OAo Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

Note 1. The Group and its operations

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards for three months ended 30 June 2008 for OAO Mosenergo (the "Company") and its subsidiaries (together referred to as the "Group" or "Mosenergo Group").

"Mosenergo group" is a regional utility generating electric power and heat and also providing heat distribution services to the city of Moscow and Moscow region. The Group's asset base includes 17 power stations. The overall operational capacity of OAO Mosenergo is approximately 11,097 megawatts ("MW") of installed generating capacity for electricity and 34,286 gigacalories ("Gkal") of installed generating capacity for heat.

OAO Mosenergo was registered in the Russian Federation on 6 April 1993 in accordance with State Property Management Committee Decree № 169-R dated 26 March 1993. In accordance with the privatisation of the Russian electric utility industry, OAO Mosenergo was organised as a joint stock company.

In 2004 the general shareholders' meeting of OAO Mosenergo approved the entity's restructuring, which entailed the creation of 13 new companies. Before restructuring OAO Mosenergo operated as a vertically integrated utility with primary focus on generation of electricity and heat. Restructuring consisted in spin-off of the following lines of business:

- transmission and distribution of electricity and heat – monopolistic;
- retail sales of electricity, repair and construction – non-core activities;
- four power plants.

As result of the restructuring, in April 2005 each shareholder of OAO Mosenergo received ordinary shares of each of the 13 companies - shares in the companies were distributed among the shareholders of OAO Mosenergo pro rata to OAO Mosenergo shares held by them prior to spin-off.

As of 20 December 2006, the general shareholders' meeting of OAO Mosenergo approved an increase of share capital of OAO Mosenergo via additional issue of ordinary shares by closed subscription in favour of OAO Gazprom and its affiliates ("Gazprom Group"). After subscription for the new shares Gazprom Group became the majority shareholder of OAO Mosenergo.

On 26 October 2007, the Extraordinary General Meeting of Shareholders of RAO UES of Russia took a decision to spin-off OAO Mosenergo from RAO UES of Russia.

OAO Mosenergo's registered office is located at 8, Raushskaya Naberezhnaya, Moscow, 115035, Russian Federation.

Operating environment. Whilst there have been improvements in economic trends in the Russian Federation, the country continues to display some characteristics of an emerging market. These characteristics include, but are not limited to, the existence of a currency that is not freely convertible in most countries outside of the Russian Federation and relatively high inflation. The tax, currency and customs legislation within the Russian Federation is subject to varying interpretations and changes, which can occur frequently.

Relations with the state and current regulation. As at 30 June 2008, the Russian Federation owned (including both direct and indirect ownership) over 50% in OAO Gazprom (the "Parent"), which in turn owned (including both direct and indirect ownership) over 53.47% in OAO Mosenergo. The Russian government is the ultimate controlling party of the Group.

The Group's customer base includes a large number of entities controlled by, or related to the state. Furthermore, the State controls a number of the Group's fuel and other suppliers.

The government of the Russian Federation directly affects the Group's operations through regulation by the Federal service on tariffs ("FST"), with respect to its wholesale energy purchases, and by the Moscow

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

and Moscow Regional Energy Commissions (“REC’s”), with respect to its retail electricity and heat sales. The operations of all generating facilities are coordinated by OAO System Operator – the Central Dispatch Unit of Unified Energy System (“SO-CDU”).

Tariffs which the Group may charge for sales of electricity and heat are governed by regulations specific to the electricity and heat industry and by regulations applicable to natural monopolies. Historically, such tariffs have been based on a “cost-plus” system, meaning cost of service plus a margin, where costs are determined under the Regulations on Accounting and Reporting of the Russian Federation, a basis of accounting which significantly differs from International Financial Reporting Standards (“IFRS”).

As described in Notes 6 and 27, the government’s economic, social and other policies could have material effects on the operations of the Group.

Industry restructuring. The Russian electric utilities industry is presently undergoing a restructuring process designed to introduce competition into the electricity sector and to create an environment in which the successor companies of RAO UES Group (including OAO Mosenergo) can raise the capital required to maintain and expand current capacity.

A crucial step in developing a competitive wholesale electricity (capacity) market was the adoption of the new Wholesale Electric Power (capacity) Market (NOREM) Rules of the Transitional Period approved by Resolution of the Government of the Russian Federation No. 529 dated 31 August 2006 and which came into force on September 1, 2006. Under the new wholesale market framework, electricity and power purchase-and-sale transactions in the regulated market sector are to be governed by a regulated bilateral contract system. From 1 September 2006, regulated contracts covered all volumes of electricity and power produced and consumed.

From 2007, the volumes of electricity (power) traded in the wholesale market at regulated prices began to be reduced. The pace of reduction was set by the Russian Federation Government according to socio-economic development forecasts. In 2007 up to 90% of the forecasted produced electricity volumes and 100% of capacity were traded at regulated prices. The period from 2006 to approximately 2011 is a transition period. After that, it is expected that a fully competitive wholesale market will be formed.

At the 28 of June 2008 a Resolution of the Russian Government № 476 “About introduction of alterations in some Russian Federation government Resolutions in point of settlement of competitive trade of generating capacity in the Wholesale Electric Rower (capacity) Market” was issued on the launch of the capacity market where available capacity volumes will be allowed to be traded at the transition auctions providing for the supplies during 2009-2011 and long-term auctions for 10 years supplies, given they pass through the competitive selection procedure in their respective free power flow zone. For the first time, the wholesale market agents will have the possibility of concluding non-regulated contracts for capacity supply.

Management believes that ultimately a stable regulatory regime and a competitive power market will be put in place such that the Group will be able to raise needed capital to sustain the business.

Recent volatility in global financial markets. Since the second half of 2007 there has been a sharp rise in foreclosures in the US subprime mortgage market. The effects have spread beyond the US housing market as global investors have re-evaluated their exposure to risks, resulting in increased volatility and lower liquidity in the fixed income, equity, and derivative markets. The volume of wholesale financing has significantly reduced since August 2007. Such circumstances may affect the ability of the Group to obtain new borrowings and refinance its existing borrowings at terms and conditions that applied to similar transactions in recent periods. Debtors of the Group may also be affected by the lower liquidity situation which could in turn impact their ability to repay their amounts owed. Management is unable to reliably estimate the effects on the Group’s financial position of any further possible deterioration in the liquidity of the financial markets and their increased volatility.

Note 2. Summary of significant accounting policies

(a) Basis of preparation. These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards IAS 34. They have been prepared under the historical cost convention as modified by the revaluation of property, plant and equipment. The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated (refer to Note 4).

(b) Functional and presentation currency. The national currency of the Russian Federation is the Russian rouble ("RR"), which is the functional currency of each of the Group's entities and the currency in which these financial statements are presented. All financial information presented in RR has been rounded to the nearest million.

(c) Accounting for the effects of hyperinflation. The Russian Federation has previously experienced relatively high levels of inflation and was considered to be hyperinflationary as defined by IAS 29 "Financial Reporting in Hyperinflationary Economies". IAS 29 requires that financial statements prepared in the currency of a hyperinflationary economy be stated in terms of the measuring unit current at the balance sheet date. Hyperinflation in the Russian Federation ceased effective from 1 January 2003. Restatement procedures of IAS 29 are therefore only applied to assets acquired or revalued and liabilities incurred or assumed prior to that date. For these balances, prior to the adoption of revaluation as a basis for accounting for property, plant and equipment (See Note 2(i)) on 1 January 2007, the amounts expressed in the measuring unit current at 31 December 2002 were treated as the basis for the carrying amounts of these financial statements.

(d) Consolidated financial statements. Subsidiaries are those companies and other entities (including special purpose entities) in which the Group, directly or indirectly, has an interest of more than one half of the voting rights or otherwise has power to govern the financial and operating policies so as to obtain economic benefits. The existence and effect of potential voting rights that are presently exercisable or presently convertible are considered when assessing whether the Group controls another entity. Subsidiaries are consolidated from the date on which control is transferred to the Group (acquisition date) and are deconsolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated; unrealised losses are also eliminated unless the cost cannot be recovered. The Company and all of its subsidiaries use uniform accounting policies consistent with the Group's policies.

(e) Investments in associates. Associates are entities over which the Group has significant influence, but not control, generally accompanying a shareholding of between 20 and 50 percent of the voting rights. Investments in associates are accounted for by the equity method of accounting and are initially recognised at cost. The carrying amount of associates includes goodwill identified on acquisition less accumulated impairment losses, if any. The Group's share of the post-acquisition profits or losses of associates is recorded in the consolidated income statement, and its share of post-acquisition movements in reserves is recognised in reserves. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

(f) Fair value disclosure. The fair value of accounts receivable for disclosure purposes is measured by discounting the value of expected cash flows at the market rate of interest for similar borrowers at the reporting date.

The fair value of financial liabilities and other financial instruments (except if publicly quoted) for disclosure purposes is measured by discounting the future contractual cash flows at the current market interest rate available to the Group for similar financial instruments. The fair value of publicly quoted financial instruments for disclosure purposes are measured based on current market value at the close of business on the reporting date.

(g) Held-to-maturity investments. Held-to-maturity investments are carried at amortised cost using the effective interest method, net of a provision for incurred impairment losses.

(h) Embedded derivatives. The Group enters into purchase agreement for fuel within ordinary course of business. The contracts were entered into and continue to be held for the purpose of receipt or delivery of commodities in accordance with the Group's expected usage requirements and they are not within the scope of IAS 39 but need to be assessed at inception to determine if they contain embedded derivatives.

An embedded derivative is one or more implicit or explicit terms in a contract that affect the cash flows of the contract in a manner similar to a stand-alone derivative instrument. Any embedded derivative that meets the separation criterion should be separated from its host contracts and measured as if it was stand-alone derivative (fair value through profit or loss) if its economic characteristics are not closely related to those of the host contract.

(i) Property, plant and equipment. Until 31 December 2006, property, plant and equipment are stated at cost value net accumulated depreciation. Deemed cost was initially determined by a third party valuation as at 31 December 1997 and restated for the impact of inflation until 31 December 2002.

The Group changed its accounting policy to revaluing its property, plant and equipment from 1 January 2007. Management believes that it would result in a more meaningful presentation of the Group's financial position and financial performance.

Property, plant and equipment are subject to revaluation on a regular basis. The frequency of revaluation depends upon the movements in the fair values of the assets being revalued. Increases in the carrying amount arising on revaluation of property, plant and equipment are credited to revaluation reserves in equity, unless the decrease of the reserve previously recognized in the income statements. Decreases that offset previous increases of the same asset are charged against revaluation reserves directly in equity; all other decreases are charged to the income statement.

Any accumulated depreciation at the date of revaluation is eliminated against the gross amount of the asset, and the net amount is restated to the revalued amount of the asset.

The Group charges deferred tax liabilities in respect of revaluation of property, plant and equipment directly to equity.

The cost of self constructed assets includes the cost of materials, direct labour and an appropriate proportion of production overheads. Interest on borrowings to finance the construction of property, plant and equipment is capitalized during the period of time that is required to complete and prepare the asset for its intended use. Where an item of property, plant and equipment comprises major components having different useful lives, they are accounted for as separate items of property, plant and equipment.

Expenditure incurred to replace a component of an item of property, plant and equipment that is accounted for separately, is capitalised with the carrying amount of the component being written off. Other subsequent expenditure is capitalised if future economic benefits will arise from the expenditure. All other expenditure is recognised in the income statement as an expense as incurred.

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

Depreciation is charged to the income statement on a straight-line basis over the estimated useful lives of the individual assets when it is available for use. Depreciation commences on the date of acquisition, or in respect of internally constructed assets, from the time the asset is completed and ready for use.

Starting from 1 January 2008 the Group changed the classification of items of property, plant and equipment and their useful lives. Useful lives (in years) are given below by PP&E types:

- | | |
|---|-------------|
| • Production buildings | 30-70 years |
| • Hydrotechnical facilities | 15-25 years |
| • Heat and electricity production machinery and equipment of power stations | 15-35 years |
| • Machinery and equipment of power substations | 16-25 years |
| • Electricity transmission lines | 20-35 years |
| • Installations | 11-35 years |
| • Heating networks | 7-20 years |
| • Pumps, compressors, electric motors | 10-20 years |
| • Construction machinery, special vehicles | 9-15 years |
| • Control and measuring tools | 6-15 years |
| • Other | 3-15 years |

Social assets are not capitalised as they are not expected to result in future economic benefits to the Group. Costs associated with fulfilling the Group's social responsibilities are expensed as incurred.

(j) Investment property. Investment property is property held by the Group to earn rental income and which is not occupied by the Group.

Investment property is initially recognised at cost, including transaction costs, and subsequently remeasured at fair value based on its market value. Valuation of investment property as at the date of transfer it from property, plant and equipment is done by the Company's staff. Investment property that is being redeveloped for continuing use as investment property or for which the market has become less active continues to be measured at fair value. Earned rental income is recorded in profit or loss within other operating income. Gains and losses resulting from changes in the fair value of investment property are recorded in profit or loss and presented separately.

Subsequent expenditure is capitalised only when it is probable that future economic benefits associated with it will flow to the Group and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred. If an investment property becomes owner-occupied, it is reclassified to property, plant and equipment, and its carrying amount at the date of reclassification becomes its deemed cost to be subsequently depreciated.

The Group determined the fair value of investment property using indices based on market data on the fair value for similar items of property.

(k) Income tax. Income taxes have been provided for in the consolidated financial statements in accordance with Russian legislation enacted or substantively enacted by the balance sheet date. The income tax expense/(benefit) comprises current tax and deferred tax and is recognised in the consolidated income statement unless it relates to transactions that are recognised, in the same or a different period, directly in equity. Current tax is the amount expected to be paid to or recovered from the taxation authorities in respect of taxable profits or losses for the current and prior periods. Taxes, other than on income, are recorded within operating expenses.

Deferred income tax is provided using the balance sheet liability method for tax loss carry forwards and temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

financial reporting purposes. In accordance with the initial recognition exemption, deferred taxes are not recorded for temporary differences on initial recognition of an asset or a liability in a transaction other than a business combination if the transaction, when initially recorded, affects neither accounting nor taxable profit or loss. Deferred tax balances are measured at tax rates enacted or substantively enacted at the balance sheet date which are expected to apply to the period when the temporary differences will reverse or the tax loss carry forwards will be utilised. Deferred tax assets and liabilities are netted only within the individual companies of the Group. Deferred tax assets for deductible temporary differences and tax loss carry forwards are recorded only to the extent that it is probable that future taxable profit will be available against which the deductions can be utilised.

Deferred tax movements are recorded in the income statement except when they are related to the items directly charged to the shareholders' equity. In this case deferred taxes are recorded as part of the shareholders' equity.

Deferred tax is not provided for the undistributed earnings of subsidiaries, as the Group requires profits to be reinvested, and only insignificant dividends are expected to be declared from future profits of the subsidiaries. Neither these future profits nor the related taxes are recognized in these financial statements.

(l) Inventories. Inventories are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

The cost of inventories is based on the weighted average cost principle and includes expenditure incurred in acquiring the inventories and bringing them to their existing location and condition.

(m) Trade and other receivables. Accounts receivable are recorded inclusive of value added taxes. Trade receivables are recognised initially at fair value and subsequently measured at amortized cost using the effective interest rate method less provision for impairment. Such a provision for impairment of accounts receivable is established if there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the carrying amount and the recoverable amount, being the present value of expected cash flows, discounted at the original effective interest rate. The carrying amount of the asset is reduced through the use of provision for impairment account. When a trade receivable is uncollectible, it is written off against the provision for impairment of trade receivables. Subsequent recoveries of amounts previously written off are credited against operating costs in the income statement.

(n) Cash and cash equivalents. Cash and cash equivalents includes cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less. Restricted balances are excluded from cash and cash equivalents for the purposes of the consolidated cash flow statement.

(o) Dividends. Dividends are recognised as a liability and deducted from equity at the balance sheet date only if they are declared (approved by shareholders) before or on the balance sheet date. Dividends are disclosed when they are declared after the balance sheet date, but before the financial statements are authorized for issue.

(p) Value added tax on purchases and sales. Value added taxes ("VAT") related to sales is payable to tax authorities on the earlier of (a) collection of the receivables from customers or (b) delivery of the goods or services to customers. Input VAT is generally recoverable against output VAT upon receipt of the VAT invoice. The tax authorities permit the settlement of VAT on a net basis. VAT related to sales and purchases which have not been settled at the balance sheet date (deferred VAT) is recognized in the balance sheet on a gross basis and disclosed separately as an asset and liability. Where provision has been made for impairment of receivables, the impairment loss is recorded for the gross amount of the debtor's

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

balance, including VAT. The related deferred VAT liability is maintained until the debtor is written off for tax purposes.

(g) Borrowings. Borrowings are carried at amortised cost using the effective interest method. Interest costs on borrowings to finance the construction of property, plant and equipment are capitalised, during the period of time that is required to complete and prepare the asset for its intended use. All other borrowing costs are expensed.

(r) Trade and other payables. Accounts payable are stated inclusive of value added tax. Trade payables are accrued when counterparty performed its obligation under the contract and are carried at amortised cost using the effective interest method.

(s) Provisions for liabilities and charges. Provisions for liabilities and charges are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount can be made. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole.

(t) Pension and post-employment benefits. In the normal course of business the Group contributes to the Russian Federation state pension scheme on behalf of its employees. Mandatory contributions to the governmental pension scheme are expensed when incurred.

OAO Mosenergo operates a number of defined benefit plans: lump-sum payments at retirement, old age life pension program and death benefits. Defined benefits plans, except old-age life pensions, are paid on a pay-as-you-go basis. For old-age life pensions payments OAO Mosenergo has contracted with a non-state pension fund. OAO Mosenergo settles its obligation in relation to former employees when they retire from OAO Mosenergo by purchasing annuity policies in the fund. All defined benefits plans are considered to be fully unfunded. When the pension obligation is settled via a non-state pension fund, the employer buys an annuity with the amount of contributions allocated to individual accounts held by the non-state pension fund and any additional contributions that may be required from the employer to meet the cost of the benefit promise.

Defined benefit plans determine the amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation. The liability recognised in the balance sheet in respect of defined benefit pension plans operated by the Group is the present value of the defined benefit obligation at the balance sheet date, together with adjustments for unrecognised actuarial gains or losses and past service cost. The defined benefit obligations are calculated using the projected unit credit method. The present value of the defined benefit obligations are determined by discounting the estimated future cash outflows using interest rates of government bonds that are denominated in the currency in which the benefits will be paid associated with the operation of the plans, and that have terms to maturity approximating the terms of the related pension liabilities.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions in excess of the greater of 10% of the value of plan assets or 10% of the defined benefit obligations are charged or credited to the income statement over the employees' expected average remaining working lives.

The Group calculated its pension plan liability by extrapolating the data included in the consolidated financial statements for the year ended 31 December 2007 using assumptions described in Note 18.

(u) Financial assets. The Group holds financial assets classified as held-to-maturity and loans and receivables.

Held-to-maturity assets include non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group has both the intention and ability to hold to maturity. Management

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

determines the classification of investment securities held to maturity at their initial recognition and reassesses the appropriateness of that classification at each balance sheet date.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets.

(v) Foreign currencies. Transactions in foreign currencies are remeasured to RR at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are remeasured to RR at the foreign exchange rate ruling at that date. Non-monetary assets and liabilities denominated in foreign currencies that are stated at historical cost are remeasured to RR at the foreign exchange rate ruling at the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are remeasured to RR at the foreign exchange rate ruling at the dates the fair values were determined. Foreign exchange differences arising on remeasurement are recognised in the income statement.

At 30 June 2008 the official rates of exchange, as determined by the Central Bank of the Russian Federation, were:

- RR 23.4573: US Dollar (US\$) 1.00 (31 December 2007: RR 24.5462: US\$ 1.00);
- RR 36.9077: Euro 1.00 (31 December 2007: RR 35.9332: Euro 1.00).

The RR is not freely convertible in most countries outside the Russian Federation.

(w) Revenues. Revenues are recognised on the delivery of electricity and heat, and on the dispatch of non-utility goods and services. Revenue amounts are presented exclusive of value added taxes.

(x) Earnings per share. The earnings per share is determined by dividing the profit/(loss) attributable to ordinary shareholders by the weighted average number of ordinary shares outstanding during the reporting period.

(y) Segment reporting. The Group operates predominantly in a single geographical area and industry, the generation of electric power and heat in the city of Moscow, Moscow region and the surrounding regions. It is not feasible to identify distinguishable business segments for electric power and heat production. The generation of electricity and heat are related activities and are subject to similar risks and returns, therefore they are reported as one business segment.

(z) Environmental liabilities. Liabilities for environmental remediation are recorded where there is a present obligation, the payment is probable and reliable estimates can be made.

(aa) Changes in presentation.

Categories of property, plant and equipment as of 31 December 2007 were changed in these financial statements in order to align them with respective structure of useful economies lives.

New categories of property, plant and equipment are as follows:

- Buildings and installations
- Machinery and equipment
- Heating networks
- Construction in progress
- Other

Buildings and installations include production buildings, hydrotechnical facilities, and installations.

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

Machinery and equipment include machinery and equipment to produce heat and electricity of power stations and machinery and equipment of power substations, and construction machinery.

Heating networks include electricity transmission lines and heating networks.

Due to immateriality of amounts for pumps, compressors, electric motors, control and measuring tools, computer equipment, office furniture and other equipment which were not included within the above groups they are grouped in "Other".

Note 3. Critical Accounting Estimates, and Judgments in Applying Accounting Policies

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgments, apart from those involving estimations, in the process of applying the accounting policies. Judgments that have the most significant effect on the amounts recognised in the financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Useful lives of property, plant and equipment. Fair value of property, plant and equipment has been determined by an independent appraiser based on the depreciated replacement cost method. Further, management assesses the remaining useful life of property, plant and equipment in accordance with the current technical conditions of assets and estimated period when these assets will bring economic benefit to the Group. Carrying value and depreciation of property, plant and equipment are affected by the estimates of replacement cost, depreciated replacement cost, residual value and remaining useful lives, and actual results could differ from these estimates.

Provision for impairment of trade and other receivables. Provision for impairment of trade and other receivables is based on the Group's assessment of whether the collectibility of specific customer accounts worsened compared to prior estimates. If there is deterioration in a major customer's creditworthiness or actual defaults are higher than the estimates, the actual results could differ from these estimates. See effect of these critical accounting estimates and judgments in Note 12.

Tax contingencies. Russian tax legislation is subject to varying interpretations and changes, which can occur frequently. Where the Group management believes it is probable that their interpretation of the relevant legislation and the Group's tax positions cannot be sustained, an appropriate amount is accrued for in these IFRS financial statements. See effect of these critical accounting estimates and judgments in Note 27.

Going concern. The Financial Statements have been prepared on a going concern basis, which contemplates the realisation of assets and the satisfaction of liabilities in the normal course of business. The accompanying Financial Statements do not include any adjustments should the Group be unable to continue as a going concern.

Note 4. Adoption of New or Revised Standards and Interpretations

Listed below are those new or amended standards or interpretations which are or in the future could be relevant to the Group's operations and the nature of their impact on the Group's accounting policies. All changes in accounting policies were applied retrospectively with adjustments made to retained earnings at 1 January 2007, unless otherwise described below.

- IFRIC 11, *IFRS 2 - Group and Treasury Share Transactions* (effective for annual periods beginning on or after 1 March 2007);

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

- IFRIC 12, *Service Concession Arrangements* (effective for annual periods beginning on or after 1 January 2008);
- IFRIC 14, *IAS 19—The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction* (effective for annual periods beginning on or after 1 January 2008).

The effect of adoption of the above new standards and interpretations on the Company's financial position at 31 March 2008 and 31 December 2007 and on the results of its operations for the six month ended 30 June 2008 and 30 June 2007 was not significant.

Note 5. New Accounting Pronouncements

Certain new standards and interpretations have been published that are mandatory for the Group's accounting periods beginning on or after 1 January 2008 or later periods and which the Group has not early adopted:

IFRS 8, Operating Segments (issued in November 2006; effective for annual periods beginning on or after 1 January 2009). The standard applies to entities whose debt or equity instruments are traded in a public market or that file, or are in the process of filing, their financial statements with a regulatory organisation for the purpose of issuing any class of instruments in a public market. IFRS 8 requires an entity to report financial and descriptive information about its operating segments and specifies how an entity should report such information. The Group is currently assessing what impact the standard will have on segment disclosures in the consolidated financial statements.

Vesting Conditions and Cancellations—Amendment to IFRS 2, Share-based Payment (issued in January 2008; effective for annual periods beginning on or after 1 January 2009). The amendment clarifies that only service conditions and performance conditions are vesting conditions. Other features of a share-based payment are not vesting conditions. The amendment specifies that all cancellations, whether by the entity or by other parties, should receive the same accounting treatment.

Puttable financial instruments and obligations arising on liquidation—IAS 32 and IAS 1 Amendment (issued in February 2008; effective from 1 January 2009). The amendment requires classification as equity of some financial instruments that meet the definition of a financial liability.

IAS 23, Borrowing Costs (revised March 2007; effective for annual periods beginning on or after 1 January 2009). The revised IAS 23 was issued in March 2007. The main change to IAS 23 is the removal of the option of immediately recognising as an expense borrowing costs that relate to assets that take a substantial period of time to get ready for use or sale. An entity is, therefore, required to capitalise such borrowing costs as part of the cost of the asset.

IAS 1, Presentation of Financial Statements (revised September 2007; effective for annual periods beginning on or after 1 January 2009). The main change in IAS 1 is the replacement of the income statement by a statement of comprehensive income which will also include all non-owner changes in equity, such as the revaluation of available-for-sale financial assets. Alternatively, entities will be allowed to present two statements: a separate income statement and a statement of comprehensive income. The revised IAS 1 also introduces a requirement to present a statement of financial position (balance sheet) at the beginning of the earliest comparative period whenever the entity restates comparatives due to reclassifications, changes in accounting policies, or corrections of errors.

IAS 27, Consolidated and Separate Financial Statements (revised January 2008; effective for annual periods beginning on or after 1 July 2009). The revised IAS 27 will require an entity to attribute total comprehensive income to the owners of the parent and to the non-controlling interests (previously "minority interests") even if this results in the non-controlling interests having a deficit balance (the current standard requires the excess losses to be allocated to the owners of the parent in most cases). The revised standard specifies that changes in a parent's ownership interest in a subsidiary that do not result in the loss of control must be accounted for as equity transactions. It also specifies how an entity should

OA0 Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

measure any gain or loss arising on the loss of control of a subsidiary. At the date when control is lost, any investment retained in the former subsidiary will have to be measured at its fair value.

IFRS 3, Business Combinations (revised January 2008; effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 July 2009). The revised IFRS 3 will allow entities to choose to measure non-controlling interests using the existing IFRS 3 method (proportionate share of the acquiree's identifiable net assets) or on the same basis as US GAAP (at fair value). The revised IFRS 3 is more detailed in providing guidance on the application of the purchase method to business combinations. The requirement to measure at fair value every asset and liability at each step in a step acquisition for the purposes of calculating a portion of goodwill has been removed. Instead, goodwill will be measured as the difference at acquisition date between the fair value of any investment in the business held before the acquisition, the consideration transferred and the net assets acquired. Acquisition-related costs will be accounted for separately from the business combination and therefore recognised as expenses rather than included in cost value. An acquirer may have to recognise at the acquisition date a liability for any contingent purchase consideration. Changes in the value of that liability after the acquisition date will be recognised in accordance with other applicable IFRSs, as appropriate, rather than by adjusting goodwill.

IFRIC 13, Customer Loyalty Programmes (issued in June 2007; effective for annual periods beginning on or after 1 July 2008). IFRIC 13 clarifies that where goods or services are sold together with a customer loyalty incentive (for example, loyalty points or free products), the arrangement is a multiple-element arrangement and the consideration receivable from the customer is allocated between the components of the arrangement using fair values. IFRIC 13 is not relevant to the Group's operations because no Group companies operate any loyalty programmes.

Unless otherwise described above, the new standards and interpretations are not expected to significantly affect the Group's financial statements.

Note 6. Related party transactions

Related parties are defined in IAS 24, *Related Party Disclosures*. Parties are generally considered to be related if one party has the ability to control the other party, is under common control, or can exercise significant influence or joint control over the other party in making financial and operational decisions. In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

The nature of the related party relationships for those related parties with whom the Group entered into significant transactions during the six months ended 30 June 2008 and the six months ended 30 June 2007 or had significant balances outstanding at 30 June 2008 and 31 December 2007 are detailed below.

(a) Parent company and its subsidiaries

As of 30 June 2008, Gazprom Group owns of 53.47% in OAO Mosenergo and has effective control over the Group's operations. The Government of the Russian Federation is the ultimate controlling party of OAO Gazprom and has controlling interest (including both direct and indirect ownership) of over 50% in OAO Gazprom.

In June 2007, Gazprom Group acquired additional shares of OAO Mosenergo and increased its interest in OAO Mosenergo to a controlling stake. Therefore, information for periods ended 30 June 2007 and as of 30 June 2007 is disclosed in the Note 6 (d) below.

For six months ended 30 June 2008, as of 30 June 2008 and as of 31 December 2007, the Group had the following significant transactions and balances with Gazprom Group:

OAO Mosenergo

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

(b) Transactions with associates (OOO KB Transinvestbank)

During the six months ended 30 June 2008 and 30 June 2007 the Group provided rent services to OOO KB Transinvestbank for RR 2,5 million and RR 2,4 million, respectively. During the six months ended 30 June 2008 and 30 June 2007 the Group received bank services from OOO KB Transinvestbank for RR 120 million and RR 94 million respectively.

Included in cash and cash equivalents of the Group are cash accounts with OOO KB Transinvestbank of RR 562 million and RR 1,145 million as of 30 June 2008 and 31 December 2007, respectively.

(c) Transactions with key management

Key management personnel (the members of the Board of Directors and Management Committee of ОАО Мосэнерго) are those persons having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity.

The remuneration for serving on the Board of Directors is subject to approval by the General Meeting of Shareholders, compensation of key management personnel (other than remuneration for serving as members of Board of Directors) is determined by the terms of the employment contracts. Total remuneration accrued and paid to the members of the Board of Directors and Management Committee for the six months ended 30 June 2008 and 30 June 2007 was as follows:

	Six months ended 30 June 2008		Six months ended 30 June 2007	
	Expense	Accrued liability	Expense	Accrued liability
Short-term compensation, including salary and bonuses	74	8	75	3
Remuneration for serving on the Board of Directors and Management Committee	10	7	10	5
Post-employment benefits	122	11	4	-

(d) Other state-controlled entities

Information provided below excludes transactions and balances with ОАО Gazprom and its subsidiaries for the six months ended 30 June 2008 that is disclosed in Note 6 (a). For six months ended 30 June 2007 the Group had the following significant transactions and balances with Gazprom Group:

	Six months ended 30 June 2007
Revenues - other	87
Operating expenses, including:	(16,578)
<i>Fuel expenses</i>	(16,578)

Cash and cash equivalents	1,093
Promissory notes	22,212
Trade receivables	74
	23,379
	28
Trade payables	28

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

During the six months ended 30 June 2007 OAO Mosenergo placed and withdrew cash on short-term deposit in AB Gazprombank (ZAO) for RR 6,300 million and RR 7,200 million, respectively.

During periods ended ended 30 June 2007 Group accrued dividends to Gazprom group in the amount of RR 223 million.

The information below does not include balances and transactions with RAO UES of Russia and its subsidiaries as of 30 June 2007 and for the period ended 30 June 2007. These balances and transactions are disclosed in Note 6(a).

The Group's significant balances and transactions with RAO UES of Russia as of 30 June 2008 and 31 December 2007 and for the periods then ended were as follows:

	Six months ended 30 June 2008	
Revenue - Electricity	18,357	
Revenue - Heating	917	
Revenue - Other	2,378	
Total Revenue	21,652

Included in additions above is capitalized interest of RR 291 million and RR 396 million for the periods ended 30 June 2008 and 2007, respectively. Capitalization rates of 3.36% were used representing the weighted average actual borrowing cost of the relevant borrowings for six months ended 30 June 2008.

Construction in progress includes advances to construction companies and suppliers of property, plant and equipment of RR 8,850 million (net of VAT) and RR 8,967 million (net of VAT) as of 30 June 2008 and 30 June 2007 respectively.

The Group changed its accounting policy to revaluing its property, plant and equipment from 1 January 2007. The Group contracted independent appraisers to estimate the fair value of the Group's property, plant and equipment at 1 January 2007. New fair value as at 1 January 2007 amounted to RR 104,547

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

million. This change was accounted in accordance with IAS 8 «Accounting Policies, Changes in Accounting Estimates and Errors», therefore comparatives were not restated.

Fair values were determined primarily based on the depreciated replacement cost method. The replacement cost of buildings, constructions and transfer devices has been estimated based on technical characteristics, unit construction cost and construction estimates. The replacement cost of equipment was estimated based on data of aggregative replacement cost of heat-power station, current purchase contracts and price-list of producers and trading companies. The economic obsolescence was estimated based on profitability test results for each cash-generating unit. The discount rate used was 11.28%, the forecast period - 19 years, long-term growth – 3%.

As a result of the revaluation, the Group's equity increased by RR 37,534 million, comprising an increase in the carrying value of property, plant and equipment of RR 49,387 million, net of related deferred tax of RR 11,853 million.

For each class of property, plant and equipment stated at revalued amount in these financial statements, the carrying amount that would have been recognized had the assets been carried under the cost model is following:

Actual value	Buildings and installations	Machinery and equipment	Heating networks	Construction in progress	Other	Total
Net book value as at 30 June 2008	22,567	28,448	1,929	35,024	4,295	92,263
Net book value as at 31 December 2007	16,835	29,017	2,043	29 480	4,393	81 768

Operating lease

The Group leases a number of land areas owned by local governments under operating lease. Land lease payments are determined by lease agreements.

Operating lease rentals are payable as follows:

	30 June 2008	30 June 2007
Not later than 1 year	359	280
Later than 1 year but not later than 5 years	1,797	1,401
Later than 5 years	15,454	12,192
Total	17,610	13,873

The land areas leased by the Group are the territories on which the Group's electric power stations, heating stations and other assets are located. The leases typically run for an initial period of 5 to 45 years with an option to renew the lease after that date. Leased payments are reviewed regularly to reflect market rentals.

ОАО Мосэнерго

(in millions of Russian Roubles)

Note 8. Investment property

	<u>30 June 2008</u>	<u>30 June 2007</u>
Investment properties at beginning of reporting period	1,288	-
Fair value losses of investment property	(63)	-
Investment properties at end of reporting period	<u>1,225</u>	<u>-</u>

The Group has reclassified certain leased properties to investment property from property, plant and equipment effective 1 October 2007. Management considers this treatment to better present the nature of the underlying asset. At the time of transfer from property, plant and equipment at 30 June 2008 investment properties were valued by method of index numbers by the Company's staff.

Where the Group is the lessor, the future minimum lease payments receivable under non-cancellable operating leases are as follows:

	<u>30 June 2008</u>
Not later than 1 year	200
Later than 1 year and not later than 5 years	801
Later than 5 years	236
Total	<u>1,237</u>

Note 9. Investments in associates

The Group has the following investments in associates:

	<u>Country</u>	<u>Ownership as at 30 June 2008</u>	<u>Ownership as at 31 December 2007</u>
ООО KB Transinvestbank	Russia	72.44%	72.44 %

In accordance with the Articles of ООО KB Transinvestbank, its charter capital is divided between three participants, including ОАО Мосэнерго, and each participant has one vote. The majority of significant decisions should be approved by the majority of votes.

The table below summarise the movements in the carrying amount of the Group's investments in associates:

	<u>30 June 2008</u>	<u>30 June 2007</u>
Carrying amount at at beginings of reporting period	1,246	346
Share of result of associates	(22)	29
Dividends received from associates	(163)	(17)
Carrying amount at the end of reporting period	<u>1,061</u>	<u>358</u>

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

At 30 June 2008 and 31 December 2007 summarized financial information of associates, including total assets, liabilities, revenues and profit were as follows:

	<u>30 June 2008</u>	<u>31 December 2007</u>
Assets	4,116	4,934
Liabilities	(2,651)	(3,242)
Total equity	1,465	1,692

	<u>Six months ended 30 June 2008</u>	<u>Six months ended 30 June 2007</u>
Revenue	392	386
Expenses	(316)	(267)
Profit for the period	76	119

Note 10. Held-to-maturity investments

In October 2007 the Company purchased several promissory notes of ZAO "Gazenergoprombank" maturing in 2008. In February 2008 the Group retired some promissory notes RR 7,607 million prior to maturity. Total amount of promissory notes as at 30 June 2008 is RR 234 million.

In February 2008 the Group purchased promissory notes of ZAO "Gazenergoprombank" maturing in February 2009. Total amount of promissory notes purchased is RR 69 million.

In May 2008 OAO Mosenergo provided a short-term loan to ZAO "Gazenergoprom- Invest" maturing in December 2008. Total amount of short-term loan as at 30 June 2008 is RR 13,512 million.

Note 11. Inventories

	<u>30 June 2008</u>	<u>31 December 2007</u>
Fuel	2,338	2,754
Materials and supplies	1,681	1,646
Other inventories	58	44
Total inventories	4,077	4,444

Materials and supplies are shown net of a provision for obsolete inventory and an adjustment for non-moving inventory in the amount of RR 8 million as at 30 June 2008 and RR 7 million as at 31 December 2007.

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

Note 12. Trade and other receivables

	<i>30 June 2008</i>	<i>31 December 2007</i>
Trade receivables (Net of provision for impairment of receivables of RR 2,175 as at 30 June 2008 and RR 1,654 as at 31 December 2007)	3,520	4,691
Other receivables (Net profit for impairment of receivables of RR 198 as at 30 June 2008 and RR 276 as at 31 December 2007)	1,007	786
Total financial assets	4,527	5,477
Advances to suppliers and prepayments	2,730	3,364
VAT recoverable	1,877	1,769
Tax prepayments (other than current profit tax prepayments)	679	956
Total trade and other receivables	9,813	11,566

Management has determined the provision for impairment of accounts receivable based on specific customer identification, customer payment trends, subsequent receipts and settlements and analyses of expected future cash flows. Management of the Company believes that the Company will be able to realize the net receivable amount through direct collections and other non-cash settlements, and therefore the recorded value approximates their fair value.

Management of the Group determines two main classes – for Electricity and for Heat. Electricity is sold in an open and highly regulated market to other energy companies that sell that electricity further to the final customers. Heat is sold to resellers and also to final customers. Debtors within these classes are quite homogeneous regarding their credit quality.

Accounts receivable current and not impaired:

	<i>30 June 2008</i>	<i>31 December 2007</i>
Electricity	608	498
Heat	1,650	2,057
Other	1,486	1,940
Total current and not impaired	3,744	4,495

As at 30 June 2008 trade and other receivables of RR 783 million (as at 31 December 2007: RR 982 million) were past due but not impaired. These relate to customers for whom historically there were no instances of default. The ageing analysis of these past due trade receivables is shown in the table below.

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

Trade and other receivables past due but not impaired:

	<i>1 month</i>	<i>2 months</i>	<i>3 months</i>	<i>4 months</i>	<i>5-12 months</i>	<i>More than 1 year</i>	<i>Total</i>
Electricity	-	61	48	45	28	30	212
Heat	-	19	143	38	16	-	216
Other	-	11	34	5	74	231	355
Total past due but not impaired	-	91	225	88	118	261	783

Trade and other receivables individually determined to be impaired (gross):

	<i>30 June 2008</i>	<i>31 December 2007</i>
Electricity	1,377	1,268
Heat	743	573
Other	254	434
Total individually impaired	2,374	2,275

All impaired trade and other receivables are made provision for. The movement of the provision is shown in the table below.

Impairment of trade and other receivables:

	<i>30 June 2008</i>	<i>30 June 2007</i>
Opening balance	1,930	1,416
Charge for the year	546	432
Trade and other receivables written-off during the year as uncollectible	(36)	(69)
Unused amounts reversed	(39)	(10)
Discounting effect	(27)	(73)
Closing balance	2,374	1,696

All impaired trade and other receivables are older than 1 year. The individually impaired receivables mainly relate to wholesalers, which are located in the Southern Federal district.

Management assesses that counterparties, balances of which fall into trade receivables and other receivables, and which are neither past due nor impaired, have approximately the same credit quality.

The Group does not hold any collateral as security.

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

Note 13. Cash and cash equivalents

	<i>30 June 2008</i>	<i>31 December 2007</i>
Cash at bank and in hand	3,500	7,992
RR term deposits (interest rate: 7.3% - 6.0%)	3,500	3,000
Foreign currency bank accounts	8	9
Other	138	135
Total cash and cash equivalents	7,146	11,136

Cash and cash equivalents balances do not include balances on special accounts in OAO "ABN AMRO Bank" and OOO KB Transinvestbank in the aggregate amounts of RR 74 million and RR 82 million as at 30 June 2008 and 31 December 2007 respectively. Such balances are destined for the purpose of repayment of principal amount of debt and interest on European Bank for Reconstruction and Development and International Financial Corporation loans. Such balances are classified within other current assets.

Term deposits have original maturities of less than three months. All the bank balances and term deposits are neither past due nor impaired. Analysis by credit quality of bank balances and term deposits is as follows:

<i>Name of the bank</i>	<i>Rating agency</i>	<i>Rating</i>	<i>2008 Balance as at 30 June 2008</i>	<i>Rating</i>	<i>2007 Balance as at 31 December 2007</i>
OAO "Gazprombank"	Moody's Investor's Service	BBB-	47	BB+	5,291
OAO "Sberbank of Russia"	Fitch Ratings	BBB+	5,527	BBB+	1,243
OAO "Bank VTB"	Fitch Ratings	BBB+	16	BBB+	3,006
ZAO "Gazenergoprombank"	Moody's Interfax	Aa3.ru	1	-	63
OOO KB Transinvestbank	-	-	562	-	1,145
OAO "Bank of Moscow"	Fitch Ratings	BBB	19	BBB	254
OAO AKB "Evrofinans Mosnarbank"	Fitch Ratings	BBB	2	BBB	21
Other	-	-	972	-	113
			7,146		11,136

The Company pursues the policy of cooperation with a number of the first-rate banks, which is approved by the Board of Directors. Temporarily surplus monetary assets are placed in different financial instruments such as fixed deposits, promissory notes. Investments are made depending on approved credit limit by Board of Directors of OAO Mosenergo.

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

Note 14. Other current assets

	<i>30 June 2008</i>	<i>31 December 2007</i>
Assets constructed under financing from Moscow Government	523	523
VAT from advances received	114	114
Other current assets	2,074	8,083
Total other current assets	2,711	8,720

As at 30 June 2008 Other Current Assets include deposits in OAO "Sberbank of Russia" that have original maturities of more than 4 months in the amount of RR 2,000 million.

As at 31 December 2007 Other Current Assets include deposits in bank that have original maturities of 4 months up to 12 months in the amount of RR 8,000 million.

Note 15. Equity

(a) Share capital

The total authorised number of ordinary shares is 39,749,359,700 shares with a par value of RR 1.00 per share. All issued ordinary shares are fully paid.

The carrying amount of share capital has been adjusted to take into account the effects of hyperinflation that existed in Russian Federation until the end of 2002.

As of 20 December 2006 the shareholders' meeting of OAO Mosenergo approved increase of share capital of OAO Mosenergo via additional issue of 11,500,000,000 of ordinary shares with nominal value equal to RR 1.00 per share by closed subscription in favour of OAO Gazprom and its affiliates. Offering price was approved at RR 5.28 per share (determined based on quoted price of OAO Mosenergo shares during the period of 19 June 2006 – 19 December 2006). The Report on additional issue of securities was registered by the Federal Securities Commission of Russian Federation on 5 July 2007. Shares were paid during March-May 2007.

(b) Revaluation surplus

Revaluation surplus represents the result of the revaluation of property, plant and equipment performed by Group as at 1 January 2007 (Note 7).

(c) Dividends

On 21 May 2008 the Annual General Shareholders' Meeting of OAO Mosenergo made the decision not to pay dividends on the Company's ordinary shares based on the results of financial year 2007 (Report №2 from 30 May 2008).

(d) Treasury stocks

As of 30 June 2008 Group had 156 101 884 treasury shares for the total amount RR of 969 million (Note 19).

(in millions of Russian Roubles)

Note 16. Borrowings

	<i>Cur- rency</i>	<i>Effective interest rate</i>	<i>30 June 2008</i>	<i>31 December 2007</i>
<i>Non-current borrowings</i>				
		Range of MosPrime+2.5% and		
EBRD	RUR	MosPrime+3.5%	5,954	-
EBRD	USD	LIBOR+3.5%	40	-
IFC	USD	LIBOR+3.5%	26	-
<i>Unsecured bonds</i>				
Unsecured bond issue №1	RUR	7.54%	4,629	-
Unsecured bond issue №2	RUR	7.65%	4,783	-
<i>Other non-current borrowings</i>				
	RUR		134	129
Total			15,566	129
<i>Current borrowings and current portion of non-current borrowings</i>				
<i>Secured bank loans</i>				
		Range of MosPrime+2.5% and		
EBRD	RUR	MosPrime+3.5%	1,246	7,200
EBRD	USD	LIBOR+3.5%	79	166
IFC	USD	LIBOR+3.5%	52	110
<i>Unsecured bonds</i>				
Unsecured bond issue №1	RUR	7.54%	-	5,000
Unsecured bond issue №2	RUR	7.65%	-	5,000
Total			1,377	17,476
Total borrowings			16,943	17,605

The effective interest rate is the market interest rate applicable to the loan at the date of origination for fixed rate loan and the current market rate for floating rate loans.

Borrowings include fixed rate loans with a carrying value of RR 9,412 million and RR 10,000 million and fair value of RR 9,968 million and RR 9,989 million as of 30 June 2008 and 31 December 2007, respectively. All other borrowings generally have variable interest rates linked to LIBOR or MosPrime, and the carrying amounts approximate fair value.

The Group has not entered into any hedging arrangements in respect of its foreign currency obligation or interest rate exposure.

(a) European Bank for Reconstruction and Development and International Finance Corporation loans

These loans were obtained in April 1998 to finance capital expenditure. Loans from European Bank for Reconstruction and Development and International Finance Corporation were received under non-revolving line of credit agreements (loan amount not to exceed USD 50 million in total). The full amount available under the agreements had been provided to the Group by 31 March 2001. The Group is required to make 18 principal payments on a semi-annual basis, beginning 15 January 2001. Interest is payable at the same time as the principal.

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

On 23 December 2005 the Group concluded the agreement with European Bank for Reconstruction and Development to open a credit line in the total amount of RR 7,200 million for more than 10 years. The credit line consisted of two credit lines in amounts of RR 2,900 million and RR 4,300 million respectively. The loan was obtained for the purchase of acquiring additional equipment for the Group. The loan interest on loans is determined on Mosprime plus basis.

The payment of interest on the loan is carried out on a quarterly basis, and the principal amount is to be repaid by 40 and 18 equal installments for the first and second credit lines respectively starting after 31 December 2007.

Net book value of fixed assets pledged as security for loans was RR 1,788 million as of 30 June 2008.

(b) Unsecured bonds

On 2 March 2006 the placement of OAO Mosenergo's 5,000,000 unconvertible fixed interest rate bearing bonds took place through underwriter Gazprombank on the trading floor of Moscow Interbank Currency Exchange. The total amount of placement equaled RR 5 billion. The face value of each bond is RR 1,000 and term of maturity of ten years. Interest of 7.65% will be paid to the bond holders semiannually.

The bonds may become subject for early redemption only upon the decision of the issuer to grant such option to the bond holders. The main purpose of bond issues is to refinance short-term bank loans.

On 19 September 2006 OAO Mosenergo registered the second issue of 5,000,000 fixed interest rate bearing bonds with the face value of RR 1,000 and term of maturity of five years. The total amount of placement equaled RR 5 billion. Interest of 7.54% will be paid to the bond holders semiannually.

At the Extraordinary General Shareholders' meeting on 28 December 2007 the Group made a decision on merging of OAO Mosenergo Holding into the Group (see Notes 1). Following that decision and in accordance with Russian legislation owners of OAO Mosenergo unsecured bonds could present the bonds for early redemption until 28 February 2008. Therefore, in accordance with IAS 1 § 69, these bonds on total amount RR 10,000 million were reclassified to current debt at 31 December 2007.

Subsequently to 31 December 2007 a report on bonds presented for early redemption was issued by OAO Mosenergo. According to that report only bonds on amount RR 588 million were presented for early redemption. Details are disclosed in the Note 30.

As of the reporting date, 30 June 2008, all bonds presented for early redemption were paid for but they were redeemed and paid. Therefore, OAO Mosenergo's bonds for the amount of RR 9,412 million were recognized as non-current borrowings in the financial statements.

(c) Borrowings maturity

As of 31 December 2007, OAO Mosenergo did not comply with the debt service coverage requirement as stated in loan agreements with the European Bank for Reconstruction and Development and International Finance Corporation. Breach of the covenant to maintain the debt service coverage ratio at the specified level, would, upon notice to OAO Mosenergo from European Bank for Reconstruction and Development and International Finance Corporation, respectively, and if not cured or otherwise waived within thirty days of such notice being provided, give European Bank for Reconstruction and Development and International Finance Corporation the right to demand repayment, it being noted that European Bank for Reconstruction and Development and International Finance Corporation are both free to waive any consequences of such breach at any time. Therefore, in accordance with IAS 1 § 69, these loans on total amount RR 6,715 million were reclassified to current debt at 31 December 2007.

As of 30 June 2008 OAO Mosenergo carried out requirements of covenants requirement as stated in loan agreements with the European Bank for Reconstruction and Development and International Finance Corporation from 1998 and 2005. Thereafter the loans on total amount RR 6,020 million were taken into account as part of the long-term debt.

ОАО Мосэнерго**Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)**
(in millions of Russian Roubles)

As of 30 June 2008 and 30 June 2007 the maturity portfolio of long-term borrowings is presented below:

	<u>30 June 2008</u>	<u>31 December 2007</u>
Between one and two years	5,992	-
Between two and five years	8,124	129
After five years	1,450	-
	<u>15,566</u>	<u>129</u>

Note 17. Other taxes payable

	<u>30 June 2008</u>	<u>31 December 2007</u>
VAT payable	-	238
Payroll taxes payable	194	150
Property tax	327	82
Other taxes payable	164	141
	<u>685</u>	<u>611</u>

Note 18. Retirement benefit obligations

The tables below provide information about post-employment benefits and actuarial assumptions used for the period ended 30 June 2008. Amounts recognized in the consolidated balance sheet:

	<u>30 June 2008</u>	<u>31 December 2007</u>
Present value of defined benefit obligations (DBO)	2,885	3,008
Unrecognised actuarial (loss)/gain	(248)	(248)
Unrecognised past service cost	(1,407)	(1,481)
Retirement benefit obligations	<u>1,230</u>	<u>1,279</u>

Benefit expenses recognised in the consolidated interim income statement:

	<u>Six months ended 30 June 2008</u>	<u>Six months ended 30 June 2007</u>
Current service cost	133	67
Interest cost	98	74
Amortisation of past service cost	74	210

	-	213
Retirement benefit expenses	<u>305</u>	<u>564</u>

OAo Mosenergo**Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)**

(in millions of Russian Roubles)

Changes in the present value of the Group's defined benefit obligation are as follows:

	<u>30 June 2008</u>	<u>31 December 2007</u>
Present value of defined benefit obligations (DBO) at 1 January	1,252	1,149
Current service cost	133	127
Interest cost	98	180
Actuarial loss/(gain)	(248)	263
Past service cost	1,757	1,629
Benefits paid	(355)	(340)
Present value of defined benefit obligations (DBO) at the end of period	<u>2,885</u>	<u>3,008</u>

Starting 1 January 2007 the Group accepted new pension plan. Payments under this new plan are made within agreements with NPF Elektroenergetiki and NPF Gazfund. The new pension plan was introduced only for active employees.

Principal actuarial assumptions are as follows:

	<u>30 June 2008</u>	<u>31 December 2007</u>
Nominal discount rate	6.75%	6.75%
Inflation rate	5.00%	5.00%
Wage growth rate p.a.	7.00%	7.00%
Benefits increase	5.00%	5.00%

	<u>30 June 2008</u>	<u>31 December 2007</u>
Present value of defined benefit obligations (DBO)	(2 885)	3,008
Deficit in plan	(2 885)	3,008
(Losses)/gains arising from experience adjustments on plan liabilities	248	(249)

In July 2008 the management of OAO Mosenergo made amendments in Pension plan working since 1 January 2007. Pension plan has corrected move down in benefit obligations of employees. The result of the amendments in Pension plan will be estimated by a professional actuary and taken into account in financial statements of OAO Mosenergo for the nine months ended 30 September 2008.

Note 19. Other provisions for liabilities and charges

	<u>As at 1 January 2008</u>	<u>Additional provisions</u>	<u>Unused amount reversed</u>	<u>Utilised during the period</u>	<u>As at 30 June 2008</u>
Provision for buy-out of treasury shares	969	-	-	(969)	-
Provision for unfair able outcome of legal claims	46	-	(15)	-	31
	<u>1,015</u>	<u>-</u>	<u>(15)</u>	<u>(969)</u>	<u>31</u>

OA0 Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

At the Extraordinary General Shareholders' meeting on 28 December 2007 the Group made a decision to merge OAO Mosenergo Holding with the Group. On 21 February 2008 report on results of shares presented for buy-out was issued. According to that report 156,101,884 shares of OAO Mosenergo were presented for buy-out at RR 6.21 per share on total amount RR 969 million and the whole amount was bought-out in March 2008.

Note 20. Trade and other payables

	<i>30 June 2008</i>	<i>31 December 2007</i>
Trade payables	2,137	3,637
Account payable for acquisition of property, plant and equipment	2,714	3,636
Dividends payable	1	1
Total financial liabilities	4,852	7,274
Accrued liabilities and other payables	2,321	2,298
Advances received	814	855
Financing from Moscow Government	523	523
Total trade and other payables	8,510	10,950

Total amount of financial liabilities as at 30 June 2008 comprises RR 19,080 million (as at 31 December 2007: RR 21,242 million) and includes, beside trade payables, non-current borrowing (Note 16) and current borrowings and current portion of non-current borrowings (Note 16).

Management believes that the majority of suppliers, balances of which are included into trade payables, comprise the single class, as they bear the same characteristics. Those suppliers are mainly providers of repair and maintenance services of equipments.

Financing from the Moscow government relates to the funds received by the Group, on a return basis, as a contribution by the Moscow government for construction of distribution and heating network. Repayment terms stipulated that certain assets (as provided by subsequent agreements), upon their completion, will be transferred to the Moscow government in settlement of the above liability.

Note 21. Revenue

	<i>Six months ended 30 June 2008</i>	<i>Six months ended 30 June 2007</i>
Electricity	24,463	17,953
Heating	21,432	19,216
Other	2,170	2,353
Total revenues	48,065	39,522

Approximately 6% of sales of electricity for six months ended 30 June 2008 relates to resale of purchased power on wholesale market NOREM (for six months ended 30 June 2007 – 7%).

Less capitalised to property, plant and equipment interest expense	291	396
Total finance costs recognised in the consolidated income statement	(529)	(555)

Note 25. Income tax

(a) Income tax expense

The Group's applicable tax rate is the corporate income tax rate of 24% (2007: 24%)

	<i>Six months ended 30 June 2008</i>	<i>Six months ended 30 June 2007</i>
Income tax		
Current year	(484)	(689)
Over provided in prior periods	758	-
(Under) provided in prior periods	(45)	-
	229	(689)
Deferred income tax		
(Loss)/profit for deferred income tax	(450)	212
Profit/(loss) for income tax	(221)	(477)

As at 30 June 2008 according to the court decision the Federal Tax Authority refunded overpaid income tax in the amount of RR 602 million. This overpayment is a result of recalculation of depreciation expenses of fixed assets of OAO «Mosenergo» as a result of fixed assets' revaluation as at 1 January 2002.

In December 2006 the Federal Tax Authority declared its decision concerning tax inspection of OAO Mosenergo for 2003 and 2004 years. In accordance with this decision OAO Mosenergo was charged with additional income tax amounting to RR 576 million, which has been accrued as at 31 December 2006 and presented within current income tax payable.

As at 31 December 2007 the Group performed reassessment of probability of unfavorable outcome and the Management believes that only 50% of that obligation in amount of RR 288 million should be provided. Therefore 50% of that accrued liability was reversed.

As at 30 June 2008 the Group performed reassessment of probability of unfavorable outcome. Management believes that only RR 152 million of this obligation should be provided. Consequently RR 156 million of accrued liability was reversed.

OA O Mosenergo**Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)**
(in millions of Russian Roubles)

Profit before tax for the financial reporting purposes is reconciled to the income tax as follows:

	<i>Six months ended</i> <i>30 June 2008</i>	<i>Six months ended</i> <i>30 June 2007</i>
Profit before tax	985	(25)
Theoretical tax (charge) at the statutory tax rate of 24%	(236)	6
Non-deductible items	(698)	(483)
Over provided in prior periods	758	-
(Under) provided in prior periods	(45)	-
	(221)	(477)

(b) Deferred income tax*Recognised deferred tax assets and liabilities*

Difference between IFRS and Russian statutory taxation regulations give rise to certain temporary differences between the carrying value of certain assets and liabilities for financial reporting purposes and for income tax purposes. Deferred income tax assets and liabilities are measured at 24%, the rate applicable when the asset or liability will reverse.

OA0 Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

Note 26. Earnings per share

The calculation of earnings per share is the net profit for the period divided by the weighted average number of ordinary shares outstanding during the period, calculated as shown below. OAO Mosenergo does not have dilutive potential ordinary shares.

	Six months ended 30 June 2008	Six months ended 30 June 2007
Weighted average number of ordinary shares issued (thousands)	39,724,349	28,824,360
Profit/(loss) for the period	764	(502)
Earnings per ordinary share for profit – basic and diluted (in Russian Roubles)	0.02	(0.02)

Note 27. Contingencies, Commitments and operating risks

(a) Capital commitments

Future capital expenditure for which contracts have been signed amounted to RR 37,734 million at 30 June 2008 (RR 20,406 million as of 31 December 2007). RR 4,044 million of capital commitments are denominated in foreign currencies, mainly Euro and Swiss francs.

(b) Tax and currency legislation

Russian tax and currency legislation is subject to varying interpretations, and changes, which can occur frequently. Management's interpretation of such legislation as applied to the transactions and activity of the Group may be challenged by the relevant regional and federal authorities, in particular the way of accounting for tax purposes of tariff imbalance, deductibility of certain expenses. Recent events within the Russian Federation suggest that the tax authorities may be taking a more assertive position in their interpretation of the legislation and assessments. As a result, significant additional taxes, penalties and interest may be assessed. Fiscal periods remain open to review by the authorities in respect of taxes for three calendar years preceding the year of review. Under certain circumstances reviews may cover longer periods.

As at 30 June 2008 management believes that its interpretation of the relevant legislation is appropriate and the Group's tax and currency positions will be sustained. Where management believes it is probable that a position cannot be sustained, an appropriate amount has been accrued for in these financial statements.

In addition, tax and other legislation do not address specifically all the aspects of the Group's reorganization related to reforming of the electric utilities industry. As such there may be tax and legal challenges to the various interpretations, transactions and resolutions that were a part of the reorganization and reform process.

(c) Legal proceedings

The Group is a party to certain legal proceedings arising in the ordinary course of business. In general those legal proceedings relate to unreasonable application of tariffs. In the opinion of management, there are no current legal proceedings or other claims outstanding that, upon final disposition, will have a material adverse effect on the financial position of the Group.

As at 31 December 2006 OAO Mosenergo held a 24,61% interest in OOO KB Transinvestbank. By 31 December 2007 as a result of litigations with former owners of the bank the share was increased up to 72.44 %. In accordance with the court decision the Group is to pay RR 957 million to the former owners

ОАО Мосэнерго

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)

(in millions of Russian Roubles)

of 47.83% interest in the bank. Therefore the provision in the amount of RR 957 million was accrued and included in accounts payable as at 31 December 2007 and 30 June 2008.

In March 2008 ООО «Agentstvo Pravovoi Informatsii Energetiki» (APIE) which provided services to ОАО Мосэнерго in relation to the above mentioned acquisition of additional share in ООО KB Transinvestbank filed a claim against ОАО Мосэнерго for RR 861 million. APIE claims that this amount was incurred by them with regard to the acquisition of share in ООО KB Transinvestbank. The claim is currently under consideration of the Arbitrage Tribunal at the non for profit Fund «Pravo i Ekonomika TEK». Management believes that the claim is unfounded and estimates the possibility of unfavorable outcome as not probable, therefore no provision was created.

(d) Compliance with covenants

The Group is subject to certain covenants related primarily to its borrowings. Non-compliance with such covenants may result in negative consequences for the Group including growth in the cost of borrowings and an ultimate declaration of default (see Note 16).

(e) Environmental matters

The enforcement of environmental regulation in the Russian Federation is evolving as is the enforcement posture of government authorities. The Group periodically evaluates its obligations under environmental regulations. As obligations are determined, they are recognised immediately.

Potential liabilities, which might arise as a result of changes in existing regulations, civil litigation or legislation, cannot be estimated but could be material. In the current enforcement climate under existing legislation, management believes that there are no significant liabilities for environmental damage.

(f) Guarantees

The Group issued guarantees for mortgaged loans of employees of RR 342 million as of 30 June 2008 (RR 345 million as of 31 December 2007). All loans are collateralised by the property of employees.

Note 28. Financial risks management

(a) Financial risk factors. The Company's activities expose it to variety of financial risks, including the effects of changes in foreign currency exchange rates, changes in interest rates and the collectibility of receivables. ОАО Мосэнерго does not have a risk policy in order to hedge its financial exposures.

(b) Currency risk. Power and heat produced by the Group is sold on the internal market of Russian Federation with prices fixed in the currency of Russian Federation. The company obtains foreign currency credits as well as signs import agreements on equipment delivery in foreign currency (USD, Euro and CHF). In connection with this the Group is exposed to currency risk.

Hence, the Group is subject to the foreign currency exchange risk. The financial condition of the Company, its liquidity, financing sources and the results of activities do not considerably depend on currency rates as the Group activities are planned to be performed in such a way that its assets and liabilities be denominated in the national currency.

US dollar change sensitivity analysis for six months ended 30 June 2008 (European Bank for Reconstruction and Development, International Finance Corporation loans)

If Rouble exchange rate in relation to US dollar decreased/(increased) by 6.78% and all other factors being equal, the change of profit after tax for three months ended 30 June 2008 would decrease/(increase) by 4 million.

Difference	45
Post-tax effect on profit	34

(c) **Interest rate risk.** The Group's operating profits and cash flows from operating activity are largely not dependent on the changes in market interest rates. The company obtains borrowings both with fixed and with floating rate and is subject to the risk of interest rate changes. The Group's significant interest bearing assets are disclosed in Note 16. The company obtains loans with floating rate, which are established on the basis of LIBOR and MosPrime rates.

Management performed sensitivity analyses of rates fluctuations based on expected forecasts of rates changes at the date of redemption of exchange commitments.

In case when LIBOR rate increased/(decreased) at 0.77% and MosPrime rate increased/(decreased) at 2% the profit after tax for three months ended 30 June 2008 would (decrease)/increase for RR 54 million.

OAo Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

In case when LIBOR rate increased/(decreased) at 0.2% and MosPrime rate increased (decreased) at 1.5% the profit after tax for three months ended 30 June 2007 would (decrease)/increase by RR 41 million.

With the purpose of interest risk reduction the Group makes the following arrangements:

- credit market monitoring to the effect of identifying favourable credit conditions;
- diversification of credit portfolio by attracting of borrowing assets both with fixed rates, and with floating rates.

For the purpose of the financial risks management by financing of the company's operating performance the credit portfolio was optimized. In 2006 the Group made two issues of obligations on total amount of RR 10 bln with the period of maturity 5 and 10 years that allowed the company to cancel short-term loans with higher interest rate.

(d) Credit risk. Credit risk – is the risk of financial loss for the Group in the case of non-fulfilment by the Contractor the obligations on the financial instrument under the proper contract. Financial assets on which the Company has the potential credit risk are represented mainly by the accounts receivable of buyers and customers (in amount of RR 3,520 million; 2007 – RR 4,691 million), other accounts receivable (in amount of RR 1,007 million; 2007 – RR 786 million), bank deposits (in amount of RR 2,000 million; 2007 – RR 8,000 million), cash (in amount of RR 7,146 million; 2007 – RR 11 136 million) and promissory notes (in amount RR 13,815 million; 2007 – RR 15,201 million) totalling to RR 28,988 million (2007 – RR 39,815 million). Although collection of receivables could be influenced by economic factors, management believes that there is no significant risk of loss to the Company beyond the provision for impairment of receivables already recorded.

For OAO Mosenergo customers there is no independent rating and therefore OAO Mosenergo assesses the credit quality of the customer at the contract execution stage. The Group takes into account the customer's financial position and its credit history. The Group monitors the existing receivables on the permanent basis in the profile departments and takes actions regularly to collect it.

Although collection of receivables could be influenced by economic factors, management believes that there is no significant risk of loss to the Group beyond the provision for impairment of receivables already recorded.

The cash has been deposited in the financial institutions with no more than minimal exposure to the default risk at the time of account opening. The Board of Directors approved the list of banks for deposits, as well as rules for the placement of deposits. Moreover, the Company constantly evaluates the financial condition, ratings assigned by independent agencies, background and other factors.

The table in Note 13 shows the deposits with banks of the major counterparties and their ratings at the balance sheet date.

(e) Liquidity risk. The Company's liquidity risk management includes maintaining the sufficient cash position and the availability of financing to support the Company's operational activity.

To assess the liquidity risk OAO Mosenergo applies the ratio analysis method, including assessment of liquidity ratios, accounts receivable and payable turnover, determination of the percentage of inventories in the current assets, and percentage of current assets in the total assets.

In accordance with the Company's internal regulatory documents OAO Mosenergo prepares forecasts of cash flow movements for various periods. For the purpose of operating decision-making, OAO Mosenergo prepares the annual budget broken down by quarters, quarterly budget and monthly budget broken down by days.

To secure the sufficient financing of its operations OAO Mosenergo raise credits in form of overdraft, promissory notes.

The table below analyses the Group's financial liabilities (including interest accrued) into relevant maturity groupings based on the remaining period at the balance sheet to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12

OAO Mosenergo

(f) Reconciliation of Classes of Financial Instruments with Measurement Categories

For the purposes of measurement, IAS 39, Financial Instruments: Recognition and Measurement, classifies financial assets into the following categories: (a) loans and receivables; (b) available-for-sale financial assets; (c) financial assets held to maturity and (d) financial assets at fair value through profit or loss ("FVTPL").

The following table provides a reconciliation of classes of financial assets with these measurement categories as of 30 June 2008:

	<i>Loans and receivables</i>	<i>Held to maturity</i>	<i>Total</i>
ASSETS			
<i>Trade and other receivables (Note 12)</i>			
Trade receivables	3,520	-	3,520
Other receivables	1,007	-	1,007
<i>Held to maturity investments (Note 10)</i>	-	13,815	13,815
<i>Other current assets (Note 14)</i>			
Bank deposits	2,000	-	2,000
<i>Cash and cash equivalents (Note 13)</i>	7,146	-	7,146
TOTAL FINANCIAL ASSETS	13,673	13,815	27,488
NON-FINANCIAL ASSETS			154,363
TOTAL ASSETS			181,851

The following table provides a reconciliation of classes of financial assets with these measurement categories as of 31 December 2007:

	<i>Loans and receivables</i>	<i>Held to maturity</i>	<i>Total</i>
ASSETS			
<i>Trade and other receivables (Note 12)</i>			
Trade receivables	4,691	-	4,691
Other receivables	786	-	786
<i>Held to maturity investments (Note 10)</i>	-	15,201	15,201
<i>Other current assets (Note 14)</i>			
Bank deposits	8,000	-	8,000
<i>Cash and cash equivalents (Note 13)</i>	11,136	-	11,136
TOTAL FINANCIAL ASSETS	24,613	15,201	39,814
NON-FINANCIAL ASSETS			145,211
TOTAL ASSETS			185,025

All of the Group's financial liabilities as at 30 June 2008 and as at 31 December 2007 are carried at amortised cost.

OAO Mosenergo

Notes to the Consolidated Interim Financial Statements for the six months ended 30 June 2008 (Unaudited)
(in millions of Russian Roubles)

Note 29. Capital risk management

Capital risk management relates to the compliance with the Russian legislation and credit policy implementation to maintain an optimal capital structure and reduce the cost of capital.

The following capital requirements have been established for joint stock companies by the legislation of Russian Federation:

- share capital can not be lower than 1,000 minimum shares on the date of the company registration;
- if the share capital of the entity is greater than statutory net assets of the entity, such entity must decrease its share capital to the value not exceeding its net assets;
- if the minimum allowed share capital is greater than statutory net assets of the entity, such entity is subject to liquidation.

As at 30 June 2008, the Group has been in compliance with the above share capital requirements.

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings, as shown in the consolidated balance sheet, less cash. Total capital is calculated as equity, as shown in the consolidated balance sheet, plus net debt.

During the six months ended 30 June 2008, the Group's strategy, which was unchanged from 2007, was to maintain a gearing ratio not exceeding 50% and a credit rating not below 2B (Standard & Poors). The gearing ratios at 30 June 2008 and at 31 December 2007 were as follows:

	<u>30 June 2008</u>	<u>31 December 2007</u>
Total borrowings	16,943	17,605
Total equity	136,424	135,660
Gearing ratio	<u>12.4%</u>	<u>12.9%</u>
