

Certain statements in this presentation are "forward-looking statements" within the meaning of the U.S. federal securities laws and are intended to be covered by the safe harbors created thereby.

These forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from those expressed or implied by these forward-looking statements.

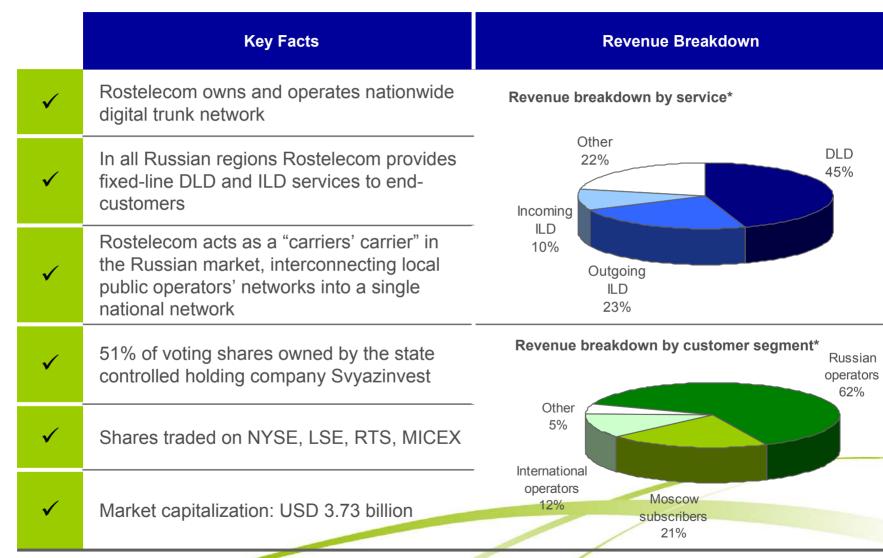

These risks include the risk of changes the Company's operations and business prospects, the general financial and economic circumstances, relating to regulation of the Russian telecommunications industry and the Russian legislation; the competition and other risks.

For a more detailed discussion of these and other factors, see the Company's Annual Report on Form 20-F for its most recently completed fiscal year and the Company's other public filings with The U.S. Securities and Exchange Commission. Many of these factors are beyond the Company's ability to control or predict. Given these and other uncertainties, the Company cautions not to place undue reliance on any of the forward-looking statements contained herein or otherwise.

The Company does not undertake any obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events, except as maybe required under applicable the U.S. federal securities laws.

Rostelecom at a Glance

^{*} In accordance with 2005 FY RAS results

Nationwide Network Underpins Rostelecom's Competitive Market Position

Developed trunk network underlies the Company's competitive advantages

Most extensive and sophisticated network infrastructure among Russian operators

- √ almost 200,000 km in length
- ✓ points of presence across entire Russian Federation
- ✓ points of presence in London, Stockholm and Frankfurt
- √ 93% digitalized in channel-kilometers
- √ 100% digitalized in switching capacity

Most reliable traffic transmission route in Russia

Low Repair & Maintenance expenses

High service recognition from local and international operators

Competitive transit rates

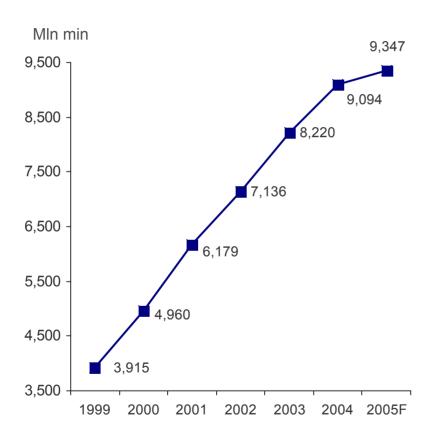

Rostelecom has built the most advantageous technological position for providing long-distance services under the new regulatory requirements

 \checkmark

Continued Traffic Growth on Rostelecom's Network

Rostelecom's domestic long-distance (DLD) traffic dynamics

Rostelecom's international long-distance (ILD) traffic dynamics

DLD traffic growth of 3-7% p.a.

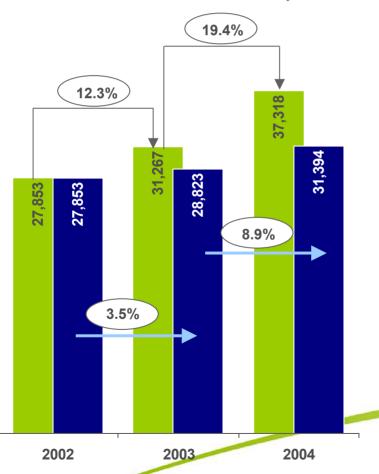

Incoming ILD traffic growth at 15-20% p.a., outgoing ILD – at 10-15% p.a.

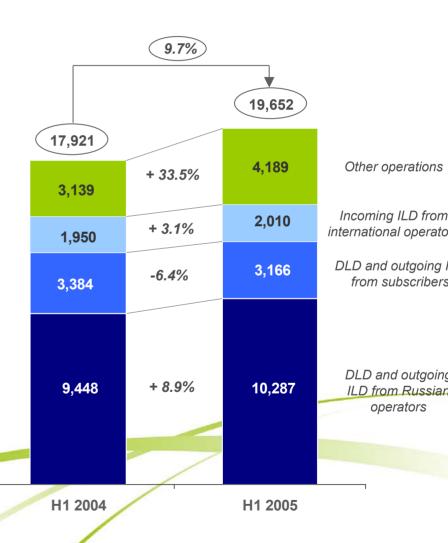

Rostelecom's Top-Line Growth Strategy Is Yielding Results

Total revenue (IFRS), RUR mln

- Revenue
- Revenue excl. effect of new settlement system

Revenue (IFRS) by segment, RUR mln

Change in Rostelecom's Market Status: Getting Direct Access to End-Users throughout Russia

	Rostelecom's market presence until 2006: primarily wholesale operator	Rostelecom's market presence from 2006: major Russian LD retail operator	
End-users market	Direct long-distance service provider in Moscow Provider of DLD and ILD services to MGTS' subscribers only Provider of channel capacity to Russian corporate clients	 Direct long-distance service provider in all Russian regions Provider of DLD and ILD services to subscribers of local network operators throughout Russia Provider of channel capacity to Russian corporate clients 	
Russian operators market	 Nationwide carrier's carrier and capacity provider Primarily provider of DLD and outgoing ILD traffic transit service to operators Provider of channel capacity to operators 	 Nationwide carrier's carrier and capacity provider Primarily provider of channel capacity to operators Provider of traffic transit services 	
International operators' market	Provider of incoming ILD traffic transit, non-switched international traffic transit and channel capacity		
Other markets	Provider of equipment servicing, intelligent network services etc.		

Evolving Rostelecom's Business Model to Seize Opportunities in Liberalized Market Environment

	Until 2006 – primarily wholesale LD operator	From 2006 – primarily retail LD operator	Rostelecom traffic volume by customer segment Traffic transit from international operators
Main contributor to top-line	LD traffic transit services to operators	LD calls provision to subscribers of local network operators	Direct traffic from subscribers 14,000 LD traffic transit from Russian operators 12,000
Revenue recognition	Transit and termination rate from operators The whole amount of end-user tariff in Moscow	The whole amount of end-user tariff across Russia	10,000 8,000 6,000 4,000
Billing and customer service	B2B (in-house)B2C in Moscow (in-house)	 B2B (in-house) B2C in Moscow (in-house) B2C (outsourced in regions) 	2,000 2000 2001 2002 2003 2004 2005F 2006F New interaction system – expanded customer base and change in traffic split

New Settlement System Effects on Rostelecom's Profit & Loss Statement

Upward effect on revenues

- Rostelecom recognizes as revenue the total amount of the enduser tariff
- ✓ Changes in revenue composition: decrease in revenues from local operators and increase in revenues from subscribers

Upward effect on operating expenses

- ✓ Rostelecom's payments to local operators increase:
 - initiation charge
 - termination charge paid for incoming ILD traffic termination
 - additional service charges to local operators
- ✓ Additional tax expense in the form of the Universal Service Fund tax (1.2% of revenues, collected from subscribers for LD services)

Effect on margins

✓ Negative effect on EBITDA margin

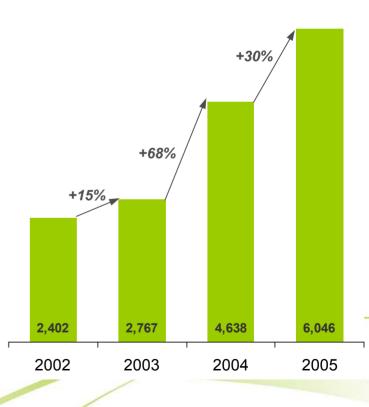

Operators Market: Sharp Increase in Revenue from Leased Line Services Driven by Booming Demand

Strong growth in demand and competitive prices boost revenues from leased line services

- ☑ Unique scale and capacity of Rostelecom's nationwide network
- ☑ Strong growth in demand for leased line services across Russia
- ☑ Further expansion of flexible multiplexers network
- **☑** High quality of service and brand awareness

- ✓ Rostelecom enjoys strong position in the leased line market
- ✓ Sustained growth in revenues

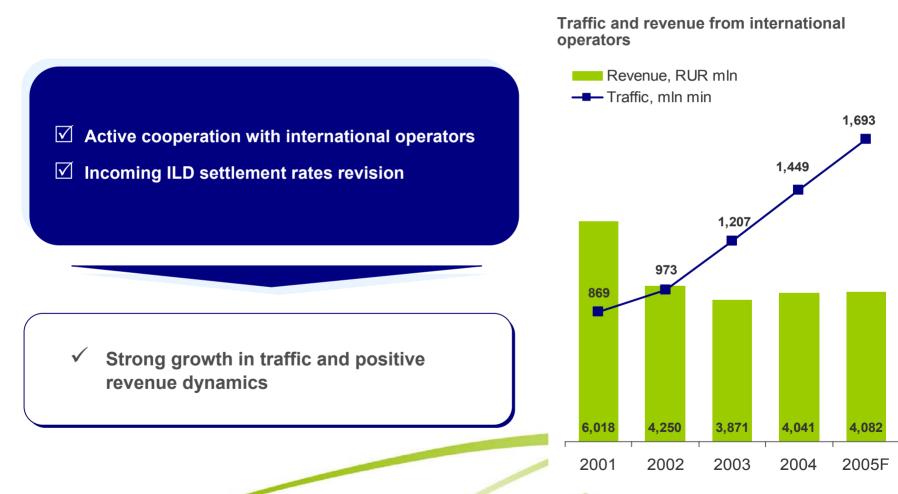

International Market: Stable Revenues on the Back of Healthy Traffic Growth

Strong relationships with international operators underpin Rostelecom's leading position in the international market

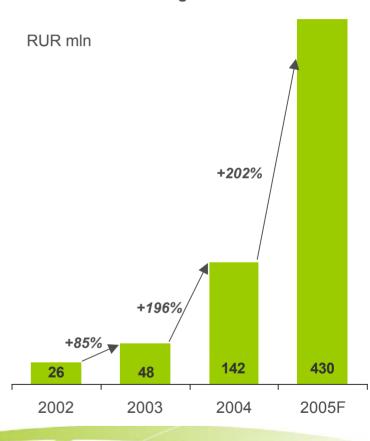

Value Added Services: Enhancing Competitiveness by Catering to Corporate Customers' New Needs

- ☑ Effective promotion of existing Intelligent Network Services (INS):
 - Free-phone (8-800-200; 8-800-100)
 - Televoting (8-803-200)
 - Prepaid card
- ✓ Active development of new services:
 - 8-802/8-805/8-806/8-809 services to be launched

- ✓ Rostelecom competitive player in the VAS market
- ✓ Surge in INS revenues

Entry into Europe–Asia Transit Market Will Strengthen Competitive Potential in the Medium Term

Opportunities

Europe-Asia traffic is expected to continue its 20 to 30% annual growth trend

Existing undersea lines of competitors will not be able to accommodate growing capacity needs

Competitors' undersea lines have certain drawbacks, including limited capacity, large length, poor quality & reliability

Rostelecom strengths

Rostelecom's high-technology terrestrial countrywide network represents the shortest traffic transit route between Europe and Asia

We offer better quality and reliability of routing along with competitive pricing

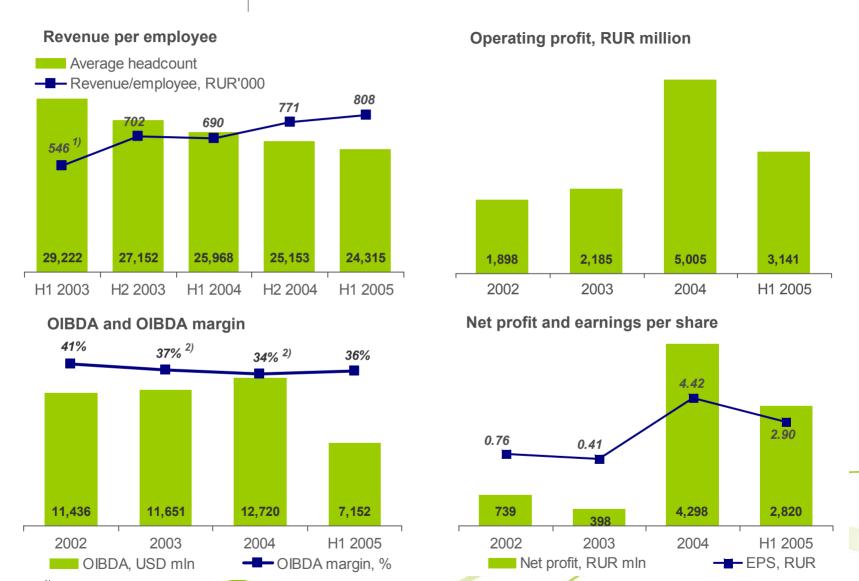

Flexible solutions to customers needs - protocol insensitive technology enables to carry any combination of voice, data, video and IP applications

Great potential of further development of TEA:

- Capacity expansion of Rostelecom's network to Chinese border underway
- Organization of point of presence in New York underway

Steady Efficiency Gains and Profit Performance Strengthen Rostelecom's Financial Position

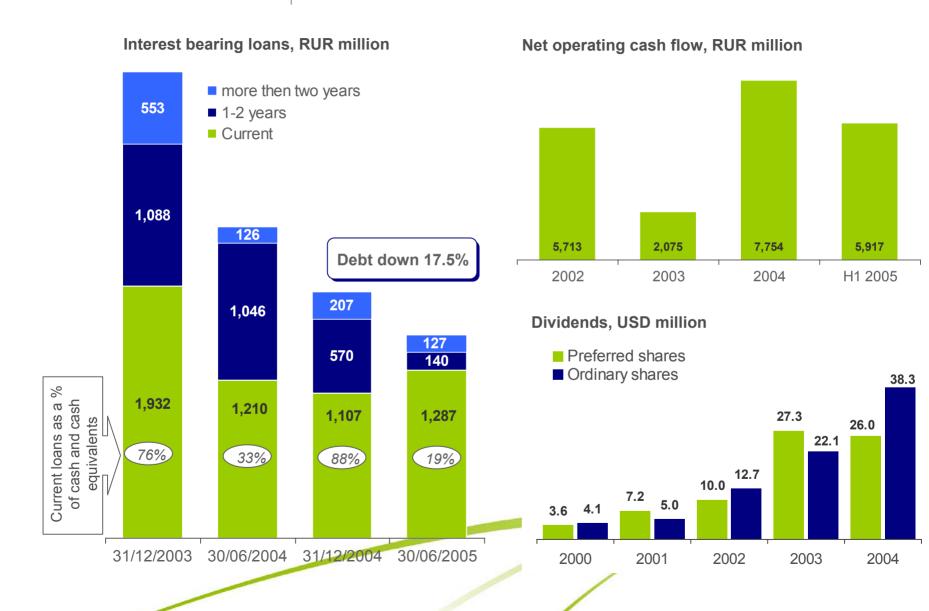

¹⁾ Adjusted to the new settlement system

²⁾ Decline in OIBDA margin is due to the introduction of the new settlement system

Strong Balance Sheet and Steady Positive NOCF Generation Underlie Financial Flexibility

Capital Expenditure Program to Enhance Rostelecom's Competitive Advantages

Investment priorities

Capacity expansion

Implementation of unified billing system

Construction of new fiber-optic lines

Secondary network modernization, development of new services

Today's Priorities Focus on Competitive Strength and Efficiency

Traditional LD voice transit services to end-users

- ✓ Further growth in traffic in the Russian market through active marketing efforts
- ✓ Strengthening competitive position in Moscow

Advanced technological solutions for corporate clients

- ✓ Active promotion and launch of new intelligent network services
- ✓ Expansion of multi-service network

Operators market

- ✓ Active promotion of Europe-Asia traffic transit service
- Strengthening leadership in the international market
- ✓ Further trunk network modernization and expansion

Further operational efficiency enhancement

- ✓ Disposal of underperforming and non-core assets
- Business processes and organizational structure optimization

Management's key goal – to secure Rostelecom's competitive position in the liberalized market

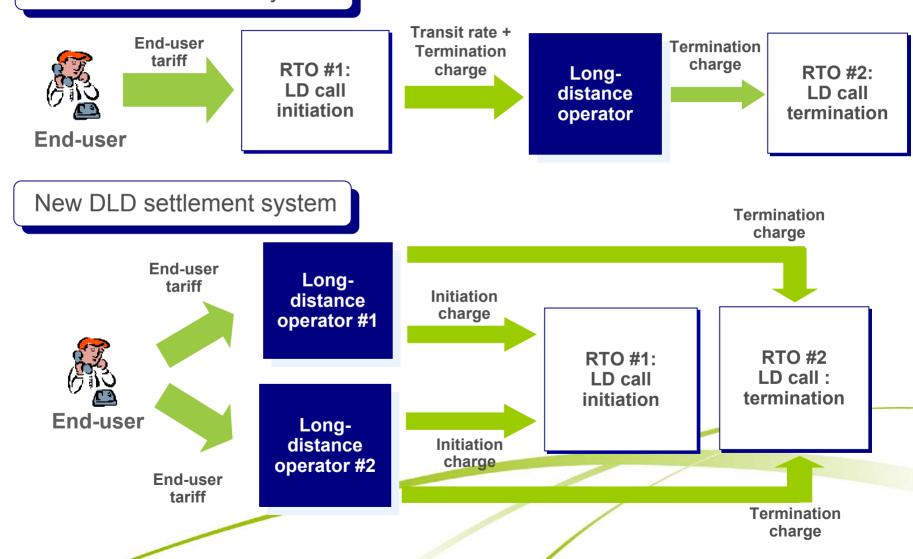

APPENDIX

Main Effect of the New Settlement System – Direct Revenue Recognition from End-Users

Old DLD settlement system

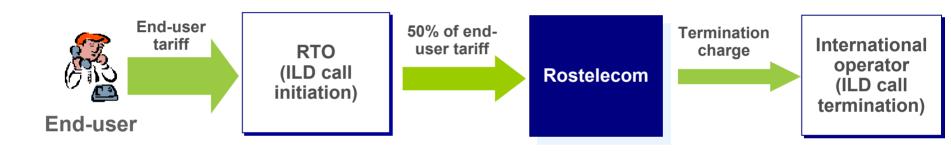

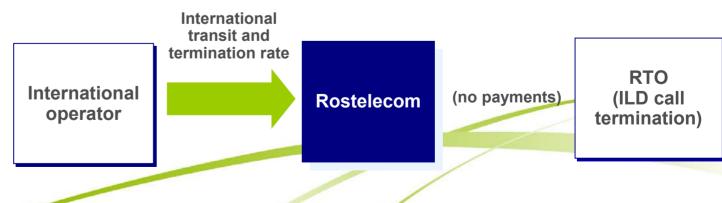

On January 1, 2006 Rostelecom Started Operating Under the New ILD Settlement System

Old settlement system

International LD services to Russian end-users

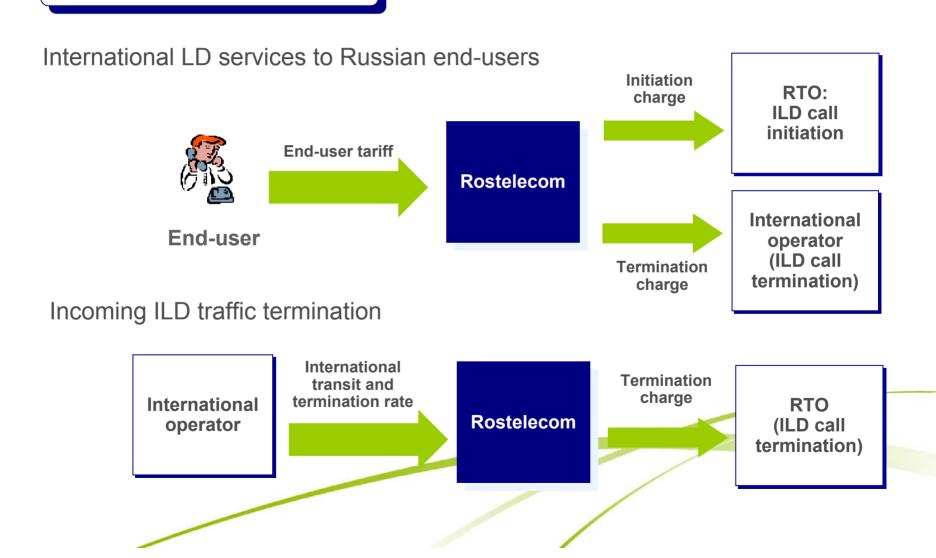

Incoming ILD traffic termination

On January 1, 2006 Rostelecom Started Operating Under the New ILD Settlement System

New settlement system

H1 2005 IFRS Financial Highlights: Robust Increase in Profits on Top-line Growth and Efficiency Gains

RUR mln	H1 2005	H1 2004	Change, %
Local operators	12,285	10,732	14.5
Subscribers	4,112	4,368	-5.9
Foreign operators	2,302	2,204	4.4
Other	953	617	54.5
