuer's other liabilities

At the date of drawing up of the quarterly report, the issuer has no agreements and obligations, including futures transactions which are not reflected in its accounting balance sheet, which may have a significant effect on the issuer's financial standing, its liquidity, sources of financing and conditions of their use, results of activities and charges.

2.4. The purposes of issue and ways of use of the funds received as a result of placement of issue securities:

The issuer did not implement placement of the securities by subscription in the reporting period.

2.5. Risks connected with purchase of equity securities placed (or being in the process of placement)

2.5.1. Industry risks

Influence of possible deterioration of the situation in the issuer's sector on its activities and execution of obligations under securities:

The issuer started its economic activities in the second quarter 2005. The basis of the company activities is electric energy transmission to the end user and to adjacent electric grids of other owners, and operation of electric grids on the territory of Moscow and the Moscow region.

The most significant changes in the electric power industry for the issuer are:

- ***Changing of tariff policy of electric power transportation that may have an adverse effect on the financial and economic standing of the enterprise.***

According to the issuer, deterioration of the environment in the sector may be connected with: The operational risks connected with deterioration of the equipment and deterioration of the fixed capital. Possible negative changes in the sector: an opportunity of occurrence of emergencies, loss of reliability of power supply, breaks in manufacture of electric power, decrease in capacity of generating stations.

The issuer's actions for these risks reduction:

- ***Reconstruction of operating and construction of new transmission lines, transformer substations and distribution equipment;***
- ***Modernisation of fixed capital.***

Besides, the issuer is subject to industrial risks:

- ***Risk of transition to works with the enforced (accident preventive allowable) cross flow;***
- ***Risk of single drastic increase in loading over the planned value on the basis of consumers' applications;***
- ***Technical risks connected with operation of the equipment. They are caused by such factors as operation of the equipment with maximum deviations from normative and technical requirements; mistakes of operational personnel; disruption of the dispatching schedule and breach of discipline.***

The issuer's actions to reduce these risks:

The issuer holds analysis of probable risk situations in order to forecast an occurrence of risks at realization of the production program and taking measures on protection against their influence. The main organizational form of reduction and compensation of the damage amount is insurance. Commercial insurance of the property, hazardous industrial objects, vehicles, civil liability, insurance of the personnel against accidents and illnesses, and medical insurance;

The risks connected with possible change of the prices for raw material, services used by the issuer in its activities (separately in the internal and external markets) and their influence on the issuer's activities and execution of obligations under securities:

The risks connected with increasing prices for the equipment and other material resources used by the issuer in its activities.

The issuer's actions to reduce these risks:

- ***Creation of the competitive environment in the sphere of works and services purchasing;***
- ***Optimization of expenses for repair and operational needs and capital construction;***
- ***Elimination of cross purchases;***

The risks connected with possible change of the prices for products and/or the issuer's services (separately in the internal and external markets) and their influence on the issuer's activities and execution of obligations under securities:

The risks connected with state regulation of tariffs for the electric power, as a result of which they may be established below the economically feasible level.

Possible influence of negative changes: deterioration of the issuer's financial and economic standing.

The issuer's actions to reduce these risks:

- ***Carrying out of works on making long-term contracts on electric power transportation;***
- ***Carrying out of the balanced financial policy;***
- ***Strengthening of works with the state legislative and executive authorities.***

The issuer does not plan to carry out activities on the foreign market, and in this connection the essential negative influence on the issuer's activities may render only global deterioration of the situation in the world fuel and energy market which may also affect Russia.

2.5.2. Country and regional risks

Country risks

Negative changes of the situation in Russia which may affect the issuer's economic situation and its activities are not expected in the near future. But the destabilization of the economic situation in the country connected with the crisis in the world financial markets or sharp reduction of prices is entirely possible. Besides, the destabilization of the situation in the country due to occurrence of labour conflicts, increase of the social tension as a result of unpopular actions of the authorities may take place at realization of reforms in the economic sector.

Regional risks

The main industrial activities of the issuer are carried out in Moscow and the Moscow region. This is one of the most developed regions of the country, which rooms a plenty of consumers of the electric power. Thus, the energy consumption constantly grows. All this allows to speak about the stability of the issuer and its minor susceptibility to regional risks.

The growth of the gross national product and production growth in the country and, in particular, in the most densely populated and historically industrial areas of Moscow and the Moscow region gives grounds for making a positive forecast on the issuer's development. The issuer estimates the political and economic situation in the region as stable. The further improvement in the economic standing of the region will certainly render a positive influence on the issuer's activities and will be favorably reflected in its financial standing. Negative changes of the situation in the region of the issuer's business and in the Russian Federation as a whole which may affect the issuer's activities and economic standing are not expected in the near future.

The issuer's assumed actions in the event of negative influence of change of the situation in the country and region on its activities:

The major part of these risks may not be controlled by the issuer due to their global scale. In case of destabilization of the situation in Russia or in a separate region which may affect the issuer's activities, the latter will take a number of measures on anti-recessionary management for the purpose of the maximal decrease in negative influence of the situation on the issuer.

The risks connected with possible military conflicts, introduction of state of emergency and strikes in the country (countries) and region, where the issuer is registered as the tax bearer and/or carries out primary activities:

The risks connected with possible military conflicts, introduction of state of emergency and strikes with reference to the Russian Federation and the Moscow region are estimated by the issuer as minimal.

The risks connected with geographical features of the country (countries) and region, in which the issuer is registered as the tax bearer and/or carries out primary activities (including the raised danger of acts of nature, possible breaks of the transport communication in connection with a remoteness and/or inaccessibility, etc.):

The issuer carries out the activities in the region with the developed infrastructure and is not subject to the risks connected with breaks of the transport communication in connection with remoteness and/or inaccessibility.

Influence of the specified risks on the issuer's activities with reference to the Russian Federation and the Moscow region is estimated as minimal.

The issuer runs the risks connected with raised danger of acts of nature: breakage of transmission lines during hurricane, a strong snowfall, ice.

The issuer's actions to decrease the influence of these risks are designing of transmission lines in view of features of weather in the region, and insurance.

2.5.3. Financial risks

Susceptibility of the issuer to the risks connected with change of interest rates, exchange rate of foreign currencies, in connection with activities of the issuer or in connection with the hedging which is carried out by the issuer in order to decrease adverse consequences of influence of the above-stated risks:

Within the limits of planned financial and economic policy, the issuer is going to involve various extra means and in due time to carry out repayment of obligations. Hence, the issuer is subject to risk of change of interest rates under interest obligations. This risk is estimated as small.

The primary clients who carry out transportation of the electric power are residents of the Russian Federation; the prices for transportation of the electric power are also expressed in the currency of the Russian Federation. In this connection the issuer is poorly subject to risks of change of exchange rates of foreign currencies.

Susceptibility of the issuer's financial standing (its liquidity, sources of financing, results of activities, etc.) to the exchange rate change:

The issuer's financial standing, its liquidity, sources of financing, results of activities depend on changes of the rate of exchange, because the issuer's activities are planned to be carried out so that its assets and liabilities are expressed in the national currency. Besides, the issuer does not plan to carry out activities on the foreign market. Therefore, the influence of change of the rate of national currency in relation to US dollar on the issuer's financial standing is estimated as insignificant.

The issuer's assumed actions in case of negative influence of change of the exchange rate and interest rates on the issuer's activities:

Susceptibility of the issuer to the risk of change of the exchange rate of foreign currencies is estimated by the issuer as insignificant, because the issuer's all obligations are expressed in the currency of the Russian Federation.

The issuer runs the risk of change of interest rates. In case of interest rates increase, the expenses for servicing extra means will also go up.

The issuer's assumed actions in case of negative influence of the interest rates change on its activities:

- *Attraction of long-term credits and loans in order to avoid a negative influence of short-term fluctuations of interest rates;*
- *Decrease in the share of credits and loans in the issuer's current assets.*

Influence of inflation:

A negative impact of inflation on the issuer's financial and economic activities may be limited to the following risks:

- *Risk of the losses connected with losses in real value of debt receivable at an essential debt rescheduling or a delay in payment;*
- *Risk of increase in interest payable;*
- *Risk of increase of the production cost of goods, products, works, services due to an increase in the price for energy, transport charges, wages, etc.*
- *Risk of reduction of real value of means under the investment program.*

The critical value of the inflation, in opinion of the issuer:

The scheduled rates of inflation established by the Government of the Russian Federation among the purposes of the economic policy, as a whole, are fulfilled and tend to reduction. Nevertheless, at escalation of inflation, the issuer plans to raise the turnover rate of current assets due to changing contractual relations with consumers. In view of the fact that there is a restriction on raising of the issuer's tariffs on electric energy transmission within the limits of no more than 10% a year, and potential profitability of activities, in opinion of the issuer, the value of inflation which are a matter of difficulties for the issuer is at least 40% per annum.

The issuer's assumed actions to reduce the risk caused by inflation:

If the value of inflation exceeds the specified critical values, the issuer plans to increase a share of short-term financial instruments in its assets, and to hold actions to reduce internal costs.

The indicators of the issuer's financial reporting which are most subject to changes as a result of the specified financial risks' influence:

The main indicator which is most subject to changes connected with financial risks, is the company profit. Along with a growth of interest rates, the interest payments for using credits of commercial banks increase and, accordingly, the company profit decreases. Besides, the profit does down at an increase in the cost price of electric power transportation and fixing of tariffs at the legislative level.

The risks influencing the specified indicators of the issuer's financial reporting and probability of their occurrence:

A substantial growth of interest rates and, as a consequence, growth of expenses for service of the issuer's debts.

The probability of their occurrence is estimated as low.

2.5.4. Legal risks

The legal risks connected with the issuer's activities:

Changes of the currency regulation:

Changes of the currency and customs legislation of the Russian Federation do not influence the Company activities and, hence, do not entail occurrence of legal risks on them.

Changes of the tax laws:

Now the Government of the Russian Federation pursues a policy of decrease in tax load on the Russian tax bearers. In this connection, amending the tax laws regarding an increase in tax rates is not expected in the near future.

This risk is considered as insignificant.

In order to minimize the risk of wrong calculation and/or payment of the taxes caused the varying treatment of norms of the legislation, the Company holds a permanent work on optimization of tax schemes of calculation of tax base in strict compliance with the current legislation of the Russian Federation.

In case of amending the operating procedure and terms of the taxation, the issuer aims to plan the financial and economic activities taking in account these changes.

Changes of rules of the customs control and duties:

Changes of rules of the customs control and duties which may create legal risks connected with the issuer's activities are not expected.

Changes of requirements on licensing the issuer's primary activities issuer or licensing rights to use objects, the availability of which is limited (including natural resources):

Changes of requirements on licensing the Company primary activities may lead to an increase in the term of preparation of the documents which are necessary for prolongation of the validity of the license, and necessity of the compliance with the requirements established. However, as a whole, this risk should be considered insignificant, except for the cases when the requirements will be set which cannot be met by the Company, or the compliance with which will be connected with excessive expenses for prolongation of the license or for realization of the activities which are subject to licensing, that may lead to the termination of this activities line.

In case of change of requirements on licensing the primary activities of the issuer or licensing of rights to use objects, the availability or circulation of which is limited, the issuer will take necessary measures to obtain the respective licenses and permits.

Changes of the judiciary practice connected with activities of the issuer (including concerning license granting):

The probability of change of judiciary practice concerning the items connected with the Company activities is insignificant. The legal risk management is based on optimization of the process of legal official registration of papers and support of activities of the Company. For minimization of legal risks, any Company business processes subject to risks (for example, the completion of contracts), pass obligatory legal examination.

In case of amending judiciary practice on the issues connected with the issuer's activities, the issuer will plan the financial and economic activities taking into account these changes.

In connection with the fact that the issuer does not plan to hold activities on foreign markets, the analysis of influence of the legal risks connected with the issuer's activities on foreign markets is not provided.

2.5.5. Risks connected with the issuer's activities

The risks which are peculiar exclusively to the issuer:

There is a risk of a delay in reception of the licenses which are necessary for realization of certain kinds of the company activities in connection with changes of the legislation in the field of license granting with coming in effect of the Federal Law as of 2 July 2005 No. 80-FZ (80-FL) "Amending the Federal Law "On granting licenses for certain activities", the Federal Law "Protection of rights of legal entities and individual businessmen at carrying out the state control (supervision)" and the Administrative Offences Code of the Russian Federation".

There is a risk of a delay in renewal of licenses, which is connected with the company re-structuring.

The issuer estimates risk of non-prolongation of the effect of the issuer's license for holding a certain line of activities or for use of objects, the availability of which is limited (including natural resources) as insignificant.

The possible responsibility of the issuer under debts of the third parties also does not render much influence on the issuer's financial standing.

The possibility of loss of consumers, the turnover with which is at least 10 percent of the total proceeds from products (works, services) is regarded by the issuer as insignificant.

The issuer runs the risks connected with a seasonal nature of consumption of electric energy. The peak of consumption is observed in the autumn and winter period; in connection with this the issuer runs risks of the grids' overload.

There are no other risks connected with activities of the issuer, which are peculiar exclusively to the issuer.

This section 2.5 describes only the risks which, in the issuer's opinion, are material. There may be other risks which were not included in this section. Other risks the issuer is unaware of, or which are

now not material for the issuer, may have a potential negative impact on the issuer's economic activities.

III. Detailed information on the issuer

3.1. Issuer's establishment and development history

3.1.1. Data on the issuer's name

The issuer's full company name in Russian:

Открытое акционерное общество «Московская объединенная электросетевая компания»

The issuer's full company name in English:

Open Joint-Stock Company "Moscow United Electric Grid Company"

The issuer's shortened company name in Russian:

OJSC «Moscow United Electric Grid Company»;

ОАО «МОЭСК»

The issuer's shortened company name in English:

OJSC "Moscow United Electric Grid Company"

OJSC "MOESK".

The current name was put into effect on *14 September 2006*.

The issuer's company name is not registered as a trade mark or a service mark.

According to the decision of the annual general shareholders meeting of OJSC "Moscow Regional Electric Grid Company" as of 26 June 2006 (Minutes No. 3 as of 6 July 2006), changes were made to the Company Charter which are connected with its company name.

The previous full company name of the issuer in Russian:

Открытое акционерное общество «Московская областная электросетевая компания»

In English: ***Open Joint-Stock Company "Moscow Regional Electric Grid Company"***

The previous shortened company name of the issuer in Russian:

OJSC «Moscow Regional Electric Grid Company»

In English: ***OJSC "Moscow Regional Electric Grid Company"***

3.1.2. Data on the state registration of the issuer

Primary state registration number of the legal entity (PSRN): ***1057746555811***

Date of state registration: ***1 April 2005***

Name of registering body according to the data specified in the certificate on making an entry in the Uniform State Register of Legal Entities: ***Interdistrict Inspection of the Federal Tax Service no. 46 in Moscow.***

3.1.3. Data on the issuer's creation and development

Time of existence of the issuer from the date of its state registration (1 April 2005) is 3 years.

The issuer was established for an indefinite time.

The brief description of the history of the issuer's creation and development:

Open Joint-Stock Company "Moscow United Electric Grid Company", renamed from OJSC "Moscow Regional Electric Grid Company" (Minutes No. 3 of the annual general shareholder meeting of OJSC "Moscow Regional Electric Grid Company" as of 6 July 2006) was created as a result of reorganization of OAO Mosenergo in the form of a spin-off (Minutes No.1 as of 29 June 2004 of the annual General shareholders meeting of OAO Mosenergo).

The Company is a legal successor with regard to a part of the rights and duties of OAO Mosenergo according to the separation balance sheet of OAO Mosenergo approved by the annual general shareholders meeting of OAO Mosenergo (Minutes No. 1 as of 29 June 2004)

The purpose of creation of the issuer: according to the issuer's Charter (item 3.1. Article 3), the main purpose of the Company's activities is profit making.

According to the issuer's Charter (item 3.2. Article 3), the Company's activities are as follows:

- *rendering services on transmission and distribution of electric energy;*
- *rendering services on connection to electric grids;*
- *rendering services on gathering, transmission and processing of the technological information, including the measurements and registration;*
- *diagnostics, operation, repair of electric grids and other electric grid facilities and technological management by them;*
- *diagnostics, operation, repair of technological communication networks, means of measurements and calculation, equipment of relay protection and emergency preventive automatics and other technological equipment connected with operation of grid facilities and technological management by them;*
- *development of long-term forecasting, perspective and current plans of development of the electric grid complex, target complex scientific and technical, economic and social programs;*
- *development of electric grids and other electric grid facilities including designing, engineering researches, construction, reconstruction, modernisation, installation and adjustment;*
- *development of technological communication grids, means of measurements and registration, equipment of relay protection and emergency preventive automatics and other process equipment connected with operation of electric grid facilities, including designing, engineering researches, construction, reconstruction, modernisation, installation and adjustment;*
- *operation of explosive, chemically and fire-dangerous industrial objects connected with functioning of electric grid facilities;*
- *activities for prevention and extinguishing of fires, installation, repair and servicing of means of maintenance of fire safety of buildings and constructions connected with functioning of electric grid facilities;*
- *realization of the technological control, carrying out of examination of industrial safety and labour safety at electric grid facilities;*
- *storage of oil products used for the technological purposes;*
- *realization of foreign trade activities, trade and economic and scientific and technical cooperation with foreign firms, in order to support the Company activities stipulated by its Charter;*
- *educational activity for the purpose of preparation, retraining and training of the personnel, including examination by the personnel of rules of technical operation, fire prevention rules, and other normative documents;*
- *transportation of cargoes and passengers by automobile, railway and air vehicles for the technological purposes;*
- *operation, maintenance works and repair of automobile, railway and air vehicles and the load-lifting mechanisms used for the technological purposes;*
- *security activities exclusively in interests of own safety within the limits of security service created by the Company which in its activities is guided by the Law of the Russian Federation "On private detective and security activities in the Russian Federation" and the current legislation of the Russian Federation;*
- *organization and carrying out of defensive actions concerning mobilization preparation, civil defence, extreme situations and protection of the state secret information, according to the current legislation of the Russian Federation;*
- *liquidation of consequences of the failures at communication lines, contact and power electric systems;*
- *other lines of activities which are not forbidden by the legislation of the Russian Federation;*

The Company may be engaged in certain kinds of activities defined by federal laws only on the basis of a special permit (license).

The issuer's mission: *the issuer's mission is not defined by the issuer's internal documents.*

Other information on the issuer's activities which is important at taking a decision on the issuer's securities purchasing: *none.*

3.1.4. Contact information

The location of the issuer: *142100, Moscow region, Podolsk city, Ordzhonikidze street, 27*

The location of the issuer's constantly operating executive body:

115114, Moscow, 2nd Paveletsky passage, 3, bld. 2

Contact telephone numbers of the issuer: *(495) 982-38-57; 981-89-77*

Fax: *(495) 585-14-51*

Email: odou@moesk.ru

The Internet website where the information on the issuer and the securities issued by it is available:

www.moesk.ru

The functions of the issuer's special division for shareholders and investors relations are assigned to the Corporate Administration of OJSC "Moscow United Electric Grid Company"

The location: *115114, Moscow city, Derbenevskaya emb., 7, bld. 14*

Telephone number: *(495) 984-57-67, 984-57-72*

Fax: *(495) 984-58-17*

Email: SobakinaTV@moesk.ru

3.1.5. Taxpayer identification number

TIN is *5036065113*

3.1.6. Branches and representative offices of the issuer:

<i>Name of the representative office/ branch</i>	"Southern Electric Networks"
<i>Date of opening</i>	1 April 2005
<i>Location</i>	142117, Moscow region, Podolsk city, Kirova street, 65
<i>Full name of the director of the representative office/ branch, Term of the effect of the power of attorney</i>	Alexander Andreevich Perchatkin Term of the effect of the power of attorney: Till 31 December 2008 № 592-Д as of 01.01.2008

3.2. Issuer’s main economic activities

3.2.1. Issuer's industry

Codes of the main kinds of economic activities of the issuer under the All-Russian Classifier of Economic Activities (OKVED): 40.10.2 28.11 31.10.9 31.20 31.20.9 31.62.9 33.20
40.10.3 41.00 45.11 45.2 45.3 45.4 55.12 55.23 55.51 60.10 63.12
63.21.2 63.40 64.20 70.12 70.20 90.00

3.2.2 Issuer’s main economic activities

The primary line of economic activities of OJSC "Moscow United Electric Grid Company" is electric power transmission.

The information on the main kinds of economic activities (kinds of activity, kinds of products (works, services) for the last 5 completed financial years is not specified in connection with the fact the issuer is registered as a legal entity on 01.04.2005

The information on the main kinds of economic activities (kinds of activity, kinds of products (works, services) for 2005, 2006, 2007 and for the first quarter of the current fiscal year is specified.

The main lines of economic activities (lines of activities, types of products (works, services)) which provide at least 10 percent of proceeds (gains) of the issuer.

<i>Indicator</i>	<i>2005</i>	<i>2006</i>	<i>2007</i>	<i>I quarter 2007</i>	<i>I quarter 2008</i>
<i>Type of economic activity:</i>					
<i>Volume of proceeds (gains) from electric power transmission ('000 RUR)</i>	<i>11,365,550</i>	<i>22,282,966</i>	<i>26,209,434</i>	<i>7,050,214</i>	<i>14,008,949</i>
<i>Share of the volume of proceeds (gains) from electric power transmission in the total volume (gains) of the issuer, %</i>	<i>92.75</i>	<i>87.56</i>	<i>67.00</i>	<i>77.49</i>	<i>87.30</i>

The issuer's goal is to provide reliable functioning of grid facilities in Moscow and Moscow region. The issuer is the largest regional power supplying companies which serve 1.4 million of consumers in total on the territory of more than 47 thousand sq. km. In this connection the share of proceeds from

electric power transmission for the third quarter of the current financial year is 87.30% in the total amount of proceeds.

Change of the amounts of the issuer's proceeds (gains) from the main economic activities by 10 and more percent in comparison with the corresponding reporting period of the previous year and the reason of such changes:

<i>Indicator</i>	<i>In 2007 in comparison with 2006</i>	<i>In quarter 2008 in comparison with quarter 1 2007</i>
<i>A growth of gains (proceeds) from primary economic line of activities in relation to the previous year, %</i>	<i>17.62</i>	<i>98.70</i>

In the 1st quarter 2008, a growth of the issuer's gains (proceeds) from transmission of the electric power in relation to the 1st quarter 2007 was 98.70% that is connected mainly with a growth of the productive supply of the electric power and execution of actions on a decrease in the electric power in electric grids.

The issuer carries out its main economic activities on the territory of the Russian Federation. The issuer does not carry out any activities in other geographical areas.

The main economic activities do not possess seasonal attributes.

The electric power is always in demand; however, the amount of demand for the electric power is exposed to seasonal fluctuations that are connected with Russian climatic conditions. As the issuer carries out activities on the territory of Moscow and Moscow region, the amount of demand depends on the season. In spring and summer months, the need for the electric power may decrease that is connected with the daylight hours duration.

The structure of the cost price of the issuer for the respective period of the current financial year under the specified articles in percent of the total cost price:

<i>Cost item</i>	<i>Q 1 2008</i>
<i>Raw and other material, %</i>	<i>1.0</i>
<i>Purchased complementary parts, semi-finished products, %</i>	<i>0</i>
<i>Works and services of industrial character which are implemented by external organizations, %</i>	<i>55.9</i>
<i>Fuel, %</i>	<i>0</i>
<i>Energy, %</i>	<i>12.5</i>
<i>Spending on labour payment, %</i>	<i>7.7</i>
<i>Interest per credits, %</i>	<i>0</i>
<i>Rent payment, %</i>	<i>0.7</i>
<i>Assessments to social needs, %</i>	<i>1.9</i>
<i>Amortization of fixed assets, %</i>	<i>9.4</i>

<i>Taxes included in the production cost, %</i>	<i>0.1</i>
<i>Other costs:</i> <i>Amortization under intangible assets, %</i> <i>Remuneration for innovations, %</i> <i>Obligatory insurance payments, %</i> <i>Representation expenses, %</i> <i>others, %</i>	<i>10.7</i>
<i>Total: expenses for production and selling of products (works, services) (production cost), %</i>	<i>100.0</i>
<i>For reference: proceeds from sales of products (works, services), % to the production cost</i>	<i>112.9</i>

New kinds of products offered by the issuer on the market of its primary activities, which have a material value (works, services), in a degree, in which this corresponds to the popular information on such types of production (works, services): none.

Standards (rules), according to which the accounting reports are prepared and the calculations are made, which are reflected in this item of the quarterly report:

The issuer's accounting reports are prepared according to the current laws of the Russian Federation in the field of book keeping:

Regulations on Book Keeping "Accounting Policy of Organization" AR 1/98 (AR 1/98) (approved by Order of the Ministry of Finance of the Russian Federation as of 9 December 1998 No. 60n (60n), amended as of 30 December 1999.)

Regulations on Book Keeping "Accounting Reports of the Organization" AR 4/99 (AR 4/99) (approved by Order of the Ministry of Finance of the Russian Federation as of 6 July 1999 No. 43n (43n)).

Regulations on Book Keeping "Charges of the Organization" AR 10/99 (AR 10/99) (approved by Order of the Ministry of Finance of the Russian Federation as of 6 May 1999 No. 33n (33n), amended by Order of the Ministry of Finance of the Russian Federation as of 30 December 1999 No. 107n (107n), as of 30 March 2001 No. 27n (27n)).

Regulations on Book Keeping "Incomes of the Organization" AR 9/99 (AR 9/99) (approved by Order of the Ministry of Finance of the Russian Federation as of 6 May 1999 No. 32n (32n), amended by Order of the Ministry of Finance of the Russian Federation as of 30 December 1999 No. 107n (107n), as of 30 March 2001 No. 27n (27n)).

3.2.3. Issuer's materials, goods (raw material) and suppliers

The name and location of the issuer's suppliers that provide at least 10% of all deliveries of raw material (other material), and their shares in total amount of deliveries for the third quarter of the current financial year:

On the basis of the agency contract, Promtekhnik LLC is an agent of OJSC "MOESK" concerning a provision of inventory deliveries under the nomenclature, quantity, terms of delivery and price defined on the basis of the specifications signed by both the parties.

The name and location of the agent: *"PROMTEKHNIKA" Limited Liability Company, Moscow city, Derbenevskaya emb., 7, bld. 14*

Share in total amount of deliveries: **100%**

The information on an over 10 percent change of prices for the main raw material (other material) during the respective reporting period in comparison with the respective reporting period of the previous financial year or on absence of such change:

An over 10% price increase for the main raw material (other material) during the respective reporting period in comparison with the respective period of the previous financial year occurred under the following positions:

- ***Wire (cable)***
- ***Concrete poles***
- ***Black and nonferrous metal (sheet, angle bars, disks)***
- ***Petroleum, oil, lubricants (gasoline, diesel fuel, automobile oil)***
- ***Transformer oil***
- ***Insulators***

The share of the issuer's import in deliveries of for the specified periods:

There is no share of direct import in deliveries.

The issuer's forecasting on availability of these sources in the future and on possible alternative sources:

Availability of sources of raw material in the future is based on long-term contractual relations with suppliers; in this connection the issuer considers the risk of their inaccessibility in the future to be minimal. The issuer has alternative sources of raw material.

3.2.4. Sales markets of the issuer's products (works, services)

The main markets on which the issuer carries out its activities:

According to the purposes of creation, the issuer carries out primary activities on rendering of services on electric energy transmission in Moscow city and the Moscow region for a fee, where it is the largest organization among those rendering such services.

Possible factors, which can negatively affect selling by the issuer of its products (works, services) and possible actions of the issuer on reduction of such influence:

Major factors, which can negatively affect selling by the issuer of its products (works, services) are incomplete and untimely payment of services under the main kind of activity and occurrence of emergencies in the issuer's electric grids.

For the purpose of reduction of influence of negative factors on activity of the issuer, the primary goals are:

- ***Expansion of the sales market of services,***
- ***Optimization of production processes,***
- ***Decrease in costs when transmitting electric power,***
- ***Construction and modernization of equipment with application of modern technologies,***
- ***Attraction of contract organizations on taking readings of devices of electric power metering,***
- ***Formation of volumes of the rendered services on electric energy transmission and service of measuring complexes.***

3.2.5. Issuer's licenses

As of 31.03.2008, the issuer disposes of the following special permits (licenses):

1. Number: *No. 1/08123;*

Date of issue: *8 July 2005;*

Period of validity: *till 8 July 2010;*

Authority that issued the special permit (license): *The Central Administration of The RF-EMERCOM State Fire-Fighting Service;*

Business line: *activities on fire prevention and fighting.*

2. Number: *No. 2/13373;*

Date of issue: *8 July 2005;*

Period of validity: *till 8 July 2010;*

Authority that issued the special permit (license): *The Central Administration of the RF-EMERCOM State Fire-Fighting Service;*

Business line: *manufacturing of works on assembling, repair and servicing of fire safety devices of buildings and structures.*

3. Number: *No. 3/01238;*

Date of issue: *17 June 2005;*

Period of validity: *till 17 June 2010;*

Authority that issued the special permit (license): *The Central Administration of the RF-EMERCOM State Fire-Fighting Service;*

Business line: *maintenance of fire-hazardous industrial facilities.*

4. Number: *No. GS-1-50-02-27-0-5036065113-032000-1 (FC-1-50-02-27-0-5036065113-032000-1);*

Date of issue: *9 April 2007;*

Period of validity: *12 September 2010;*

Authority that issued the special permit (license): *The Federal Agency for Construction and Housing and Communal Services;*

Business line: *construction of buildings and structures of I and II responsibility levels in accordance with the state standards.*

5. Number: *No. GS-1-50-02-26-0-5036065113-031999-1 (FC-1-50-02-26-0-5036065113-031999-1);*

Date of issue: *9 April 2007;*

Period of validity: *29 August 2010;*

Authority that issued the special permit (license): *The Federal Agency for Construction and Housing and Communal Services;*

Business line: *designing of buildings and structures of I and II responsibility levels in accordance with the state standards.*

6. Number: *No. 001162-R (001162-P);*

Date of issue: *26 July 2005;*

Period of validity: *26 July 2010;*

Authority that issued the special permit (license): *The Federal Technical Regulation and Metrology Agency;*

Business line: *activities on measurement devices repairing.*

7. Number: *No. 37600;*

Date of issue: *23 December 2005;*

Period of validity: *23 December 2010;*

Authority that issued the special permit (license): *The Federal Service for Supervision in the Sphere of Communications;*

Business line: *communication services on provision of communication channels.*

8. Number: *No. 37601;*

Date of issue: *23 December 2005;*

Period of validity: *23 December 2010;*

Authority that issued the special permit (license): *The Federal Service for Supervision in the Sphere of Communications;*

Business line: *Services of local telephone communication, except for services of local telephone communication with use of payphones and multiple access devices.*

9. Number: *No. 37667;*

Date of issue: *23 December 2005;*

Period of validity: *23 December 2010;*

Authority that issued the special permit (license): *The Federal Service for Supervision in the Sphere of Communications;*

Business line: *Services on transmission of voice information in the data communication network.*

10. Number: *No. EV-02-000952 (K) (ЭБ-02-000952 (K));*

Date of issue: *20 October 2006;*

Period of validity: *29 June 2011;*

Authority that issued the special permit (license): *Federal Service for Ecological, Technological and Atomic Supervision;*

Business line: *Maintenance of explosive industrial objects, where the equipment operating under superfluous pressure of more than 0.07 MPa or at the temperature of water heating of more than 115 degrees Celsius is applied*

11. Number: *No. EV-02-001323 (C) (ЭБ-02-001323 (C));*

Date of issue: *12 July 2007;*

Period of validity: *12 July 2012;*

Authority that issued the special permit (license): *Federal Service for Ecological, Technological and Atomic Supervision;*

Business line: *Maintenance of explosive industrial objects, where the substances which may form explosive mixtures with oxygen of air or with each other (combustible gases, inflammable and combustible liquids, dust producing substances), solid-phase and liquid-phase substances sensitive to spontaneous decomposition with and explosion are transported, destroyed, generated, used, processed, formed, and stored.*

12. Number: *No. 9777*;
Date of issue: *10 January 2007*;
Period of validity: *10 January 2010*;
Authority that issued the special permit (license): *The Administration of the Federal Security Service of the Russian Federation for Moscow and Moscow Region*;
Business line: *the works connected with use of the state secret data.*
13. Number: *No. 9778*;
Date of issue: *10 January 2007*;
Period of validity: *10 January 2010*;
Authority that issued the special permit (license): *The Administration of the Federal Security Service of the Russian Federation for Moscow and Moscow Region*;
Business line: *holding actions and (or) services in the field of the state secret protection.*
14. Number: *No. 50.99.08.002L.000252.11.07 (50.99.08.002I.000252.11.07)*;
Date of issue: *9 November 2007*;
Period of validity: *1 November 2012*;
Authority that issued the special permit (license): *The Administration of The Federal Supervision Agency for the Customer Rights Protection and Human Welfare for the Moscow Region*;
Business line: *activities in the field of use of ionizing radiation sources (generation sources).*
15. Number: *No. 50-01-001426*;
Date of issue: *27 September 2007*;
Period of validity: *27 September 2012*;
Authority that issued the special permit (license): *Federal Service for Health and Social Development Supervision*;
Business line: *Medical activities.*

The issuer's forecast on a probability of prolongation of a special permit (license):

The issuer estimates the risk of non-prolongation of the available special permits (licenses) as minimal.

3.2.6. Issuer's joint activities

The issuer is not engaged in the joint activities with other organizations.

3.2.7. Additional requirements to the issuers which are joint-stock investment funds, insurance or credit organizations, and mortgage agents

The issuer is not a joint-stock investment fund, insurance or credit organization, mortgage agent.

3.2.8. Additional requirements to the issuers, the primary activities of which are extraction of minerals

The information is not presented, as the issuer does not carry out extraction of minerals, including extraction of precious metal and jewel, and has no subsidiaries or dependent entities which conduct activities on extraction of the specified minerals.

3.2.9. Additional requirements to the issuers, the primary activities of which are rendering communication services

The information is not presented, as the issuer's primary activities do not include rendering communication services.

3.3. Issuer's plans of the future activities

The brief description of the issuer's plans concerning the future activities

In conformity with its Charter, the main goal of the issuer's activities is profit making. On this basis, the issuer plans to continue works in the field of the primary activities - electric energy transmission.

As may be necessary, in the event of a growth of loading and deterioration, activities on re-equipment and reconstruction of the fixed assets will be held.

The sources of the future incomes:

OJSC "Moscow United Electric Grid Company" plans the following sources of incomes:

- Transmission and distribution of electric energy;*
- Incomes from leasing out buildings and constructions;*
- Technological connection to electric networks;*
- Other incomes.*

Plans of the organization of new production, expansion or reduction of production, development of new kinds of products, re-equipment and reconstruction of the fixed assets:

The Investment Strategy of OJSC "MOESK" is aimed to eliminate the existing deficiency of electric capacity in Moscow and the Moscow region, increase of reliability of electric power supplies to consumers, meeting the perspective demand for connection of new consumers.

The complex Investment Program of OJSC "MOESK" for 2008-2012 is generated in the volume of RUR 223,835,097 thousand, including the amount of RUR 196,707,515 thousand is assigned for re-equipment and reconstruction, RUR 12,780,220 thousand is allocated for new construction; besides, the receipt of property formed due to means of the leasing companies on the Company off-balance account in 2008-2012 in the amount of RUR 15,394,372 thousand.

The complex investment program is directed to maintenance of reliable electric power supply of consumers of the Moscow region and development of industrial potential of Moscow and the Moscow region.

In the long term, the realization of the complex investment program will allow to provide solution of a lot of economic, social and technological tasks.

At formation of the complex program, a number of actions aimed to define priority directions of the investment were held. First of all we should note a participation of OJSC "MOESK" together with the Governments of Moscow and the Moscow region included in the Agreement on interaction of the Government of Moscow and RAO UESR on development of the electric grid system of Moscow and provision of reliable electric power supplies to consumers of Moscow and in the Agreement on interaction of the Government of the Moscow region and RAO UESR on development of the electric grid system of the Moscow region and provision of reliable electric power supplies of consumers of the Moscow region.

Possible changing of primary activities.

The issuer's activities are connected with the electric power transmission. The issuer does not plan to change primary activities.

3.4. Participation of the issuer in industrial, bank and financial groups, holdings, concerns and associations

The issuer is part of the holding - Russian open joint-stock company of energy industry and electrification "UES of Russia" (JSC RAO "UES of Russia").

Term of participation of the issuer in the holding:

Since 1 April 2005 (since the date of the state registration of the issuer) the Company is a subsidiary society of JSC RAO "UES of Russia" and is a part of a united energy system of Russia.

Place and functions of the issuer in the organization: being a subsidiary of JSC RAO "UES of Russia", the issuer plays a key role in formation of the Moscow regional energy system, is focused on performance of the following functions:

- Realization of a uniform energy policy of JSC RAO "UES of Russia" on the regional level;*
- Maintenance of the reliability of functioning of the electropower complex;*
- Realization of long-term investment programs in electric power industry and so forth*

3.5. Issuer's subsidiaries and dependent economic companies

The personal structure of the governance bodies of subsidiaries and dependent entities is specified on the basis of the information provided by specified entities.

1. The full company name: *Open Joint-Stock Company "Energocenter"*

The shortened company name: *OJSC "Energocenter"*

The location: *142117, Moscow region, Podolsk city, Kirova street, 65*

The basis of recognition of the company to be a subsidiary and/or a dependent entity: *OJSC "Moscow United Electric Grid Company" owns more than 20% of the voting shares of OJSC "Energocenter"*

The amount of the issuer's stake in the authorized capital of the subsidiary and/or dependent entity: *50%*

The amount of ordinary shares of the subsidiary and/or dependent entity belonging to the issuer: *50%*

The stake of the subsidiary and/or dependent entity in the issuer's authorized capital: *0%*

The amount of the issuer's ordinary shares belonging to the subsidiary and/or dependent entity: *0%*

The main business line of the company: *Realization of investment activities, rendering of services on connection to electric grids, development of electric networks and other electric grid facilities, including designing, engineering researches, construction, reconstruction, re-equipment, installation and adjustment*

Estimation of the value of this entity for the issuer's activities: *High. In order to carry out control over the investment projects carried out by OJSC "Energocenter" and rendering of influence on the decisions taken by OJSC "Energocenter", in 2006 the Board of Directors of OJSC "MOESK" (Minutes No.38 as of 27 December 2006) approved participation of OJSC "MOESK" in OJSC "Energocenter" as a shareholder with the 50% stake of the authorized capital.*

Total, fixed assets	32,607,305	2,838,836	29,768,469

Reporting date: *01.01.2007 after the reassessment*

Name of the group of fixed asset objects	Initial (recovery) value, '000 RUR	Amount of the accrued depreciation, '000 RUR	Residual value, '000 RUR
Buildings	4,987,335	174,582	4,812,753
Structures and transfer mechanisms	15,951,955	1,150,408	14,801,547
Machines and equipment	29,390,726	6,141,664	23,249,062
Vehicles	105,904	92,541	13,363
Other types of fixed assets	274,471	36,018	238,453
Total, fixed assets	50,710,391	7,595,213	43,115,178

Way of carrying out the reassessment: *Definition of full recovery value of the fixed assets under the direct recalculation method*

Amortization under the fixed asset objects is made by linear way, proceeding from the terms of efficient application of these objects.

Plans for purchase, replacement, retirement of the fixed assets, the value of which is at least 10 percent of the issuer's fixed assets value and other fixed assets under the discretion of the issuer:

Business plan on investment activities for 2008 amounts to RUR 48,383,841 thousand, VAT excluded.

Own sources of financing: RUR 18,594,496 thousand, including:

- Amortization: RUR 5,192,716 thousand;
- Profit: RUR 720,079 thousand,
- Cash flow balance of the year 2007 for the 2007 technical connections: RUR 1,537,789 thousand.

Involved assets: RUR 29,789,345 thousand.

RUR 34,957,343 thousand are planned to be allocated in 2008 for reconstruction and re-equipment of operating power facilities with expansion of an opportunity of connection of additional consumers; RUR 6,876,606 thousand are planned to be assigned for new construction.

Putting in operation of the fixed assets for the amount of RUR 27,348,819 thousand (VAT excluded) is planned.

In 2008 it is planned to put in operation 981.24 km of transmission lines and 1,779 MVA of transformers at 110-220 kV substations.

The primary goal for 2008 is performance of actions on putting in operation of the objects according to the Investment Program 2008. The special attention is paid to meeting schedules on putting in operation in 2008 of the objects included in the Agreement for interaction of the Government of Moscow and the Moscow region:

- Cable overhangs of 220 kV "Ochakovo-Choboty II" at "Govorovo" substation
- Translation of "Khlebnikovo" substation to 220 kV
- "Paveletskaya" 220/110/10 substation
- "Omega" 220/110/10 kV substation
- 10 kV COL "Mazilovo - Krylatskoe" 1,2
- 110 kV COL "N.Kuntsevo - Setun" 1,2
- 110 kV COL "Rublevo-Setun" 1,2
- 110/10 kV "Semenovskaya" substation
- Reconstruction of 110 kV "Karacharovo-Vvykhino" substation.

IV. Data on the issuer's financial and economic activities:

4.1. Results of the issuer's financial and economic activities

4.1.1. Profit and loss

Indicators showing the issuer's profitability and loss

Indicator	2005	2006	2007	1 quarter
-----------	------	------	------	-----------

				2008
<i>Proceeds ⁽¹⁾, RUR '000</i>	12,254,106	2, 447,566	38,681,052	16,038,233
<i>Gross profit, RUR '000</i>	2,140,538	6,216,655	9,091,433	1,833,105
<i>Net profit (unappropriated profit (uncovered loss)), RUR '000</i>	1,293,798	3,735,595	4,747,588	2,013,776

<i>capital turnover</i>	0.45	0.63	0.60	0.24
<i>Amount of uncovered loss as of the reporting date, RUR '000</i>	0	0	0	0
<i>Relation of uncovered loss as of the reporting date to the balance sheet assets</i>	0	0	0	0

⁽¹⁾ net of the value added tax, excises and similar obligatory payments

The methods recommended in the Regulations for the Information Disclosing by Issuers of Equity Securities approved by Order of The Federal Financial Markets Service as of 10 October 2006 No. 06-117/pz-n (№ 06-117/n3-n) was applied for calculation of the specified indicators.

The issuer's proceeds as of the date of the end of the year 2007 equaled RUR 38,681,052 thousand that is by RUR 13,233,486 thousand more than for the similar period of the previous year.

As at the end of the 1st quarter 2008, the issuer's proceeds was RUR 16,083,233 thousand.

The issuer's plans include activities on connection of new consumers. The connection of new consumers means a technological connection of power-receiving devices to electric networks. It will allow the issuer to raise reliability and quality of power supply due to installation of the highly technological equipment and simultaneously to expand the client base.

The increase in quantity of consumers is expected to lead to a growth of the issuer's proceeds. The modern equipment will allow to reduce operational costs that will also positively influence on the issuer's financial results.

Implementation of payment for connection of new consumers in Moscow and the Moscow region according to Decision of the RPC of Moscow as of 15.08.2006 №28, the order of the Fuel and Energy Complex of the Moscow region as of 29.05.2006 №14/05-05, Decision of the RPC of Moscow as of 08.09.2006 №39 will give additional opportunities for reconstruction and modernization of the electric grid equipment of the company, implementation of modern technologies, increase of reliability and safety of operation of electric grids of Moscow and the Moscow region.

The profitability indicators representing the results of the relation of profit (net revenue) and the means of its reception characterize an overall performance of the enterprise - productivity or feedback of the issuer's financial resources.

The return on assets which is calculated as a relation of net profit to assets, shows, what part of assets is per a unit of net profit, in other words, how much assets in money terms is involved per 1 ruble of net profit. Thus, the indicator enables to estimate the efficiency of assets use with a view of reception of profit.

The return on assets at 31.12.2007 was 5.02%, while the return on equity was 9.70 %. The economic interpretation of the returns indicators is as follows: they show how much rubles is per one ruble of the equity. Thus RUR 9.70 of net profit of the reporting period is per RUR 100 of the issuer's equity.

The return on assets as of the end of the quarter 1 2008 was 1.98%, while the return on capital was 3.95%.

The capital turnover indicator, which is calculated as a relation of proceeds to the amount of own assets and long-term liabilities, shows, what part of long-term financial sources is covered by proceeds. The capital turnover at the date of the 2007 financial year was 0.60.

The capital turnover indicator, first of all, characterizes the volume of sold products falling per 1 ruble of the assets invested in the enterprise's activities. Thus, this indicator for the issuer equals 0.60 ruble per 1 ruble of the cumulative indicator of own means and means in long-term use.

The way of calculation recommended by The Federal Financial Markets Service suggests to calculate the indicator of net profitability as the relation of net profitability of the reporting period to the proceeds for the similar period. Thus, the issuer's net profitability indicator at the date of the end of the year 2007 (12.27%) proves that every 100 rubles of proceeds bring 12.27 rubles of net profit.

As of the end of the 1st quarter 2008, the indicator of the net profitability of the reporting period was 12.56%.

There is no an uncovered loss at the end of the third quarter of the current financial year.

4.1.2. Factors which influence changing of the amount of proceeds from selling by the issuer of the issuer's goods, products, works, services and profit (loss) from the primary activities

Indicator	2006	2007	2007/2006, %
Proceeds from sales, RUR ' 000	25,447,566	38,681,052	152.00
Net profit (unappropriated balance) (uncovered loss),RUR '000	3,735,595	4,747,588	127.09

Indicator	Q 1 2006	Q 1 2007	Q 1 2008/Q 1 2007, %
Proceeds from sales, RUR ' 000	9,098,711	16,038,233	176.27
Net profit (unappropriated balance) (uncovered loss),RUR '000	1,727,722	2,013,776	116.56

The proceeds from selling in 2007 were RUR 38,681,052 thousand that is by 52.00 % more than the similar period of the last year.

The net profit in 2007 was 4,747,588 thousand that is by 27.09 % more than in 2006

The major factors which affected the growth of the amount of proceeds from selling in 2007 in comparison with the similar period of the last year are:

- *Increase in productive supply of electric power;*
- *Implementation of actions on decrease in losses of the electric power.*

The proceeds from selling in 1 quarter 2008 were RUR 16,038,233 thousand that is by 76.27 % more than the similar period of the last year.

The net profit in the 1st quarter 2008 was RUR 2,013,776 thousand that is by 16.56 % more than in the 1st quarter 2007.

The major factors which affected the growth of the amount of proceeds from realization in the 1st quarter 2008 in comparison with the similar period of the last year are:

- *Increase in productive supply of electric power;*
- *Implementation out of the actions to decrease losses of electric power.*

Opinions of the issuer's governance bodies on the information presented in this item coincide.

4.2. Issuer's liquidity, sufficiency of the equity and working capital

Indicators that characterize the issuer's liquidity.

<i>Indicator</i>	<i>2005</i>	<i>2006</i>	<i>2007</i>	<i>1 quarter 2008</i>
<i>Working capital, RUR '000</i>	<i>(644,962)</i>	<i>(5,327,571)</i>	<i>(19,043,203)</i>	<i>(19,758,202)</i>
<i>Net fixed assets index</i>	<i>1.02</i>	<i>1.17</i>	<i>1.39</i>	<i>1.39</i>
<i>Current liquidity ratio</i>	<i>0.90</i>	<i>1.57</i>	<i>0.90</i>	<i>0.89</i>
<i>Acid test ratio</i>	<i>0.49</i>	<i>1.27</i>	<i>0.77</i>	<i>0.78</i>
<i>Equity asset ratio</i>	<i>0.84</i>	<i>0.64</i>	<i>0.52</i>	<i>0.50</i>

The methods recommended in the Regulations for the Information Disclosing by Issuers of Equity Securities approved by Order of The Federal Financial Markets Service as of 10 October 2006 No. 06-117/pz-n (№ 06-117/n3-n) was applied for calculation of the specified indicators.

Own working capital - the share of own capital aimed to finance the issuer's working capital. For the issuer, this indicator is negative and at the date of the end of 2007 is RUR 19,043,203 thousand. The decrease in the indicator in 2007 in comparison with the 2006 indicator is connected with a significant growth in 2007 of the non-current assets in connection with commissioning of the fixed assets and with increase in the value of incomplete construction owing to active investment activity.

At the date of the end of the 1 quarter 2008, the indicator of own working capital is negative and is RUR 19,758,202 thousand.

The net fixed assets index describing the share noncurrent assets and long-term accounts receivable of the issuer in the sources of own means at the date of the end of 2007 was 1.39. Growth of the indicator for 2007 in comparison with 2006 is caused by a significant growth in 2007 of noncurrent assets in connection with commissioning of the fixed assets and with increase in the value of incomplete construction owing to active investment activity.

At the date of the end of the 1st quarter 2008 the net fixed assets index was 1.39.

The current liquidity index shows whether the enterprise has enough means which can be used for repayment of short-term obligations (in particular, accounts payable). At 31.12.2007 the current liquidity indicator was 0.90. The decrease in the indicator in 2007 in comparison with 2006 is connected with the vigorous activity of the company in the field of the technological connection of consumers to electric networks as within the limits of contracts of connection essential advance payments are stipulated, and attraction of intermediate crediting before accommodation of eurobonds.

At the date of the end of the 1st quarter 2008, the current liquidity indicator was 0.89.

Acid test ratio is the relation of the most liquid assets of the company and accounts payable to current short-term obligations (net of incomes of the future periods). This factor reflects payment opportunities of the enterprise for duly and fast repayment of the debts. For the issuer at 31.12.2007, the indicator was 0.77.

At the date of the end of the 1st quarter 2008, the acid test ratio was 0.78.

Equity asset ratio characterizes dependence of the enterprise on external sources of financing. The above its value, the more the issuer's financial independence. The value of the equity asset ratio at the date of the end of the year 2007 was 0.52. The decrease in the indicator in 2007 in comparison with 2006 is connected with attraction of the long-term extra capital within the limits of realization of investment activity.

At the date of the end of the 1st quarter 2008, the equity asset ratio was 0.50.

Opinions of the issuer's governance bodies concerning the information presented in this item coincide.

4.3. Amount and structure of the issuer's equity and working capital

4.3.1. Amount and structure of the equity and working capital

The amount and structure of the capital and working capital for 2007

The information for 2007

a)The amount of the authorized capital of the issuer, RUR: **14,124,679,850 (fourteen billion, one hundred and twenty -four million, six hundred and seventy-nine thousand eight hundred and fifty) rubles.**

The amount of the authorized capital specified in the present section, corresponds to the Charter of the issuer.

b)Total value of the shares (stakes) of the issuer redeemed by the issuer for the subsequent resale (transfer), and specification of the percent of such shares (stakes) from the placed shares (the authorized capital) of the issuer: **no such shares (stakes)**

c)The amount of the reserve capital of the issuer formed due to contributions from the issuer's profit: **RUR 251,470 thousand.**

d)The amount of the additional capital of the issuer reflecting an increase in the value of assets revealed after the reassessment, and the amount of the difference between the sale price (price of placement) and par value of the shares (stakes) of the company due to sale of the shares (stakes) at the price exceeding the par value: **RUR 23,401,503 thousand.**

e)The amount of the unallotted net profit of the issuer: **RUR 11,004,062 thousand.**

f)Total amount of the capital of the issuer: **RUR 48,781,715 thousand.**

The amount of the issuer's working capital according to the issuer's accounting reports:

OJSC "Moscow United Electric Grid Company" uses both own sources of financing of current assets, and extra sources. The own sources are enough for realization of the current financial and economic activities; however, the company also uses extra sources in order to provide an effective realization of the investment program. The current assets financing policy is based on principles of minimization of loans value, availability of credit resources, maximization of the company profit, etc. Formation of the delayed debt (i.e. breaking the terms of the contracts concluded by the issuer regarding the terms of transfer of money resources) is not allowed.

The issuer does not project an occurrence of factors which may entail changes in the policy of financing of the current assets.

4.3.2. Issuer's financial investments

The list of the issuer's financial investments which are at least 10 percent of its all financial investments at the date of the end of the third quarter of the current financial year.

The full company name: *Open Joint-Stock Company "Energocenter"*

The shortened company name: *OJSC "Energocenter"*

The location: *142117, Moscow region, Podolsk city, Kirova street, 65*

The type of securities: *shares*

The state registration number of the share issue: *1-01-55217-E*

The date of the state registration number of the share issue: *31 August 2006*

The registering agency which carried out the state registration of the share issue: *The Federal Financial Markets Service*

The number of the securities owned by the issuer: *10,000 pieces*

The state registration number of the share issue: *1-01-55217-E-001D*

The date of the state registration number of the share issue: *24 May 2007*

The registering agency which carried out the state registration of the share issue: *The Federal Financial Markets Service*

The number of the securities owned by the issuer: *10,000 pieces*

The total par value of the securities owned by the issuer: *RUR 1,000,000,000.*

The total balance sheet value of the securities holding: *RUR 1,000,000,000.*

The amount of the declared dividend per the ordinary shares: *dividend was not paid per ordinary shares*

The issuer has no funds on depositary or other accounts in banks and other credit organizations, the licenses of which were suspended or withdrawn, and in banks and other credit organizations, with regard to which the decision on reorganization, liquidation, the beginning of the bankruptcy procedure or on recognition to be insolvent (a bankrupt) was taken.

The registration of the issuer's financial investments is performed according to the Russian Book Keeping Rules stated in the Order of the Ministry of Finance of the Russian Federation as of 10 December 2002 No. 126n (126н) "On approval of the Regulations for Book Keeping "Registration of Financial Investments" AR 19/02" (AR 19/02).

4.3.3. Issuer's intangible assets

Information on the structure, initial value of the intangible assets and the amount of the accumulated amortization for the first quarter of the present financial year:

Such information is not indicated as far as at the end of 2007 and at the end of the end of the first quarter of the current financial year the issuer does not possess any intangible assets.

There was no contribution of the intangible assets to the authorized capital or their acquisition through a grant.

Standards (rules) of the accounting whereby the issuer presents information concerning his/her intangible assets:

1. Regulation on the accounting "Financial accounting of the enterprise" AR 4/99 (approved by the order of the Ministry of Finance of the Russian Federation as of July 6, 1999, N. 43 n).

2. Regulation on the accounting "Intangible assets accounting" AR 14/2000 (approved by the order of the Ministry of Finance of the Russian Federation as of October 16, 2000 N. 91 n).

4.4. Data on the issuer’s policy and expenses in the field of scientific and technical development, licenses and patents, new development and research.

There is no policy of the issuer in the sphere of the research and development and costs for the implementation of the research and development from own funds for the period since the date of the state registration of the issuer till the moment of the third quarter end of 2008.

The issuer neither created nor got the legal protection of the main objects of the intellectual property in the 1st quarter 2008.

There are no risk factors connected with the possibility of the validity expiration of the basic patents and licenses for trade marks use.

4.5. Analysis of tendencies of development in the sphere of the issuer’s primary activities

Russian power industry is one of the largest in the world due to its installed capacity, production and sales of the power energy.

For January-March of 2008, 291 billion kW/h of electricity power was produced. It outnumbers the correspondent period of 2007 by 15.2 billion kW/h (5.5%). The increase of the power production was conditioned by the increase of the industrial growth rate.

Electric power production growth rates
(December of 2003 – 100%)

%

Source: Ministry of Finance of the Russian Federation

Power production at heat and nuclear power plants in January-March of 2008 in comparison with January-March of 2007 increased by 20.1 billion kW/h (10.6%) and 2.3 billion kWh (5.5%) accordingly, and decreased by 7.2 billion kW/h (15.8 per cent) at hydroelectric power stations (15.8%).

Considerable decrease of power production at hydroelectric power stations in accordance with the same period of the past year was connected with the unfavorable hydro geological conditions influencing the rivers of the European part of Russia and Siberia.

Thus, in January-March of 2008 the power production at Volzhsko-Kamsky cascade in comparison with January-March of 2007 decreased by 4.4 billion kW/h (36.6%), and at Angaro-Yeniseysky by 2.2 billion kW/h (9.7 per cent).

	2007		2008		2007 to 2008, %	
	January-March	Including March	January-March	Including March	January-March	Including March
<i>Electric energy, billion kW/h</i>	<i>275.7</i>	<i>91.0</i>	<i>290.9</i>	<i>93.2</i>	<i>105.5</i>	<i>102.4</i>
<i>Including power production by the following stations:</i>						
<i>heat</i>	<i>189.1</i>	<i>61.1</i>	<i>209.2</i>	<i>65.6</i>	<i>110.6</i>	<i>107.3</i>
<i>hydroelectric power</i>	<i>45.3</i>	<i>16.0</i>	<i>38.1</i>	<i>13.0</i>	<i>84.2</i>	<i>81.5</i>
<i>nuclear</i>	<i>41.2</i>	<i>13.8</i>	<i>43.4</i>	<i>14.5</i>	<i>105.5</i>	<i>105.1</i>

The amount of the electric power produced by the heat power stations in the general amount of the produced power was increased from 68.6% in January-March of 2007 up to 71.9% in January-March of 2008. The amount of the electric power produced by the hydro-electric power stations decreased accordingly from 16.4% down to 14.9%. Nuclear power plants production remained on the level of the 1st quarter 2007 and equaled 14.9%.

Power consumption for January-March of 2008 accounted for 287.3 billion kW/h that 5.1 % outnumbers the correspondent period of 2007.

Electric power production dynamics analysis gives the right to consider this sector a constantly growing one.

The 80-ies of the 20th century witnessed stagnation features in the electric power sector of the country: production facilities were renewed slower than the growth of power consumption.

In 1990, during the period of the general economic crisis in Russia the amount of power consumption was considerably decreased and the process of the facilities renewal was almost stopped.

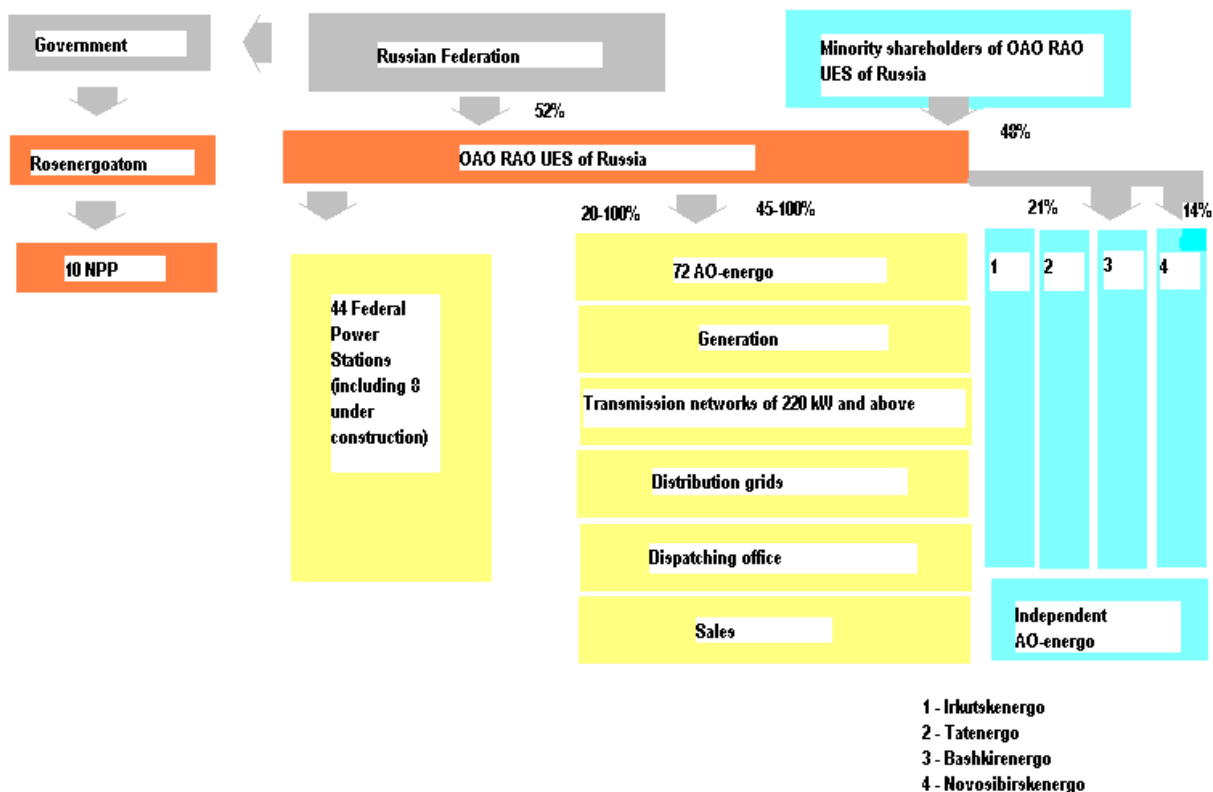

The general branch condition was estimated as follows:

- *Technological indices (fuel use per kW/h, average efficiency of the equipment, working capacity of the substations and etc.) showed that Russian power companies lagged behind their counterparts in developed countries;*
- *There were no incentives for the increase of productivity, reasonable planning of power production and consumptions industrial regimes, and power saving;*
- *Some regions saw black-outs and power crisis, high probability of serious accidents;*
- *There was no payment discipline. Payment defaults were a frequent event;*
- *Branch enterprises were not “transparent” in information and financial terms;*
- *New, independent players could not enter the market.*

All this entailed the necessity of changes in power industry sector which could develop the conditions for the productivity increase of power companies and let increase the amount of investments in the

branch. Otherwise, together with the further development of foreign economic cooperation, Russian enterprises would lose the economic competition not only at foreign markets, but also inside the country.

III No. 1, Branch structure in 2000.

Source: OAO RAO UES of Russia

The main goal of Russian power industry reforming is the increase of branch enterprises productivity, creation of the conditions for its development on the basis of the investments promotion, ensuring the reliable and uninterrupted power supply of the consumers.

It entails the considerable changes in Russian power sector: the system of the state regulation of the branch changes, the competitive power market is formed, new companies are created.

The sector structure changes during the reform: there is the separation of the natural monopoly (power transmission, operative and dispatch management) and potentially competitive functions (power production and sales, maintenance and service). Vertically integrated companies fulfilling all these functions give their way to formations specializing in separate kinds of activity.

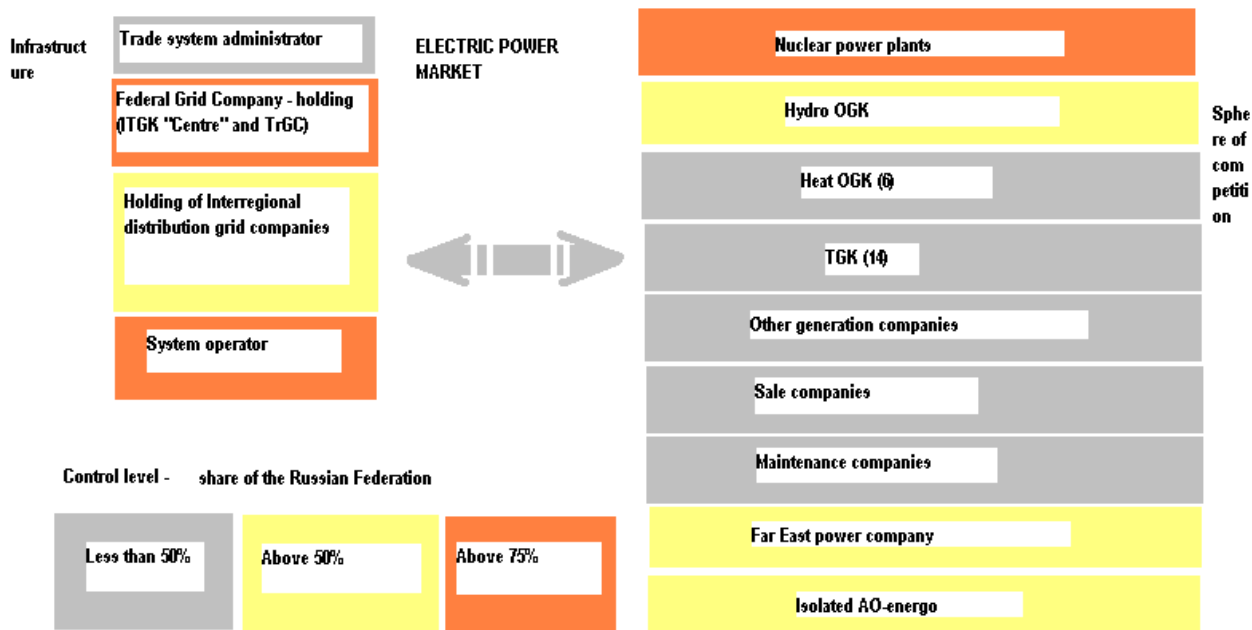

Generation, sales and maintenance companies in future will become mainly private and will compete with each other. In natural monopoly spheres, on the contrary one can observe the increase of the state control.

Thus, the conditions for the development of the competitive sector of electric power are being created. Its prices are not regulated by the state, but formed on the basis of the demand and supply and its participants compete decreasing their expenditures.

Goals of the reform were determined by the Government decree as of July 11, 2001 No. 526 "On Restructuring the Electric Power Industry of the Russian Federation"

Taking into consideration the latest changes in regulatory and legal framework the goals of reforming were described in the "Strategy Concept of OAO RAO UES of Russia" for 2005-2008 "5+5"

III 2. Goal structure of the branch

Source: OAO RAO UES of Russia

Companies formed during the reform present enterprises specializing in certain types of activity (generation, power transmission and others) and governing the correspondent profile assets. According to the scale of the profile activity the created companies surpass the former monopolies of the regional level: new created companies comprise the profile enterprises of several regions or are all-Russian. Thus, the transmission networks are under control of the Federal Grid Company. It is planned to integrate the distribution grids into interregional distribution grid companies (IDGC). The functions and assets of the regional dispatch bodies will be transmitted to the all-Russian system operator.

Assets of the generation are also combined into interregional companies of two types: generation companies of the wholesale market (wholesale generation companies – WGC (OGK)) and territorial generation companies – TGC. OGK comprises power stations specializing in production of electric power only. TGC consists mainly of thermal power plants (TPP) which produce both heat and thermal power. Six out of seven OGK were formed on the basis of the thermal power stations and one of them (HydroOGK) – on the basis of hydrogenation assets. Heat OGK is built on extraterritorial basis when TGC comprise the stations of the neighboring regions.

The process of AO-energo reforming began in 2003 with the implementation of several pilot projects: Kalugaenergo, JSC; Orelenergo, JSC; Bryanskenergo, JSC; Tulaenergo, JSC restructuring. Structural transformations most actively were carried out in 2004. The reforming process comprised more than 30 companies. There was completed the procedure of the first regional power company - Kalugaenergo by April 2004. By the end of the year, all 5 AO-energo were divided according to the types of activity.

There began the creation of the new interregional companies in 2004. At the end of 2004 first three OGK and two TGC were formed (went through the state registration). At the same time (in October of 2004) the Board of Directors of OAO RAO UES of Russia took the decision on creation of four IDGC. In 2004 the new operative and dispatch administration was almost completely formed: functions of regional dispatch administrations were transferred (with a slight change) from AO-energo to the System operator.

In 2005 the restructuring process comprised the majority of AO-energo. Most of them were divided by the end of the year. Thus, the year witnessed the creation of the majority of the rest interregional companies: the last of 7 OGK was registered by March; thirteen out of 14 TGC and four IDGC were registered by August.

In 2006 - the beginning of 2007, the process of formation of the companies of the target structure came to an end. At the beginning of 2007, projects of reforming 70 out of 71 "energo" joint-stock companies was approved, formation of all of six thermal WGC was finished. By 1 March 2007, formation of the target structures of TGC-3 (JSC "Mosenergo"), TGC-4, TGC-5, TGC-6, TGC-9, TGC-13 ("Yenisei TGC") and TGC-14 was completed; contracts of sale and purchase of generating property between Kuzbassenergo (TGC-12) and Altaienergo were signed, the 1st stage of reorganization of TGC-1, TGC-2, TGC-8, TGC-10 was completed.

The process of all grid companies' separation came to an end. 55 out of the planned 56 transmission companies were created on the basis of the reorganized AO-energo.

Since September 1, 2006 new rules of work of the wholesale and retail electric power markets entered into force. At the wholesale electric power (capacity) market the transition to the regulated agreement between the buyers and generation companies took place as a result of new rules of work introduction since September 1. Free trade sector (FTS) was liquidated and new spot market was launched – "tomorrow market" (TM). By 2011 in accordance with the decision taken by the Government of the Russian Federation on November 30, 2006 the stage-by stage substitution of the regulated agreements by free (non-regulated) agreements took place. Rules of the retail markets functioning presuppose stage-by stage liberalization of the wholesale electric power market preserving during the transition period power transmission to the consumers retaining the regulated tariffs.

Thus, during the reform, the former, monopolistic structure of power industry vanishes: the majority of the vertically integrated companies go off the scene. They are substituted by the new companies of the branch goal structure.

Main factors influencing the branch condition:

For the past 5 years it is possible to point out the following tendencies characteristic for the branch in general:

- *considerable growth of power consumption since the end of the 90-ies and increase of the heat and electric power consumption;*
- *increase of the payment discipline of heat and electric power consumers;*
- *increase of the financial results of the power companies activity;*
- *regional systems' balance structure improvement;*
- *decrease of the cross subsidization level;*
- *ageing of the basic equipment (power stations, electric and heat grids) of power companies, lack of the investment resources for the support of the generating capacities.*

General assessment of the issuer's activity results in the given branch, the assessment of the correspondence of the issuer's activity results to the tendencies of the branch development and the reasons determining the acquired results of the activity:

It is necessary to point out the sustainable positive issuer's development dynamics. The issuer acquires the leading position not only at power transmission market of the Moscow Region, but the whole country.

Investment program of the Company determined the priority tasks: improvement of the distribution, development of the electric network, modernization of power transmission lines of the Moscow Region, increase of the reliable power supply in Moscow and the region owing to the construction of new owning centers, increase of the industry productivity, decrease of costs and dangerous impact on the environment.

OJSC "MOESK" successfully implemented all the goals of 2007 directed to the elimination of the capacity deficiency in the Moscow Region. The reliability of power transmission in the region was increased. There were no limitations of power in first ten days of December, when the system loads outnumbered the highest loads of the cold 2006. Implementation of the Company's investment program will let eliminate all the restrictions during the power supply in Moscow and the Moscow Region for the period of the autumn and winter loads maximum in future.

The Company has even more serious tasks directed to the decrease of accident risk, implementation of the maintenance programs, creation of the attractive environment for the shareholders and investors.

Opinions of the issuer's management bodies concerning the presented information are identical.

4.5.1. Analysis of tendencies of development in the sphere of the issuer's primary activities

Factors and conditions influencing the issuer's activity and the forecast concerning their duration:

Factors and conditions influencing the issuer's activity comprise the following:

- *considerable amount of the state regulation of the branch, concerning the tariffs regulation for heat and electric power;*
- *the growth of power consumption in the place of the issuer's location;*
- *increase of payment discipline of heat and electricity power consumers;*
- *decrease of cross-subsidization level;*
- *ageing of the issuer's basic equipment lack of the investment resources for the generating capacities support;*

the reform of the energy industry may be considered as a factor of uncertainty when forecasting the variants of the issuer's development.

The given factors will influence the activity of the issuer during near several years.

Activities taken by the issuer and activities the issuer is planning to take in future for the productive use of the given factors and conditions:

- *to carry out the fixed assets modernization;*
- *to provide the constant growth of all industrial chain constituents efficiency of the issuer;*
- *to implement the improved procedures of the financial planning;*
- *to concentrate efforts for the provision of the timely acquisition of the money means concerning the current and overdue accounts receivable;*
- *to restrict the obligations directed to their extinction during the longer period of time.*

Methods used by the issuer and methods the issuer plans to use in future to decrease the negative effect of factors and conditions influencing the issuer's activity:

- *development of the modern system of transmission and distribution of the electric power;*
- *decrease of losses of power;*
- *increase of the financial control and implementation of the program directed to the decrease of costs;*
- *risks management connected with the basic activity of the issuer;*
- *insurance of the property risks and civil responsibility risks and etc.*

Considerable events/factors which can negatively influence the possibility of the issuer's acquisition of higher results are as follows:

- *deterioration in business, political and social environment in the country;*
- *raw materials and equipment cost growth.*

The probability of the abovementioned factors is considered by the issuer as not high due to the current forecasts of the stable and successful development of the economic, political and social situation in the country in general.

Considerable conditions/factors which can improve the results of the issuer's activity and the possibility of their occurrence and the duration of their action:

There are no considerable factors that can improve the basic activity of the issuer – electric power transmission.

4.5.2. Issuer's competitors

Information on the general and supposed competitors of the issuer concerning the basic types of the activity:

In accordance with the “Strategy Concept of OAO RAO UES of Russia” for 2005-2008 “5+5” each segment of the Russian electric power market (generation, transmission and sale) has independent companies competing with each other. The activity of the issuer is the natural-monopolistic one.

List and factors of the issuer’s competitive ability with the description of their influence, according to the issuer on the competitive ability of the produced goods (works and services):

It is not possible to evaluate the factors of the issuer’s competitive ability as far as the issuer’s activity is natural-monopolistic.

V. Detailed data on the persons that form part of the issuer's governance bodies, bodies of the issuer undertaking control over its financial and economic activities, and brief data on the staff (employees) of the issuer

5.1. Data on structure and competence of the issuer's governance bodies

A comprehensive description of the issuer's governance bodies in accordance with the issuer's Charter (documents of incorporation):

The governance bodies of the issuer, in accordance with its Charter, are:

- General Shareholders Meeting;*
- Board of Directors;*
- Management Board;*
- General Director.*

General Shareholders Meeting is the highest governance body of the issuer.

The competence of the issuer's General Shareholders Meeting in accordance with its Charter.

The issues which fall within the competence of the General Shareholders Meeting shall not be delegated for decision to the Company Board of Directors or General Director (item 10.3., Article 10, the issuer's Charter).

In accordance with item 10.2 of the issuer's Charter, the competence of the issuer's General Shareholders Meeting includes the following issues:

- 1) amending of the Charter and approval of the revised Charter;*
- 2) restructuring of the Company;*
- 3) liquidation of the Company; appointment of the liquidation commission and the approval of the interim and final liquidation balances;*
- 4) determination of the quantity, par value, category (type) of the declared shares and the rights provided by these shares;*
- 5) increase of the authorized capital by an increase of the par value of shares or by a placement of additional shares;*
- 6) reduction of the Company authorized capital by a reduction of the par value of the shares, through the acquisition by the Company of a part of shares in order to reduce their total amount, or by repayment of the shares redeemed or acquired by the Company;*
- 7) fractioning and consolidation of the Company shares;*
- 8) making the decision on the placement by the Company of bonds converted into shares and other equity securities convertible into shares;*
- 9) election of the members of the Board of Directors and the early termination of their powers;*
- 10) election of the members of the Auditing Committee of the Company and the early termination of their powers;*
- 11) approval of the Company Auditor;*
- 12) making the decision on the transfer of powers of the Company sole executive body to the managing organization (managing director) and on the early termination of his/her powers;*
- 13) approval of annual reports, annual accounting reports, including the Company income statements, and distribution of its profit (including payment (declaring) of dividends, except for the profit distributed as a dividend following the results of the first quarter, half a year, nine months of the financial year) and the Company loss following the results of the financial year;*
- 14) payment (declaring) of dividends following the results of the first quarter, half a year, nine months of the financial year;*

- 15) determination of the procedure for holding the Company General Shareholder Meeting;
- 16) making the decision on the approval of transactions in cases envisaged by Article 83 of the Federal Law “On Joint Stock Companies”;
- 17) making the decision on the approval of large transactions in cases envisaged by Article 79 of the Federal Law “On Joint Stock Companies”;
- 18) making the decision on the participation in financial and industrial groups, associations and other unions of for-profit organizations;
- 19) approval of the internal documents regulating the activities of the Company bodies;
- 20) making the decision on payment remuneration and/or compensation to the members of the Company Auditing Committee;
- 21) making the decision on payment of remuneration and/or compensation to the members of the Company Board of Directors;
- 22) solution of other issues envisaged by the Federal Law “On Joint Stock Companies”.

The competence of the issuer’s Board of Directors in accordance with its Charter.

In accordance with item 15.1 of the issuer’s Charter, the Company Board of Directors carries out general management of the Company activities, except for the decision of issues which are referred by the Federal Law “On Joint Stock Companies” and the Charter to the competence of the General Shareholders Meeting.

The Company Board of Directors’ competence includes the following issues:

- 1) setting the priority directions of the Company activities;
- 2) convocation of the Company annual and extraordinary general shareholder meetings, except for the cases stipulated by item 14.8 of Article 14 of this Charter;
- 3) Approval of the Company general shareholder meeting agenda;
- 4) election of the secretary of the Company general shareholder meeting;
- 5) determining of the date of drawing up the list of persons entitled to participate in the Company general shareholder meeting, and solution of other issues connected with preparation and carrying out of the Company general shareholder meeting;
- 6) submission for the decision of the Company general shareholder meeting of issues envisaged by subparagraphs 2,5,7,8,12-20 of Item 10.2 of Article 10 of this Charter, as well as on the reduction of the Company authorized capital through the reduction of the par value of the shares;
- 7) placement by the Company of bonds and other equity securities except for the cases stipulated by the legislation of the Russian Federation and this Charter;
- 8) approval of the resolution authorizing issuance of securities, prospectus for securities, and report on the results of the securities issuance, approval of the reports on the results of the shares acquisition from the Company shareholders, reports on the redemption of shares, reports on the results of presentation the demands by the Company shareholders on the redemption of the shares owned by them;
- 9) determining the price (monetary value) of the property, the price of the placement and redemption of equity securities in cases envisaged by the Federal Law “On Joint Stock Companies” as well as while solving issues stipulated in subitems 11, 20, 21, and 38 of Item 15.1. of Article 15 of this Charter;
- 10) acquisition of the shares, bonds and other securities placed by the Company in cases envisaged by the Federal Law “On Joint Stock Companies”;
- 11) carve-out (selling) of the Company shares which are placed at the disposal of the Company as a result of their acquisition or redemption from the Company shareholders, as well as in other cases envisaged by the Federal Law “On Joint Stock Companies”;
- 12) election of the Company General Director and early termination of his/her powers including taking the decision on early termination of the labor contract with him/her;
- 13) recommendations to the Company general shareholder meeting on the amount of remunerations and compensations paid to the members of the Auditing Committee and fixing the amount of remuneration of the Auditor’s services;

- 14) *recommendations on the amount of the dividend per shares and the procedure for its payment;*
- 15) *approval of the Company internal documents determining the procedure for the formation and use of the Company funds;*
- 16) *decision-making on the use of the Company funds; approval of the cost estimates for the use of special-purpose funds and consideration of the results of the implementation of cost estimates for the use of special-purpose funds;*
- 17) *approval of the Company internal documents except for internal documents, the approval of which is referred to the competence of the Company general shareholder meeting and other Company internal documents, the approval of which is referred to the competence of the Company executive bodies;*
- 18) *approval of the business plan (revised business plan) and the report on the results of its implementation, as well as approval (revising) of the list and values of the Company cash flow benchmarks;*
- 19) *foundation of the Company branches and opening of the Company representative offices, their liquidation, as well as amending the Company Charter in connection with the foundation of the Company branches and opening of the Company representative offices (including changing of the information on the names and locations of the Company branches and representative offices) and their liquidation;*
- 20) *participation of the Company in other organizations (including coordination of constituent documents and candidates for the governance bodies of newly founded organizations, and in view of provision 21, item 15.1., Article 15 of this Charter) and change of the stake (number of shares, amount of contributions, equities), carve-out of shares (equities) and termination of the Company's participation in other organizations;*
- 21) *making the decision on one or several associated transactions of the Company on the carve-out, pledging or other encumbrance of shares and stakes of SDE (subsidiaries and dependent entities) which are not engaged in production, transmission, dispatching, distribution and selling of electric and thermal energy in case if the market value of shares or stakes being the subjects of the deal determined according to the report of the independent appraiser exceeds 30 million rubles and in other cases (amount) determined by the separate decisions of the Company Board of Directors;*
- 22) *determination of the Company credit policy as to provision by the Company of loans, making credit contracts and loan contracts, issuing of guarantees, acquisition of liabilities on bills (issuing of ordinary and transfer bill), pledging of property and making the decision on the above mentioned transactions of the Company in cases when the procedure for the decision-making of them is not determined by the Company credit policy as well as decision-making in accordance with the order envisaged by the Company credit policy on bringing the debt situation of the Company within the limits determined by the Company credit policy;*
- 23) *decision-making on completion of the transactions, the subject of which is the property, works and services, the value of which is from 5 to 25 per cent of the Company balance sheet assets which is defined at the date of decision-making on completion of the transaction, except for the transactions completed in the process of the Company ordinary economic activities;*
- 24) *approval of the large transactions in cases envisaged by Chapter X of the Federal Law "On Joint Stock Companies";*
- 25) *approval of transactions in cases envisaged by Chapter XI of the Federal Law "On Joint Stock Companies";*
- 26) *approval of the Company Registrar, terms of the contract concluded with it and termination of the contract concluded with it; approval of an estimate of expenses for carrying out the Company General Shareholder Meeting;*
- 27) *election of the Company Board of Directors Chairperson and the early termination of his/her powers;*
- 28) *election of the Company Board of Directors Deputy Chairperson and the early termination of his/her powers;*

- 29) election of the Company Board of Directors Secretary and the early termination of his/her powers;
- 30) tentative approval of decisions on the Company transactions connected with the gratuitous transfer of the Company property or property rights (demands) to itself or the third party; transactions connected with the liberation from property liabilities to itself or the third party; transactions connected with the gratuitous provision of services by the Company (carrying out of works) to the third parties, in cases (amount) determined by separate decisions of the Company Board of Directors, and decision-making on these transactions by the Company in cases when the above-mentioned cases (amount) are not determined;
- 31) decision-making on suspending of the powers of the managing organization (managing director);
- 32) decision-making on the appointment of the Acting General Director of the Company and his/her calling to an account;
- 33) calling to an account of the Company General Director and his/her remuneration in accordance with the labor legislation of the Russian Federation;
- 34) consideration of the General Director's reports on the Company activities (including the report on exercising his/her functions, on the implementation of the decisions of the Company General Meeting and its Board of Directors);
- 35) approval of the procedure of the Company's interaction with the organizations, in which the Company participates;
- 36) Definition of the Company's position (Company's representatives), including the assignment to take or not to take part in voting on the agenda items, to vote under draft decisions "for", "against" or "abstained", on the following items of the agenda of general shareholder (participant) meetings of subsidiaries and dependent entities (further on called SDE) (except for the cases when the functions of the SDE general shareholder meetings are exercised by the Company Board of Directors), and meetings of the SDE boards of directors (except for an item on approval of the agenda of the SDE general shareholder meetings when functions of the SDE general shareholder meeting are carried out by the Company Board of Directors):
- i) on the determination of the agenda of the general shareholder meeting (participants) of SDE;
 - ii) on the reorganization and liquidation of SDE;
 - iii) on the determination of the quantitative structure of the SDE Board of Directors, nomination and election of its members and the early termination of their powers;
 - iv) on the determination of the number, par value, category (type) of the SDE declared shares and the rights granted by these shares;
 - v) on the increase of the SDE authorized capital through the increase of the par value of shares or through the placement of additional shares;
 - vi) on the placement of the SDE securities convertible into ordinary shares;
 - vii) on the fractioning and consolidation of the SDE shares;
 - viii) on the approval of large transactions made by the SDE;
 - ix) on the participation of SDE in other organizations (on entering the existing organization or on the foundation of the new one), as well as on the acquisition, carve-out, encumbrance of shares and stakes in the authorized capitals of the organizations, in which SDE participates, changes of the stake in the authorized capital of the respective organization;
 - x) on the transactions made by SDE (including several associated transactions) connected with the carve-out or the possibility of carve-out of property, representing fixed assets, intangible assets, objects of incomplete construction, the purpose of the use of which is production, transmission, dispatching, distribution of electric and thermal energy in cases (amount) defined by the procedure of interrelation of the Company with organizations in which the Company participates, approved by the Company Board of Directors;
 - xi) on amending the SDE constituent documents;
 - xii) on the determination of the procedure of remuneration payment to the members of the SDE Board of Directors and Auditing Committee;
- 37) determination of the position of the Company (representatives of the Company) on the following items of the agenda of the SDE board of directors' meetings (including the assignment

to participate or not to participate in voting on the items of the agenda, to vote on draft decisions “for” or “against”, or “abstain”:

i) on the determination of the SDE representatives’ position on the items of the agenda of the general meetings of shareholders (participants) and the meetings of the Board of Directors of the subsidiaries and dependent entities in respect of SDE, concerning the completion (approval) of transactions (including several associated transactions) connected with carve-out or a possibility of carve-out of the property representing fixed assets, intangible assets, objects of incomplete construction, the purpose of the use of which is production, transmission, dispatching, distribution of electric and thermal energy in cases (amount) determined by the procedure of interrelations of the Company with organizations in which the Company participates, approved by the Company Board of Directors;

ii) on the determination of the SDE representatives’ position on the items of the agenda of the general meetings of shareholders (participants) and the meetings of the Board of Directors of the subsidiaries and dependent entities in respect of SDE, participating in production, transmission, dispatching, distribution of electric and thermal energy, on reorganization, liquidation, increase of the authorized capital of these entities through the increase of the par value of shares or through the placement of additional shares, securities convertible into ordinary shares;

38) tentative approval of the decisions on the completion by the Company:

i) of transactions, the subject of which shall be the Company non-current assets in the amount exceeding 10 percent of the balance sheet value of these assets as of the date of decision-making on the completion of this transaction;

ii) of transactions (including several associated transactions) connected with carve-out or an opportunity of carve-out of the property forming the fixed assets, intangible assets, objects of incomplete construction, the purpose of use of which is production, transmission, dispatching, distribution of electric and thermal energy in the cases (amount) determined by separate decisions of the Company Board of Directors;

iii) of transactions (including several associated transactions) connected with carve-out or an opportunity of carve-out of the property forming the fixed assets, intangible assets, objects of incomplete construction, the purpose of use of which is not production, transmission, dispatching, distribution of electric and thermal energy in the cases (amount) determined by separate decisions of the Company Board of Directors;

39) nomination by the Company of persons for the election to the position of the sole executive body, to other management bodies, bodies of control, and candidates for the Auditor of the organizations, in which the Company participates, which carry out production, transmission, dispatching, distribution and selling of electric and thermal energy, as well as repair and maintenance activities;

40) determination of the lines of provision of the Company with insurance coverage including the approval of the Company Insurer;

41) approval of the candidate to the position of the independent appraiser(s) for definition of the value of shares, property and other Company assets in the cases envisaged by the Federal Law “On Joint Stock Companies”, Charter, and separate decisions of the Company Board of Directors;

42) tentative approval of the collective agreement, the agreements concluded by the Company within the limits of the regulation of social and labor relations;

43) approval of the candidate for the financial consultant involved in accordance with the Federal Law “On the Securities Market” as well as the candidates of securities issuance organizers and consultants on transactions directly connected with the attraction of means in the form of public loans;

44) working-out of recommendation on selecting the Auditor which carries out an audit of the Company financial statements prepared under the International Financial Reporting Standards, approval of the contract terms with it, and monitoring of carrying out the audit of the Company financial statements prepared under the International Financial Reporting Standards;

- 45) approval of the document determining the rules and approaches to disclosing of the information on the Company; document on use of the information on the Company activities, on the Company securities and transactions with them, which is not accessible to the public and the disclosure of which may render a material influence on the Company securities value; document determining the procedures of the internal control over the Company financial and economic activities;
- 46) approval of prospective (up to 5 years), annual and quarterly major construction schedules, schedules of goods and services purchases, projects of new construction, technical re-equipment and reconstruction, and the reports on their implementation;
- 47) tentative approval of transactions, which may lead to an occurrence of liabilities expressed in the foreign currency (or liabilities, the volume of which is attached to the foreign currency) in cases and amounts determined by separate decisions of the Company Board of Directors and if the said cases (amounts) are not determined by the Company Board of Directors;
- 48) determination of the Company purchasing policy, including the approval of the Regulations for the Procedure for Carrying out the Specified Purchases Of Goods, Works and Services, approval of the head of the Company Central Purchasing Body and its members, and approval of the annual comprehensive program of purchases and decision-making on other items in accordance with the documents approved by the Company, regulating the Company purchasing activities;
- 49) decision making on the nomination of the Company General Director for state awarding;
- 50) approval of the target values (revised values) of the Company key performance indicators (KPI) and the reports on their implementation;
- 51) determination of the Company housing policy including in the part of providing corporate aid to the employees of the Company for improving their living conditions in the form of subsidies, compensation of their costs, interest free loans and decision-making on the provision by the Company of the specified aid in cases, when the procedure of its provision is not determined by the Company housing policy;
- 52) determination of the quantitative number of the Company Management Board, election of the Company Management Board members, early termination of their powers, including decision-making on early termination of labour contracts with them.
- 53) determination of the Company policy directed to improving the stability of the power grids distribution complex and other power energy complex facilities, including the approval of the Company strategic programs on the improvement of the stability of the power grid complex, its development and its safety;
- 54) other issues falling within the competence of the Board of Directors in accordance with the Federal Law “On Joint Stock Companies” and the Company Charter.

The competence of the issuer’s Management Board in accordance with its Charter.

In accordance with item 20.1, Article 20 of the issuer’s Charter, the Company’s current activities management shall be carried out by the sole executive body – General Director, and the collegial executive body – the Company Management Board.

The collegial executive body shall be accountable to the General Shareholder Meeting and the Company Board of Directors.

- 1) development and granting for consideration of the Board of Directors of long-term plans on realization of the Company main business lines;
- 2) approval (revising) of target values of key performance indicators (KPI) for divisions (officials) of the Company;
- 3) preparation of the business plan (revised business plan) and the report on results of its implementation; approval and revising of the cash flow according to the list and values of the Company cash flow benchmarks approved by the Company Board of Directors (with an obligatory subsequent submission to the Company Board of Directors);
- 4) preparation of the investment program and the report to the Company Board of Directors on the results of its implementation;

- 5) consideration of the Company certain investment projects for the amount exceeding 2 (two) million rubles and approval of reports of the Company officials and divisions on the efficiency of their realization;
- 6) preparation of the program of the Company re-equipment, reconstruction and development;
- 7) approval of the quarter budget of the Company cash flow, and the report on its execution;
- 8) preparation of the annual program on the Company purchasing activities, approval of quarter purchases programs within the limits of the annual programs, and preparation of reports on implementation of the Company annual and quarter purchases programs;
- 9) preparation of the report on the Company financial and economic activities, on implementation by the Management Board of the decisions of the Company General Shareholders Meeting and Board of Directors;
- 10) decision-making on completion of transactions, the subject of which is the property, works and/or services, the value of which is more than 1 percent of the Company balance sheet assets defined at the date of decision-making on the completion of the transaction, except for the transactions completed during the Company usual economic activities; and the transactions, the decision on fulfilment of which according to the Company Charter falls within to the competence of the Company Board of Directors;
- 11) preliminary consideration and delivery to the Company Board of Directors of the recommendations on the issues submitted for consideration of the Company Board of Directors in accordance with the procedure specified in the Company internal documents which regulate the procedure of the Company Management Board activities;

Information on the existing agreements concerning these payments in the current financial year:

The amount and procedure of remuneration and compensation payment to the members of the Board of Directors is fixed in the "Regulations for Payment of Remuneration and Compensation to the Board of Directors Members" approved by the Company annual General Shareholders Meeting on 26 June 2006.

5.4. Data on the structure and competence of the issuer's bodies for control over financial and economic activities

The comprehensive description of the structure of the bodies for control over the issuer's financial and economic activities and their competence according to the issuer's Charter (constituent documents):

According to Article 23 of the issuer's Charter:

23.1. In order to ensure control over the Company financial and economic activities, the General Shareholder Meeting shall elect the Checkup Committee of the Company for the period till the next annual General Shareholder Meeting.

Should the Checkup Committee of the Company be elected at the extraordinary meeting of shareholders, the members of the Checkup Committee shall be considered elected for the period till the date of the holding of the Company annual General Shareholder Meeting.

The quantitative structure of the Checkup Committee shall be 5 (five) people.

23.2. By the decision of the Company General Shareholder Meeting, the powers of all or separate members of the Company Checkup Committee may be terminated early.

23.3. The competence of the Company Checkup Committee shall include the following:

- confirmation of the correctness of the information contained in the annual report, accounting balance sheet, income statement of the Company;*
- analysis of the Company financial standing, revealing of the reserves for the improvement of the financial situation in the Company and working out of recommendations for the Company management bodies;*
- organization and carrying out of an examination (audit) of the Company financial and economic activities, in particular:*
- examination (audit) of the financial, accounting, settlement and other documentation of the Company which is connected with carrying out by the Company of financial and economic activities in order to ensure its compliance with the Russian Federation laws, the Charter, internal and other documents of the Company;*

- *control over safe keeping and use of fixed capital;*
- *control over the adherence to the order of writing off the insolvent debtors' debt to the Company losses;*
- *control over cash spending of the Company in accordance with the approved business plan and budget of the Company;*
- *control over the building up and use of the reserve and other specialized funds of the Company;*
- *examination of correctness and timely attributing and payment of dividends per the Company shares, interest per bonds and earnings per other securities;*
- *examination of the regulations issued earlier on the correction of violations and shortages revealed by the previous examinations (audits);*
- *carrying out of other actions (measures) connected with the examination of the Company financial and economic activities.*

23.4. All decisions on the issues referred to the competence of the Checkup Committee shall be made by the simple majority of the votes from the total number of its members.

23.5. The Checkup Committee shall be entitled and, in case of the revealed serious violations of the Company financial and economic activities, obliged to demand the convening of the Company extraordinary general shareholder meeting.

23.6. The procedure of the Company Checkup Committee's activities shall be determined by the internal document of the Company approved by the Company General Shareholder Meeting. The Checkup Committee in accordance with the decision on carrying out an examination (audit) in order to carry out the given examination (audit), shall be entitled to involve specialists in the respective field of law, economy, finance, accounting, management, economic security and other organizations, including the specialized ones.

23.7. The examination (audit) of the Company financial and economic activities may be carried out at any time at the initiative of the Company Checkup Committee, by the decision of the Company General Shareholder Meeting, the Company Board of Directors or upon the demand of the Company shareholder (shareholders) possessing in total at least 10 percent of the Company voting shares.

23.8. For the examination and approval of the Company annual financial reports, the Company General Shareholder Meeting shall annually approve the Company Auditor.

23.9. The amount of the remuneration of the services of the Auditor shall be determined by the Company Board of Directors.

23.10. The Company Auditor shall carry out the examination of the Company financial and economic activities in accordance with the requirements of the Russian Federation laws and on the grounds of the Contract signed with him/her.

23.11. Following the results of the examination of the Company financial and economic activities, the Company Checkup Committee, the Company Auditor shall compile a report, which shall contain:

- *confirmation of the correctness of the information contained in the Company reports and other financial documents;*
- *information on the facts of violation by the Company of the accounting procedures and submission of financial reports envisaged by legal regulations of the Russian Federation, as well as normative enactments of the Russian Federation while carrying out by the Company of financial and economic activities.*

The procedure and the period for compiling the report on the results of the examination of the Company financial and economic activities shall be determined by the normative enactments of the Russian Federation and the Company internal documents.

The information on the system of internal control over the issuer's financial and economic activities; the information on availability of the internal audit service, time of its work and its key staff:

The Company established a structural division which performs procedures of the internal control over financial and economic activities - The Internal Control Department (Order No. 409-244 as of 6 June 2007).

Key employees: Alexander Sergeyevich Sharikov.

The main function of the Internal Control Department is control over the financial and economic activities of the issuer, its branches, and its structural divisions.

The decision of the Board of Directors of OJSC "MOESK" (Minutes No. 52 of 28 November 2007) approved the Regulations for the Internal Control of OJSC "MOESK".

Debtors which share accounts for at least 10% of the total amount of the accounts receivable: *none*

VII. Issuer's accounting reports and other financial information:

7.1. Annual financial statement of the issuer:

Annual accounting reports of the issuer for 2007 financial year, made up in accordance with the requirements of the Russian Federation legislation is enclosed into the annual report for the 1 quarter of 2008 (Appendix No. 1).

The accounting reporting of the issuer for 2007 consists of:

- *balance sheet (form 1);*
- *profit and loss statement (form 2);*
- *statement of changes in equity (form 3);*
- *statement on cash flow (form 4);*

- *appendix to balance sheet (form 5);*
- *explanatory note;*
- *audit report.*

Annual accounting reports for 2007 made in accordance with the International Financial Reporting Standards and the Auditor Report, please find here:

http://www.moesk.ru/ru/shareholders/report_info/msfo_reports/

7.2. Quarterly accounting reports of the issuer for the previous completed reporting quarter

Quarterly financial statement of the issuer for the 1st quarter of 2008 made up in accordance with the requirements of the Russian Federation legislation is enclosed into the present quarterly reporting (Appendix No.2)

Financial statement of the issuer for the 3 quarter of 2008 consists of:

- *balance sheet (form No.1)*
- *profit and loss statement (form No. 2)*

The Issuer does not make the quarterly financial statement in accordance with International Financial Reporting Standards or the generally acquired principles of the financial statement making in the USA.

7.3 Summary accounting reports of the issuer for the previous completed financial year

a) There are no consolidated accounting reports of the Issuer made in accordance with the requirements of the legislation of the Russian Federation.

The Company's obligation to make the consolidated accounting reports established by paragraph 91 of the Order of the Ministry of Finance of the Russian Federation No. 34n on "Approval of the Regulation directed to the implementation of the financial statement and reporting in the Russian Federation" as of July 29, 1998.

In accordance with the government report if the Company possess subsidiary and dependent companies except own financial reporting it should make consolidated accounting reports including the indices of the reports of such companies being on the territory of the Russian Federation and behind its boundaries in the order established by the Ministry of Finance of the Russian Federation.

Besides, there is no order established by the Ministry of Finance of the Russian Federation. The only document that concerns such a report making is the order of the Ministry of Finance of the Russian Federation No. 112 as of December 30, 1996 "On consolidated accounting reports making and methodical recommendations presenting." Besides, this document is not the normative one (By the statement of the Ministry of Justice of the Russian Federation as of March 19, 1997 No. 07-02-285-97, the given Order of the Ministry of Finance of the Russian Federation does not require the state registration); it bears the methodical character and besides, this document does not establish the order, but determine the general approaches to compiling of the consolidated accounting reports. There are no guidelines directed to the use of the given order.

All this, according to the issuer, proves the lack of the clear normative order of the consolidated accounting reports compiling. In its turn, it is not possible for the Issuer to develop such an order using own potential.

b) The issuer did not compile accounting reports in accordance with International Financial Reporting Standards together and USA GAAP.

7.4. Data on the issuer's accounting policy

Information on the accounting polices of the Issuer for 2008, approved by the issuer for the present financial year are presented in Appendix No.3 to the quarterly report for the first quarter of 2008.

Accounting policy of the Company is carried out in accordance with the Federal law as of November 29, 1996 No.129-FL "On Accounting" (issued as of November 3, 2006) and normative documents of the Ministry of Finance of the Russian Federation regulating the order of the Financial statement making and carrying out.

7.5. Data on total amount of export and an export share in the total amount of sales

The Issuer does not carry out the export of the products (goods, works services).

7.6. Data on the value of the issuer's real estate and essential changes which occurred in the structure of the issuer's property after the date of the previous completed financial year.

The total value of the fixed assets and the amount of the accumulated depreciation for the date of the reporting quarter end.

2007

No.	Name	Total cost (RUR, thousand)	Amount of the accumulated depreciation (RUR, thousand)
<i>1</i>	<i>Buildings, construction and transmission devices</i>	<i>13,432,207</i>	<i>1,866,313</i>

Q 1 2008

No.	Name	Total cost (RUR, thousand)	Amount of the accumulated depreciation (RUR, thousand)
<i>1</i>	<i>Buildings, construction and transmission devices</i>	<i>13,188,015</i>	<i>2,052,700</i>

During 12 months before the date of the reporting quarter end the assessment of the fixed assets owned or rented for the long term by the issuer was not carried out by the appraiser.

There were no acquisition and retirement of the fixed assets objects with the cost exceeding 5 per cent of the balance value of the issuer's assets after the date of the past financial year end before the date of the accounting quarter end.

7.7. Data on participation of the issuer in litigations if such participation may have a material effect on the financial and economic activities

There were no judicial proceedings which could considerably influence the financial and industrial activity of the Company.

VIII. Additional information on the issuer and the placement of the equity securities

8.1. Additional data on the issuer

8.1.1. Data on the amount, structure of the authorized (joint-stock) capital (share fund) of the issuer

Information on the authorized capital of the issuer:

Amount of the authorized capital is *14,124,679,850 (fourteen billion, one hundred and twenty -four million, six hundred and seventy-nine thousand eight hundred and fifty) rubles.*

Ordinary shares: *28 249 359 700 (Twenty eight billion two hundred forty nine million three hundred fifty nine thousand seven hundred) pieces.*

Total par value of the ordinary shares: *14 124 679 850 (fourteen billion one hundred twenty four million six hundred seventy nine thousand eight hundred fifty) rubles.*

Share of the ordinary shares in the authorized capital of the issuer: *100%*

Par value of each share: *RUR 0.5*

Shares of the issuer do not circulate beyond the boundaries of the Russian Federation.

8.1.2. Data on the change of the amount of the authorized (joint-stock) capital (share fund) of the issuer

Since the moment of the state registration of the issuer as a legal entity, the amount of the issuer's authorized capital did not change.

The governance body of the issuer which made a decision on approval of the transaction: ***Board of directors of OJSC «Moscow United Electric Grid Company»***

Date of decision-making on approval of the transaction: ***28 February 2007***

Date of drawing up and number of the report of the meeting (session) of the authorized governance body of the issuer, where the decision on approval of the transaction was taken: ***Report 40 from 2 March 2007***

In 1 quarter 2008 the Company accomplished 1 transaction, the amount of obligations on which was more than 10 percent of the book value of the assets of the issuer according to its accounting reporting for last accounting quarter previous to the date of fulfilment of the transaction - of Contract of financial rent (leasing) between OJSC «Moscow United Electric Grid Company» and Closed Joint-Stock Company Leasing company «BUSINESS ALLIANCE».

The parties of Contract. Lease Receiver - Open Company « Moscow United Electric Grid Company », Lease Granter - Joint-Stock Company « BUSINESS the ALLIANCE ».

Subject of Contract.

Lease Granter undertakes on behalf of Lease Receiver to get in the property and to give to Lease Receiver in time possession and using for realization of enterprise activity according to its economic purpose with subsequent repayment by Lease Receiver on conditions of leasing the new ready for operation Equipment and to organize performance of Additional works and services in conformity with the Specification (Appendix №1 to the Contract), made on the basis of Application by Lease Receiver, on the price

coordinated with Lease Receiver, for payment specified below for all term of leasing according to the Contract of delivery and performance of installation works concluded between Lease Granter and Lease Receiver as the Buyer and the Supplier accordingly.

Lease Receiver receives the Equipment in time possession and using during all term of leasing according to its technical purpose, however has no right to concede the rights and duties under the Contract or any interests following from it to the third party without written approval by Lease Granter.

The place of operation of the Equipment will be determined in addition, thus the Parties undertake to sign the corresponding additional agreement to the Contract.

Date of signing by the Parties of the Certificate of commissioning and transfer to leasing the Equipment under the Contract, signed according to conditions of item 3.13 of Contract by the authorized representatives of Lease Granter and Lease Receiver will be considered as the beginning of term of leasing and commissioning of all units of equipment. .

Term of leasing of each unit of equipment with the engineering specifications to be defined depending on amortisation group of the given unit of equipment given in the Specification (Appendix №1 to the Contract) and defined according to Classification of the fixed assets included in amortisation groups (the Governmental order of the Russian Federation №1 from 01.01.2002 (in the edition acting on the moment of transfer to leasing of the Equipment according to item 2.6. of Contract).

The equipment is property of Lease Granter and is booked on its balance sheet during all validity of the Contract.

The parties have agreed to charge deterioration on each unit of equipment transferred in leasing, with use of a linear method of amortization and with use of Factor of the accelerated amortization equal to 3 (three).

The price of Contract. Total cost of the services rendered under of Contract, makes 12,202,855,000 (Twelve billion two hundred two million eight hundred fifty five thousand) rubles 00 kopecks, except for VAT of 1,986,165,921.20 (One billion nine hundred eighty six million hundred sixty five thousand nine hundred twenty one) rubles and 20 kopecks, including:

Contract 1:

4.1. The total amount of leasing payments under the Contract for all period of using all units of equipment, specified in item 2.7. of Contract makes 3,564,214,190 (Three billion five hundred sixty four million two hundred fourteen thousand hundred ninety) rubles, including VAT (18 %) – 543,693,690 (Five hundred forty three million six hundred ninety three thousand six hundred ninety) rubles.

4.1.1. The total sum of leasing payments under the Contract represents the sum of leasing payments on all units of equipment.

4.2. The total sum under the Contract is calculated in view of positions of item 4.3. of Contract and is subject to specification according to conditions of item 4.3.1. and 4.3.2. of Contract.

4.3. The total sum of investment expenses under the Contract should not exceed the sum in 2 240 011 748 (Two billion two hundred forty million eleven thousand seven hundred forty eight) rubles, including the VAT (18 %) – 341,696,707.32 (Three hundred forty one million six hundred ninety six thousand seven hundred seven) rubles 32 kopeck thus:

4.3.1. If the actual sum of investment expenses under the Contract exceeds the sum of the General investment expenses specified in item 4.3. of Contract, the total sum of investment expenses increases up to the size of actual charges of Lease Granter for purchase of the Equipment and payment of Additional works and services. Financing of the sum of excess of actual charges of Lease Granter on purchase of the Equipment in view of Additional works and services above the total sum of investment expenses is carried out due to means of Lease Receiver; the parties are obliged to sign the corresponding additional agreement to the present Contract about this.

4.3.2. On the fact of input of the Equipment in operation and the beginning of term of leasing within 15 (fifteen) calendar days from the date of signing by the Parties of the Certificate of commissioning and transfer to leasing the Equipment under the Contract of the Party are obliged to carry out recalculation of the total amount of the Contract specified in item 4.1. of Contract, in view of actual charges of Lease Granter.

Thus a total amount of the Contract specified in item 4.1. of Contract is subject to the respective alteration including the sum of change of investment expenses, the sum of change of percent on the involved financing, the sum of change of the tax to property, the sum of change of charges on insurance, change of the sum of the VAT, paid to the budget, change of other charges of the leasing company connected with change of the sum of investment expenses about what the Parties are obliged to sign the

corresponding additional agreement to the Contract. Thus rate of commission of Lease Granter is not subject to change.

Contract 2:

4.1. A total sum of leasing payments under the Contract for all period of using all units of equipment, specified in item 2.7. of Contract, makes 2,364,797,408 (Two billion three hundred sixty four million seven hundred ninety seven thousand four hundred eight) rubles, including the VAT (18 %) – 360,731,808 (Three hundred sixty million seven hundred thirty one thousand eight hundred eight) rubles.

4.1.1. The total sum of leasing payments under the Contract represents the sum of leasing payments on all units of equipment.

4.2. The total sum under the Contract is calculated in view of positions of item 4.3. of Contract and is subject to specification according to conditions of item 4.3.1. and 4.3.2. of Contract.

4.3. The Total sum of investment expenses under the Contract should not exceed the sum in 1,472,042,951 (One billion four hundred seventy two million forty two thousand nine hundred fifty one) rubles, including the VAT (18 %) – 224,548,924.73 (Two hundred twenty four million five hundred forty eight thousand nine hundred twenty four) rubles and 73 kopecks, thus:

4.3.1. If the actual sum of investment expenses under the Contract exceeds the sum of the General investment expenses specified in item 4.3. of Contract, the total sum of investment expenses increases up to the size of actual charges of Lease Granter for purchase of the Equipment and payment of Additional works and services. Financing of the sum of excess of actual charges of Lease Granter on purchase of the Equipment in view of Additional works and services above the total sum of investment expenses is carried out due to means of Lease Receiver; the parties are obliged to sign the corresponding additional agreement to the present Contract about this.

4.3.2. On the fact of input of the Equipment in operation and the beginning of term of leasing within 15 (fifteen) calendar days from the date of signing by the Parties of the Certificate of commissioning and transfer to leasing the Equipment under the Contract of the Party are obliged to carry out recalculation of the total amount of the Contract specified in item 4.1. of Contract, in view of actual charges of Lease Granter.

Thus a total amount of the Contract specified in item 4.1. of Contract is subject to the respective alteration including the sum of change of investment expenses, the sum of change of percent on the involved financing, the sum of change of the tax to property, the sum of change of charges on insurance, change of the sum of the VAT, paid to the budget, change of other charges of the leasing company connected with change of the sum of investment expenses about what the Parties are obliged to sign the corresponding additional agreement to the Contract. Thus rate of commission of Lease Granter is not subject to change.

Contract 3:

4.1. The Total sum of leasing payments under the Contract for all period of using all units of equipment, specified in item 2.7. of Contract, makes 3,586,391,110 (Three billion five hundred eighty six million three hundred ninety one thousand hundred ten) rubles, including the VAT (18 %) – 547,076,610 (Five hundred forty seven million seventy six thousand six hundred ten) rubles.

4.1.1. The Total sum of leasing payments under the Contract represents the sum of leasing payments on all units of equipment.

4.2. The Total sum under the Contract is calculated in view of positions item 4.3. of Contract also is a subject to specification according to conditions item 4.3.1. and 4.3.2. of Contract.

4.3. The Total sum of investment expenses under the Contract should not exceed the sum in 2 207 443 249 (Two billion two hundred seven million four hundred forty three thousand two hundred forty nine) rubles, including the VAT (18 %) – 336,728,631.20 (Three hundred thirty six million seven hundred twenty eight thousand six hundred thirty one) ruble 20 kopecks, thus:

4.3.1. If the actual sum of investment expenses under the Contract exceeds the sum of the General investment expenses specified in item 4.3. of Contract, the total sum of investment expenses increases up to the size of actual charges of Lease Granter for purchase of the Equipment and payment of Additional works and services. Financing of the sum of excess of actual charges of Lease Granter on purchase of the Equipment in view of Additional works and services above the total sum of investment expenses is carried out due to means of Lease Receiver; the parties are obliged to sign the corresponding additional agreement to the present Contract about this.

4.3.2. On the fact of input of the Equipment in operation and the beginning of term of leasing within 15 (fifteen) calendar days from the date of signing by the Parties of the Certificate of commissioning and transfer to leasing the Equipment under the Contract of the Party are obliged to carry out recalculation of the total amount of the Contract specified in item 4.1. of Contract, in view of actual charges of Lease Granter.

Thus a total amount of the Contract specified in item 4.1. of Contract is subject to the respective alteration including the sum of change of investment expenses, the sum of change of percent on the involved financing, the sum of change of the tax to property, the sum of change of charges on insurance, change of the sum of the VAT, paid to the budget, change of other charges of the leasing company connected with change of the sum of investment expenses about what the Parties are obliged to sign the corresponding additional agreement to the Contract. Thus rate of commission of Lease Granter is not subject to change.

Contract 4:

4.4. 4.1. The Total sum of leasing payments under the Contract for all period of using all units of equipment, specified in item 2.7. of Contract, makes 2,590,888,240 (Two billion five hundred ninety million eight hundred eighty eight thousand two hundred forty) rubles, including the VAT (18 %) – 395,220,240.00 (Three hundred ninety five million two hundred twenty thousand two hundred forty) rubles.

4.1.2. The Total sum of leasing payments under the Contract represents the sum of leasing payments on all units of equipment.

4.2. The Total sum under the Contract is calculated in view of positions item 4.3. of Contract also is a subject to specification according to conditions item 4.3.1. and 4.3.2. of Contract.

4.3. The Total sum of investment expenses under the Contract should not exceed the sum in 1,593,000,000.00 (One billion five hundred ninety three million) rubles, including the VAT (18 %) – 243,000,000.00 (Two hundred forty three million) rubles. Thus:

4.3.1. If the actual sum of investment expenses under the Contract exceeds the sum of the General investment expenses specified in item 4.3. of Contract, the total sum of investment expenses increases up to the size of actual charges of Lease Granter for purchase of the Equipment and payment of Additional works and services. Financing of the sum of excess of actual charges of Lease Granter on purchase of the Equipment in view of Additional works and services above the total sum of investment expenses is carried out due to means of Lease Receiver; the parties are obliged to sign the corresponding additional agreement to the present Contract about this.

4.3.2. On the fact of input of the Equipment in operation and the beginning of term of leasing within 15 (fifteen) calendar days from the date of signing by the Parties of the Certificate of commissioning and transfer to leasing the Equipment under the Contract of the Party are obliged to carry out recalculation of the total amount of the Contract specified in item 4.1. of Contract, in view of actual charges of Lease Granter.

Thus a total amount of the Contract specified in item 4.1. of Contract is subject to the respective alteration including the sum of change of investment expenses, the sum of change of percent on the involved financing, the sum of change of the tax to property, the sum of change of charges on insurance, change of the sum of the VAT, paid to the budget, change of other charges of the leasing company connected with change of the sum of investment expenses about what the Parties are obliged to sign the corresponding additional agreement to the Contract. Thus rate of commission of Lease Granter is not subject to change.

Contract 5:

4.1. A total sum of leasing payments under the Contract for all period of using all units of equipment, specified in item 2.7. of Contract, makes 2,293,077,952 (Two billion two hundred ninety three million seventy seven thousand nine hundred fifty two) ruble, including the VAT (18 %)-349,791,552.00 (Three hundred forty nine million seven hundred ninety one thousand five hundred fifty two) ruble.

4.1.2. The Total sum of leasing payments under the Contract represents the sum of leasing payments on all units of equipment.

4.2. The Total sum under the Contract is calculated in view of positions item 4.3. of Contract also is a subject to specification according to conditions item 4.3.1. and 4.3.2. of Contract.

4.3. The Total sum of investment expenses under the Contract should not exceed the sum in 1,410,100,000.00 (One billion four hundred ten million hundred thousand) rubles, including the VAT (18 %) – 215,100,000.00 (Two hundred fifteen million hundred thousand rubles) rubles. Thus:

4.3.1. If the actual sum of investment expenses under the Contract exceeds the sum of the General investment expenses specified in item 4.3. of Contract, the total sum of investment expenses increases up to the size of actual charges of Lease Granter for purchase of the Equipment and payment of Additional works and services. Financing of the sum of excess of actual charges of Lease Granter on purchase of the Equipment in view of Additional works and services above the total sum of investment expenses is carried out due to means of Lease Receiver; the parties are obliged to sign the corresponding additional agreement to the present Contract about this.

4.3.2. On the fact of input of the Equipment in operation and the beginning of term of leasing within 15 (fifteen) calendar days from the date of signing by the Parties of the Certificate of commissioning and transfer to leasing the Equipment under the Contract of the Party are obliged to carry out recalculation of the total amount of the Contract specified in item 4.1. of Contract, in view of actual charges of Lease Granter.

Thus a total amount of the Contract specified in item 4.1. of Contract is subject to the respective alteration including the sum of change of investment expenses, the sum of change of percent on the involved financing, the sum of change of the tax to property, the sum of change of charges on insurance, change of the sum of the VAT, paid to the budget, change of other charges of the leasing company connected with change of the sum of investment expenses about what the Parties are obliged to sign the corresponding additional agreement to the Contract. Thus rate of commission of Lease Granter is not subject to change.

Validity of Contract. the Contracts inure from the date of signing of Contract and operate up to full execution by the Parties of all obligations within the limits of the Contract.

Value of the issuer's assets: 94,615,025 thousand rubles (at 31.12.2007).

- g) Code of the reason for registration (Tax Code) of the person entrusted to get the amounts of revenue and/or Bonds paying off.*

Bonds owners, their authorized persons including NDC depositors, on their own shall check up the fullness and topicality of the bank account information and other data presented by them to NDC. If the abovementioned information was not presented or presented untimely to NDC, the Issuers' obligations fulfillment directed to the Bonds nominal value paying off is presented to the person who required the obligations fulfillment and is the Bonds owner for the date of the requirement presentation. Together with this, the Issuer's Bonds obligation fulfillment shall be carried out on the basis of NDC data. In this case, the Issuer's obligations are considered fulfilled in full scale and proper manner. If the bank account requisites and other information necessary for the Issuers' obligations fulfillment does not let timely carry out money means transmission such a delay can not be considered as delay in Bonds obligations performance, and the Bonds owner can not require the interest accrual or any other indemnification payment for such a delay in payment. In the abovementioned cases the Issuer as well as the Paying agent does not bear the responsibility for the delay in payments.

Not later than on the 2nd (second) working day before the date of the Bonds nominal value paying off the Issuer shall transmit necessary money means to the account of the Paying agent. On the basis of the List of Owners and/or Bonds' nominal holders of the given NDC, the Paying agent accounts the amounts of the money means subjected to payment of each of the persons indicated in the List of owners and/or Bonds nominal holders.

On the date of the Bonds nominal value paying off the Paying agent transmits necessary money means to the bank accounts of the persons entrusted to acquire the amounts of Bonds nominal value paying off determined in the list of Owners and/or Bonds nominal holders.

If one person is entrusted with the obligation to acquire the amounts of the Bonds nominal value paying off from the part of Bonds several holders such a person gets the amount concerning each Bonds holder.

After the accounts end with persons authorized to get the amount of the Bonds nominal value paying off by the person determined in the list of the owners and/or Bonds nominal holders, the Paying agent notifies NDC hereof. If the date of the Bonds nominal value paying off is a day off – irrespective of the fact whether it is a state holiday or accounting operations day off, the payment of the proper amount shall be carried out on the first working day following the day off. Bonds owner is not entitled to require interest accrual or any other indemnification for such a payment delay.

Bonds issue paying off term:

Paying off date:

In 1820th (On thousand eight hundred and twentieth) calendar day since the date of the Bonds placement.

Possibility and conditions of the early Bonds paying off.

The possibility of early bonds paying off is not determined.

Amount of the percent (coupon) Bonds revenue, the order and conditions of its payment:

The order of the coupon per cent rate determination:

1) First coupon per cent rate is determined by means of the contest carrying out among the Bonds potential buyers on the date of the Bonds placement beginning.

The order and conditions of the contest are determined in paragraph 8.3 of the Decision on the Securities issue and paragraph 2.7 of the Securities prospectus.

2) Together with the determination of the date of the Securities placement, the Issuer can take the decision to acquire the Bonds from their holders within 5 (Five) days of j-th coupon period (j= 1,2...9). Coupon percent rates which ordinal number is less or equal j shall be determined equal to the first

coupon per cent rate. The abovementioned information including the ordinal number of the coupons which per cent rate is determined equal to the first coupon and also the ordinal number of the (j) coupon period, where the bonds owners can require the Issuer's Bonds acquirement shall be brought to the notice of the Bonds' potential buyers by means of information disclosure in the correspondent order stipulated by the Federal law "On securities market" and legal acts of the Securities Market Federal executive body determined in paragraph 11 of the Securities issue decision and paragraph 2.9. of the Securities prospectus.

If together with the determination of the date of the Bonds placement the Issuer did not take the decision on the Company's Bonds acquirement all coupons per cent rates beginning with the second one shall be determined equal to the first coupon per cent rate.

3) Coupons per cent rate, which amount (order of determination) was not stipulated by the Issuer before the date of the Bonds placement ($i=(j+1).....10$) shall be determined by the Issuer in figures after the State registration of the report on the result of the securities issue on the date of the determined i -th coupon which comes at least 10 (Ten) calendar days prior to the date of the $(i-1)$ -th coupon. The Issuer is entitled to determine on the date of the i -th stake coupon determination the amount of the non-determined coupons following the i -th coupon (together with this $k -$ is the number of the last determined coupon.) i -th coupon per cent rate shall be brought by the Issuer to the notice of the Bonds owners in the order and in terms stipulated by paragraph 11.5 of the Securities issue decision and paragraph 2.9. of the Securities prospectus.

The Issuer informs the exchange on the decision taken including the certain stakes at least 10 (Ten) days prior the date of the $(j-1)$ -th coupon period (the period j -th and the following coupons per cent rate is determined) end.

Should after the coupons rates' announcement the Bonds will retain the undetermined stakes at least of one of the following coupons, together with the notification on the stakes of the i -th and other Bonds determined coupons the Issuer is entitled to ensure the Bonds owners rights to require from the Issuer the Bonds Acquisition within 5 (Five) days of the k -th coupon period (if the Issuer determined the rate only of one i -th coupon, $i=k$). The abovementioned information including the ordinal number of the coupons which per cent rate determined on the date of the i -th coupon determination and also the ordinal number of the coupon period (k), where the Bonds acquirement will take place shall be brought to the notice of the Bonds potential acquirers by means of publication in the order and terms determined in paragraph 1.1.5 of the Decision of the securities issue and paragraph 2.9. of the Securities prospectus.

The amount of payment concerning any coupon per one Bond is determined to a precision of one kopeck (rounding -up is carried out in accordance with the rules of the mathematical rounding-up. Together with this, the rule of the mathematical rounding-up is the method or rounding up where the meaning of one kopeck (num kopecks) does not change if the first figure following the rounded-up one equals from 0 to 4 and changes, increasing by one if the first figure following the rounded-up one equals 5-9).

First coupon per cent rate amount is the amount of 8.05 (eight point nought five) per cent per annum was approved by the decision of the sole executive body of the Open Joint Stock Company "Moscow Regional Power Grid Company", since September 12, 2006.

In accordance with the Decision on the securities issue the second, third, fourth, fifth, sixth, seventh, eighth, ninth and tenth coupons of the Bonds is established equal the per cent rate of the first coupon.

The order and term of Bonds payment including the order and revenue payment term concerning each coupon.

Coupon (percent) period		Term (date) of the coupon (per cent) revenue payment	Date of the Bonds owners list compiling for the coupon (per cent) revenue payment
Beginning date	End date		

1. Coupon: First coupon per cent rate – C (1) – is determined by means of the contest carrying out among the Bonds potential buyers on the date of the Bonds placement beginning. The order and conditions of the contest are presented in paragraph 8.3. of the Bonds issue decision and paragraph 2.7 of the Securities prospectus.

<i>First coupon period beginning date is the date of the bonds placement</i>	<i>First coupon end date is 182nd (one hundred and eighty second) day since the date of Bonds placement beginning</i>	<i>First Bonds coupon revenue payment date is 182nd (one hundred and eighty second) day since the date of the Bonds placement beginning</i>	<i>Bonds coupon payment is carried out for benefit of Bonds owners as of the end of NDC operation day preceding the third working day before the date of the Bonds coupon revenue payment.</i>
<i>Bonds revenue payment is carried out by money means in the Russian Federation currency in cashless terms for the benefit of the Bonds holders.</i>			
<i>Bonds holder, if he/she is not the NDC depositor, is entitled but not obliged to entrust the Bonds nominal holder – NDC depositor to get the amounts of the Bonds revenue payment.</i>			
<i>If the Bonds holder did not entrust the NDC depositor to get for his/her benefit the amounts from the Bonds revenues payment the Bonds revenues payments shall be carried out for the benefit of the Bonds owner.</i>			
<i>It is presumed that the nominal holders – NDC depositors are entrusted with the right to acquire the Bonds revenue.</i>			
<i>NDC depositor not authorized by their clients to acquire the amounts of bonds revenue prior to 13:00 (Moscow time) on the 3rd (third) working day before the date of the Bonds revenue payment shall transmit to NDC the list of owners containing all the account details determined further for the List of owners and/or Bonds nominal holders.</i>			
<i>Bonds revenue payment is made for the benefit of the Bonds owners as of the end of the NDC operation day prior to 3 (Third) working day before the date of the Bonds revenue payment.</i>			
<i>If among the owners who entrusted the nominal holder to get the amounts of the Bonds coupon revenue there are non residents and/or physical persons, the nominal holder is entitled to indicate in the list of the Bonds owners the following information:</i>			
<ul style="list-style-type: none"> - <i>Full name/ Name, last name and patronymic of the Bonds owner;</i> - <i>Amount of shares belonging to the owner;</i> - <i>Complete list of persons entrusted to get the Bonds' paying off amounts;</i> - <i>Location (place of registration – for physical persons) and postal address including index of the Bonds owner;</i> - <i>Details of the Persons' Bank Account entrusted to get Bonds' paying off amounts;</i> - <i>Tax payer identification number (TPIN) of the Bonds owner;</i> - <i>Tax status of the Bonds owner if the Bonds owner is the legal person-non-resident;</i> - <i>Personal identification number (PIN) if any, if the Bonds owner is the physical person;</i> - <i>Type, number date and place of the document issue identifying the Bonds owner and name of the body issued the document;</i> - <i>Number of the state pension insurance certificate of the Bonds owner (if any);</i> - <i>TPIN of the Bonds owner (if any);</i> - <i>Date, month and Born of the Bonds owner.</i> 			
<i>Obligations fulfillment in relation to the owner included into the List of owners and/or Bonds nominal holders are considered proper also in case of the Bonds alienation after the date of the abovementioned List compiling.</i>			
<i>Should the rights of the Bonds owner be considered by the Bonds nominal holder and the Bonds nominal holder is authorized to get the amount of the Bonds revenue the person authorized to get the amount of Bonds revenue is the Bonds nominal holder.</i>			

Should the rights of the Bonds owner not considered by the Bonds nominal holder or the Bonds nominal holder is not authorized by the owner to get the Bonds revenue amounts the body authorized to get the amounts of the Bonds revenue is Bonds Owner.

Not later than on the 2nd (second) working day before the date of the Bonds nominal value paying off the NDC gives the Issuer and the Paying agent the List of Owners and/or Bonds nominal holders containing the following data:

- a) Full name (Last name, Name and Patronymic) of the person entitled to get the amounts of the Bonds nominal value paying off;***
- b) Amount of bonds considered on the security account of the Body entrusted to get the amounts of the Bonds nominal value paying off;***
- b) Location and postal address of the person entrusted to get the Bonds nominal value paying off;***

The Regulations of the Central Bank of the Russian Federation No. 269-P (269-II) as of 4 May 2005 "On opening of non-residents' bank accounts by The Bank of Russia in the currency of the Russian Federation and carrying out of operations under the specified accounts".

Instruction No. 117-I (117-II) of the Central Bank of the Russian Federation as of 15 June 2004 "On the procedure of representation by residents and non-residents of documents and information at realization of foreign currency transactions to the authorized banks; the procedure of the accounting by the authorized banks of foreign currency transactions and registration of transaction certificates";

The circular No. 31 of the Central Bank of the Russian Federation as of 31 March 2005 "Questions connected with application of the Federal Law No. 173-FZ (№173-FL) as of 10 December 2003 "On foreign currency regulation and foreign currency control" and statutory acts of The Bank of Russia";

Other normative legal enactments of the Russian Federation.

8.8. Description of incomes taxation procedure of the issuer's floated equity securities and equity securities which are in the process of floatation

Taxation of income of physical persons (tax residents of the Russian Federation, and those who are not tax residents of the Russian Federation but who receive income from sources in the Russian Federation).

In compliance with item 208 of the RF-TC, dividend and interest received from the Russian organization, income from selling the issuer's securities in the Russian Federation and beyond its bounds are the incomes which are subject to income taxation of physical persons.

If the source of the income in the form of the dividend is the Russian organization, the specified organization is recognized to be a tax agent and determines the amount of the tax separately for each tax payer with reference to each payment of the specified incomes under the 9% rate (item 224 of the RF-TC) in accordance with the procedure established by item 275 of the RF-TC.

The tax amount is calculated proceeding from the total amount of the tax and the share of each tax payer in the total amount of dividends. The total amount of the tax is determined as a product of the tax rate and the difference between the amount of the dividends to be distributed between shareholders (participants) in the current tax period reduced by the amounts of the dividends to be paid by the tax agent of the foreign organization and (or) to the physical person who is not a resident of the Russian Federation, in the current tax period, and the amount of the dividends received by the tax agent in the current reporting (tax) period.

If the Russian organization - the tax agent, pays dividends to the physical person - non-resident of the Russian Federation, the 30% tax rate is applied to these payments according to item 3, Article 224, the RF-TC.

In compliance with Article 214.1 of the RF-TC, the tax base under each operation with securities and operations with financial instruments of term transactions, the basic asset under which are securities (futures and option transactions at the stock exchange), is defined separately. Thus, the incomes received under the following operations are registered:

Sale and purchase of securities which are outstanding at the organized securities market;

Sale and purchase of the securities which are not outstanding at the organized securities market;

With financial instruments of term transactions, the basic asset under which is securities;

Sale and purchase of investment units of share investment funds, including their repayment;

With securities and financial instruments of term transactions, the basic asset under which is securities, which are carried out by a trustee in favour of the trustor that is a physical person.

According to item 3, Article 214.1, the RF-TC, the tax base - the income (loss) under operations of sale and purchase of securities, is defined as the amount of incomes under the total number of transactions with securities of the corresponding category completed during the tax period minus the amount of losses. The income (loss) is defined as a difference between the amounts received from securities selling and charges on purchase, selling and storage of securities, or the property deductions accepted in the part of reduction of incomes of the securities sale and purchase transaction.

The income under the transaction of sale and purchase of the securities outstanding on the organized securities market is reduced by an amount of interest for using of the involved money resources, but within the limits of the amounts calculated proceeding from the current rate of refinancing of the Central Bank of the Russian Federation. The amount of the loss under such transaction is defined in view of the limiting border of fluctuations of the market price of securities. Thus, the securities outstanding on the organized securities market include the securities admitted to the outstanding at trade organizers' who have the license of the federal authority for regulation of the securities market.

If charges may not be directly referred to charges on purchase, selling and storage of the specific securities, the specified charges are distributed proportionally to the value estimation of the securities, the specified charges are incurred in relations to. If it is impossible to confirm the charges documentary, the tax payer is entitled to use the property tax deduction stipulated by paragraph 1, subitem 1, item 1, Article 220, the RF-TC.

The property tax deduction or deduction in the amount of actually incurred and documentary confirmed charges is provided to the tax payer at calculation and payment of the tax to the budget from the source of income payment or upon termination of the tax period at submission of the tax declaration to the tax

authority. If there are several sources of income payment, the property tax deduction is made only from one source of income payment at the tax payer's option.

At definition of tax base under operations of securities sale and purchase, it is necessary to take into consideration that the loss under operations with the securities outstanding on the organized securities market reduces the tax base under securities sale and purchase operation of this category. The income from operations of sale and purchase of securities which are not outstanding on the organized securities market, which at the moment of their purchase met the requirements established for the securities outstanding on the organized securities market, may be reduced by an amount of the loss received from operations of sale and purchase of securities outstanding on the organized securities market.

The tax base under operations with financial instruments of term transactions is defined as a difference between the positive and negative results received based on the results of reassessment of obligations and rights of requirements under completed transactions and execution of financial instruments of term transactions, in view of payment of services of exchange intermediaries and stock exchange on opening of positions and keeping of the physical person's accounts. Thus, the tax base increases by an amount of the bonuses received under transactions with options, and decreases by an amount of the bonuses paid under the specified transactions.

At definition of the tax base under operations with the securities which are carried out by the trustee, charges of the tax payer also include the amounts paid to the trustee in the form of remuneration and compensation of the charges incurred by him/her under the operations with securities.

If at realization of trust management, transactions with securities of various categories are completed, and if there appear other types of income (dividend, interest), the tax base is defined separately for each category of securities and each type of income. Charges which cannot be directly referred to reduction of the income under transactions with securities of the corresponding category or to reduction of the corresponding type of income, are distributed proportionally to the share of each type of income.

The tax base under operations of sale and purchase of securities and operations with financial instruments of term transactions is defined upon termination of the tax period (i.e. year). Thus calculation and payment of the amount of the tax is performed by the tax agent upon termination of the tax period or at realization of payment of money resources by it to the tax payer before the expiration of the next tax period. In this case the tax should be paid from the share of the income which corresponds to the actual amount of paid money resources. At realization of payment more than once during the tax period, the calculation of the amount of the tax is made by an accruing result taking into account the tax amounts paid earlier.

The tax agent with respect to the incomes of operations with the securities referred to the trustees is the latter. The tax base under these operations is defined at the date of the end of the tax period or at the date of payment of money resources before the expiration of the tax period. The tax thus is subject to payment within one month from the date of the termination of the tax period or the date of payment of money resources (transfer of securities). At realization of payments from the funds which are in trust management before the expiration of the trust management contract or before the termination of the tax period, the tax is paid from the share of the income which corresponds to the actual amount of the funds which are paid to the trustor.

If it is impossible to deduct the computed tax from the tax payer by the income payment source, the tax agent within one month from the moment of occurrence of this circumstance notifies in writing the tax authority in the locality where it is registered on the impossibility to deduct the tax and on the amount of the tax payer's debt. Payment of the tax in this case is made by equal shares in two payments: the first is made not later than 30 days from the date of delivery by the tax authority of the notice on payment of the tax; the second is paid not later than 30 days after the first term of payment.

The order of the tax calculation under incomes of operations with securities is defined by item 1, Article 225, RF-TC, according to which the tax amount is estimated as a percentage share of the tax base complying with the tax rate (for physical persons - tax residents of the Russian Federation, it is 13%; for the physical persons, who are not tax residents of the Russian Federation, it amounts to 30%, in conformity with Article 224 of the RF-TC).

Taxation of legal entities (of both the Russian organizations, and the foreign organizations which carry out their activities in the Russian Federation through permanent representative offices and/or receive income from the sources in the Russian Federation).

According to item 1, Article 250, the RF-TC, the incomes from the individual shares in other organizations (in the form of dividend) and the incomes received from operations with financial instruments of term transactions are recognized to be extraordinary incomes which are taxable. Thus, the date of reception of the income is the date of receipt of money resources on the settlement account (cash register) of the tax payer.

According to item 1, Article 265, the RF-TC, charges in the form of interest under debt instruments of any type (including under securities and other obligations which are issued by the tax payer, charges on the organization of issuance of own securities, servicing of own securities, granting of the information to shareholders, and the charges connected with service of securities acquired by the tax payer are extraordinary charges which reduce the tax base under the profit tax. The date of realization of the extraordinary charges connected with acquisition of securities is the date of realization or other retirement of securities.

The peculiarities of definition of the tax base under the incomes received from the individual share in other organizations (dividend) are established in Article 275 of the RF-TC.

If the source of the income is the Russian organization, the specified organization is recognized to be the tax agent and defines the amount of the tax. Thus, the amount of the tax to be deducted from incomes of the dividends' receiver is calculated by the tax agent proceeding from the total amount of the tax and the share of each tax payer in the total amount of the dividend. The total amount of the tax is defined as a product of the 9% tax rate (Article 284 of the RF-TC) and the difference between the amount of the dividend which are subject to distribution between shareholders in the current tax period reduced by the amounts of the dividends payable by the tax agent to the foreign organizations and/or the physical person who is not the RF resident, in the current tax period, and the amount of the dividend received by the tax agent in the current tax period. If the difference is negative, there is not an obligation to pay the tax, and the compensation from the budget is not made.

If the Russian organization - the tax agent, pays the dividend to the foreign organization and/or to the physical person who is not the RF resident, the tax base of the tax payer - the dividends' receiver, is defined as the sum of paid dividends, and the 15% tax rate (Article 284 of the RF-TC) or 30% (Article 224 of the RF-TC) are accordingly applied to it.

The peculiarities of definition of tax base under operations with securities are established in Article 280 of the RF-TC.

Incomes of the tax payer from operations on selling or another retirement of securities (including repayment) are defined proceeding from the price of selling or another retirement of the securities, and also the amount of the accumulated interest (coupon) income which was paid by the buyer to the tax payer, and the amount of the interest (coupon) income which was paid to the tax payer by the issuer (drawer of bill). Thus, the income does not include the amounts of the interest (coupon) income which were earlier registered at taxation.

Charges at selling/other retirement of securities are defined proceeding from the price of purchase of the securities, expenses for its selling, amount of the accumulated (coupon) income paid by the tax payer to the seller of the securities. Thus, the charges do not include the amounts of the interest (coupon) income which was earlier considered at taxation.

The actual price of selling or other retirement of the securities which are in the interval between the minimal and maximal prices of transactions with the specified securities registered by the securities market trade organizer at the date of fulfilment of the respective transaction is accepted for the purposes of taxation as a market price. In case of selling of the securities, which are outstanding on the securities market, at the price which is below the floor price of transactions on the organized securities market, the floor price of the transaction for the organized securities market is accepted at definition of the financial result.

With respect of the securities which are not outstanding on the organized securities market, the actual price of selling or other retirement of these securities is accepted for the purposes of the taxation at meeting at least even one of the following conditions:

If the actual price of the respective transaction is in the interval of the prices under similar securities registered by the trade organizer of the securities market at the date of completion of the respective transaction, in the even that these securities were traded at the trade organizer's at least once within the past 12 months;

If the deviation of the actual price of the respective transaction is within the limits of 20% aside an increase or downturn from the average weighted price of the similar securities calculated by the trade organizer of the securities market according to the rules established by it based on the trading results at the date of the completion of such a transaction or at the date of the nearest trading, which took place before the day of completion of the respective transaction, if the trading in these securities were held at the trade organizer even once within the past 12 months.

The tax base under the operations with securities is defined by the tax payer separately. Thus, the tax base under operations with the securities which are outstanding on the organized securities market is defined separately from the tax base under operations with the securities which are not outstanding on the organized securities market.

At selling or another retirement of securities, the tax payer independently according to the accounting policy accepted for the purpose of taxation defines one of the following methods of a write-off of the value of the retired securities to charges:

at the value of the first purchases;

at the value of the most recent purchases;

at the value of the unit.

The tax payers who received the loss from operations with securities in the previous tax period or during the previous tax periods, have the right to reduce the tax base received under operations with securities in the reporting (tax) period. Thus, losses from operations with the securities which are not outstanding on the organized securities market, received in the previous tax period, may be referred to reduction of the tax base from operations with such securities defined in the reporting (tax) period. Losses from operations with the securities outstanding on the organized securities market received in the previous tax period may be referred to reduction of the tax base from the operations on selling of this category of securities.

The incomes received from operations with securities which are outstanding on the organized securities market may not be reduced by charges or losses from operations with the securities which are not outstanding on the organized securities market. The incomes received from operations with securities, which are not outstanding on the organized securities market, may not be reduced by charges or losses from operations with the securities which are outstanding on the organized securities market.

In compliance with Article 286 of the RF-TC, the tax is defined as a percentage share of the tax base complying with the tax rate (for legal entities - tax residents of the Russian Federation, 24 %; for foreign legal entities-non-residents, 20 %; according to Article 284 of the RF-TC). The amount of the tax following the results of the tax period is defined by the tax payer independently.

Following the results of each reporting (tax) period, tax payers calculate the amount of advance payment proceeding from the tax rate and the taxable profit calculated as an accruing result from the beginning of the tax period to the end of the reporting (tax) period. During the reporting period, tax payers calculate the amount of monthly advance payment.

If the tax payer is the foreign organization receiving incomes from sources in the Russian Federation, which are not connected with permanent representative offices in the Russian Federation, the obligation on definition of the amount of the tax, deduction of this amount from incomes of the tax payer and transfer of the tax to the budget is assigned to the Russian organization, which pays the specified income to the tax payer. The tax agent defines the amount of the tax under each payment (transfer) of money resources or other reception of the income. If the source of incomes of the tax payer in the form of dividends is the Russian organization, the obligation to deduct the tax from incomes of the tax payer and to transfer it to the budget is assigned to this source of incomes. Thus, advance payments under the tax are withheld from incomes of the tax payer at each payment of such incomes. Under the incomes which are paid to the tax payers in the form of dividends, the tax withheld at payment of the income is transferred to the budget by the tax agent who has carried out the payment, within 10 days from the date of payment of the income.

The tax from the incomes received from operations of securities selling is taxable after the tax period and is payable not later than the time fixed for submission of tax declarations for the respective tax period (not later than on the 28th of March of the year following the expired tax period). Advance payments following the results of the reporting period are paid not later than the time for submission of tax declarations for the respective reporting period (not later than 28 days from the date of the end of the respective reporting period).

The monthly advance payments which are subject to payment during the reporting period are paid in the time not later than on the 28th day of each month of this reporting period. The tax payers calculating monthly advance payments under the actually received profit pay advance payments not later than on the 28th day of the month following the month, based on the results of which the calculation of the tax is made.

8.9. Data on declared (accrued) and paid dividends per the issuer's shares

Information for the past 5 completed financial years is not specified, as the issuer was registered on 1 April 2005

Information for the 2005 and 2006 completed financial years is specified:

For the year 2005

Category of shares: *ordinary*

The amount of the declared (accrued) dividends under the issuer's shares of each category (type) per one share: **RUR 0.00177.**

The amount of the declared (accrued) dividends in aggregate under all shares of one category (type): **RUR 50,001 thousand.**

The name of the issuer's governance body which made a decision (declared) on payment of dividends per the issuer's shares: ***annual General Shareholders Meeting of OJSC "Moscow Regional Electric Grid Company"***

Date of carrying out of the meeting (proceedings) of the issuer's governance body, where the decision on payment (declaring) of dividends was taken, date and number of the minutes of the meeting (proceedings) of the issuer's governance body, where the decision on payment (declaring) of dividends was taken:

26 June 2006, Minutes No. 3 as of 6 July 2006

The term allocated for payment of dividends under the issuer's shares:

Within 60 days from the date of decision-making on payment of dividends

The form and other terms of payment of the declared dividends under the issuer's shares:

In the monetary form

The reporting period (year, quarter) for which the declared dividends under the issuer's shares were paid: ***following the results of the year 2005.***

The total amount of the dividends paid under the issuer's all shares of one category (type) for each reporting period, for which the decision on payment (declaring) of dividends was taken:

RUR 50,001 thousand.

Dividends for 2005 were paid to shareholders within 60 days from the moment of decision-making on payment of dividends in full.

For the year 2006.

Category of shares: ***ordinary***

The amount of the declared (accrued) dividends under the issuer's shares of each category (type) per one share: ***RUR 0.00212394.***

The amount of the declared (accrued) dividends in aggregate under all shares of one category (type): ***RUR 60,000 thousand.***

The name of the issuer's governance body which made a decision (declared) on payment of dividends per the issuer's shares: ***annual General Shareholders Meeting of OJSC "Moscow United Electric Grid Company"***

Date of carrying out of the meeting (proceedings) of the issuer's governance body, where the decision on payment (declaring) of dividends was taken, date and number of the minutes of the meeting (proceedings) of the issuer's governance body, where the decision on payment (declaring) of dividends was taken:

15 June 2007, Minutes No. 4 as of 21 June 2007.

The term allocated for payment of dividends under the issuer's shares:

Within 60 days from the date of decision-making on payment of dividends

The form and other terms of payment of the declared dividends under the issuer's shares:

In the monetary form

The reporting period (year, quarter) for which the declared dividends under the issuer's shares were paid: ***following the results of the financial year 2006.***

The total amount of the dividends paid under the issuer's all shares of one category (type) for each reporting period, for which the decision on payment (declaring) of dividends was taken:

RUR 60,000 thousand.

Dividends for 2006 were paid to shareholders within 60 days from the moment of decision-making on payment of dividends in full.

Other information on the declared and/or paid dividends per the issuer's shares: ***none.***

Income paid per bonds

Securities type, series, form and other identification features of the bonds issue: ***documentary non-convertible interest bearer bonds of series 01 with an obligatory centralized storage with the repayment term on the 1820th calendar day from the date of the beginning of placement, without an option of early repayment.***

State registration number of the bonds issue and the date of the state registration:

4-01-65116-D 22 June 2006.

Date of the state registration of the report on the results of the bonds issuance: **24 October 2006.**

Number of the bonds of the issue: **6,000,000 (six million) pieces**

Par value of each bond of the issue:

RUR 1,000 (one thousand).

Amount of the issuer at the par value:

RUR 6,000,000,000 (six billion).

Payment of coupon interest per the bonds of series 01:

Number of the coupon payment	Period, for which the payment was realized	Date of the payment	Interest rate	Amount per one bond, RUR	Total amount of payment, RUR	Form of payment
1	12 September 2006– 13 March 2007.	13 March 2007.	8.05 %	40.14	240,840,000	Monetary funds
2	13 March 2007 – 11 September 2007.	11 September 2007.	8.05 %	40.14	240,840,000	Monetary funds
3	11 September 2007 – 11 March 2008.	11 March 2008.	8.05 %	40.14	240,840,000	Monetary funds

The issuer's liability on payment of the interest per the first, second, third and fourth coupon of the bonds of the issue was executed in full.

Other information on the earnings per the bonds of the issue to be specified by the issuer at its sole discretion: **none**

8.10. Other data

Board of directors of RAO UES of Russia approved formation of the uniform interregional distributive network company in territory of Moscow and the Moscow region on February, 29th, 2008. It will be created on the basis of OJSC "MOESK" by merger with it of "MGEsK".

The board of directors of RAO UES of Russia approved volume of additional share issue of MOESK, into which the MGEsK's shares will be converted. Thus, MOESK will place 20 461 450 thousand additional ordinary shares at the par value of 0.5 rubles each for a total of 10 230 725 thousand rubles.

1966/1424 ordinary shares MGEsK will be converted into one additional ordinary share of MOESK at the par value of 0.2 rubles. The fairness opinion of the swap ratio is prepared by independent financial advisers and approved by Committee according to the Board of directors of RAO UES of Russia.

Stakes of RAO UES of Russia (50.9 %) and other large shareholders in the authorized capital of the uniform inter-regional distributive network company in view of similarity of structures of the joint-stock capital of MOESK and MGEsK as a result of reorganization of the companies will not change greatly.

The board of directors charged representatives of RAO UES of Russia in governance bodies of MOESK and MGEsK to vote for taking necessary decisions on merger of MGEsK with MOESK. It is planned that extraordinary assemblies of shareholders of both companies concerning reorganization will pass in the second half of April 2008, and the process of merger will come to an end by 1 July 2008

1. ORGANIZATION OF TAX ACCOUNTING

1.1. GENERAL PROVISIONS

1.1.1. The present Regulation defines the system of the tax accounting accepted in OJSC "Moscow United Electric Grid Company" for the purposes of calculation, payment and declaring of taxes, and also the order of interaction of the isolated divisions of OJSC "Moscow United Electric Grid Company" concerning the tax accounting.

The tax accounting policy for the purposes of the taxation is obligatory for branches of OJSC "Moscow United Electric Grid Company".

1.1.2. Changes are brought in the tax accounting policy of OJSC "Moscow United Electric Grid Company" at change of the order of the accounting of separate economic operations and (or) objects with a view of the taxation in case of change of the legislation or applied methods of the accounting, and also if OJSC "Moscow United Electric Grid Company" has started to carry out new kinds of activity.

Decisions on any changes are reflected in the tax accounting policy for the purposes of the taxation.

1.1.3. OJSC "Moscow United Electric Grid Company" uses a system of registers of the tax accounting and the order their filling-in stipulated in the specialized program " 1C: Accounts department 7.7".

1.1.4. Inventory of the obligations connected with calculations under taxes and payments, verification of debts with tax bodies are made by the executive body and branches of OJSC "Moscow United Electric Grid Company" in the place of exercising duties of the tax bearer.

1.1.5. In each IFTS of Moscow, the Moscow region and other regions of Russia, a responsible branch is appointed for carrying out adjustment of calculations under personal accounts of OJSC "Moscow United Electric Grid Company" under the centralized taxes according to the order of OJSC "Moscow United Electric Grid Company".

1.2. Distribution of duties between the executive body and branches of OJSC "Moscow United Electric Grid Company"

1.2.1. Executive body carries out duties of the tax bearer (calculation of taxable base, granting of declarations (advance calculations) under following taxes:

Under the profit tax - carries out calculation of the tax as a whole on OJSC "Moscow United Electric Grid Company", distributes the sum of tax payments between budgets of different levels, represents the summary declaration (advance calculation) in the electronic form to tax body in a place of the accounting as the largest tax bearer, and also the declaration (advance calculations) in tax bodies on a site of the responsible isolated divisions (item 3 article 80, item 2 article 288 the Tax code of the Russian Federation - further RF-TC).

Under the value added tax - carries out calculation of the tax as a whole on OJSC "Moscow United Electric Grid Company" and represents the tax declaration in the electronic form to tax body in the place of the accounting as the largest tax bearer;

Under the tax to property - carries out calculation of the tax as a whole on OJSC "Moscow United Electric Grid Company" and represents the tax declaration (advance calculations) in the electronic form to tax body in a place of the accounting as the largest tax bearer, and also tax declarations (advance calculations) in tax bodies in the place of location of the isolated divisions having separate balance (branches), and in tax bodies on a site of objects of the real estate which is being outside of a site of the organization, the isolated division of the organization having separate balance (branch);

Under the land tax - regarding the ground areas considered in the executive body, carries out calculation of the tax and represents tax declarations (advance calculations) in the electronic form to tax body in a place of the accounting as the largest tax bearer;

Under the tax to incomes of physical persons (the tax agent), the uniform social tax, insurance payments to obligatory pension insurance - regarding the payments to workers made by the executive body, carries out calculation of taxes, insurance payments on obligatory pension insurance and represents tax declarations, declarations on insurance payments on obligatory pension insurance (advance calculations), data on incomes of physical persons under the form 2-PIT on tax bearers - physical persons in the electronic form to tax body in a place of the accounting of OJSC "Moscow United Electric Grid Company" as the largest tax bearer;

As a tax agent, the executive body at payment of dividends to shareholders of OJSC "Moscow United Electric Grid Company" estimates and keeps the profit tax of the organizations from legal persons and the tax to incomes of physical persons.

The executive body calculates and retains the VAT from the sums of the incomes paid by the executive body to the organizations-non-residents, which are not registered in the tax accounting records in the Russian Federation simultaneously with payment of the income.

The executive body accepts tax declarations (advance calculations) from branches in the electronic form under the land tax, the transport tax, the uniform social tax, the declaration on insurance payments on obligatory pension insurance (advance calculations), data on incomes of physical persons under the form 2-PIT and represents them to tax body in a place of the accounting of OJSC "Moscow United Electric Grid Company" as the largest tax bearer.

1.2.2. Branches of OJSC "Moscow United Electric Grid Company" under following taxes make calculation of the tax by way established by corresponding chapter TC of the Russian Federation and give in an electronic kind tax declarations (advance calculations), the form 2-PIT (including on electronic carriers) in the executive body according to the rules of OJSC "MOESK" on representation of the reporting by branches in an electronic form:

Under the land tax - regarding the land areas booked in a branch;

Under the tax to incomes of physical persons (the tax agent), the uniform social tax, insurance payments to obligatory pension insurance - regarding the payments to workers made by branch and its structural divisions;

Under the transport tax - regarding the vehicles registered on the location of branches and their structural divisions;

Under the tax to extraction of minerals;

Under the water tax.

Branches calculate, retain and transfer the VAT from the sums of the incomes paid by branch to the organizations-non-residents, which are not registered in the tax accounting records in the Russian Federation simultaneously with payment of the income.

1.2.3. Payment of tax payments to budgets and unappropriated funds is made:

under payments of branch and its structural divisions - by branch;

under payments of the executive body - by the executive body;

under the centralized taxes - by the executive body.

1.3. Order of interaction with tax bodies

1.3.1. OJSC "Moscow United Electric Grid Company" exercises rights and duties of the tax bearer (tax agent) through interaction with tax bodies which control correctness and timeliness of payment of taxes and granting of the reporting, and carry out other functions according to TC of the Russian Federation.

1.3.2. For conducting operative work with tax bodies in places, a responsible branch is appointed according to an order of OJSC "Moscow United Electric Grid Company" in each IFTS of Moscow, the Moscow Region and other regions of Russia.

1.3.3. Those experts of OJSC "Moscow United Electric Grid Company" can cooperate only with tax bodies, who are empowered to this by the duty regulations and only within the limits of their competence.

1.4. Order of carrying out of verification with tax bodies of data under the paid and accrued taxes

1.4.1. Verification of calculations with budgets is carried out in accordance with the procedure determined by order FTS of Russia from 09.09.2005 SAE -3-01/444 "About adoption of the rules of the organization of work with tax bearers, payers of collections, insurance payments on obligatory pension insurance and tax agents".

1.4.2. Verification of calculations with budgets is held quarterly in the time defined by the order of OJSC "Moscow United Electric Grid Company". As for the centralized taxes, a responsible branch represents the originals of certificates of verification to a tax sector of the executive body. As for taxes of a branch, x-copies of certificates of verifications are represented to tax sector of the executive body, the originals are stored at the branch.

1.5. Order of sending inquiries to tax bodies concerning application of the legislation on taxes and tax collections

1.5.1. In conformity with article 21 TC of the Russian Federation, OJSC "Moscow United Electric Grid Company" has the right to receive from tax bodies written explanations concerning application of the legislation on taxes and tax collections. For reception of such explanation, OJSC "Moscow United Electric Grid Company" forwards the corresponding inquiry in writing to a tax body in the place of the accounting.

1.5.2. Questions on application of the legislation on taxes and tax collections are forwarded to chief accountants of branches or the employees appointed by them - to accounts department of the executive body of OJSC "Moscow United Electric Grid Company". The accounts department of the executive body, proceeding from necessity of observance of the uniform approach to questions of the taxation and the tax accounting in OJSC "Moscow United Electric Grid Company" as a whole, answers the given question in written form. In case of impossibility of formulation of an unequivocally treated answer proceeding from requirements of the tax laws, accounts department of the executive body of OJSC "Moscow United Electric Grid Company" (if necessary with participation of experts of legal division) prepares for the letter of enquiry in tax body.

1.5.3. At sending inquiries to tax bodies concerning application of the legislation on taxes and tax collections the following order is observed. The inquiries on all questions demanding the decision within the limits of OJSC "Moscow United Electric Grid Company" are forwarded to IFTS in a place of registration of OJSC "Moscow United Electric Grid Company" (the executive body). The inquiries related to the order of calculation of the taxes which are subject to transfer given tax body (for example, local taxes) can be forwarded to the IFTS in the place of the accounting of isolated divisions.

1.5.4. Originals of inquiries in tax bodies and their answers are stored in accounts department of the executive body of OJSC "Moscow United Electric Grid Company" or branch. The chief accountant of branch should provide delivery of spears of all inquiries and the answers made in IFTS in a place of registration of branch, in accounts department of the executive body.

1.6. Storage of documents of the tax accounting

1.6.1. Documents of the tax accounting are understood as tax declarations (advance calculations), declarations on insurance payments on obligatory pension insurance (advance calculations), data on incomes of physical persons under the form 2-PIT, payment assignments on transfer of taxes (payments), calculation of tax base, tax registers, and also primary documents of book keeping.

1.6.2. Originals of primary documents are stored in accordance with the established procedure in accounts department of the executive body or branch accordingly.

1.6.3. The responsibility for safety of documents of the tax accounting on paper carriers and in electronic form is defined by the order of the general director of OJSC "Moscow United Electric Grid Company" and the head of branch of OJSC "Moscow United Electric Grid Company".

2. RESPONSIBILITY FOR CONDUCTING THE TAX ACCOUNTING AND DRAWING UP OF THE TAX REPORTING

2.1. The tax accounting is carried out at all levels of management of OJSC "Moscow United Electric Grid Company". The responsibility for drawing up of the tax reporting is assigned to workers of the accounting service headed by the chief accountant of OJSC "Moscow United Electric Grid Company" and to the chief accountant of branch.

Powers and responsibility of tax divisions and the chief accountant of branch at each level of management and inside of each level are defined by Regulations about division, Regulations about the tax accounting policy of OJSC "Moscow United Electric Grid Company" and duty regulations of the employees who carry out the tax accounting and drawing up of the tax reporting at the organization.

The documents proving calculations on charge and payment of taxes (payments) are formed by accounts department of the executive body according to the data given by branches of OJSC "Moscow United Electric Grid Company".

2.2. For maintenance of correct and full formation of taxable bases under all taxes and payments, branches give the necessary information in the time established by the schedule of document circulation, in forms and volumes approved by corresponding orders of the chief accountant of OJSC "Moscow United Electric Grid Company".

2.3. The accounting of calculations under taxes and the payments paid to the budget and unappropriated funds, is conducted by continuously accruing result during the tax period separately under each tax and payment in by the level of budgets and unappropriated funds (federal, budget of the subject of the Russian Federation, the local budget), and also by the type of debts (shortage on the basic sum of the tax, and payment, fine, penalty fee).

2.4. The book keeping provides for requirements to the tax accounting according to provisions of the Tax Code of the Russian Federation (further on called TC of the Russian Federation).

3. PROFIT TAX

3.1. General provisions

3.1.1. OJSC "Moscow United Electric Grid Company" establishes a uniform system of organization, ways and forms of conducting the tax accounting for the purposes of the profit tax of the organizations on the basis of Chapter 25 TC of the Russian Federation and the present Regulations.

3.1.2. OJSC "Moscow United Electric Grid Company" estimates tax base based on results of each reporting (tax) period on the basis of data of the tax accounting.

3.1.3. OJSC "Moscow United Electric Grid Company" admits specification and expansion of principles, order and forms of conducting the tax accounting stated in the present Regulations, during the tax period by means of introduction of additional analytical data, registers and principles of generalization of the information promoting more correct disclosing principles and order of formation of tax base.

3.1.4. Primary documents for the purposes of the tax accounting are primary documents (including the information of the bookkeeper) of book keeping, tax registers and calculation of tax base.

3.1.5. The basis of the tax accounting and calculation of taxable base includes the data containing in primary documents used when conducting the accounting, and also special calculations of the accounting of objects and economic operations for the purposes of the taxation according to Chapter 25 TC of the Russian Federation.

3.1.6. Forms of registers of the tax accounting, book keeping accounting and other information used when calculating the profit tax are developed and approved in accordance with the established procedure. Registers of the tax accounting are conducted in electronic form, after the tax (accounting) period are transferred to the paper carrier and signed by the chief accountant and the executing party.

3.2. Order of recognition of incomes and charges

3.2.1. OJSC "Moscow United Electric Grid Company" estimates incomes and charges for the purposes of the taxation under the method of charging. According to this method incomes (expenses) are recognized in that reporting period in which they actually took place, irrespective of actual receipt (spending) of money resources.

3.2.2. The order of the accounting and the moment of recognition of separate kinds of incomes (charges) is specified in separate items of the present Regulation.

3.3. Tax accounting of the expenses connected with creation of objects of depreciated of property

3.3.1. With a view of the taxation, a part of the property used as means of work for manufacture and sale of goods (performance of works, rendering of services) with a view of income generation or for management of OJSC "Moscow United Electric Grid Company" is recognized as fixed assets, its cost is repaid by charge of amortization.

Depreciated property of OJSC "Moscow United Electric Grid Company" with a view of the tax accounting is the property which simultaneously meets the following conditions:

Term of its useful life is more than 12 months and initial value is more than 10 000 rubles on property which is put into operation before 01.01.2008, and more than 20 000 rubles on property which is put into operation since 01.01.2008 irrespective of time of its purchase (Federal law from 24.07.2007 N 216-FL, the letter of the Ministry of Finance of Russia from 03.11.2007 N 03-03-06/1/767).

Depreciated property also includes:

Capital investments into the objects of fixed assets given in rent in the form of permanent improvements made with the consent of lessor (the basis: item 1, article 256 TC of the Russian Federation);

3.3.2. Initial value of fixed assets is defined as the sum of charges on their purchase, construction, manufacturing, delivery and bringing up to the condition in which it is suitable for use, except for the value added tax and excises (the basis: item 1, article 257 TC of the Russian Federation.).

Initial value of gratuitously received fixed assets is defined proceeding from estimation of such property according to item 8 of article 250 TC of the Russian Federation.

When OJSC "Moscow United Electric Grid Company" uses objects of fixed assets of own manufacture, their initial value of is defined under the value of finished goods estimated according to item 2 of article 319 TC of the Russian Federation.

Fixed assets received at reorganization in the form of spin-off are accepted for the accounting at residual value which is defined according to the tax accounting of the transferring party for the date of reorganization.

Fixed assets received under the contract of leasing, are accepted for the accounting at redemption value which is provided in the contract of leasing.

Initial value of fixed assets changes in cases of completion, additional equipment, reconstruction, re-equipment, modernization, partial liquidation of the corresponding objects and on other similar bases.

3.3.3. The tax accounting of the expenses connected with creation of objects of depreciated property is conducted in the system of the tax accounting and provides for inclusion of expenses in initial value of objects of depreciated property under rules of Chapter 25 RF-TC.

3.4. Tax accounting of fixed assets

3.4.1. For the purposes of the tax accounting, fixed assets accepted for the accounting join in the corresponding amortisation group, proceeding from term of the useful life defined independently according to positions of article 258 TC of the Russian Federation and the Governmental Order of the Russian Federation from 01.01.2002 №1 «About classification of fixed assets included in amortisation groups».

3.4.2. Fixed assets, the rights to which are subject to the state registration according to the legislation of the Russian Federation, join in structure of corresponding amortisation group since the date of documentary confirmed fact of submission of documents for registration of the specified rights.

3.4.3. OJSC "Moscow United Electric Grid Company" has the right to increase the term of useful life of object of fixed assets after the date of its putting into operation if after reconstruction or modernisation of such object there was an increase in the term of its useful life. Thus the increase in the term of useful life of fixed assets can be carried out within the limits of the terms established for the amortisation group, such fixed assets had been earlier included in.

3.4.4. Amortization of fixed assets is charged by a linear method.

3.4.5. On cars and passenger minibuses having initial value accordingly more than 600 thousand rubles and 800 thousand rubles, which were put into operation after December 31st, 2007, the main norm of amortization is applied with a special factor 0,5 (paragraph 1 of item 9 article 259 TC of the Russian Federation).

Since January 1st, 2008 OJSC "Moscow United Electric Grid Company" applies the lowering factor on already depreciated cars with initial value from above 300 thousand rubles and up to 600 thousand rubles (to passenger minibuses with initial value from above 400 thousand rubles. and up to 800 thousand rubles.) is not made.

3.4.6. Concerning depreciated fixed assets used for work in conditions of aggressive environment and (or) raised changeability, a special factor is applied to the basic norm of amortization which is adopted by an order of the head of branch on each object of fixed assets (not above 2).

3.4.7. The sum of amortization for the purposes of the taxation is defined monthly according to the procedure established by article 259 and article 322 TC of the Russian Federation. Amortization is charged separately on each object of fixed assets.

3.4.8. Charge of amortization on objects of fixed assets which are again put into operation, begins with the 1st day of the month following after the month, in which the following conditions are compiled with:

Objects are put into operation;

On objects, the rights to which are subject to the state registration according to the legislation of the Russian Federation, the fact of submission of documents on registration is documentary confirmed.

3.4.9. Charge of amortization on object of fixed assets stops from the 1st day of the month following after the month when there was a full write-off of the value of such object or when the given object left structure of fixed assets of OJSC "Moscow United Electric Grid Company" on any bases.

3.4.10. In case of purchase of used objects of fixed assets, the norm of amortization on this property is defined in view of the term of the useful life reduced by quantity of years (months) of operation of given property by the previous proprietors. If term of actual use of the given fixed assets at the previous proprietors will appear equal to, or exceeding the term of its useful life approved by administrative documents of OJSC "Moscow United Electric Grid Company" on the basis of the governmental order of the Russian Federation from 01.01.2002 1 "About classification of fixed assets included in amortisation groups", additional term of use of this fixed assets is defined in view of requirements of the safety precautions and other factors by technical commission of corresponding branch of OJSC "Moscow United Electric Grid Company" and approved by the order of the head of branch.

3.4.11. On fixed assets received by reorganization in the form of spin-off, amortization is charged proceeding from the remained term of useful life which is defined according to the tax accounting of the transferring party at the date of reorganization.

3.4.12. Charge of amortization on depreciated to property in the form of capital investments in objects of the rented fixed assets which is subject to amortization, is made as follows:

1) it starts at lessor with the 1st day of the month following after the month in which this property was put into operation, but not earlier than in the month in which lessor made compensation to the lessee of the value of the specified capital investments;

2) it starts at the lessee with the 1st day of the month following after the month in which this property was put into operation (the basis: item 2, article 259 TC of the Russian Federation).

3.4.13. The following is not subject to amortization:

The land and other objects of wildlife management (water, bowels and other natural resources);

inventories;

goods;

objects of incomplete capital construction;

securities;

financial instruments of futures transactions.

3.4.14. The following kinds of property are not subject to amortization:

a) The property purchased (created) with use of budgetary funds of target financing (except for the property received at privatization);

b) Land improvement facilities (including, objects of road facilities, which were constructed with attraction of the sources of budgetary or other similar target financing) and other similar objects;

c) Productive cattle (except for working cattle);

d) Purchased editions (books, brochures, etc.), works of art;

e) Property received within the limits of target financing;

3.4.15. The following fixed assets are excluded from structure of depreciated property:

Transferred (received) under contracts for gratuitous use;

Transferred by the management of OJSC «Moscow United Electric Grid Company» to preservation of duration of over three months;

Transferred by the management of OJSC «Moscow United Electric Grid Company» for reconstruction and modernization by duration of over 12 months.

3.4.16. Branches of OJSC "Moscow United Electric Grid Company", at which objects of the fixed capital are translated to preservation for over three months or are deduced for reconstruction for over 12 months, duly prior to the beginning of translation for preservation or reconstruction prepare and give to the executive body a draft decision of the management of OJSC "Moscow United Electric Grid Company" about translation for preservation or putting for reconstruction of the corresponding object of fixed assets, signed by director of branch.

3.4.17. On fixed assets transferred to gratuitous use, since the 1st day of the month following after the month in which there was a specified transfer, charge of amortization is not made. The similar order is applied to fixed assets translated under the decision of the management of OJSC "Moscow United Electric Grid Company" to preservation by duration of over three months, and also to fixed assets which are under reconstruction, modernization and re-equipment for over 12 months under the decision of the management of OJSC "Moscow United Electric Grid Company".

Upon termination of validity of the contract of gratuitous using and return of fixed assets, and also at depreservation or termination of reconstruction, the amortization is charged in accordance with the procedure established by Chapter 25 TC of the Russian Federation, since the 1st day of the month following after the month in which there was the return of fixed assets of OJSC "Moscow United Electric Grid Company", the termination of reconstruction or depreservation of fixed assets.

At depreservation of the object of fixed assets, the term of useful life is prolonged for the period of time during which the object of fixed assets was on preservation.

Sale and retirement of depreciated property.

3.4.18. The profit (loss) from sale or retirement of depreciated property is defined on the basis of the analytical accounting on each object at the date of recognition of the income (charge). The accounting of incomes and charges on depreciated property is conducted object by object.

3.4.19. The profit received as a result of sale of depreciated property, joins in structure of tax base in the reporting period in which sale of property was carried out.

3.4.20. The loss received as a result of sale of depreciated of property is reflected in the analytical accounting as miscellaneous costs. The received loss joins in structure of miscellaneous costs by equal shares during the term defined as a difference between useful life of this property and actual term for its operation before the moment of the sale.

3.4.21. The sums of incompletely charged amortization of fixed assets at their liquidation are related to non-operating expenses.

3.5. Tax accounting of intangible assets

The intangible assets are purchased and (or) created by OJSC "United Electric Grid Company" objects of intellectual activity and other objects of intellectual property (exclusive rights to them) used in production (performance of works, rendering of services) or for administrative needs of OJSC "Moscow United Electric Grid Company" for a long time (duration is over 12 months).

For recognition of intangible asset, presence of ability to bring economic gains (income) to the Company is necessary, as well as presence of properly issued documents confirming existence of the intangible asset and (or) the exclusive right of the Company to the results of intellectual activity (including patents, certificates, other security documents, contract of concession (purchase) of patent, trade mark).

Definition of term of useful life of object of intangible assets is made proceeding from validity of the patent, certificate and (or) from other restrictions of terms of use of objects of intellectual property according to the

legislation of the Russian Federation or the applicable legislation of the foreign state, and also proceeding from the useful life of intangible assets specified by corresponding contracts. A ten-year norm of amortization is fixed for the intangible assets, in relation to which it is impossible to define the term of useful life of the object of intangible assets.

Amortization of intangible assets is charged by a linear method proceeding from the norms estimated on the basis of target dates of useful life.

The sum of amortization for the purposes of the taxation the Russian Federation is defined monthly by way established by article 259 TC. Amortization is charged separately on each object of intangible assets. Charge of amortization on object of intangible assets begins with the 1st day of the month following after the month in which this object was put into operation. Charge of amortization on object of intangible assets stops from the 1st day of the month following after the month when there was a full write-off of the value of such object or when the given object left the structure of intangible assets of OJSC "Moscow United Electric Grid Company" on any bases.

Value of the intangible assets created by OJSC "Moscow United Electric Grid Company" is defined as the sum of actual charges for their creation, manufacturing (including material charges, charges on payment, charges on services of foreign organizations, patent fees connected with reception of patents, certificates), except for the value added tax and excises.

Initial value of depreciated intangible assets is defined as the sum of charges for their purchase (creation) and their bringing to the condition, in which they are suitable for use, except for the sums of the taxes considered in the structure of charges according to RF-TC.

Results of intellectual activity and other objects of intellectual property with a view of the taxation are not related to property (item 2 of article 38 TC of the Russian Federation, article 128 CC of the Russian Federation), therefore, even if cost of such objects is less than 10 000 rubles, they also should be considered in the structure of depreciated property (letter FTS of Russia from 27.02.2006 N 04-2-05/2 "About the order of application of separate positions of the Tax Code of the Russian Federation").

The acquired rights to results of intellectual activity and other objects of intellectual property are not subject to amortization if under the contract for acquisition of the specified rights the payment should be made by periodic payments during validity of the specified contract.

3.6. Tax accounting of inventories

3.6.1. The value of raw material and other materials is defined proceeding from the prices of their purchase (without taking into accounting the sums of the taxes which are subject to deduction, or included in charges according to TC of the Russian Federation), including the commissions paid to intermediary organizations, import customs duties and collections, charges for transportation and other expenses connected with purchase of raw material and other materials.

3.6.2. The value of raw material and materials does not include:

Charges in the form of interest under debt obligations of any kind taken for the purpose of purchase of raw material and other materials;

Charges in the form of sum difference arising in the event that the sum of arisen obligations and requirements estimated on rate of conditional monetary units established by the agreement of the parties for the date of recording of raw material and other materials, mismatches actually paid sum of rubles.

The charges specified in the present item are included in structure of non-operating expenses.

3.6.3. The value of raw material, other materials, spare parts completing parts, semifinished items and other material assets of own manufacture, and the value of results of works or services of own manufacture included in structure of material charges, is defined as value of finished goods in accordance with the procedure established by article 319 TC of the Russian Federation.

3.6.4. At definition of the size of material charges at write-off of raw material and other materials used in production (manufacturing) of goods (performance of works, rendering of services), the method of estimation under the average cost price is applied.

3.6.5. Value of inventories in the form of the surpluses revealed during inventory, and (or) the property received at dismantling, disassembly of fixed assets put out of operation, and their repair is defined as the sum of the tax estimated from the received income.

Order of write-off of value of purchased goods

3.6.6. The value of the goods is defined proceeding from the prices of their purchase (without taking into accounting the sums of the taxes which are subject to deduction, or included in charges according to TC of the Russian Federation), including the commissions paid to intermediary organizations, import customs duties and collections, charges for transportation and other expenses connected with purchase of goods.

3.6.7. The value of goods does not include:

Charges in the form of interest under debt obligations of any kind taken for the purpose of purchase of the goods;

Charges in the form of sum difference arising in the event that the sum of arisen obligations and requirements estimated under the rate of conditional monetary units established by the agreement of the parties for the date of booking the goods, mismatches actually paid sum of rubles.

The charges specified in the present item join in the structure of non-operating expenses.

3.6.8. At selling goods, the sales incomes decrease by the value of purchase of the given goods defined at the value of the purchases which were first as to time (FIFO method).

3.7. Tax accounting of charges

3.7.1. Charges of OJSC "Moscow United Electric Grid Company" are defined on the basis of primary documents and data of the tax accounting which is conducted according to the present Regulation.

3.7.2. At definition of charges which reduce incomes of OJSC "Moscow United Electric Grid Company", their documentary acknowledgement and economic validity are checked without fail.

3.7.3. Documentary confirmed charges are understood as the charges confirmed by primary documents, issued according to the legislation of the Russian Federation.

Primary documents should contain the following obligatory requisites:

The name of the document;

Date of drawing up of the document;

The name of the organization on behalf of which the document is made;

The content of economic operation;

Measuring instruments of economic operation in kind and terms of money;

The name of positions of the persons responsible for fulfilment of economic operation and correctness of its registration;

Personal signatures of the specified persons.

Documentary acknowledgement of the performed charges are the primary accounting documents issued not only according to the legislation of the Russian Federation, but also as the documents issued according to the business customs applied in the foreign state, in the territory of which the corresponding charges were made, and (or) the documents indirectly confirming performed charges (including the customs declaration, order on business trip, travel papers, report on the executed work according to the contract) (the basis: item 1, article 252 TC of the Russian Federation);

The branches applying in addition their internal forms of primary accounting documents approve them by order of the head of the branch. The given forms are without fail coordinated with the chief accountant of OJSC "Moscow United Electric Grid Company".

3.7.4. Charges of OJSC "Moscow United Electric Grid Company", except for the charges which are not considered with a view of the taxation in conformity from item 270 TC of the Russian Federation, are subdivided into:

Charges connected with manufacture and sale;

Charges for realization of the activity connected with use of objects of production of services and facilities in conformity with item 275.1 RF-TC;

non-operating expenses.

3.7.5. Charges for manufacture and realization which were exercised during the reporting (tax) period, are subdivided into: direct and indirect

3.7.6. For the purposes of the tax accounting, direct costs are equated to charges which are booked on account 20 «Main manufacture», 23 «Auxiliary manufacture», 25 «Common industrial charges» and form the cost price of book keeping.

3.7.7. The direct costs concerning a concrete kind of activity (including charges for payment of the employees borrowed in a concrete kind of activity, amortization of the fixed capital used in a concrete kind of activity) with a view of the tax accounting join in charges by corresponding kind of activity in accordance with the procedure accepted by OJSC "Moscow United Electric Grid Company" for the purposes of book keeping of such charges.

3.7.8. The indirect charges include:

All other sums of charges on manufacture and sales, except for non-operating expenses and charges which are not booked with a view of the taxation in conformity with article 270 TC of the Russian Federation;

Charges on rendering services on connection of capacity to the electric networks formed in the accounting reports.

3.7.9. The structure of non-operating expenses includes the proved expenses for realization of the activity which was not directly connected with manufacture and selling. The structure of non-operating expenses is formed in conformity with article 265 TC of the Russian Federation.

3.7.10. The structure of the charges which are not booked with a view of the taxation is formed in conformity with article 270 TC of the Russian Federation.

3.7.11. The charges accepted for the purposes of the taxation in view of positions of Chapter 25 TC of the Russian Federation, are recognized in the reporting (tax) period they are related to, irrespective of time of actual payment of money resources and (or) another form of their payment.

3.7.12. Dates of recognition of concrete kinds of charges are accepted in accordance with the procedure established by the Russian Federation by article 272 TC. The charges connected with purchase of software products and databases are distributed to the corresponding quantity of the reporting (tax) periods proceeding from conditions of contracts. If contract provisions do not connect occurrence of charges with concrete reporting (tax) periods, the charges are written off in accordance with the procedure established for the purposes of the accounting, i.e. in regular intervals proceeding from term of useful life of this property defined by constantly operating commission for definition of terms of useful life of software;

3.7.13. Charges (expenses) with a view of the tax accounting are formed in an actual place of realization of charges: of the executive body and branches of OJSC "Moscow United Electric Grid Company".

3.7.14. Taking into account that OJSC "Moscow United Electric Grid Company" forms taxable base with the identical tax rate, charges which cannot be directly referred expenses under a concrete kind of activity, are distributed proportionally to proceeds.

3.7.15. The activity connected with use of objects of production of services and facilities of OJSC "Moscow United Electric Grid Company" considers activity of the isolated divisions according to requirements of article 275 TC of the Russian Federation and defines tax base on the specified activity separately from tax base by other kinds of activity.

3.7.16. The sum of direct costs on manufacture and realization, performed in the reporting (tax) period, is related to charges of the current reporting (tax) period, except for the sums of the direct costs distributed to the rests of production in progress, finished goods in warehouse and shipped, but production not sold in the reporting (tax) period in accordance with the procedure established by article 319 TC of the Russian Federation.

The production in progress with a view of the tax accounting is products (works, services) of partial readiness, i.e. which did not pass all operations of the processing (manufacturing) stipulated by technological process. The production in progress joins in works and services, which are finished, but not accepted by the customer. The rests of outstanding orders of manufactures and the rests of semifinished items of own manufacture are related to production in progress. Materials and semifinished items in manufacture are related to production-in-progress provided that they were exposed to processing.

By the activity «transmission and distribution of electric energy» the production in progress is absent, since transmission of electric energy in one stage coincides on time with its sale.

By other kinds of activity the estimation of production in progress is made on direct costs.

The sum of direct costs is distributed to rests of production-in-progress as the share calculated as the relation of gain of production-in-progress regarding direct costs for the reporting (tax) period according to book keeping to direct costs of the current (tax) period according to book keeping.

By the kinds of activity connected with rendering of services, the production in progress is absent, since all direct costs are in full written off to reduction of incomes of the reporting (tax) period.

The estimation of the rests of finished goods in warehouse is defined as a difference between the sum of direct expenses for the rests of finished goods at the beginning of current month, increased by the sum of the direct expenses for output in the current month (net of the sum of the direct expenses for the rest of production in progress) and the sum of direct expenses for products shipped in the current month.

During the reporting period (month is accepted as the reporting period), release of finished goods to warehouse, supply of finished goods from warehouse is carried out in quantitative expression.

Cost of the finished goods which were issued to the warehouse, released from warehouse during the reporting period is defined at the end of the month.

Cost of finished goods released to warehouse is defined as a difference between the sum of the direct costs which were carried out in the current month and the sum of direct costs related to the rests of production-in-progress.

At definition of the amount of the direct expenses for production shipped in the current month, the method of estimation of finished goods at average cost is applied.

3.7.17. The sum of indirect charges for manufacture and sale carried out in the reporting (tax) period, is in full related to charges of the current reporting (tax) period in view of the requirements stipulated by TC of the Russian Federation.

3.7.18. The expenses included in charges, are considered according to the present Regulations in view of limit rates and specification established by TC of the Russian Federation for separate clauses of charges or limit rates established OJSC «Moscow United Electric Grid Company».

3.7.19. Charges for purchase of land areas are considered at a rate of 30 % of tax base of the previous tax period. Thus the sums of charges for purchase of the rights to land areas considered in previous year are excluded from tax base (paragraph 3 of item 1 of item 3 of item 264.1 TC of the Russian Federation). The accounting of charges is made in the corresponding reporting (tax) period up to full recognition of all of the sum of expenses.

3.7.20. Charges in the form of sum difference arising in the event that the sum of arisen obligations and requirements, estimated under rate of conditional monetary units established by the agreement of the parties for the date of selling (booking) of goods (works, services), property rights mismatches actually received (paid) sum of rubles, is reflected in structure of non-operating expenses.

Sum difference is recognized to be charge:

At sale of goods (works, services), property rights - for date of repayment of debts receivable for the sold goods (works, services), property rights, and in case of the advance payment - for date of sale of goods (works, services), property rights;

At purchase of the goods (works, services), property rights - for date of repayment of payables for the purchased goods (works, services), property or other rights, and in case of the advance payment - for date of purchase of the goods (works, services), property, or other rights (item 9 Article 272 RF-TC).

3.7.21. Charges on repair of fixed assets are recognized for the purposes of the taxation in the sum of actual expenses of that reporting (tax) period in which they were carried out. Charges for repair of fixed assets are considered on the basis of the data reflected in registers of book keeping.

3.7.22. Charges in the form of rent payments for rented property, are reflected in the tax accounting at date of their reflection in book keeping, but not later last date month to which they concern in view of a principle of uniform and proportional formation of charges.

3.7.23. Charges in the form of leasing payments for the property accepted in leasing are reflected in the tax accounting at date of their reflection in book keeping, but not later than on the last day of the month they are related to, at the rate stipulated by the schedule of charge of leasing payments under the contract.

Charges for payment

3.7.24. For the purposes of the taxation charges for payment are considered, except for the sums of payments under the contracts of obligatory and voluntary insurance concluded in favour of workers, on the basis of data of

book keeping. The size of the specified payments accepted for the purposes of the taxation is calculated in registers of the tax accounting.

Charges for labor payment join in all charges to employees of OJSC "Moscow United Electric Grid Company" meeting positions of article 255 TC of the Russian Federation and stipulated by orders and other administrative documents of OJSC "Moscow United Electric Grid Company", positions accepted according to them at branches and the executive body, and also collective and labour contracts.

3.7.25. Charges for payment join in charges for payment of the employees who are not included in staff of the organization, for performance of works under contracts of civil legal character.

3.7.26. The structure of charges for payment recognized for the purposes of the taxation does not include the charges named in item 270 TC of the Russian Federation.

3.7.27. For the purposes of the taxation, charges for payment are recognized monthly, proceeding from the sum of the added charges for payment for the given period.

Tax accounting of other indirect charges connected with manufacture and selling

3.7.28. Indirect charges include charges on research and development, charges on voluntary and obligatory insurance of property and other charges according to TC of the Russian Federation. The structure of the expenses included in specified clauses of indirect charges is defined in conformity with article 263 and article 272 TC of the Russian Federation and other statutory acts of the legislation of the Russian Federation about taxes and tax collections.

3.7.29. Charges on capital investments at a rate of 10 percent of initial value of fixed assets (except for fixed assets received gratuitously) and (or) the charges incurred in cases of completion, additional equipment, modernization, re-equipment, reconstruction, partial liquidation of fixed assets, join in structure of miscellaneous costs of the reporting (tax) period (the basis: item 1, article 259 TC of the Russian Federation).

3.7.30. Charges on the research and development, which gave a positive result, are included in structure of miscellaneous costs in regular intervals within 2 years. The charges which did not given positive result, join in full in structure of miscellaneous costs within 3 years (the basis: item 2, article 262 TC of the Russian Federation).

3.8. Tax accounting of incomes

3.8.1. Incomes of OJSC "Moscow United Electric Grid Company", profits considered at the taxation, are defined on the basis of primary documents and data of the tax accounting which is conducted according to the present Regulation; documentary acknowledgement of the received incomes is not only primary accounting documents, but also other documents - quotations of exchange rates of the Central Bank of the Russian Federation and the Moscow Interbank Stock Exchange, other documents confirming the income (the basis: subitem 2, item 1, article 248 TC of the Russian Federation);

3.8.2. With view of calculation of the profit tax, all incomes of OJSC "Moscow United Electric Grid Company" share into two groups:

Incomes of selling;

Non-operating incomes.

3.8.3. At definition of incomes the sums of taxes presented to the buyer (purchaser) of the goods (works, services, property rights) according to TC of the Russian Federation of OJSC "Moscow United Electric Grid Company" are excluded from them.

3.8.4. Incomes are recognized in that reporting (tax) period in which they took place, irrespective of actual receipt of money resources, other property (works, services) and (or) property rights.

3.8.5. Under incomes of connection of capacity to electric networks, the date of reception of the income will be date of signing of the certificate of the executed works on connection (the letter of the Ministry of Finance of Russia 03-03-04/1/674 from 28.09.2006).

3.8.6. For incomes of realization by date of reception of the income date of realization of the goods (works, services, property rights) defined according to item 1 of article 39 TC of the Russian Federation (date of

transition of the property right), irrespective of actual receipt of money resources (other property (works, services) and (or) property rights) in their payment is recognized. At realization of the goods (works, services) under the contract of the commission (the agency contract) OJSC "Moscow United Electric Grid Company", representing itself as the committent (principal), date of reception of the income of realization is the date of selling of the property (property rights) belonging to the committent (principal) specified in the notice of the commission agent (agent) on selling and (or) the report of the commission agent (agent).

3.8.7. Date of reception non-operating incomes is accepted in accordance with the procedure established by item 4 of article 271 TC of the Russian Federation.

3.8.8. Incomes of selling are defined by kinds of activity: in case for the given kind of activity other order of the taxation is stipulated, other rate of the tax is applied, or the order of the accounting of profit distinct from general and the loss received from the given kind of activity is stipulated.

3.8.9. For the purposes of the taxation incomes of selling fixed assets and other property (except for securities, the income of which realization is defined in accordance with the procedure established TC of the Russian Federation) are considered on the basis of data of book keeping in view of positions of item 40 TC of the Russian Federation.

Incomes of delivery of property in rent are reflected in the tax accounting in the sum which is due for payment for the reporting (tax) period according to conditions of concluded contracts, in view of the principle of uniform and proportional formation of incomes and charges. The specified incomes are recognized in tax accounting at the date of their reflection in book keeping, but not later than the last date of the month, they are related to.

3.8.10. Sum difference is recognized the income:

At sale of the goods (works, services), property rights - for date of repayment debts receivable for the realized goods (works, services), property rights, and in case of the advance payment - for date of realization of the goods (works, services), property rights;

At purchase of the goods (works, services), property rights - for date of repayment of payables for the got goods (works, services), property, property or other rights, and in case of the advance payment - for date of purchase of the goods (works, services), property, property or other rights (item 7 of Article 271 RF-TC).

Sum differences in the tax accounting are reflected in structure of non-operating incomes.

3.9. Order of accounting of incomes and charges from delivery of property in rent

Incomes of delivery of property in rent are recognized with a view of the tax accounting incomes of realization. The charges connected with delivery of corresponding property in rent, are recognized with a view of the tax accounting of charges connected with manufacture and sale (item 4 of item 250 TC of the Russian Federation, item 1 of item 1 Article 265 TC of the Russian Federation).

3.10. Tax accounting of securities

3.10.1. Value of securities is determined proceeding from the prices of their purchase, including charges on their purchase. Charges at sale (or other retirement) of securities are defined proceeding from cost of securities, expenses for their realization, the sum of the accumulated interest (coupon) income paid by OJSC "Moscow United Electric Grid Company" to the seller of the securities. Thus the charges do not join the sums of the accumulated interest (coupon) income which was earlier considered at the taxation. At realization or other retirement of securities the cost of the retired securities which are written off on charges, is defined at the cost of unit.

3.10.2. The tax accounting of bills of exchange

Charges on manufacture or purchase of forms of bills are considered in structure of non-operating expenses (subitem 3 item 1 article 265 TC of the Russian Federation). Charges on interest (discount) are recognized in regular intervals during term of the circulation of the bill in structure of non-operating expenses in view of the restrictions

established by the present position proceeding from article 269 of the TC of the Russian Federation, and join in tax base quarterly (item 8 article 272 TC of the Russian Federation).

Under discount bills with the term "after presentation" the charge (discount) is defined from the date of drawing up of the bill, i.e. the cycle time of the bill is accepted equal to 365 (366) days.

For charge of discount under bills with for "after presentation, but not earlier" as term of the circulation proceeding from which discount as of the end of the reporting period is defined, prospective term of the reference of the bill, defined according to the bill legislation (365 (366) days plus term from date of drawing up of the bill before the minimal date of its presentation to payment) is used.

At prescheduled repayment of the bill, the charge is recognized carried out. It joins in structure non-operating expenses on date of cancellation of the contract.

3.11. Tax accounting of interest under debt obligations

Interest charges under debt obligations join in structure of non-operating expenses without dependence from character of the given credit or loan (current and-or investment).

Under contracts of the loan and other similar contracts (other debt obligations, including securities) which validity is more than one reporting period, the charge is recognized performed and joins in structure of corresponding charges at the end of the corresponding reporting period.

The limiting amount of the percent recognized as the charge is accepted equal to the rate of refinancing of the Central bank of the Russian Federation increased in 1,1 times, - at registration of the promissory note in rubles and, to equal to 15 percent, - under promissory notes in foreign currency. The above-stated order is applied also to interest under bills, thus in concept of percent under the bill for calculation of limiting size of interest joins the interest of the revenue specified in the bill and discount which is formed at the drawer as a difference between by return purchase (repayment) and sale of the bill.

The interest added to the creditor over the sums accepted to the charge, are not considered for the purposes of the taxation.

3.12. Reserves

3.12.1. Reserve for doubtful debts.

With a view of covering losses on hopeless debts by results of held at the end of the previous reporting (tax) period of inventory of debts receivable, OJSC "Moscow United Electric Grid Company" creates reserves for doubtful debts by way established by article 266 TC of the Russian Federation.

Doubtful debt is any debts to the tax bearer, which arose in connection with selling the goods, performance of works, rendering of services, and at observance of the conditions stipulated by norms of article 25 of TC of the Russian Federation (basis of item 1, item 266).

Reserves for doubtful debts can be used only for covering of hopeless debts, that is debts to OJSC "Moscow United Electric Grid Company" on which the target date of limitation of actions has expired, and also those debts on which according to the civil legislation the obligation is stopped owing to impossibility of its execution, on the basis of the certificate of the state body or liquidation of the organization.

3.12.2. Reserve of forthcoming charges for repair of fixed assets. The reserve of forthcoming charges on repair of fixed assets is not created.

Charges on repair are considered by actual expenses.

3.13. Order of calculation of the profit tax

3.13.1. During the reporting (tax) period (quarter) of OJSC "Moscow United Electric Grid Company" pays monthly advance payments under the profit tax. Payment of monthly advance payments is made by equal

shares in the amount of one third of actual quarter advance payment for the quarter previous to the quarter in which payment of monthly advance payments is made.

3.13.2. Payment of advance payments, and also the sums of the tax which are subject to transfer to budgets of subjects of the Russian Federation, is made on the location of OJSC "Moscow United Electric Grid Company", and also on the location of each responsible division. The sum of the tax which is subject to payment to the budget of the subject of the Russian Federation, is defined proceeding from a share of the profit estimated from set of parameters of isolated divisions located on territory of the given subject of the Russian Federation.

The share of the profit per these isolated divisions is defined as arithmetic average of relative density of average number of workers and relative density of average specified cost of depreciated property of OJSC "Moscow United Electric Grid Company" and the specified isolated divisions for the reporting (tax) period.

4. Value-added tax

4.1. Payment of the VAT to the federal budget is made centrally by the executive body of OJSC "Moscow United Electric Grid Company".

4.2. The moment of definition of tax base under the VAT (except for conditions of realization stipulated items 3, 7 11, 13 15, item 167 TC of the Russian Federation) is the earliest of following dates:

- 1) day of shipment (transfer) of the goods (works, services), property rights;
- 2) day of payment, partial payment of forthcoming deliveries of the goods (performance of works, rendering of services), transfer of property rights.

In cases if the goods are not shipped and are not transported, but there is a transfer of the property right to these goods, such transfer of the property right with a view of calculation of the VAT is equated to its shipment (item 167 TC of the Russian Federation).

The moment of definition of tax base under the VAT at performance of civil and erection works for own consumption is last day month of each tax period (item 167 TC of the Russian Federation).

In case the moment of definition of tax base is day of payment, partial payment of forthcoming deliveries of the goods (performance of works, rendering of services) or day of transfer of property rights at date of shipment of the goods (performance of works, rendering of services) or at date of transfer of property rights for earlier received payment, partial payment, a moment of definition of tax base is also appears (item 14 of item 167 TC of the Russian Federation).

4.3. Data under the value added tax from branches monthly are reflected in account 68 "Calculations with the budget" on the separate subaccount on the basis of aviso, monthly received from corresponding branch together with monthly calculation of the tax being an internal document of the Company. On results of the tax period (quarter with 2008) branches give summary calculation of the tax. The tax declaration is submitted by the executive body as a whole on the Company for the tax period.

The sums in aviso are specified in rubles and copecks.

4.4. The order of drawing up and registration of invoices, books of purchases, books of sales is adjusted by the current legislation.

In case of rent of state (municipal) property, OJSC «Moscow United Electric Grid Company» pays the income to body of the government (local self-management) and acts as the tax agent under the value added tax, thus invoices itself in one copy which remains at OJSC «Moscow United Electric Grid Company».

For the tax period (month) one invoice is made dated as of the last day of the current month, for a total sum of the rent payment transferred in this month.

Registration of invoices in case of rent of the state (municipal) property is made in the generally established order in view of following features.

In the invoice in line 2 "Seller" the tax agent specifies the tax bearer, from the incomes of which the value-added tax is withheld, for example, Department of property of Moscow. Column 5 of tabulated part of the invoice, in which cost of the goods (works, services) is reflected without the VAT, is not filled in by the tax agent. Thus in column 9 " Cost of the goods (works, services), total, in view of the tax" a total sum of the income paid to lessor of the state (municipal) property is specified. In column 7 the settlement rate of the tax 18/118 is provided, and in

column 8 - size of the withheld tax is given. In the similar order invoices are made in case of purchase of goods, works, services from foreign organizations which are not having registered representative office in tax body in territory of the Russian Federation.

Log-books of the received and exposed invoices, books of purchases and books of sales are conducted by branches and have through numbering with application of an index which corresponds to a code of branch. Log-books of invoices both given out, and received, are stored directly at branches. For registration of a uniform log-book of invoices, the uniform book of purchases and books of sales, the branches give the above-named documents for the reporting tax period to accounts department of the executive body.

5. Tax to property of organizations

The tax accounting of the tax to property of organizations is carried out centrally on the basis of Chapter 30 TC of the Russian Federation.

Object of the taxation is movable and real estate considered on balance of OJSC "Moscow United Electric Grid Company" as objects of fixed assets according to the established order of conducting book keeping.

The land areas and other objects of nature management (water objects and other natural resources) are not recognized objects of the taxation.

With a view of correct application of privileges under the tax to property in the executive body of OJSC "Moscow United Electric Grid Company" and in branches of OJSC "Moscow United Electric Grid Company" the separate accounting of the property which is subject to privileges according to the current legislation under the tax to property of organizations.

The structure of objects of property which is taken into consideration for reduction of cost of property estimated for the purposes of the taxation, is defined in conformity with article 381 TC of the Russian Federation.

For calculation of the tax to property, branches of OJSC "Moscow United Electric Grid Company" represent calculations and lists of property which are taken into consideration for reduction of cost of the property estimated for the purposes of the taxation, in time according to the schedule of document circulation. The given calculations and lists are coordinated by corresponding divisions of the executive body:

The list of power lines and constructions being by the integral technological part of the specified objects is coordinated with the deputy general director for distributive networks, deputy chief engineer for high-voltage electric networks.

The tax to property of organizations is distributed and paid to the budget in the place of location of OJSC "Moscow United Electric Grid Company", location of branches and each object of the real estate which is located outside of OJSC "Moscow United Electric Grid Company" or outside of branches in conformity with articles 383, 384, 385 TC of the Russian Federation.

6. Uniform social tax (UST)

The tax base on UST is defined as the sum of payments and other compensations according to chapter 24 TC of the Russian Federation.

Branches independently make calculation and payment of UST separately concerning the federal budget, Federal fund of obligatory social insurance, Federal and territorial funds of obligatory medical insurance and represent the tax declaration (calculation on advance payments UST) by way stipulated by item 3.2. of the present position.

Branches which structure includes isolated divisions, estimate and pay UST for divisions centrally in the place of the location.

Payments and compensations are not subject to inclusion in tax base for calculation of the tax, if they are not referred to the charges reducing tax base under the profit tax of the organizations in the current reporting (tax) period.

Calculation of tax base on each physical person is made by an accruing result from the beginning of the year. If during the tax period the physical person passes from one division of OJSC "Moscow United Electric Grid Company" to another, the tax rate is defined depending on the tax base calculated in view of payments on all divisions.

Chief accountant

The present regulation is developed also on the basis of professional opinion and judgments of:

-Employees of UES FGC;

-Managements of accounts department of OJSC "Moscow United Electric Grid Company";

- Those responsible for formation full and trustworthy information about activity of the Company and its property status.

The Regulations are aimed:

-To declare the basic assumptions, requirements and approaches to the organization and conducting registration process (including drawing up of the reporting);

-To provide reliability of the prepared financial (accounting) reporting;

-To provide formation of full and trustworthy information about such objects of the tax accounting as incomes, charges, property, property rights, obligations and economic operations of the Company, the cost estimation of which defines tax base of the current reporting (tax) period;

-To provide the information to internal and external users for control of correctness of calculation, completeness and timeliness of payment to the budget of the sums of taxes in view of organizational and branch features of the Company;

-To provide representation of full and trustworthy information for formation of the actual data in system of budgetary management.

The present Regulation about the accounting policy should be used in their activities by:

-Heads and workers of all structural divisions, services and departments of the Company which are responsible for duly representation in accounts department of primary documents and other registration information;

-Heads and workers of all services and the departments responsible for duly and proved development, revision and bringing of the normative and help information up to executing divisions (including accounts department);

-The workers of accounts department who are responsible for duly and qualitative performance of all kinds of registration works and drawing up of the authentic reporting of all kinds.

Other executive documents of the Company should not contradict to the provisions of the present aspects of the accounting policy.

1.1. PRINCIPLES OF ORGANIZATION AND TASKS OF BOOK KEEPING

The responsibility for the organization of book keeping in OJSC «Moscow United Electric Grid Company» and observance of the legislation at performance of economic operations is born by general director OJSC «Moscow United Electric Grid Company».

The accounting and tax accounting is conducted by accounts department of OJSC «Moscow United Electric Grid Company» headed by chief accountant.

Chief accountant of OJSC «Moscow United Electric Grid Company» submits directly to the general director and bears the responsibility for formation of accounting policy, conducting book keeping, duly representation of the full and authentic accounting reporting.

The accounts department of the executive body carries out methodological management by accounting services of branches.

Branches of OJSC «Moscow United Electric Grid Company» have own accounting services which conduct the accounting and tax accounting, make incomplete accounting and tax interfirm reporting and represent them to accounts department of executive body OJSC «Moscow United Electric Grid Company».

Heads of branches are appointed by the order of general director OJSC «Moscow United Electric Grid Company» and act on the basis of the power of attorney.

The chief accountant of branch of OJSC «Moscow United Electric Grid Company» bears the responsibility for observance of the accepted accounting policy, conducting of book keeping, duly representation of the full and authentic accounting reporting to the executive body of OJSC «Moscow United Electric Grid Company».

The organizational structure of accounting service of the Company completely corresponds to organizational structure of the management of the enterprise.

1.2. FORMS OF PRIMARY ACCOUNTING DOCUMENTS AND RULES OF DOCUMENT CIRCULATION

Accounting registration records are made on the basis of the primary documents fixing the fact of fulfilment of economic operations.

In OJSC «Moscow United Electric Grid Company», the typical interdepartmental forms of the primary registration documents containing in albums of unified forms of primary accounting documentation are applied.

For registration of financial and economic operations on which typical forms of primary accounting documents are not stipulated, and also the internal accounting reporting, forms of primary accounting documents according to the appendix are approved for all branches.

The branches applying in addition the internal forms of primary accounting documents approve them by order of the head of branch. The given forms are without fail coordinated with chief accountant of OJSC «Moscow United Electric Grid Company» and should contain the following obligatory requisites (item 5 AR 1/98 «Accounting policy of organization» approved by order of the Ministry of Finance of Russia as of 29.07.1998 № 34H):

- The name of the document;
- Date of drawing up of the document;
- The name of the organization on behalf of which the document is made;
- The content of economic operation;
- Measuring instruments of economic operation in kind and terms of money;
- The name of posts of the persons responsible for fulfilment of economic operation and correctness of its registration;
- Personal signatures of the specified persons.

The primary documents made in foreign languages, should have line-by-line translation into Russian.

MOESK applies computer technology of processing of the primary registration accounting information by means of the specialized accounting program " 1C : Accounts department 7.7 and 8.0".

The primary and summary registration documents received with application of computer programs, are accepted to book keeping if they are issued on the paper carrier and contain obligatory requisites (Federal Law as of 21.11.1996 № 129-FL (as amended as of 30.06.2003) «On accounting», item 7 article 9).

The following computer forms of accounting documents for the internal accounting reporting, created in system of accounting programs are established:

- turnover balance sheet;
- turnover balance sheet under account;
- journal- order (sheet);

Other registers of the accounting necessary for conducting of the analytical and synthetic accounting of economic operations according to requirements of normative documents and the information necessary for operative reception.

The validity of documents stored, processed and transferred by means of automated information and telecommunication systems, are proved to be true by the electronic digital signature. The validity of the electronic digital signature is recognized at presence of the automated information system of the software providing identification of the signature, and observance of the established rules of their use.

The primary registration documents which were received in accounts department necessarily are exposed to check.

Check is carried out under the form (completeness and correctness of official registration of papers, filling of requisites), contents (legality of the documentary operations, logic coordination of separate parameters).

The primary accounting document should be made during the moment of fulfilment of operation and if it is not obviously possible - directly after its termination.

At acceptance of primary accounting documents to the accounting, the competences of the persons who signed them are controlled.

Heads of the Company, acting on the basis of powers of attorney have the right to sign primary accounting documents. Heads of branches have the right of signing primary accounting documents on the basis of the powers of attorney which were issued by the Company.

The documents reflecting economic operations, which assume movement of money resources (on accounts in banks, in cash department of the organization), are signed by heads of the Company, acting on the basis of powers of attorney, and the chief accountant, and persons authorized for this. At branches, the documents reflecting economic operations, which assume movement of money resources (on accounts in banks, in cash department of the organization), are signed by heads of the branch acting on the basis of the powers of attorney which were issued by the Company, and the chief accountant, and persons authorized for this.

The working plan of accounts (Federal Law as of 21.11.1996 № 129-FL (as amended as of 30.06.2003) «On accounting», item 2 article 17.) of book keeping, other documents of accounting policy, procedure of coding, the software data processing (with the instruction of terms of their use), accounting information on entering corrections into the accounting and the reporting are stored by the Company not less than five years after a year in which they were used for drawing up of the accounting reporting last time.

The responsibility for the organization of storage (Federal Law as of 21.11.1996 № 129-FL (as amended as of 30.06.2003) «On accounting», item 3 article 17.) of accounting documents, registers of book keeping is born by the head of the Company.

1.3. ORDER AND TERMS OF DRAWING UP OF REPORTING

Drawing up of the reporting is based on the given registers of book keeping. For maintenance of an individual responsibility of the personnel of accounts department registers quarterly are unpacked and signed by the persons (Federal Law as of 21.11.1996 № 129-FL (as amended as of 30.06.2003) «On accounting», item 2 article 10.) who have made them. These persons are responsible for correctness of reflection of economic operations in memory registers. (Federal Law as of 21.11.1996 № 129-FL (as amended as of 30.06.2003) «On accounting», item 2 article 10.)

Book keeping of property, obligations and economic operations of the Company is conducted in rubles (Federal Law as of 21.11.1996 № 129-FL (as amended as of 30.06.2003) «On accounting», item 1 article 8.) and copecks. The accounting reporting is made in thousands of rubles.

According to requirements of the above-named normative documents on conducting book keeping and accounting policy of OJSC «Moscow United Electric Grid Company», branches of the Company conduct the book keeping and tax accounting, make the reporting in accordance with the procedure established by executive body of OJSC «Moscow United Electric Grid Company», pay taxes according to requirements of the tax laws, bear the responsibility for timeliness of granting and correctness of calculation of taxable base under the taxes paid centrally, and for the organization of the accounting of the assigned property.

Branches of OJSC «Moscow United Electric Grid Company» are specified in the Charter of the Company. Branches of the Company are provided with property which is considered on their separate balance sheets. The property of branch is formed of the property (means) fixed at it by the Company, and also the monetary and material means got during its economic activities and entering into consolidated balance sheet of the Company. The property which is registered on balance of branch is the property of the Company.

Forms of the interfirm reporting are developed by OJSC «Moscow United Electric Grid Company» in view of grouping, ordering and generalization of the information.

Forms of the intermediate and annual accounting reporting in OJSC «Moscow United Electric Grid Company» are developed on the basis of the forms recommended by the Ministry of Finance of the Russian Federation, in view of the additional indicators entered by RAO "UES of Russia".

Accounting reporting of OJSC «Moscow United Electric Grid Company» is made in accordance with the procedure and the term stipulated by statutory acts on book keeping. It is formed by accounts department of the executive body on the basis of the generalized information on property, obligations and results of activity in view of the information given by accounts departments of branches.

With a view of formation by RAO "UES of Russia" of the consolidated reporting on IFRS, OJSC «Moscow United Electric Grid Company» systematizes and transfers to RAO "UES of Russia" the financial information in the form of the consolidated tables-decodings developed by RAO "UES of Russia".

The accounting reporting is signed by the head and the chief accountant of the Company.

In the report on profits and losses the financial result of the reporting period is reflected as net profit, i.e. the final financial result revealed for the reporting period, net of taxes due to profit and other similar obligatory payments, including sanctions for non-observance of rules of the taxation, and also in view of the postponed tax assets and the postponed tax obligations. (Order of Ministry of Finance Of Russia as of 22.07.2003 № 67H)

The annual accounting balance and the report on profits and losses of OJSC «Moscow United Electric Grid Company» are considered and adopted by general meeting of shareholders.

To the reporting submitted for approval to meeting of shareholders, the final part of the auditor report (Order Of Ministry of Finance of Russia as of 06.07.1999 № 43H «On adoption of regulations on accounting «Accounting reporting of organization » (AR 4/99)», item 41) which was given out by results of obligatory audit of the accounting reporting is applied.

The decision made by annual meeting of shareholders of the Company on distribution of profit of fiscal year is reflected in the accounting reporting in the period when the meeting was held, i.e. in the year following after the fiscal year.

Accounting reporting OJSC «Moscow United Electric Grid Company» is represented in terms and addresses stipulated by constituent documents, legislation of the Russian Federation and directive documents of RAO "UES of Russia".

Approved annual accounting reporting of OJSC «Moscow United Electric Grid Company» is published not later than on June 1st of the year following after the reporting year (item 15 and 16 Laws « About book keeping »).

The intermediate accounting reporting (Federal Law as of 21.11.1996 № 129-FL (as amended as of 30.06.2003) «On accounting», item 2 article 15.) of the Company is made within 30 days upon termination of a quarter, annual - in the term established by the legislation of the Russian Federation and directive documents of RAO "UES of Russia", but not later than 90 days upon termination of a year.

Contents of registers of book keeping and internal reporting are a trade secret, and in the cases stipulated by the legislation of the Russian Federation, - state secret. The persons who got access to the information, containing in registers of book keeping and in the internal reporting, are obliged to keep trade secret. They bear the responsibility established by the legislation of the Russian Federation for its disclosure.

1.4. ORDER OF FORMATION, ADOPTION AND CHANGE OF ACCOUNTING POLICY

Within a year the chief accountant of the Company carries out preparation and substantiation of decisions on change (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) « On adoption of regulations on accounting «Accounting policy of organization » AR 1/98», item 18, 17, 9.) of various Positions of accounting policy which can be accepted to execution, since next year.

Any change of accounting policy is made out in the form of additions and changes for the present Position which are approved by the head of the Company.

Changes of accounting policy appear the Company in an explanatory note (Order of Ministry of Finance Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) « On adoption of regulations on accounting «Accounting policy of organization» AR 1/98», item 23.) to the accounting reporting for a year previous year of the beginning of their application.

In case of occurrence in economic activities of the Company of the new (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) « On adoption of regulations on accounting «Accounting reporting of organization» AR 1/98», item 16.) facts of economic activities which ways of book keeping are not determined in the accounting policy, addition to the accounting policy is made. Addition to the accounting policy is made in the form of addition to the present Regulations which is not considered as its new edition and applied from the moment of the adoption.

Disclosing of ways of the book keeping accepted at formation of accounting policy which essentially influence estimation and decision-making by interested users of the accounting reporting, is carried out by the Company by inclusion of extracts from the present regulations in an explanatory note (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) «On adoption of accounting regulations «Accounting policy of organization» AR 1/98», item 15.) to the accounting reporting for a fiscal year.

Essential (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) « On adoption of regulations on accounting «Accounting reporting of organization»» AR 1/98», item 11) ways of conducting book keeping are ways, without knowledge of which application by the interested users of the accounting reporting the authentic estimation of a financial position, movement of money resources or financial results of activity of the Company is impossible.

1.5. APPLIED PLAN OF ACCOUNTS

In OJSC «Moscow United Electric Grid Company» the working plan (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) « On adoption of regulations on accounting «Accounting reporting of organization»» AR 1/98», item 5.) of accounts of the book keeping, developed on the basis of the typical Plan of accounts recommended to use of RAO "UES of Russia" is applied.

The working plan of accounts of book keeping is obligatory for application by all workers of accounts department of the Company and is applied during conducting book keeping in branches. The right to enter, specify and exclude the subaccount to synthetic accounts is given to the chief accountant of the Company, to establish additional systems of the analytical accounting.

Reflection in the accounting of economic operations is made according to the working Plan of accounts OJSC «Moscow United Electric Grid Company». The Company conducts book keeping of property, obligations and economic operations by way of double record according to the Plan of accounts of book keeping.

1.6. APPLIED INTERNAL STANDARDS OF ACCOUNTING

The Company applies internal registration rules (intrafirm standards of the accounting) which are developed on the basis of typical intracorporate standards of the accounting.

Intrafirm standards of the accounting contain requirements (detailed instructive material) to conducting book keeping of concrete economic operations of the Company, the organization of document circulation.

Intrafirm standards of the accounting are obligatory to application by all employees of the Company.

All current changes in the intrafirm standards of the accounting caused by change of the legislation, character of performed operations or the organizations of registration process is made out by the order of the chief accountant of the Company.

1.7. ORDER OF CARRYING OUT OF INVENTORY OF ASSETS AND OBLIGATIONS

Inventory of property and obligations is made according to the Law of the Russian Federation from November, 21st 1996 129-FL «About book keeping» and Methodical instructions on inventory of property and the financial obligations, approved by the order of the Ministry of Finance of Russia from 13.06.1995 49.

The order, terms of carrying out of scheduled inventory and structure of the central inventory commission are established by the order of general director OJSC «Moscow United Electric Grid Company», and when carrying out of inventory is obligatory - on the basis of orders of heads of branches. The statement and structure of the inventory commissions on places is established by the order of the head of branch.

2. METHODOLOGICAL ASPECTS OF ACCOUNTING POLICY

The present section states the selected ways of conducting the book keeping, essentially influencing estimation and decision-making by users of the reporting which are typical at formation of accounting policy of the Company.

2.1. GENERAL REQUIREMENTS TO REPORTING. REQUIREMENTS AND ASSUMPTIONS ACCEPTED AT CONDUCTING OF ACCOUNTING AND DRAWING UP OF REPORTING. REQUIREMENTS TO INFORMATION FORMED BY SYSTEM OF BOOK KEEPING

The system of book keeping of the Company should provide reliability, completeness and trustworthiness of the accounting information at an admissible level of costs on its formation and representation.

Authentic and full reporting is reporting generated by rules, established statutory acts on book keeping.

Reporting is reliable, if it does not contain essential mistakes. It is possible to count on absence of mistakes in connection with the multilevel control of reliability of conducting the accounting and drawing up of the reporting of the Company: the control of the expert who is carrying out corresponding accounting procedures, the control of the head of structural division of the accounts department signing summary accounting registers, the control of internal control and auditing service, auditor checks.

The information (except for reports of special purpose) should be neutral, i.e. free from being one-side, from unilateral accounting of requirements of one of users of the reporting (for example, tax bodies). The information is not neutral if by means of selection or form of representation it influences decisions and estimations of interested users for the purpose of achievement of the predetermined results or consequences.

The structure of the external reporting for its users is formed by the information on the property status of the Company (it is represented in the form of balance sheet - Form No. 1), financial results of activity and changes in financial position of the Company (it is represented in the form of the report on profits and losses - Form No. 2), decoding and explanatory useful for the broad audience of interested users at decision-making (it is represented in the form of appendices to balance sheet - forms 3 «statement of changes in equity», 4 «cash flow statement», 5 «appendix to balance sheet» and in explanatory note).

The basic sections of an explanatory note are defined in item 4 article 13 the Federal law from November 21st, 1996 N 129-FL «About book keeping».

In particular:

- Information on the organization;
- Financial position of the organization;
- Comparability of data for the reporting year and the previous years:
 - Methods of estimation and essential items of the accounting reports:
 - On intangible assets and research and development;
 - On fixed assets and profitable investments;
 - On inventories;
 - On financial investments;
 - Under credits and loans;
 - On calculation of the profit tax;
 - On course differences;
 - On events after accounting date;
 - On the conditional facts of economic activities;
 - On stopped activity;
 - On affiliated persons;
 - On the state assistance;
 - The facts of non-use of rules of book keeping;
 - Changes in the accounting policy for the next financial year.

The structure of an explanatory note can be other if the facts of separate sections (for example, non-use of rules of book keeping, change in the accounting policy) are absent, or activity of the organization demands expansion of explanatory.

The annual reporting is represented by the Company as full forms with enclosing an explanatory note, the intermediate reporting is represented by the Company in volume of balance sheet and report on profits and losses.

Concerning the information for internal users, the purpose of book keeping consists in formation of the information useful for the management of the Company for taking administrative decisions. The management of the Company is interested in the information represented to external users, and in the various additional information which is represented in forms of the internal reporting in the volume approved by the head of the Company or the person authorized by him.

At formation of the information the Company is guided by the standard requirements to conducting the accounting and drawing up of the reporting: the requirement (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) «On adoption of regulations on accounting «Accounting reporting of organization»» AR 1/98», item 7.) of discretion, the requirement of completeness, the requirement of rationality, the requirement of consistency, the requirement of priority of the contents in relation to the form.

Besides the specified requirements, the accounting process (including formation of the reporting) is conducted by the Company proceeding from the following assumptions (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) «On adoption of regulations on accounting «Accounting reporting of organization»» AR 1/98», item 6.):

- Property and obligations of the Company are considered separately from property and obligations of proprietors of this organization (an assumption of property isolation of the organization);

-The Company will continue the activity in the foreseeable future, and it does not have intentions and necessity of liquidation or essential reduction of activity, and, hence, obligations will be repaid in accordance with the established procedure (an assumption of continuity of activity of the organization);

-The accounting policy chosen by the Company is applied consistently: from one fiscal year to another, within the limits of one organization, and also group of the interconnected organizations (an assumption of sequence of application of accounting policy);

-The facts of economic activities of the Company are related to that reporting period (and, hence, are reflected in book keeping) in which they took place, irrespective of actual time of receipt or payment of the money resources connected with these facts (an assumption of time definiteness of the facts of economic activities).

2.2. GENERAL APPROACHES TO QUALIFICATION OF OBJECTS OF ACCOUNTING

Assets of the Company are subdivided into assets and expenses (incomplete investments in creation of assets).

During the reporting period the Company carries out use (expenditure) of resources of various kinds: material, financial, labour and other. The cost estimation of the used resources accepted to the accounting is qualified as an expense (noncompleted investments in creation of assets).

Upon termination of the period the accumulated expenses lead to formation of assets (fixed assets, finished goods, etc.), or charges (decision-making about write-off on losses of incompleting capital investments owing to liquidation or sales of incomplete object of construction, write-off of expenses for the research and development, which did not give results, write-off of the cost price of the executed works and rendered services, etc.).

The moment of end of the period of accumulation of expenses is defined by that moment when conditions of recognition of assets are observed or when it becomes obvious that the incurred expenses reduce economic gains of the Company without creation of any asset.

Expenses are divided into capital (non-current) and current (working).

Capital expenses in the Company are expenses, the purpose of which is creation of non-current assets, including expenses for purchase of new objects, new construction, expansion, reconstruction, modernization and re-equipment.

All other expenses are recognized by the Company *as current*.

Cost estimation of the used resources - expenses - preliminary calculated on calculation accounts, for example:

- Expenses for production of goods, works, services (current) - account 20, 25;
- Expenses of auxiliary manufacture - account 23
- Expenses - common economic - account 26;
- Expenses for purchase (creation) of non-current assets (capital investments) - account 08.

On accounts of the accounting of expenses on purchase (creation) of non-current assets, the accounting of expenses is conducted object-by-object. (Order of Ministry of Finance of Russia as of 30.03.2001 № 26н «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 6.)

On accounts of the accounting of expenses on purchase of current assets, the accounting of expenses is conducted with a breakdown into nomenclature (Order of Ministry of Finance of Russia as of 09.06.2001 № 44н «On adoption of accounting regulations «Accounting of inventories» AR 5/01», item 3.) numbers, parties, homogeneous groups of inventories.

Upon termination of the period of accumulation of expenses, the Company recognizes that realization of expenses has led to creation of an asset if there was a formation of object of property, from use or alienation of which the economic gain in the future is expected. The Company recognizes as assets only the objects of property belonging to it under the property right (an assumption of property isolation) (Order of Ministry of Finance of Russia as of 09.12.1998 № 60н «On adoption of accounting regulations «Accounting policy of organization» AR 1/98», item 6.).

The future economic gains («Concept of accounting in market economy of Russia» (adopted by the Methodical Council on Accounting under the Ministry of Finance of Russia as of 29.12.1997), item 7.2.1.) are a potential opportunity of property directly or indirectly to promote inflow to the Company of money resources or their equivalents. It is considered that the object of property will bring economic gains in the future when it can be:

- used separately or in combination with other object during production of products, works, services intended for sale;

- changed for other object of property;
- used for repayment of payables;
- distributed between proprietors.

In order to make the object of property recognized in book keeping, its cost should be measured with a sufficient degree of reliability («Concept of accounting in market economy of Russia» (adopted by the Methodical Council on Accounting under the Ministry of Finance of Russia as of 29.12.1997), item 8.3.). The Company recognizes measurement of cost reliable enough when the object of property is ready to use for the planned purposes, and all expenses on its bringing up to this condition are recognized in the accounting and estimated on the basis of settlement documents, contractual or market quotations and tariffs.

At change of requirements of normative documents on qualification of separate objects of the accounting, the Company qualifies all objects of the accounting according to new requirements - both got before the specified changes, and got after their putting into effect (maintenance of uniformity of the accounting of property).

If realization of expenses has not led to creation of an asset, the Company's charges are recognized upon termination of the period of accumulation of expenses. At the same time charges (Order Of Ministry of Finance of Russia as of 06.05.1999 № 33H «On adoption of accounting regulations «Expenses of organizations» AR 10/99», item 2.) are reduction of economic gains of the Company as a result of retirement of assets (money resources, other property) and (or) the occurrence of obligations leading to reduction of the capital (except for reduction of contributions of participants).

The Company recognizes charges only in the event that retirement of assets has *unconditional character*. If under certain conditions retired assets will be returned to the Company, the accounting recognizes debts receivable or formation of other assets (for example, financial investments).

The Company does not recognize (Order Of Ministry of Finance of Russia as of 06.05.1999 № 33H « On adoption of accounting regulations «Expenses of organizations » AR 10/99», item 3.) as charges money resources and other property transferred with a condition of possible or obligatory subsequent return (the issued loans, advance payments, transfer of property for sale to the commission agent or the attorney, the sums of the turnaround taxes allocated as a separate line in settlement documents with suppliers, etc.).

Incomes (Order Of Ministry of Finance of Russia as of 06.05.1999 № 32H «On adoption of accounting regulations «Incomes of organizations » AR 9/99», item 2.) are understood as increase in economic gains of the Company as a result of receipt of assets (money resources, other property) or repayments of the obligations, leading to increase in the capital, except for contributions of participants (proprietors of property).

The Company does not recognize (Order Of Ministry of Finance of Russia as of 06.05.1999 № 32H « On adoption of accounting regulations «Incomes of organizations » AR 9/99», item 3.) as incomes receipt of money resources and other property received with a condition of possible or obligatory subsequent transfer to other participants of economic turnover (the received loans, received advance payments, sums of current taxes allocated in the separate line in settlement documents with buyers, etc.).

The Company recognizes payables («Concept of accounting in market economy of Russia» (adopted by the Methodical Council on Accounting under the Ministry of Finance of Russia), item 7.3.) if there is a probability of outflow of resources of the Company, capable to bring economic gains which are consequence of execution of the existing obligation in the accounting, and the size of this obligation can be measured with a sufficient degree of reliability.

The capital («Concept of accounting in market economy of Russia» (adopted by the Methodical Council on Accounting under the Ministry of Finance of Russia), item 7.4.) of the Company is the sum of cost of assets minus amount of its obligations (payables).

2.3. GENERAL APPROACHES TO ESTIMATION OF OBJECTS OF ACCOUNTING

In the accounting the Company makes estimation of acceptance of property and obligations in money terms. The estimation of property is carried out as follows:

- The property (Order Of Ministry of Finance of Russia as of 30.03.2001 № 26H «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 9.) received by the Company as the contribution to the authorized capital, is estimated in money determined by founders (shareholders) of the Company, according to requirements of the current legislation;
- The property purchased by the Company for payment (Order Of Ministry of Finance of Russia as of 29.07.1998 № 34H «On adoption of regulations on conducting book keeping and accounting reporting in the Russian Federation», item 23.), is estimated on the sum of actually made expenses for its purchase. In case of insignificance of size (3 %

from contractual cost) expenses for purchase of securities (except for the sums paid according to the contract to the seller) such expenses are recognized by the Company as miscellaneous costs (Order of Ministry of Finance of Russia as of 10.12.2002 № 126H «On adoption of accounting regulations «Accounting of fixed assets» AR 19/02», item 11.);

-The property made in the Company (Order Of Ministry of Finance of Russia as of 29.07.1998 № 34H « On adoption of regulations on conducting book keeping and accounting reporting in the Russian Federation », item 23.), is estimated under the cost price of its manufacturing (the actual expenses connected with manufacture of object of property);

-The material assets remaining from write-off of unsuitable to restoration and further use of fixed assets (Order Of Ministry of Finance of Russia as of 29.07.1998 № 34H « On adoption of regulations on conducting book keeping and accounting reporting in the Russian Federation », item 54.), the spare parts (Order Of Ministry of Finance of Russia as of 13.10.2003 № 91H «On adoption of methodical indications on accounting of fixed assets», item 79.) formed as a result of restoration of fixed assets (reconstruction, modernization, repair) are estimated at current market cost for date of write-off of fixed assets or for date of acceptance to the accounting of spare parts;

- The property received by the Company gratuitously and the property revealed at carrying out by the Company of inventory of assets and obligations (Order Of Ministry of Finance of Russia as of 13.10.2003 № 91H « On adoption of methodical indications on accounting of fixed assets », item 36.) is estimated at current market cost for date of acceptance of property to the accounting. Current market cost is understood as the sum of money resources which can be received as a result of sale of named asset for date of acceptance to book keeping. Current market cost is formed proceeding from the prices acting on the given or similar kind of property. Thus data about an established price should be confirmed documentary or by expert (Order of Ministry of Finance of Russia as of 29.07.1998 № 34H «On adoption of regulations on accounting conducting book keeping accounting reporting in the Russian Federation », item 23.).

At definition of current market cost, data about the prices for the similar fixed assets received in writing from the organizations-manufacturers, data on price level, available at bodies of the state statistics, trading inspections, and also in mass media and the special literature, expert judgments (for example, appraisers) about cost of separate objects of fixed assets can be used (Order Of Ministry of Finance of Russia as of 13.10.2003 № 91H «On adoption of methodical instructions on accounting of fixed assets», item 29.). The expert judgment is understood as the report of the independent expert or the authorized experts of the Company possessing special knowledge and skills. The given experts are appointed by the order of the head of the Company or the persons authorized by it as members of constantly operating commission on acceptance to the accounting or write-off of property.

Current market cost of the securities having market quotations, is accepted at a rate of their market price (Order Of Ministry of Finance of Russia as of 10.12.2002 № 126H «On adoption of accounting regulations «Accounting of financial investments» AR 19/02», item 13.) calculated according to the established procedure by the organizer of trade on securities market and confirmed documentary (statement in professional press, listing of a stock exchange, etc.);

-The property received by the Company under contracts, providing execution of obligations (payment) not by money (in particular under contracts of change) (Order Of Ministry of Finance of Russia as of 30.03.2001 № 26H «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 11.), is estimated at cost of the values which are transferred or subject to transfer to the Company. Cost of the values which are transferred or subject to transfer to the Company is established according to the price at which in similar circumstances the Company usually defines cost of similar values.

At estimation of the property got on any bases, its actual cost is formed with addition of the expenses incurred by the Company on bringing of property up to condition suitable for use (on carrying out of examinations, consultations and estimations, on payment of services of agents and other intermediaries, on delivery, installation and trial start-up, registration of transactions, payment of duties, etc.). (Order of Ministry of Finance of Russia as of 30.03.2001 № 26H «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 12.)

The estimation of property and obligations, which cost at purchase (occurrence) is expressed in a foreign currency, is made in rubles by recalculation of foreign currency at the rate of the Central bank of the Russian Federation, acting on date of acceptance of objects of property to book keeping.

Cost of property in which they are accepted to book keeping, is not subject to change, except for the cases established by the legislation of the Russian Federation.

For non-current assets (except for intangible assets) change is supposed in case of completion (Order Of Ministry of Finance of Russia as of 30.03.2001 № 26H «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 14.), additional equipment, reconstruction, modernization, partial liquidation and reassessment of objects of fixed assets.

For current assets it is supposed in case inventories have morally become outdated, the initial quality or current market cost which cost of sale has decreased have in full or in part lost. (Order Of Ministry of Finance of

Russia as of 09.06.2001 № 44H «On adoption of accounting regulations «Accounting of inventories» AR 5/01», item 25.)

For financial (Order Of Ministry of Finance of Russia as of 10.12.2002 № 126H «On adoption of accounting regulations «Accounting of financial investments» AR 19/02», item 20.) investments on which it is possible to define in accordance with the established procedure the current market cost, updating of registration cost up to market is made.

At absence by the moment of receipt of property (fixed assets, inventories, etc.) of documents on cost of the received objects they are accepted to the accounting by conditional estimation in view of contractual cost, charges on the delivery, transport waybills defined according to data and other transport documents.

In the reporting the property related to depreciated assets (fixed assets, intangible assets and profitable investments in material assets), is reflected at residual cost (initial value minus the added amortization).

2.4. SELECTED WAYS OF ACCOUNTING OF CAPITAL EXPENSES AND NON-CURRENT ASSETS

Capital expenses are connected:

With realization of capital construction in the form of new construction, reconstruction, modernization, expansion and modernisation (in the further - construction);

Purchase of buildings, construction, equipment, vehicles and other separate objects (or their parts) of fixed assets;

Purchase of land areas and objects of wildlife management;

Purchase and creation of assets of intangible character.

2.4.1. Capital construction by forces of outside contractors and own forces

Capital expenses lead to creation of non-current assets (fixed assets) on objects of civil and erection works after input of the specified objects in the operation, issued by corresponding certificates, and in necessary cases - with registration of the certificate on the state registration of the property right to the real estate.

At acceptance to the accounting of object of the real estate as object of fixed assets the sum of actual expenses on its creation, considered as capital investments in the given object, forms an initial project cost of fixed assets:

To objects of the real estate constructed by the Company and its divisions in the economic or contract way, - after submission of the complete set of documents on registration of the property right to object;

To fixed assets entering into the estimates of construction sites (intended for operation in objects in the process of construction), - after commissioning all object of construction;

To fixed assets demanding installation, - after end of process of installation;

To fixed assets which do not demand installation, - after receipt of object from supplying division in maintaining division. Thus if the maintaining division places the received object on warehouse in the accounting, it is reflected as object of fixed assets in the stock (in the reserve).

The accounting of investments in non-current assets is conducted as a whole on construction, on separate objects of investments.

Object of construction - separately located building or construction, kind or complex of works the design-budget documentation on construction of which should be made.

The object of construction is considered with all arrangements related to them, equipment, furniture, stock, subsidiary and auxiliary devices, and also if necessary with engineering networks adjoining to them and common site works (vertical lay-out, accomplishment, gardening, etc.).

The accounting of expenses is conducted by an accruing result from the beginning of construction of object with a breakdown into the reporting periods before input of objects in operation or full manufacture of corresponding works. The builder (customer) of construction keeps accounting expenses for accounting 08 «Investments into non-current assets».

The builder is understood as a legal person who owns as the property or rent a land plot and has made a decision on realization of the program of construction on it of a complex of objects, defining methods of financial maintenance of construction and carrying out coordination of works on its realization.

Incomplete construction - expenses of the builder on erection of objects of construction from the beginning of construction up to input of objects in the operation, considered as capital investments under accounting 08 «Investments into non-current assets».

The accounting of incomplete construction is conducted:

- As a whole on construction;
- In separate turns;
- On separate objects of construction;
- On technological structure of expenses on object of construction.

Expenses on separate object of construction are grouped on the technological structure of charges defined by the budget documentation on corresponding object.

The technological structure of charges provides, in particular, charges:

- On civil work;
- Works on installation of equipment;
- Purchase of the equipment which has been handed over for installation;
- Purchase of the equipment which does not demand installation, tool and stock, equipment demanding installation, but intended for constant stock;
- Other capital expenses.

Capital investments in the form of construction (reconstruction, modernization) of objects performed in the economic way are reflected in the accounting monthly, in process of their formation. Thus the division which carries out capital investments reflects them in account 08 «Investments into non-current assets» monthly.

The capital investments which have been carried out during works of capital character, executed for the Company by outside contract organizations are reflected in the accounting in process of their performance on the basis of the signed certificates of the executed works and settlement documents.

2.4.2. Accounting of operations on share construction of objects

Two variants of signing of contracts of share construction of objects are possible:

The Company enters joint activity which subject is construction of object. A distinctive attribute of such contract is that under such contract all of the parties not only bring money resources, but also to some extent actually take part in construction;

The Company invests own means or accumulates means of other persons for construction of object. In this case actually only one of the parties (builder-customer) is engaged in construction, the other party (parties) only invests money resources for reception of demanded result - is the investor.

In the first case, the relations of the parties are reflected according to the order established for joint activity.

The contribution of the Company to joint activity is reflected in accounting 58 «Financial investments. Contributions under the contract of simple company». Reception of contributions and expenses on construction are considered on separate balance of joint activity by the party to which according to the contract such duty is assigned.

Upon termination of construction the Company forms payables on the completed capital investments due to it, which is reflected in account 08 «Investments in non-current assets». Thus, commissioning of the object of finished construction (regarding that belonging to the Company according to contract provisions) is reflected in the accounting of the Company. Such object of fixed assets which is the property of two or several organizations is reflected in structure of fixed assets of the Company in proportion to its share in a total cost of object.

In the second case, investments actually made by the Company (transfer of money resources and other property) are reflected in structure of long-term debt receivables in separate account 76 «Settlement of accounts with different debtors and creditors » (including payment of services of the customer-builder).

If the Company carries out duties of the customer-builder the means of other investors received by it are reflected as long-term payables. Thus additional payment of services of the Company (over the sum of expenses for construction) on realization of supervision of construction, etc. works is reflected by the Company in accounts of the accounting of sales (account 90 "Sale").

Expenses on capital construction are considered on balance of the Company:

-At structural division - the executing party of civil work under the account of expenses;

-At structural division - the customer-builder under the account 08 «Investments into non-current assets» in process of end and acceptance of civil work (stages of works).

After end of construction these expenses are transferred to investors

(In the share due by it) for reflection by them in structure of capital investments and the subsequent transfer in structure of fixed assets.

2.4.3. Accounting of interest under loans and credits involved for purchase and/or creation of non-current assets

With a view of definition of the order of the accounting of capitalized expenses regarding percent under the involved loans and credits the Company allocates investment assets among objects of investments. Investment assets are understood as objects of property which preparation for prospective use demands significant time, and also greater expenses for purchase and (or) construction (property complexes and other similar assets). The Company refers assets to investment assets, the cost of which is more than 10 billion rubles and formation is more than 5 years.

The expenses connected with reception and use of loans and credits, include:

The interests which are due for payment to creditors under loans received from them and credits;

Interest, discount under bills due for payment and bonds;

The additional expenses made in connection with reception of loans and credits, issuance and placement of extra obligations.

The additional expenses made by OJSC «Moscow United Electric Grid Company» in connection with reception of loans and credits, issue and placement of extra obligations, include the charges connected with:

Rendering by OJSC «Moscow United Electric Grid Company» of legal and consulting services;

Realization of multiple copying works;

Payment of taxes and tax collections (in the cases stipulated by the legislation);

Other expenses directly connected with reception of loans and credits, placement of extra obligations.

Write-off of additional expenses of the loans connected with reception and credits, is carried out by placement of extra obligations due to miscellaneous costs of OJSC «Moscow United Electric Grid Company» in the reporting period in which the specified charges have been made.

Expenses under the received loans and credits directly concerning purchase and (or) construction of investment asset, join in cost of this asset and are repaid by means of charge of amortization, except for cases when charge of amortization of an asset is not stipulated by rules of book keeping.

Expenses under the received loans and the credits connected with formation of an investment asset on which by rules of book keeping amortization is not charged, do not join in cost of such asset, and is related to the operational expenditure of the organization.

Inclusion of expenses under the received loans and credits in initial value of an investment asset is made at presence of following conditions:

Occurrence of charges on purchase and (or) construction of an investment asset;

The actual beginning of the works connected with formation of an investment asset;

Presence of actual expenses under loans and credits or obligations on their realization.

If the investment asset is not accepted to book keeping as object of fixed assets or a property complex (under corresponding clauses of assets), but actual output, performance of works, rendering of services started, inclusion of expenses under the given loans and credits in initial value of an investment asset stops from the first date following after month of the actual beginning of operation. (items 11, 19, 20, 23, 27, 31 AR 15/01)

Expenses under the received loans and credits incurred prior to the beginning of manufacture of works on creation of investment assets, and also objects of the investments, which are not referred to investment assets do not join in cost of investments in non-current assets, and are related to miscellaneous costs of the Company in structure of miscellaneous costs.

In case of stay of the works connected with realization of investments in non-current assets, during the term exceeding three months, inclusion of expenses under the received loans and credits in volume of capitalized expenses also stops. In this case expenses under loans are related to the operational expenditure of the Company in the structure of miscellaneous costs.

It is not considered cessation of work on formation of an investment asset the period in which the additional coordination arisen during construction of an of asset technical and (or) organizational questions is carried out.

Reception of the loans provided by own bill.

Debts of OJSC «Moscow United Electric Grid Company» before loan granters provided by issued own bills, is considered separately on account 66 «Calculations under short-term credits and loans» - are short-term, on account 67 «Calculations under long-term credits and loans» - long-term. Simultaneously own bills which were issued for security of loans are considered separately on off-balance account 009 «Obligations payable» at the par value. (Plan of accounts № 94H, section VI, off-balance accounts)

Order of accounting of incomes from time investment of extra means

In OJSC «Moscow United Electric Grid Company» expenses under the received loans and credits, connected with purchase of an investment asset, decrease by size of the income of time use of extra means as long-term and short-term financial investments. (item 26 AR 15/01)

Order of accounting of debts under received loans and credits

The basic sum of debt under the loan received from the creditor or the credit is considered in OJSC «Moscow United Electric Grid Company» according to contract provisions in the sum of actually received money resources or in a cost estimation of other things stipulated by the contract. (Item 3 AR 15/01)

Translation of long-term debts into short-term debts

OJSC «Moscow United Electric Grid Company» makes translation of long-term debts into short-term. (Items 6 and 32 AR 15/01)

Estimation of debts under received credits and loans

The payables under the received credits and loans is considered and reflected in the reporting in view of due as of the end of the reporting period to payment of percent according to treaty provisions.

The added sums of percent are considered separately. (Item 73 of Regulations № 34H., plan of accounts № 94H, section VI., items 16, 17 AR 15/01)

Accounting of the operations connected with issuance of bonds

Book keeping of the operations connected with issue of bonds is conducted on account 67 «Calculations under long-term credits and loans». The size of the coupon income in percentage and the price of sale (distribution) is defined by the decision of Board of Directors OJSC «Moscow United Electric Grid Company».

Charge of due income (percent or discount) under the placed bonds is made according to contract provisions and reflected by OJSC «Moscow United Electric Grid Company» in miscellaneous costs of those reporting periods to which the given charges are related.

The organization - the issuer does not consider preliminarily the sum due to payment to the creditor of the income under the sold bonds as charges of the future periods. (Plan of accounts № 94H, section VI, item 18 AR 15/01)

2.4.4. Fixed assets

The fixed assets are recognized by the Company as assets concerning which the following conditions are simultaneously satisfied:

-Use in production is supposed, at performance of works or rendering of services or for administrative needs for a long time (term of useful life duration over 12 months or usual operational cycle if it exceeds 12 months);

-Ability to bring economic gains (income) in the future, and the subsequent resale of the given assets is not stipulated. (Order Of Ministry of Finance of Russia as of 30.03.2001 № 26H (as amended as of 18.05.2002) «On adoption of accounting regulations «Accounting of fixed assets AR 6/01», item 4).

The assets concerning which the conditions stipulated by the present Regulations are met, and in cost within the limits of no more than 20000 rubles per unit, are reflected in book keeping and the accounting reporting in structure of inventories.

fixed assets intended only for granting in time possession and using with the purpose of reception of the income are considered by OJSC «Moscow United Electric Grid Company» in the structure of profitable investments in material assets, accounting 03 Profitable investments in material assets.

The objects which are registered in structure of fixed assets, but subjects of obligatory state registration till the moment of the state registration, are considered in structure of fixed assets separately.

At presence of library fund cost of the printed editions included in fund, is enlisted in structure of fixed assets under the debit of account 01 «fixed assets» in correspondence from the credit of account 08 «Investments in non-current assets».

The Company does not recognize objects concerning which at their acceptance to the accounting (during the moment of qualification) the decision on alienation in favour of other persons is accepted as fixed assets - resale is supposed, change, etc. In this case the object is qualified by the Company as the goods.

Inventory object of fixed assets the separate structurally isolated subject intended for performance of certain independent functions or the isolated complex of structurally jointed subjects, representing a single whole and intended for performance of the certain work is recognized. (Order of Ministry of Finance of Russia as of 30.03.2001 № 26Н «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 6.)

If one or several subjects of one or different purpose represent the isolated complex of structurally jointed subjects having the general adaptations and accessories, the general management, mounted on one base therefore each of subjects can carry out the functions only in structure of complex, to the accounting as inventory object all complex as a unit is accepted.

In case of presence at one inventory object of the several parts having essentially different term of useful life, each such part is considered as independent inventory object irrespective of fact, the specified part of object can to carry out independent function or not.

As independent inventory objects are accepted:

- Capital investments in the rented objects of fixed assets;
- Capital investments on radical improvement of the grounds (drying, irrigating and other ameliorative works);
- Shares of objects of fixed assets which are being the share property of the Company and another (others) of the proprietor (organizations).

Computers can be considered as the separate structurally isolated subject having number or as object, consisting of separate subjects (the system block, the monitor, etc.), each of which has the accession number.

The fixed assets are accepted to book keeping at the initial value defined depending on a way of receipt - purchase to payment, creation by own forces (construction), gratuitous reception, etc.

In initial value of fixed assets got for payment, the sum of actual expenses of the Company on purchase, a construction and manufacturing (except for the value added tax and other compensated taxes) is recognized. (Order of Ministry of Finance of Russia as of 30.03.2001 № 26Н (as amended as of 18.05.2002) «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 8.)

• The actual expenses include:

- The sums, paid to suppliers according to the contract of delivery;
- The sums paid to the foreign organizations for services on delivery of property up to warehouses (including the tariff);
- The sums, paid to the organizations for the information and consulting services connected with purchase of fixed assets;
- The customs duties and the custom charges;
- Not compensated taxes, a State Tax, paid in connection with purchase of object of fixed assets;
- The compensations paid of the intermediary organization through which the object of fixed assets is got;
- Expenses for carrying out of starting-up and adjustment works, individual approbation of separate kinds of machines and mechanisms, complex approbation of all kinds of the equipment and technical installations with the purpose of quality check of their installation, spent "empty";
- common economic and other similar charges, in case they are directly connected with purchase of object of fixed assets;
- Other expenses directly connected with purchase, construction and manufacturing of object of fixed assets and its bringing up to a condition in which it is suitable to use (for example, charges on opening the letter of credit for purchase of fixed assets, travelling and living expenses, including over the norms established by the legislation if they are directly connected with purchase of fixed assets).

Do not join in actual charges on purchase and creation of fixed assets (except for investment assets):
The interests which are due for payment to creditors under loans received from them and credits;

Interest, discount under bills due for payment and bonds

At reception of fixed assets as the contribution to charter capital in initial value is recognized the monetary estimation of fixed assets coordinated by founders (participants). At reception of fixed assets under the contract of donation and other cases of gratuitous reception in initial value their current market cost for date of acceptance to book keeping is recognized.

In initial value of fixed assets received under contracts, providing execution of obligations (payment) not money resources, cost of the values which are transferred or a subject transfer from the organization is recognized. Cost of the values which are transferred or subject to transfer by the organization, is established proceeding from the price on which in comparable obligations OJSC «Moscow United Electric Grid Company» usually defines cost of similar values.

At impossibility to establish cost of the values which are transferred or subject to transfer, cost of fixed assets received by the organization under contracts, providing execution of obligations (payment) not money resources, it is defined proceeding from cost on which in comparable circumstances similar objects of fixed assets are got.

In initial value of fixed assets received instead of retirement property within the limits of agreements on indemnification of losses and transfer of property rights, cost of actual expenses for construction of object of the transferring party, specified in the certificate приемки-assignment is recognized.

The estimation of object of fixed assets, which cost at purchase is expressed in a foreign currency, made in rubles by recalculation of the sum in a foreign currency at the rate of the Central bank of the Russian Federation, acting on date of acceptance of object to book keeping on accounting 01 «fixed assets». The difference arising at it between the estimation of fixed assets reflected in the accounting of the accounting of fixed assets, and estimation on the accounting of the accounting of investments in non-current assets is written off on the accounting of the accounting of profits and losses as other incomes (charges).

Charges on internal moving objects of fixed assets between divisions of the Company, in initial value do not join, and concern on current expenses.

The basis for acceptance to the accounting of fixed assets received on internal moving between divisions of the Company, is the waybill on internal moving of objects of fixed assets (form OS-2) and a card of the accounting of fixed assets (form OS-6).

The objects of fixed assets accepted or transferred to is material-responsible storage are considered on off-balance accounting 002 «Commodity-material assets, accepted on responsible storage» in the prices stipulated in acceptance reports.

If the Company makes a decision on the full termination of own operation of separate objects of a fixed capital in the accounting depending on a situation, the following is reflected:

-Preservation of the specified objects - then the given objects stand apart in the analytical accounting;

-Transfer of the specified objects to other users on the basis of for-a-fee contracts (rent, hire) - then the given objects are transferred on the accounting of the accounting of profitable investments to material assets;

-Write-off from the accounting of constantly unused objects (moral and-or physical deterioration) - then the Company recognizes non-operating expenses.

Write-off of cost of separate objects of fixed assets

The assets purchased after 01.01.2006 up to 01.01.2008 in cost no more than 10000 rubles and with 01.01.2008 no more than 20 000 rubles per unit are reflected in book keeping and the accounting reporting in structure of inventories in accounting 10 "Material". Concerning these assets forms of primary registration documents under the accounting of fixed assets are not applied., in particular, OS-1 are not made out at reception-transfer of fixed assets, form N OS-2 at internal moving objects, form N OS-4 at their retirement, does not open an inventory card of the accounting of fixed assets form N OS-6, etc.

With a view of maintenance of safety of these assets in manufacture or at operation in OJSC «Moscow United Electric Grid Company» the credit order under form N M-4, the requirement-unprofitable under form N M-11, a card of the accounting of materials under form N M-17 is made on them, etc.

On the got vehicles, including during leasing, cost of no more than 20 000 rubles for unit besides on off-balance to the accounting, OS-1 are made out form N at reception-transfer of fixed assets, form N OS-2 at internal moving objects, form N OS-4 at their retirement, opens an inventory card of the accounting of fixed assets form N OS-6

Retirement of fixed assets

Incomes and charges connected with sale, retirement and other write-off of objects of fixed assets from book keeping, are subject to transfer in the accounting of profits and losses as other incomes and charges.

At retirement objects of fixed assets and other assets owing to impossibility of use in view of unfitness to the further operation, an obsolescence and other write-off, the loss from retirement and other write-off of property is subject to referring to miscellaneous costs (items 12, 31 of section III AR 6/01, item 11 of section III AR 10/99, items 7,8 of sections III AR 9/99, item 82 of Regulations 34H)

Expenses for repair of fixed assets

Expenses for carrying out of all kinds of repair (current, average and capital) join in charges for usual kinds of activity of that reporting period in which they have been made. The reserve of forthcoming charges for repair of fixed assets is not created.

Accounting of repair of fixed assets in structure of cost price

In structure of charges included in the cost price on repair of fixed assets following basic groups are allocated: charges on the repair which is carried out in the contract way; charges on the repair which is carried out in the economic way, including charges on wages of the workers borrowed by repair, carried out economic way; other expenses for repair.

In case of industrial necessity can be allocated and other groups of the accounting.

2.4.5. Change of cost of fixed assets

Change of initial value of fixed assets in which they are accepted to book keeping, is supposed in cases of completion, an additional equipment, reconstruction, modernization, partial liquidation and reassessment of objects of fixed assets. (Order Of Ministry of Finance of Russia as of 30.03.2001 № 26H «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 14.)

Works on completion, reconstruction and modernization (including partial liquidation) of fixed capital of the Company are carried out on the basis of the annual plan of reconstruction and modernization of the fixed capital, the Company approved by the head.

The reorganization of existing objects of as a result of which fixed capital is improved concerns to modernization or reconstruction (raise) of earlier accepted quality indicators of functioning of fixed assets:

- Capacity;
- Productivity;
- Transmission capacity;
- Other qualitative characteristics.

The full or partial reorganization and re-equipment of existing objects concerns to reconstruction without expansion of available designs, buildings and constructions, connected with perfection of manufacture and increase of its technical and economic level. Reconstruction is made with a view of increase in capacities, improvement of their qualitative characteristics.

The complex of actions concerns to modernization on increase of a technical and economic level of separate objects on the basis of introduction of high technology, mechanization and automation of manufacture, replacement of the out-of-date and physically worn out equipment new, more productive.

Erection of new parts of buildings is related to completion, construction, reorganization of the existing objects making a single whole with object of fixed capital as a result of which quantitative characteristics of fixed capital change:

- Construction of additional premises on operating object (a superstructure of floors, an extension of new premises);
- Construction of additional objects and introductions in structure of an existing complex of fixed assets.

Qualitative change (downturn) of physical or technical properties of objects which lead to decrease in economic gains from their use (liquidation of separate constructive elements of the object operating in structure of

complex of fixed assets, replacement of separate parts at modernization or reconstruction, etc.) is related to partial liquidation.

In case of partial liquidation of objects of fixed assets in the same proportion the amortization saved up on them is written off.

Modernization of objects of fixed assets is possible and at carrying out of major overhaul of objects of fixed assets. Major overhaul of the electro network equipment is held according to the engineering specifications: the operation manual and to major overhaul, the passport of the equipment, norms of the charge of materials and spare parts. If carrying out of procedural works within the limits of major overhaul-regenerative entails improvement (increase) before the accepted quality indicators of functioning of object of fixed assets with prolongation of service life, such works are equated to modernization and are considered by way of capital investments with increase in cost of objects of fixed assets. Allocation of works as a result of which modernization of object of fixed assets is carried out is made on the basis of the opinion by the employee of service of management of repairs authorized by the chief engineer.

If the sum of charges on modernization does not exceed 20 000 rubles, in this case all sum of expenses in full lump sum joins in charges at calculation of the profit tax. (Letter of Ministry of Finance Of Russia as of 7 May 2007 № 03-03-06/1/266)

If the sum of charges on modernization makes 20 000 rubles and more, the modernized object is included in structure of depreciated property. Its initial value will represent the sum of expenses for modernization. *In this case* the Company forms a new object of fixed assets. (Letter of Ministry of Finance of Russia as of 9 June 2004 № 03-02-05/3/50)

Acceptance of fixed assets from reconstruction and modernizations is made out by the certificate of acceptance of the reconstructed and modernized objects (form OS-3) on the basis of the certificate of the executed works on repair (form KC-2) on the basis of which the information on cost of the executed works and expenses (form KC-3) is filled in.

Reassessment of fixed assets is made in accordance with the procedure established by the legislation on the basis of the corresponding executive document of the head of the Company every two years.

The sum of additional estimation object of fixed assets as a result of reassessment is reflected in the account of debit of fixed assets in the correspondence with the credit of the accounting of the additional capital. The sum of additional estimation object of fixed assets is equal to its sum of markdown held during the previous reporting periods and is referred in the accounting to the unallotted profit (loss), is related to the credit of the accounts of the accounting of unallotted profit (loss) in the correspondence with the debit of the accounting of the fixed assets. (Order as of 13 October 2003 N 91H On adoption of methodical instructions on accounting of fixed assets (as amended Ordera Of Ministry of Finance of Russia as of 27.11.2006 N 156H), item 48)

The sum of markdown object of fixed assets as a result of reassessment is reflected under the debit of the accounting of unallotted profit (loss) in the correspondence with the credit of the accounting of fixed assets. The sum of markdown of object of fixed assets concerns in reduction of the additional capital of the Company formed due to the sums additional estimation of this object, is held during the previous reporting periods and is reflected in book keeping under the debit of the accounting of the accounting of the additional capital and the credit of the accounting of fixed assets. Excess of the sum of markdown of object above the sum of additional estimation is transferred to the additional capital of the organization as a result of reassessment held during the previous reporting periods, is reflected under the debit of the accounting of unallotted profit (loss) in the correspondence with the credit of the accounting of fixed assets.

At retirement of object of fixed assets, its sum of additional estimation is written off from the receivables of the accounting of the additional capital in the correspondence with the credit of the accounting of unallotted profit of the organization.

2.4.6. Term of useful life of objects of fixed assets

Definition of term of useful life of objects of fixed assets is made proceeding from the expected physical deterioration depending on mode of operation, natural conditions and influence of an excited environment, system of carrying out of repair. (Order of Ministry of Finance of Russia as of 30.03.2001 № 26H (as amended as of 18.05.2002) «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 20.) Term of useful life of objects of fixed assets is defined within the limits approved by the governmental order of the Russian Federation from 01.01.2002 1, under the list approved by the head of the Company. On all new objects term of useful life is defined at a level of the average index established by the governmental order of the Russian Federation from 01.01.2002 1, on corresponding group.

Term of useful life of objects of fixed assets is established at their acceptance to the accounting on the basis of the passport of object, other technical documentation or on the basis of an estimation of technical services of the

Company or its divisions according to internal documents on the basis of the decision of constantly operating commission. Term of useful life is fixed in an inventory card (OS-6).

Term of useful life of object of fixed assets is reconsidered in case of improvement (increase) of originally accepted normative parameters of functioning of object as a result of the held completion, an additional equipment, reconstruction or modernization. (Order Of Ministry of Finance of Russia as of 13.10.2003 № 91H «On adoption of methodical instructions on accounting of fixed assets», item 60.) Thus the increase in term of useful life of fixed assets can be carried out within the limits of the terms established for amortisation group in which the given fixed assets are included.

Term of useful life of the modernized part of object pays off as a difference between new target date of useful life of object after restoration and for its operation by the moment of end of modernization.

Definition of term of useful life of object of fixed assets, earlier used at other organization, is defined under the formula: the term of useful life estimated for new object of fixed assets, net of term of actual operation of object of fixed assets at the former owner and prospective term of useful life by the Company which is defined in view of:

- Expected term of use in the organization of this object according to expected productivity or capacity;

- The expected physical deterioration depending on a mode of operation, natural conditions and influence of an excited environment, system of carrying out of repair;

- normative legal and other restrictions of use of this object.

Prospective term of useful life of fixed assets on the basis of documentary acknowledgement of its value is established by the commission and the head of the Company or branch approved at acceptance of object to the accounting as fixed assets.

If received used object of fixed assets completely fulfilled the term according to data of the supplier and characteristics sheet, term of its useful life is defined by the commission of the branch which has accepted to the accounting specified object.

2.4.7. Amortization of fixed assets

Charge of amortization on objects of fixed assets is made by linear way, proceeding from initial or current (regenerative) cost (in case of carrying out of reassessment) object of fixed assets and norm of the amortization estimated proceeding from term of useful life of this object.

Charge of amortization of fixed assets transferred in leasing, is made as agreed with application of special factor to the basic norm of amortization.

Service (sentry) dogs are related to the third group of fixed assets according to the governmental order of the Russian Federation from 01.01.2002 1 «About classification of fixed assets included in amortisation groups».

Objects of the real estate on which capital investments are finished, are legalized by corresponding primary registration papers on acceptance-transfer, documents are transferred to the state registration and actually maintained, are accepted to book keeping as fixed assets and stand apart in the analytical accounting. (Order Of Ministry of Finance of Russia as of 13.10.2003 № 91H «On adoption of methodical instructions on accounting of fixed assets», item 52.)

At charge of amortization on gratuitously (Order Of Ministry of Finance of Russia as of 06.05.1999 № 32H (as amended as of 30.03.2001) «On adoption of accounting regulations «Incomes of organization» AR 9/99», item 8.) received fixed assets, and also fixed assets got with attraction of means of target (Order Of Ministry of Finance of Russia as of 16.10.2000 № 92H «On adoption of accounting regulations «Accounting of state assistance» AR 13/2000», item 9.) financing, simultaneously with write-off of the sum of amortization in the same proportion the part of incomes of the future periods is recognized as non-operating incomes of the Company.

Amortization is not charged on:

- Used for realization of the legislation of the Russian Federation about mobilization preparation and mobilization to objects of fixed assets which are inhibited and are not used in production, at performance of works or rendering of services, for administrative needs of the organization or for granting by the organization for payment in time possession and using or in time using;

- To objects of available housing (apartment houses, hostels, apartments, etc.), were not repaid;

- To objects of fixed assets which consumer properties eventually do not change (the ground areas; objects of wildlife management; the objects carried to museum subjects and museum collections, etc.);

- To long-term plantings;

-To library fund.

On the specified objects of fixed assets charge of deterioration is made in the end of fiscal year on the established norms of depreciation charges. Movement of the sums of deterioration on the specified objects is considered on separate off-balance account.

Charge of amortization stops:

-On fixed assets translated on preservation. The Company recognizes as preservation (Order of Ministry of Finance of Russia as of 30.03.2001 № 26н (as amended as of 18.05.2002) «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 23.) the time termination of operation of object for the term of more than three months. Charges on preservation of objects (survey, greasing, enclosing, etc.), and also on the time termination of operation of objects within three months are recognized the Company as other non-operating expenses (Order Of Ministry of Finance of Russia as of 06.05.1999 № 33н (as amended as of 30.03.2001) «On adoption of accounting regulations «Expenses of organizations» AR 10/99», item 4, 12.);

-For the period of reconstruction and modernization, major overhaul of objects of fixed assets if duration of works exceeds 12 months. (Order of Ministry of Finance of Russia as of 30.03.2001 № 26н (as amended as of 18.05.2002) «On adoption of accounting regulations «Accounting of fixed assets» AR 6/01», item 23.)

On the specified objects charge of amortization stops since a month following after month of translation, and begins with a month following after the month of commissioning of the given objects.

On property in stock (reserve) (Order Of Ministry of Finance of Russia as of 13.10.2003 № 91н «On adoption of methodical instructions on accounting of fixed assets», item 61.), not translated in a mode of preservation, charge of amortization is carried out regularly.

Charge of depreciation charges on object of fixed assets begins with the first date following after month of acceptance of this object to book keeping, and is made before full repayment of cost of this object or write-off of this object from book keeping.

Charge of depreciation charges on object of fixed assets stops from the first date following after month of full repayment of cost of this object or write-off of this object from book keeping.

Charge of amortization on fixed assets is made for the purposes of book keeping proceeding from norms of depreciation of charges which are defined according to the governmental order of the Russian Federation from 01.01.2002 1 «About classification of fixed assets included in amortisation groups» specially created by the head of branch commission, and on the executive body - by the commission created by the head of the Company.

2.4.8. Accounting of rent of fixed assets

The Company (Lessor) can give fixed assets got for own industrial activity or for administrative needs in rent. The given fixed assets are considered on account 01 «fixed assets», but stand apart in the analytical accounting.

- Expenses for carrying out of operating repair are recognized charges of the Company if the contract of rent stipulates carrying out of operating repair due to Lessor, otherwise the Lessee is obliged to support property in a serviceable condition and to make *operating repair* at own expense.

- Lessor is obliged to make at own expense *major overhaul* of the property transferred in rent if other is not stipulated by the law, other legal certificates or the contract of rent. In this case at Lessor charges on carrying out of major overhaul leased property related to the charges connected with reception of the income on rent.

The Company (Lessee) can rent fixed assets belonging to other proprietors according to the concluded contracts.

- The lessee is obliged to support property in a serviceable condition, to make at own expense operating repair and to bear charges on the maintenance of property if other is not established by the law and the contract of rent. The specified charges are reflected in the same accounts of expenses, as charges on rent of fixed assets.

- The lessee has the right to make the major overhaul stipulated by the contract or caused by urgent necessity (at infringement Lessor of duty on manufacture of major overhaul). In this case cost of major overhaul can be collected from Lessor or registered on accounting of rent.

- If expenses on major overhaul are compensated to the Company (Lessee) on accounting of rent between the parties of the contract offset of counter homogeneous requirements is spent: the Lessee should pay Lessor the certain sum of rent, Lessor owes to the lessee the certain sum for services on major overhaul.

- The separable improvements of the property taken in rent made by the Company (Lessee) due to own means and without consent of Lessor to compensate the made charges, are the property of the Lessee. Term of

useful life on such property is defined in the generally established order (according to internal documents of the Company on the basis of the decision of constantly operating commission).

Cost of the improvements made by the Company (Lessee), *inseparable* without harm for the rented property and carried out due to own means and with the consent of Lessor, can be considered at calculations on a rent or the Lessee has the right after the termination of the contract to compensation of cost of these improvements if other is not stipulated by the contract of rent.

The fixed assets intended only for granting by the organization for payment in time possession and using or in time using with the purpose of reception of the income, are reflected in book keeping and the accounting reporting in structure of profitable investments in material assets.

2.4.9. Accounting of equipment demanding installation

To the equipment to installation, the equipment put into operation only after assembly of its parts and attachments to the base or support concerns to a floor, interfloor overlapping and other bearing designs of buildings and constructions, and also complete sets of spare parts of such equipment. The structure of this equipment joins in the instrumentation or other devices intended for installation in structure of the installed equipment. (Order Of Ministry of Finance of Russia as of 31.10.2000 № 94Н (as amended as of 07.05.2003) «on adoption of plan of accounts of accounting of financial and economic activity of organizations and instructions on its applications », account 07 «Equipment for installation».)

The equipment to installation is accepted to the accounting on account 07 under the actual cost price of purchase which is developed out of cost under the prices of purchase and charges on purchase and delivery of this equipment to warehouse of the Company.

2.4.10. Intangible assets and their amortization

Intangible assets are recognized belonging to a Company, non monetary objects not having physical structure, irrespective of their cost, intended for useful life in production, rendering of services or for administrative needs during term not less than 12 months and capable in the future to bring economic gains.

The Company does not recognize objects concerning which at their acceptance to the accounting (during the moment of qualification) the decision on alienation in favour of other persons as intangible assets is taken - resale is supposed, change, etc. In this case the object is qualified by the Company as the goods.

The objects of intangible assets are those created or received on the basis of corresponding contracts:

- Exclusive rights of patent holder on inventions, industrial samples, useful model;
- Exclusive rights of the owner of the certificate to a trade mark, service marks, the name of a place of origin of the goods;
- Exclusive copyrights to the computer programs, databases;
- Business reputation.

Object of the accounting of intangible assets is rights arising from one patent, certificate, contract of concession of the rights. The basic attribute by which the object is identified from another, by its performance of independent function serves in production, performance of works or rendering of services or use for administrative needs of the Company.

Intangible assets are accepted to the accounting at the initial value defined depending on the reason of their receipt in the Company (purchase, creation by own forces, reception as the contribution in charter capital, etc.).

Cost of intangible assets on which they are accepted to the accounting, is not subject to change.

The business reputation is accepted to the accounting in the sum of difference between an actual purchase price of the got company (or its parts) as property complex as a whole and cost of all (or corresponding part) its assets and obligations on balance.

The negative business reputation is qualified as incomes of the future periods and in regular intervals is related to financial results of the Company in structure of operational incomes.

The positive business reputation is considered as the extra charge to the price paid by the buyer pending of the future economic gains. It is considered as separate inventory object.

The sum of depreciation charges on intangible assets is defined on the norms calculated proceeding from their initial value and term of useful life (a linear way).

Terms of useful life of intangible assets are defined by a commission of experts and approved by the head of the Company at acceptance of object to the accounting proceeding from the following positions:

- By the rights got on the basis of patents, certificates and other similar security documents containing terms of their action, or having legislatively target dates of action - proceeding from the term fixed in such document;

- By the rights got on the basis of author's contracts, contracts of concession and other similar contracts containing concrete terms on which intangible assets - proceeding from the terms, specified in such contracts;

- On other objects of intangible assets - proceeding from expected term of use of object during which the Company can receive economic gains from use of the given assets;

- On objects of intangible assets, term of useful life of which cannot be determined, depreciation charges are established for 20 years (but no more term of operation of property complex to which the given asset is related);

- Term of useful life of business reputation and organizational charges is established as 20 years (but no more term of operation of property complex to which the given asset is related).

Charge of amortization is carried out monthly on special account 05 «Amortization of intangible assets» (except for business reputation, the cost of which is repaid by reduction of the rest under the accounting of intangible assets).

Charge of depreciation of charges does not stop, except for cases of preservation of property complex to which the given asset concerns, as a whole.

Use of objects of intangible assets for the purposes of manufacture, rendering of services or for administrative needs of the Company stops in communication:

- With expiry of the term of the action fixed in patents, certificates or other similar security documents;

- With expiry of the term of the action fixed in corresponding contracts;

- With impossibility of useful life of object before the expiration of the above-stated terms at presence of confidence, that in the future this object will not be used in production, at rendering services or for administrative needs of the Company;

- With a concession of the exclusive right and its transfer in the order established by statutory acts.

In case of retirement object of intangible assets its cost is a subject to write-off in the corresponding reporting period. Thus retirement of intangible assets is reflected at residual cost to similarly order established for fixed assets.

2.5. SELECTED WAYS OF ACCOUNTING OF INVENTORIES

2.5.1. Recognition of assets, inventories and their estimation

As inventories (further inventories) assets are recognized (Order Of Ministry of Finance of Russia as of 09.06.2001 № 44H «On adoption of accounting regulations «Accounting of inventories» AR 5/01», item 2.):

- Used as materials, spare parts, lubricants, etc. Item at rendering services after transfer of electric energy, performance of works (the production, intended for sale), including the special tool, special adaptations, special equipment, overalls irrespective of term of useful life;

- Used stock, tool and economic accessories with service life of less than a year considered on account 10 "Materials";

- Goods intended for sale;

- Send for administrative needs of the Company.

The goods got by branches of OJSC « Moscow United Electric Grid Company », are considered on account 41 "Goods".

The transport and other charges connected with delivery of the goods include:

- in the structure of actual expenses for purchase of the goods on account 41 "Goods" if they are formed till the moment of their acceptance to book keeping;

- in the structure of charges on distribution costs on account 76 «Calculations with different debtors and creditors» if transport charges on delivery are formed after their acceptance to book keeping. (Items 16 and 18 AR 5/01, plan of accounts № 94H, section II, items 21, 24, 26 of Order Of Ministry of Finance Of Russia as of 26.12.2002)

Material support of the Company is organized through the special agent. The accounting of agency deliveries is carried out by accounts department of the executive body and accounts departments of branches of the Company.

Unit of book keeping of inventories is nomenclature number or homogeneous group (depending on a kind of inventories).

The analytical accounting of inventories is conducted by operatively-accounting (balance) method. (Letter of Ministry of Finance of the USSR as of 30.04.1974 № 103 «On main provision on accounting of materials at enterprises and construction sites»)

Estimation of inventories.

Inventories for the purposes of acceptance to the accounting are estimated depending on the reason of receipt: purchase for payment, manufacturing by own forces, gratuitous receipt, etc.

Inventories are accepted to book keeping under the actual cost price of purchase or manufacturing.

The actual cost price of inventories got for a payment, the sum of actual expenses of the organization, except for the value added tax and other compensated taxes (except for the cases stipulated by the legislation of the Russian Federation) is recognized.

Actual expenses for purchase of inventories it is defined in view of the course differences arising before acceptance of stocks to book keeping, in cases when payment is made in the sum equivalent to the sum in a foreign currency (conditional monetary units). After acceptance inventories sum differences arising by calculations with counterparts and connected with purchase of the given stock concern to book keeping to non-operating incomes and charges.

The actual expenses for purchase inventories include:

The sums paid according to the contract to the supplier (seller);

The sums, paid to the organizations for information and consultation services connected with purchase of inventories;

The customs duties;

Not compensated taxes paid in connection with purchase of unit of inventories;

The compensations paid of the intermediary organization through which are got inventories;

Expenses on preparation and delivery inventories up to warehouses, including charges on insurance;

Interest under credits and loans given by suppliers (commercial credit), before acceptance to book keeping inventories;

Interest on extra means if they are involved for purchase of these stocks, and also charges on service of the specified loans and credits, before acceptance of inventories to book keeping;

After acceptance on accounting inventories charges on the added percent for the received credits and loans are reflected in book keeping in the general order with reference on miscellaneous costs. (Order Of Ministry of Finance of Russia as of 06.05.1999 № 33H «On adoption of accounting regulations «Expenses of organization» AR 10/99», item 11.)

The actual cost price of inventories received by the organization under the contract of donation or it is gratuitous, and also fixed assets remaining from retirement and other property, is defined proceeding from their current market cost for date of acceptance to book keeping.

The actual cost price of inventories brought on accounting of the contribution in charter (joint-stock) capital of the organization, is defined proceeding from their monetary estimation coordinated by founders (participants) of the organization if other is not stipulated by the legislation of the Russian Federation.

The actual cost price of financially - the industrial stocks received under contracts, providing execution of obligations (payment) non-money, cost of the assets which are transferred or subject to transfer by the organization is recognized.

Actual expenses of OJSC «Moscow United Electric Grid Company» on delivery of inventories, including the goods intended for sale till the moment of their transfer to sale, join in the actual cost price of inventories.

The actual cost price of material assets at their manufacturing is defined by the Company proceeding from the actual expenses connected with their manufacture.

The actual cost price of the material assets received by the enterprise gratuitously, and also fixed assets remaining from retirement and other property, is defined, proceeding from their current market cost for date of

acceptance to book keeping. Current market cost is understood as the sum of money resources which can be received as a result of sale of the specified assets.

Common economic and other similar charges are not included in actual expenses for purchase of inventories of, except for cases when they are directly connected with purchase inventories.

2.5.2. Accounting of receipt of inventories

Materials are a kind of stocks. The raw material, the basic and auxiliary materials, purchased semifinished items and completing products, fuel, container, spare parts, building and other materials, and also the special tool, special adaptations, special equipment, overalls are materials.

The expenses directly connected with process of preparation and delivery of materials are recognized in the Company (Order Of Ministry of Finance of Russia as of 28.12.2001 № 119Н «On adoption of methodical instructions on accounting of inventories», item 70.) transport-procuring charges. The structure of transport-procuring charges includes:

-Charges on loading materials in vehicles and their transportation subject to payment by the buyer over the price of these materials according to the contract;

-Charges under the maintenance of the warehouse device of the Company, including charges on payment and deductions for social needs of workers of the Company directly borrowed by preparation, acceptance, storage and supply of got materials, and also their delivery (support) in the Company;

-A payment for storage of materials in places of purchase, at railway stations, ports, quays;

-Charges on business trips on direct preparation of materials;

-Other charges.

The estimation of inventories received on non-invoiced deliveries, including used for repair work-regenerative and capital construction, is made under the average cost price of similar inventories of the last month.

Non-invoiced deliveries are credited under accounts of the accounting of material stocks (depending on purpose of accepted material stocks).

Thus material stocks are credited and considered in analytical and synthetic book keeping under the registration prices accepted in the organization.

Inventories belonging to OJSC "Moscow United Electric Grid Company", but being in way, or transferred on the security, are considered in book keeping under the registration prices.

The following prices are applied for materials as registration prices:

Contractual prices. In this case other charges entering into the actual cost price of materials, are considered separately in structure of transport - procuring charges;

The actual cost price of materials according to the last month or the reporting period (fiscal year). In this case deviations between the actual cost price of materials of current month and their registration by are considered in structure of transport - procuring charges. (Items 6,13 and 26 of section II AR 5/01, item 59 of Regulations № 34Н., item 39 of Order of Ministry of Finance Of Russia as of 28.12.2001 № 119Н.)

Formation of the actual cost price of materials is carried out with application of accounts 15 «Preparation and purchase of material assets» and 16 « Deviation in cost of material assets».

On credit accounts 15. «Preparation and purchase of material assets» in the correspondence with accounting 10 "Materials" are actually received in OJSC "Moscow United Electric Grid Company" and credited financially industrial stocks in the sums paid according to the contract.

The sum of difference of costs of got financially industrial stocks estimated in the actual cost price of purchase (preparation) and prices paid to the supplier according to the contract. Preparation and purchase of material assets » on account 16 « Deviation in cost of material assets» are written off from accounting 15.

The reserve under depreciation of material assets is not created.

Inventories on non-invoiced deliveries are accepted to the accounting under the prices of the previous delivery with the subsequent specification of cost at receipt of documents. Thus account 60 «Settlement of accounts with suppliers and contractors» is financed on at the cost of the received values determined under the prices of the previous delivery. At reception of documents from suppliers:

Additional record for the sum of the VAT if it is stipulated is made;

If the acted documents mismatch the prices of the previous delivery additional record on size of deviation under the debit of accounting 16 « Deviation in cost of material assets» and the credit of the accounting of calculations with the subsequent write-off from account 16 « Deviation in cost of material assets » regularly is made.

If settlement documents on non-invoiced deliveries have acted in following year after representation of the annual accounting reporting:

1. Registration cost of inventories does not vary.
2. The size of the value added tax is accepted to book keeping when due hereunder.

3. Calculation with the supplier is specified, thus the sum of the developed difference between registration cost of the credited material stocks and their actual cost price are written off in a month in which documents have acted:

Reduction of cost of material stocks is reflected under the debit of accounts of calculations and the credit of accounts of financial results (as the profit of the last years revealed in accounting year);

The increase in cost of material stocks is reflected under the credit of accounts of calculations and accounts of financial results (as the losses of the last years revealed in accounting year). (Items 6, 13 and 26 of section II AR 5/01, item 59 of Regulations № 34Н., item 39 of Order of Ministry of Finance Of Russia as of 28.12.2001 № 119Н.4.4.3.)

2.5.3. Accounting of retirement of inventories

Supply of materials on manufacture is understood as their delivery from warehouse directly for rendering services (performance of works, manufacturing of production), and also holiday of materials for administrative needs of the Company.

The order of supply of materials from warehouse of division of the Company to sites, brigades, on workplaces is established by the Head of division of material supplies of the Company in coordination with the Chief accountant of the Company.

In primary registration documents on supply of materials from warehouses of the Company in divisions, on sites, in brigades, on workplaces are specified:

-The name of material;

-Quantity;

-The price (the registration price);

-The sum, and also purpose - number (code) and (or) the name of kind of service (maintenance service, repair, starting-up and adjustment works, etc.) for which realization materials are released, either number (code) and (or) the name of expenses.

On actually spent materials division - addressee of materials - makes the Report on the spent materials in which are specified the name, quantity, registration price and sum under each name, number (code) and (or) the name of kind of service (maintenance service, repair, starting-up and adjustment works, etc.) for which realization materials, either number (code) and (or) the name of expenses, quantity and sum on norms of the charge are released, quantity and the sum of the charge over norms and their reasons; in necessary cases amounts of executed works are specified.

Write-off of materials with subaccount corresponding division of the Company and reference of their cost on expenses of manufacture (depending on for what purposes materials are spent) are made on the basis of specified-above the Report.

The concrete order of drawing up of the Report on the spent materials, and the list of divisions for which it is stipulated, are established by the Company.

The estimation of inventories (except for cable production) at supply to manufacture and other retirement is made under the average cost price of group (kind) of stocks on branch as a whole by division of the general cost price of group (kind) of stocks into their quantity, developing, accordingly, from the cost price and quantity of the rest on the beginning of month and received stocks within the given month.

The estimation of cable production at write-off is made at cost of a registration unit.

Supply of materials on the party for contractors is made at presence of contracts or agreements.

If in the turnkey contract transfer of materials to the contractor without payment is stipulated, materials are considered as charges of the customer. Cost of the materials, transferred to contractors as charges of the customer, it is considered on account 10.9.1. «Materials transferred in processing on the party». Subsequently on the basis of the document «Certificate of the executed works» cost of the materials, transferred to the contractor as charges of the customer, and the sum of deviations of costs of the given materials, are written off on production costs or on account 08 "Capital investments".

The actual cost price of holiday represents the sum of their registration cost and the size of the deviations falling written off resources.

Write-off of deviations from use of account 16 «Deviation in cost of material assets» is made proportionally costs of the spent materials, proceeding from the attitude of the sum of the rest of size of deviations on the beginning of month and current deviations month to the sum of the rest of materials on the beginning of month and the acted materials for a month. The value received as a result increased on 100, gives percent which should be used at write-off of deviations on cost of the spent materials.

In book keeping the Company on accounting 10 "Materials" the subaccount for the control over use of overalls is allocated:

Overalls in operation (in a cut of employees - it is materially responsible persons).

Term of use is defined on the basis of Typical branch norms of free-of-charge delivery to workers of the special clothes, special footwear and other means of an individual defence approved by proxy bodies.

Cost of special clothes, which term of operation according to norms of delivery does not exceed 12 months, is written off to the debit of corresponding accounts of the accounting of expenses for manufacture during the moment of its transfer (holiday) to employees of the organization.

Cost of special clothes, which term of operation, according to norms of delivery, exceeds 12 months, is repaid by linear way, proceeding from terms of useful life of the special clothes, stipulated in typical branch norms of free-of-charge delivery of the special clothes, special footwear and other means of individual defence.

Cost of special equipment is repaid by linear way, proceeding from the actual cost price of object of special equipment and the norms estimated proceeding from terms of useful life of this object.

Charge of repayment of cost of special equipment and special clothes is reflected under the debit of accounts of the accounting of expenses for manufacture and the credit of the accounting "Materials" of subaccounts "Special equipment in operation" and "Special clothes in operation".

The overalls in cost no more than 20000 rubles for unit, is reflected in book keeping and the accounting reporting of the Company in structure of inventories. (AR 6/01, item 5)

The analytical accounting of special equipment and the special clothes, being manufacture (operation), is conducted under names (nomenclature numbers), quantity and the actual cost price, with the instruction of date of receipt in manufacture (operation) (month, year), places of operation (on divisions) and materially responsible persons.

Delivery to workers and delivery of means of an individual defence by them should enter the name in a personal card of the worker approved by the decision of the Ministry of work and social development of the Russian Federation «About the statement of rules of maintenance of workers the special clothes, special footwear and other means of an individual defence» №51 from 18.12.1998.

The special clothes, given out to workers, are the property of the organization and are a subject to return: at dismissal, while translating for other work for which given out by it the special clothes, the special footwear and safety adaptations are not stipulated by norms, and also upon termination of terms their socks instead of received new.

2.5.4. Accounting of inventories (including spare parts), credited as a result of removal from fixed assets in a stage of restoration (reconstruction, modernization, repair)

The spare parts credited as a result of removal from fixed assets in a stage of restoration, are considered separately from new spare parts, as independent nomenclature numbers.

If necessary repair of the spare parts credited as a result of removal from fixed assets in a stage of restoration, the following sequence of registration records is carried out. By transfer to repair spare parts are written off from the credit of accounts of the accounting of stocks (account 10 "Materials" of the plan of accounts of the Company) in the debit of accounts of the accounting of expenses for repair by forces of structural divisions of auxiliary manufacture (for example account 23 «Auxiliary manufactures» plan of accounts of the Company). In the debit of the same accounting expenses for repair of the specified spare parts are written off all. Upon termination of repair the restored spare parts are credited from the credit of the accounting of the accounting of expenses for repair in the debit of the accounting of the accounting of stocks (accounting 10 "Materials" of the plan of accounts of the Company) at cost in view of repair.

Inventories (including spare parts), remaining from retirement fixed assets and other retirement, are estimated proceeding from current market cost for date of acceptance to book keeping. (Order of Ministry of Finance of Russia as of 09.06.2001 № 44н «On adoption of accounting regulations «Accounting of inventories» AR 5/01», item 9.) Current market cost is understood as the sum of money resources which can be received as a result of sale of the specified assets.

The spare parts credited as a result of removal from fixed assets in a stage of restoration, are estimated at registration cost of the last on time of purchase of similar spare parts in view of percent of actual deterioration of credited objects (not below cost of scrap metal), in case of absence of the similar information at current market cost.

The accounting of inventories revealed at inventory, and (or) the property received at dismantle or disassembly of fixed assets deduced from operation, materials or other property received as a result of carrying out of repair or reconstruction of fixed assets which is not deduced from operation is made on the accounting of the accounting of stocks (accounting 10 "Materials" of the plan of accounts of the Company) and are other incomes of the Company (account 91 of the plan of accounts of the Company).

2.5.5. Accounting of automobile tires

Automobile tires (a tire cover, the chamber and rim tape), acting together with the new car or the trailer (on wheels and one spare complete set), enter into cost of the car and are considered in structure of fixed assets. The trunks got for replacement worn out, are considered on subaccount 10.4.1 "Spare parts in warehouse".

The trunks which have been released from warehouse for replacement worn out, become unfit for use or for other reasons, for seasonal change ("summer", "winter") and established on the car are considered on subaccount 10.4.2 "Automobile tires in operation" accounts 10.4 "Spare parts".

Cost of automobile tires is repaid lump sum depending on run upon termination of term of operation within the limits of the norms approved by the document "Time norms of operational run of trunks of vehicles" ПД - 3112199-1085-02 approved by the Ministry of Transport of the Russian Federation from 04.04.2002 in the debit of corresponding accounts of the accounting of expenses. At insufficient mileage of auto tire covers its reasons (fault of the driver, manufacturer and so forth) which are reflected in the document the Certificate on write-off are found out. Charges on repair (Order Ministry of Trust of RF as of 24.06.2003 № 153 «On approval of instructions on accounting of incomes and expenses on ordinary activities in v vehicles », item 43.) of automobile tires join in structure of material inputs in charges by usual kinds of activity within the limits of the norms approved by Ministry of Transport of Russia.

2.6. SELECTED WAYS OF ACCOUNTING OF INCOMES, CURRENT EXPENSES AND CHARGES

2.6.1. General approaches to the accounting of incomes and charges

The accounting of incomes and charges is carried out:

- As a whole on the Company;
- On Moscow;
- On the Moscow Region.

The Company subdivides incomes into incomes of usual kinds of activity and other incomes.

Incomes of usual kinds of activity are the receipts connected with rendering of services, performance of works, from sale of production and the goods to the foreign organizations. (Order Of Ministry of Finance of Russia as of 06.05.1999 № 32H «On adoption of accounting regulations «Incomes of organizations» AR 9/99», item 5.)

The Company recognizes as incomes of usual kinds of activity:

- Incomes of services on transfer and distribution of the electric power;
- Incomes of services on connection of capacity to electric networks;
- Incomes of sales of the other goods, works and services of industrial character by their kinds.
- Incomes of sales of the other goods, works and services of non-productive character and other kinds of activity which are usual for OJSC « Moscow United Electric Grid Company », by their kinds.

Incomes of services on transfer and distribution of the electric power include all incomes of transfer of the energy consumed by subjects of the market in region of service certain Company. Transfer and distribution of the electric power is an adjustable kind of activity.

The incomes of the Company received by them as a result of performance of a complex of works (actions) of organizational and technical character, the connection directed on a possibility concern to incomes of services on connection of capacity to electric networks to energy receiving devices of legal and physical persons according to the parameters declared by them. All incomes connected with realization of other works for the Company and services concern to incomes of realization of other works and services.

All incomes which were not connected with realization of works and services by usual kinds of activity are related *to other incomes*.

Volumes at own-accounting construction are not recognized incomes and are not considered in proceeds from realization.

Incomes of the Company according to the principle of charge are recognized in that reporting period in which they took place, irrespective of actual time of receipt of the money resources connected with these facts. (Order Of Ministry of Finance of Russia as of 09.12.1998 № 60H (as amended as of 30.12.1999) «On adoption of accounting regulations «Accounting policy of organization» AR 1/98», item 6.)

The Company subdivides charges into charges from usual kinds of activity and miscellaneous costs.

Charges from usual kinds of activity are the charges connected with rendering of services, performance of works. (Order Of Ministry of Finance of Russia as of 06.05.1999 № 33H (as amended as of 30.03.2001) «On adoption of accounting regulations «Expenses of organization» AR 10/99», item 5.)

Charges, first of all, concern to charges by usual kinds of activity in directions:

- Charges on transfer and distribution of the electric power;
- Charges on connection to electric networks;
- Charges on other works and services of industrial character
- Charges on other works and services of non-productive character and other kinds of activity which are usual for OJSC « Moscow United Electric Grid Company », by their kinds

The cost price of services on transfer and distribution of the electric power represents set of the charges connected with the maintenance and operation:

- Electric mains, switching centers, substations and other constructions and the equipment, intended for transfer and distribution of the electric power;
- Means of the accounting and the control of the electric power.

The cost price of services on connection to electric networks represents set of the charges connected with performance of a complex of works (actions) of organizational and technical character directed to possibility of connection to energy-receiving devices of legal and physical persons according to the parameters declared by them.

- The Cost price of other works and services represents the total charges connected with realization of other works for the Company and services.

Miscellaneous costs are those which are not connected with realization of works and services by usual kinds of activity.

Charges are recognized by the Company in two cases:

-When there is a confidence that realization of expenses is the reason of extraction of the corresponding income. Expenses can be recognized by the charge directly (in case of realization of services, works, a recognition of administrative or commercial charges) or through retirement of assets for which creation the Company earlier carried out these expenses (fixed assets, inventories, own production, etc.). Then charges are recognized the accounting by usual kinds of activity or miscellaneous costs (retirement of the other assets which are distinct from production);

-When realization of expenses cannot be directly correlated with any income or becomes obvious, that the income prospective on corresponding expenses will not be received. Then miscellaneous costs are recognized in the accounting (for example, payment of percent under credits, charges on preservation of fixed assets, losses, etc.). Charges also are recognized in case of occurrence of the obligation without the fact of receipt of property.

2.6.2. Incomes and charges by usual kinds of activity

Incomes of services on transfer and distribution of the electric power are recognized in book keeping for date of the adoption by the parties of Balance of the electric power and Certificates of the executed works about volume of the rendered services on transfer and distribution of electric energy under the contracts concluded with the Marketing companies. The certificate is made on the basis of the monthly Balance of the electric power containing: total sizes of the received (put) electric energy in a network of the Company, total sizes of the electric power received by the consumer (useful holiday), total sizes of the electric power given to adjacent networks (transit), total sizes of actual losses.

The accounting of incomes of services on transfer and distribution of the electric power and charges on realization of services on transfer and distribution of electric energy is carried out by accounts department of the Company.

Charges on transfer and distribution of electric energy are considered in accounts department of the Company in a cut of clauses of charges and elements of expenses.

In OJSC « Moscow United Electric Grid Company » the basic way of the industrial accounting is the way of summation of expenses. Expenses of branches for transfer and distribution of electric energy are transferred in executive body OJSC « Moscow United Electric Grid Company » on aviso for definition of the full cost price to transfer and distribution of electric energy up to 8th day of the month following for accounting, with the appendix of accounting on transfer and distribution of energy.

Transfer and distribution of electric energy in one stage coincides on time with its realization, therefore in the basic manufacture on transfer and distribution of electric energy does not happen the rests of work in progress.

Proceeds and expenses of branches by other kinds of activity are considered by them independently with definition of result from a concrete kind of activity.

The final balance of profits and losses is monthly transferred by branches on aviso in executive body OJSC «Moscow United Electric Grid Company». (Instruction on planning, accounting and calculation of cost price of electric and thermal energy adopted by the ministry of Energy industry and Electrification of the USSR as of 1970)

The full cost price on transfer and distribution of electric energy.

The full cost price on transfer of electric energy is formed in executive body OJSC « Moscow United Electric Grid Company» and defined as a whole on the Company as a cost estimation used during manufacture and sale of kinds of production of natural resources, raw material, materials, energy, fixed assets and manpower, and also other expenses for transfer of the electric energy, made by all divisions OJSC «Moscow United Electric Grid Company».

Distribution of common industrial charges and common economic charges.

The grouping and write-off of expenses for transfer and distribution of electric energy is made by division of expenses on direct and indirect with calculation of the full cost price of production (works, services). Distribution of indirect charges between objects calculation is made is proportional to the basic wages of industrial workers.

Charges of industrial services in executive body OJSC «Moscow United Electric Grid Company» are considered as production costs, are considered in accounts 25 «common economic charges » and join in the cost price of transfer of electric energy in the reporting period.

The direct accounting on transfer and distribution of electric energy:

Expenses on fund of payment, uniform social tax of Department on transport of electric energy, the block of the assistant to the General director - the chief engineer, the assistant to General director-chief engineer, industrial services;

Services on electricity transmission rendered by the foreign organizations (payment of services of UES FGC, MUE, TGOs, factories);

Purchased energy on indemnification of losses;

Leasing;

The tax to property of the organizations.

Expenses on transfers in not state pension fund to carry by kinds of activity by proportionally generated Company to expenses on all fund of a payment (the executive body and network branches).

Other clauses of expenses by administrative personnel concern by kinds of activity to proportionally scheduled settlement proceeds.

Expenses for rendering of services on connection of capacity to electric networks are defined by "common stock" method, considered separately, written off on charges in the same reporting period and do not join in the cost price of transfer and distribution of electric energy. Expenses on Fund of payment, the uniform social tax of Department on technological connections completely concern on the cost price of services on connection of capacity to electric networks.

Charges on realization of other works, services are considered by accounts department "*common stock*" method.

2.6.3. Other incomes and charges (AR 9/99 «incomes of organizations» и AR 10/99 «Expenses of organization», adopted accordingly by Orders of Ministry of Finance of Russia as of 6.05. 1999 No. 32н и № 33н.)

As other incomes the Company recognizes incomes on the independent economic operations, not being subject of its activity, but carried out with the purpose of data acquisition of incomes, namely:

The receipts connected with participation in authorized capitals of other organizations (including percent and other incomes under securities);

Receipts from sale of fixed assets and other assets which are distinct from bank notes (except for a foreign currency) products, goods;

The profit received under the contract of simple company, and other receipts;

The percent received for granting in using of money resources OJSC «Moscow United Electric Grid Company», and also percent for use by bank of the money resources which are being on the accounting of the Company in this bank;

Penalties, fines, penalties for infringement of conditions of contracts;
Receipts in compensation caused OJSC «Moscow United Electric Grid Company» losses;
Gratuitous reception of assets;
The profit of the last years revealed in accounting year;
The sums of receivables and payables on which term of limitation of actions has expired;
The sum of additional estimation assets;
Course differences;
Other other incomes corresponding to AR 9/99.

As miscellaneous costs the Company recognizes:

The charges connected with representation for payment in time using of assets of the organization;
The charges connected with sale, retirement and other write-off of fixed assets and other assets which are distinct from money resources (except for a foreign currency), goods, products.

Miscellaneous costs join in the charges corresponding to AR 10/99, which account 91 - Other incomes and charges:

- Charges of social character: material aid, improving actions, losses from maintenance of housing and communal services, financing of objects of social sphere;
- transfer of means (payments, payments, etc.), connected with charities;
- Charges on realization of sports actions of cultural-educational character and other similar actions.

2.6.4. Incomes and charges of the future periods

Incomes (Order Of Ministry of Finance of Russia as of 31.10.2000 № 94H «on adoption of plan of accounts of financial and economic activity of organizations and instructions on its application », account 98 «Incomes of future periods») of gratuitous receipt of assets concern to incomes of the future periods.

The charges made in the reporting period concern to charges of the future periods, but concerning to the following reporting periods. Charges of the future periods are considered in book keeping and reflected in balance by separate line as charges of the future periods.

In structure of charges of the future periods join, in particular:

The charges connected with development of new manufactures, installations and units;
The charges connected with recultivation of the grounds and realization of other nature protection actions;
The charges connected with purchase of software products and databases under contracts of sale and purchase or contracts of change if these assets mismatch the conditions established for intangible assets (item 3 AR 14/2000);

Charges on purchase of licenses or any rights of use and others;

Charges on payment of incomes (discount) under the bills given out by the Company (Accounting regulations "Accounting of loans and credits and expenses on their servicing " (AR 15/01), item 13).

Retirement of assets by way of the advance payment of inventories and other values, works and services of contract provisions or requirements of the legislation and statutory acts, or according to customs of the business relations return the listed money resources is possible, including preschedule cancellation of the contract does not concern to charges of the future periods. Such payments are classified as advance payments (advance payment) and considered on accounts of calculations with suppliers and contractors separately. (Item 65 of Regulation № 34H, plan of accounts, sections VI and VIII).

Write-off of charges of the future periods.

Charges of the future periods are subject to write-off by kinds of charges in regular intervals proceeding from term of useful life of this property defined by constantly operating commission of branch by definition of terms of useful life of the software. (Item 65 of Regulations № 34H)

Accounting of charges of the future periods.

The analytical accounting of charges of the future periods is conducted by kinds of charges on accounting 97 «Charges of the future periods» (plan of accounts № 94H, section VIII, account «Expenses of future periods».)

2.6.5. Charges on advertising

-Charges on advertising and promotion of services:

-Charges on publicities through mass media and telecommunication networks;

-Charges on light and other outdoor advertising (including manufacturing of displays and publicity boards);

-Charges on purchase (manufacturing) of prizes, draws handed over to winners during mass advertising campaigns;

The charges connected with participation in exhibitions - rent of exhibition facilities, stands.

2.6.6. Accounting of course differences

Book keeping of assets and obligations which cost is expressed in a foreign currency in the accounting of assets and obligations which cost is expressed in a foreign currency » is carried out according to Accounting regulation (AR 3/2006 «Accounting of assets and obligations, the value of which is expressed in the foreign currency», Order Of Ministry of Finance of Russia as of 27.11.2006 № 154Н).

Cost of assets and the obligations, expressed in a foreign currency, for reflection in book keeping and to the accounting reporting is subject to recalculation in rubles.

Recalculation of cost of assets and obligations, expressed in a foreign currency, into rubles is made at the rate of the Central bank of the Russian Federation for this foreign currency in relation to the ruble acting on date of fulfilment of operation in a foreign currency.

Recalculation of cost of assets and obligations (bank notes in cash department of the organization, means on accounts of the organization, monetary and payment documents, short-term securities, means in calculations (including under extra obligations with legal persons) in rubles is made for drawing up of the accounting reporting at the rate of the Central bank of the Russian Federation, acting on accounting date.

The course difference is reflected in book keeping and accounting reporting in that reporting period to which date of execution of obligations on payment concerns or for which the accounting reporting is made.

Recalculation of cost of bank notes in cash department of the organization and means on accounts in the credit organizations, expressed in a foreign currency, in process of change of rates of the foreign currencies quoted by the Central bank of the Russian Federation, is not made.

The course difference is subject to transfer to financial results as other incomes and miscellaneous costs.

The accounting of the obligations expressed in a foreign currency, but subject to payment in rubles, is conducted according to Accounting Regulations « Accounting of assets and obligations, the value of which is expressed in the foreign currency ». (AR 3/2006 «Accounting of assets and obligations, the value of which is expressed in the foreign currency», Order Of Ministry of Finance Of Russia as of 27.11.2006 № 154Н)

In the accounting the obligations expressed in a foreign currency, but subject payment in rubles, are recalculated on condition:

For date of acceptance to the accounting;

For last date month during the period when they are registered in the accounting;

For date of repayment of obligations. (item 3 AR 3/2006 « Accounting of assets and obligations, the value of which is expressed in the foreign currency », Order Of Ministry of Finance Of Russia as of 27.11.2006 № 154Н)

Thus arising differences are called course.

At repayment of the obligations expressed in a foreign currency, but subject to payment in rubles, the proceeds reflected at the moment of realization in the accounting accounting of the Company as the seller, cost of property (works, services) reflected in accounting the Company as buyer, are not recalculated. (item 1 of Appendix to Order of Ministry of Finance Of Russia as of 27.11.2006 N 156Н)

2.7. ACCOUNTING OF RESERVE FOR DOUBTFUL DEBTS

OJSC "Moscow United Electric Grid Company" forms a reserve on doubtful debts by calculations with the organizations for products, goods, works and services with reference of the sums of a reserve on financial results.

Doubtful debt (Order Of Ministry of Finance of Russia as of 29.07.1998 № 34Н «On adoption of regulations on conducting accounting and reporting in RF», item 70) is recognized debts receivable which are not repaid in the terms established by the contract, and are not provided by corresponding guarantees (deposit, mortgage, security for payment, aval of bills, etc.).

Account 63 (Order Of Ministry of Finance of Russia as of 31.10.2000 № 94Н «On adoption of plan of accounts of financial and economic operations of organization and instructions on its application », account 63.) is applied to the accounting of a reserve of doubtful debts « Reserves on doubtful debts ».

OJSC "Moscow United Electric Grid Company" forms a reserve on doubtful debts by calculations with the organizations for production, the goods, works and services with reference of the sums of a reserve on financial results.

The size of the reserve is defined separately on each doubtful debt depending on the financial condition (solvency) of the debtor and estimation of probability of repayment of debt in full or in part.

At estimation of financial condition (solvency) of the debtor the attributes of inconsistency (bankruptcy) specified in article 3 of the Law of the Russian Federation « About an inconsistency (bankruptcy) » from 26.10.2002 127-FL can be used: inability of the legal person to satisfy the requirement of creditors under liabilities and (or) to act on payment of obligatory payments if corresponding obligations and (or) duties are not executed by it within three months from the moment of approach of date of their execution.

The reserve of doubtful debts is created quarterly on the basis of results of the held inventory of receivables.

Formation of a reserve of doubtful debts (including the accounting of charge, use and write-off of not spent part of a reserve) is made by accounts department of the Company on the basis of the received information from structural divisions of the Company.

If up to the end of the fiscal year following after year of creation of a reserve of doubtful debts, this reserve or a part of it is not be used, not spent sums join at drawing up of accounting balance on the end of fiscal year in the financial results. (Plan of accounts № 94H, section VI, account «Reserves for doubtful debts», item 70 of Regulations № 34H)

2.8. Features of the accounting of interfirm calculations

In OJSC « Moscow United Electric Grid Company » the following order of interfirm calculations is applied: Transfer of material assets (fixed assets, equipment, cable products), performance of works and rendering of services by one structural divisions for needs of others in an intrasystem turn and is made with use of account 79 « Interfirm calculations » under the actual cost price without reflection on accounts of sale.

Transfer of financially industrial stocks by one structural divisions for needs of others is an intrasystem stage and is made with use of account 79 « Interfirm calculations » under the average cost price without reflection of retirement of material assets on accounts of sales.

2.9. SELECTED WAYS OF ACCOUNTING OF FINANCIAL INVESTMENTS

Estimation of financial investments (initial and subsequent).

Financial investments are accepted to book keeping at initial value. In initial value of the financial investments got for payment, the sum of actual expenses for their purchase, except for the value added tax and other compensated taxes is recognized.

Common economic and other similar charges do not join in actual expenses for purchase of financial investments, except for cases when they are directly connected with purchase of financial investments.

Before acceptance of assets as financial investments to book keeping actual expenses for their purchase are defined in view of sum differences arising in cases when payment is made in rubles in the sum equivalent to the sum in a foreign currency.

In case of insignificance (at a rate of up to 0.05 %) sizes of expenses (except for the sums paid according to the contract to the seller) on purchase of such financial investments as securities, in comparison with their face-value, such charges do not join in initial value of financial investments, and are related to miscellaneous costs in that reporting period in which the specified securities have been accepted to book keeping.

Financial investments sold and bought at the stock exchange on which it is possible to define current market cost, are reflected in book keeping at current market cost by quarterly updating their estimation for the previous accounting date. The difference between an estimation of financial investments at current market cost for accounting date and the previous estimation of financial investments concerns on financial results in structure of other incomes and charges.

Financial investments on which current market cost is not defined, are subject to reflection in book keeping at initial value. (Items 8, 10,11, 19, 20, 21 and 22 AR 19/02)

Retirement of financial investments.

At retirement financial investments on which current market cost is not defined, their cost is defined as follows:

Contributions to authorized capitals of other organizations (except for actions of joint-stock companies), the loans given to another organizations, depositary contributions in the credit organizations, receivables got on the basis of concession of right of demand, are estimated at initial value of each retirement unit of financial investments;

Securities (shares and bonds) are estimated at retirement at average initial value;

Purchased bills are estimated at retirement (payment for performed works (the goods, services) at the price of purchase;

At retirement the assets accepted to book keeping as financial investments on which current market cost is defined, their cost is defined proceeding from their last estimation. (Items 26, 27, 28, 30 AR 19/02)

Classification of financial investments, proceeding from term of their use.

Depending on term of the reference (repayment) financial investments are subdivided on short-term and long-term. (Items 41, 42 AR 19/02)

2.10. Features of the accounting of operations of participation in joint activity (under the contract of simple company) («Information on participation in joint activities », AR 20/03, adopted by Order Of Ministry of Finance Of Russia as of 24.11.2003 № 105Н.)

In common carried out operations

In common carried out operations are understood as performance by each participant of the contract of the certain production phase of production (performance of work, rendering of service with use of own assets. Thus each participant of the contract in book keeping reflects the part of charges and obligations, and also a share of economic gains due to it or the income according to treaty provisions.

Incomes, charges, obligations and assets in are common carried out operations by each participant of the contract are considered separately in a share concerning the participant, in the analytical accounting under corresponding synthetic accounts of the accounting of incomes, charges, obligations and assets.

Each participant of the contract in book keeping carries out reflection of a share of production due to it and (or) the income of sale of production (performance of works, rendering of services) for the reporting period according to contract provisions. Thus the participant who carries out the final stage of joint production, share of production, due to other participants of the contract, considers of-balance, and if the contract stipulates sale of products (works, services) the incomes which are subject to reception by other participants of the contract, are reflected in book keeping as the obligation to them. (Items 6,7 of section II AR 20/03)

Shared assets

Assets are considered shared in case of when the property is in the general property of participants of the contract with definition of a share of each of proprietors in the property right (the share property) and proprietors conclude the contract with the purpose of sharing of such property for reception of economic gains or the income. Thus each of participants of the contract reflects in book keeping a share of charges and obligations, and also a share of incomes due to it from sharing assets according to contract provisions.

Incomes, charges, obligations received as a result of sharing of assets, are considered by each participant of the contract separately in the analytical accounting under corresponding synthetic accounts of the accounting of incomes, charges, obligations. The assets belonging to the participant of the contract on the right of the share property and brought by it as the contribution, continue to be considered by it on corresponding accounts of book keeping and are not translated into structure of financial investments. Thus the contribution of the participant of the contract, economic operations connected with performance of such contract, and also received from sharing assets financial results, are not allocated on separate balance.

Each participant of the contract in book keeping for the reporting period reflects its share of the incomes received from sharing of assets, and also obligations and the charges incurred by it in connection with performance of the contract.

The participant's obligations which have arisen directly at the participant in connection with participation in the contract, and also its share in joint obligations with other participants of the contract are subject to reflection in book keeping.

The participant's charges made directly by the participant in connection with participation in the contract, and its share in joint charges with other participants of the specified contract are considered in book keeping. (Items 9,10 of section III AR 20/03)

Joint activity

Under the contract («Civil Code of the Russian Federation (part two)» as of 26.01.1996 № 14-FL (adopted GD FS RF on 22.12.1995) (as amended as of 18.07.2005), article 1041.) of simple company (to the contract about joint activity) two or some persons (comrades) undertake to connect the contributions and in common to operate without formation of the legal person for extraction of profit or achievement of other purpose not contradicting the law.

The contribution to simple company is recognized in the accounting of the Company as financial investments. The property brought on accounting of the contribution under the contract about joint activity (the contract of simple company), joins in the partner organization in structure of financial investments at balance cost (Order Of Ministry of Finance of Russia as of 24.11.2003 № 105Н «On adoption of accounting regulations «Information on participation in joint activity » AR 20/03», item 13.) for date of the introduction of the contract by virtue of.

Acknowledgement of the fact of reception of the property contribution for the partner organization is the notice (aviso) about acceptance to the accounting of property the partner leading to common causes, or the primary registration document on reception of property (the certificate of acceptance-assignment, unprofitable, payment documents and etc.).

At formation of financial result each organization-comrade the share of profit or the losses which are a subject reception as a result of joint activity, includes in structure of other (Order Of Ministry of Finance of Russia as of 24.11.2003 № 105Н «On adoption of accounting regulations « Information on participation in joint activity » AR 20/03», item 14.) incomes or charges.

The property which is subject to reception by each partner organization by results of section (Order Of Ministry of Finance of Russia as of 24.11.2003 № 105H «On adoption of accounting regulations « Information on participation in joint activity » AR 20/03», item 15.), according to item 1050 CC of the Russian Federation, at the termination of joint activity is reflected as repayment of the contributions considered in structure of financial investments. In case of occurrence of a difference between a cost estimation of the contribution considered in structure of financial investments, and cost of the received assets after the termination of joint activity it joins in structure of other incomes or miscellaneous costs at formation of financial result. The assets received by the partner organization after the termination of joint activity, are accepted to the accounting in an estimation which is registered in separate balance for date of decision-making on the termination of joint activity. (Items 12,13.14 of section IV AR 20/03)

Disclosing of the information in the accounting reporting.

The organization, being the participant of the contract about joint activity, in the accounting reporting the following information on participation in joint activity is a subject to disclosing:

The purpose of joint activity (production, performance of works, rendering of services, etc.) and the contribution to it;

Way of extraction of an economic gain or the income (in common carried out operations, shared assets, joint activity);

Classification of an accounting segment (operational or geographical);

Cost of assets and obligations concerning joint activity;

The sums of incomes, charges, profits or the loss, concerning joint activity. (Items 22 of section V AR 20/03)

Disclosing of the information in the accounting reporting of the organization about participation in joint activity is carried out in an explanatory note. (Accounting regulations "Information on segments" AR 12/2000)

2.11. SELECTED WAYS OF ACCOUNTING OF OWN MEANS (CAPITAL)

The structure of own capital of the Company includes authorized , additional and reserve capital, unallotted profit and other reserves.

In accounting balance the size of the authorized capital registered in authorized documents is reflected.

The sum of additional estimation of fixed assets, objects of capital construction and other material objects of property with for useful life from above 12 months, spent when due hereunder, and other similar sums are considered as the additional capital. (Item 68 of Regulations on conducting accounting adopted by Order of Ministry of Finance Of Russia as of 29.07.1998 N 34H)

The unallotted profit is:

Unallotted profit of the last years;

Unallotted profit of the reporting period;

Use of profit of the reporting period;

The uncovered loss of the last years;

The uncovered loss of the reporting period;

Target investment means.

Receipt of budgetary funds is related to target financing within the limits of the program of target financing and financing of target investment programs according to contracts of investment and individual share. (Items 66, 67, 68 of Regulations 34H)

Use of profit of OJSC « Moscow United Electric Grid Company », remaining at its disposal after charge of the profit tax of the organizations and other similar obligatory payments, including sanctions for non-observance of rules of the taxation, are approved by general meeting of shareholders. (Federal Law as of 26.12.1995 № 208-FL «On joint stock companies».)

Creation of funds.

OJSC «Moscow United Electric Grid Company» does not create any funds due to the profit remaining at its disposal, except for cases when creation of such funds is stipulated by constituent documents. In this case the order of their creation and use is defined on the basis of the decision of general meeting of shareholders.

In OJSC « Moscow United Electric Grid Company » the reserve fund at a rate of 5 (five) percent from the authorized capital of the Company is created.

The size of obligatory annual deductions in reserve fund of the Company makes not less than 5 (five) percent from net profit of the Company up to achievement by reserve fund of the established size.

The reserve fund of the Company is intended for covering of losses of the Company, and also for repayment of bonds of the Company and the repayment of shares of the Company in case of absence of other means.

2.12. SELECTED WAYS OF ACCOUNTING OF OBLIGATIONS (PAYABLES AND OF RECEIVABLES)

Estimation of payables

The payables to suppliers and other creditors are considered in the sum of the accounts accepted for payment and size of the added obligations according to settlement documents. The payables on non-invoiced deliveries are considered in the sum of the acted values determined proceeding from the price and conditions, stipulated in contracts. (Item 73 of Regulations № 34Н., plan of accounts № 94Н, section VI.)

The order of write-off receivables and payables.

The receivables on which term of limitation of action has expired, other debts, not real for collecting, are written off under each obligation on the basis of data of the held inventory, written substantiation and the order of the head of OJSC "Moscow United Electric Grid Company" and are charged to the reserve of doubtful debts or to the financial results if during the period, previous to the accounting one, the sums of these debts were not reserved.

Write-off of debt at a loss owing to insolvency of the debtor is not cancellation of debts. This debts are reflected off- balance within five years from the moment of write-off for supervision over an opportunity of its collecting in case of change of the property status of the debtor.

The sums of receivables and payables on which term of limitation of actions has expired, are written off under each obligation on the basis of data of the lead inventory, written substantiation and order of the head of OJSC "Moscow United Electric Grid Company" and concern to financial results. (Items 77 and 78 of Regulations № 34Н).

2.13. Reserves of forthcoming charges and payments

OJSC «Moscow United Electric Grid Company» does not create reserves of forthcoming charges and payments. (Item 72 of Regulations № 34Н)

2.14. ACCOUNTING OF CALCULATIONS UNDER PROFIT TAX

Concept of constant differences, time differences, constant tax obligations

Constant differences are understood as incomes and charges forming accounting profit (loss) of the reporting period and excluded at the rate of tax base under the profit tax as accounting and subsequent periods.

As time differences are understood as incomes and charges forming accounting profit (loss) in one reporting period, and tax base under the profit tax - in another reporting period(s).

The constant tax obligation is understood as the sum of the tax which leads to increase in tax payments under the profit tax in the reporting period

The information on constant and time differences is formed on the basis of primary registration documents in registers of the accounting and tax accounting. (Items 4, 5, 7, 8, 13 AR 18/02.)

The order of the accounting of the postponed tax assets.

OJSC «Moscow United Electric Grid Company» recognizes the postponed tax assets in that reporting period in which there are subtracted time differences, under condition of existence of probability of that the Company will receive taxable profit in the subsequent reporting periods. The postponed tax assets are reflected in book keeping the executive body of OJSC «Moscow United Electric Grid Company» in separate synthetic account 09 «Postponed tax assets». Thus in the analytical accounting the postponed tax assets are considered is differentiated by kinds of assets in which estimation there was a subtracted time difference. (Item 14 AR 18/02).

Order of the accounting of the postponed tax obligations

The postponed tax obligations are recognized in that reporting period in which there are taxable time differences. The postponed tax obligations are reflected in book keeping by the executive body OJSC «Moscow United Electric Grid Company» in separate synthetic account 77 « Postponed tax obligations». Thus in the analytical accounting the postponed tax obligations are considered differentiated by kinds of assets and obligations in which estimation there was a taxable time difference. (Item 15 AR 18/02)
