2.4. Objectives of the issues and information on the use of funds raised through placement of issuing securities.

The Company did not place any securities in the reporting quarter.

2.5. Risks related to acquisition of placed issuing securities or those being placed.

2.5.1. Industry risks.

In the course of its business, the Company incurs a number of industry risks, including hydrocarbon prices, industry competition, and technological risks related to specific features of the production process.

World and domestic oil prices remain the most important factor affecting the Company's financial and economic performance.

The major factors shaping world hydrocarbon prices are:

- the rate of economic development of the largest oil consuming countries;***
- global and regional demand and supply balance;***
- geopolitical situation in oil producing regions;***
- weather conditions in oil and petroleum products consuming countries;***
- price for and availability of alternative energy sources.***

Domestic oil and petroleum products prices are subject to the following:

- transport infrastructure development;***
- diversification of export deliveries to new markets;***
- taxation and export regulations.***

Factors which determine prices for energy resources are beyond the Company's control. If the price trends change, the Company is in a position to redirect commodity flows, reassess its investment projects, and reduce costs.

The Company is competing with other oil companies to obtain field development and production licenses, acquire assets, and gain access to the pipeline system and refining capacities.

Prospecting, field development, oil and gas transportation, processing, and sales are a complex and capital-intensive process fraught with technological and environmental risks. The Company minimizes technological risks by strictly adhering to industry requirements and standards and introducing new technology at all stages of the production process.

2.5.2. Country and regional risks.

The Company's country and regional risks include political, economic, and social risks existing in Russia.

The stable social and political situation and better economic conditions in Russia mitigate the effects of country risks on the Company's operations.

The Company operates in 16 constituent territories of the Russian Federation in Western and Eastern Siberia, the central and northwestern parts of the country. Although these territories are not prone to natural disasters, the Company's oil production operations are concentrated in harsh climate which may affect the Company's general performance.

2.5.3. Financial risks.

The Company is engaged in foreign economic activity and earns a significant part of its income from export of crude oil and refined products to

foreign markets. Since export contracts typically use the US Dollar as the main currency for payments, any changes in the national currency/USD rate may substantially influence the Company's financial performance.

Interest rate risks have less impact on the Company's operations owing to its strong financial position, absence of heavy debts, and availability of cash assets necessary to carry out strategic projects. However, changes in interest rates related to the reevaluation of country risks may entail changes in the Company's requirements for investment project returns.

An essential part of the Company's spending depends on the general price level in Russia, in particular, tariffs of natural monopolies, prices for raw materials, supplies, machines and equipment, and is subject to the risk of rising inflation.

The Company does not hedge financial risks but takes into account their impact on its operating and financial activities when developing investment projects, financial plans and budgets.

2.5.4. Legal risks.

Changes in exchange regulations, tax legislation and subsurface use requirements, customs regulations and tariffs, licensing requirements for the Company's core activities or for rights to use objects limited in commerce (including natural resources) may affect the Company's operations.

2.5.5. Risks related to the issuer's operations.

Key risks that may deeply affect the Company's operations include oil price trends on global and domestic markets, transport infrastructure development in the Russian Federation, higher natural monopoly tariffs and prices for engineering and metallurgical products, and more stringent tax regime.

2.5.6. Bank risks.

The Company is not exposed to such risks as it is not a lending institution.

In carrying out its activities, the Company seeks to fulfill its obligations and minimize the impact of risks.

Summary of the issuer's establishment and development: ***The name of oil and gas producing company "Surgutneftegas" goes hand in hand with the discovery of Big Oil in Western Siberia.***

Back in March 1964, the first group of oilmen set foot on Surgut ground. Local climate and terrain did not let people lay out roads, drill wells and construct pipelines and field facilities in a conventional way. In fact, the oil producing division "Surgutneft" was a real testing ground where various technologies and methods were created and applied to develop fields in severe geological and climatic conditions. The division proved to be a true forge of skilled workers for the whole Western Siberia. Many oil and gas producing companies, such as Yuganskneft, Megionneft, Pravdinskneft, Kogalymneftegas, and Noyabrskneftegas, were once part of Surgutneft and later became separate entities.

Construction of the refinery in the city of Kirishi, Leningradskaya Oblast, began in 1961. As was the common practice of that time, the refinery was an All-Union Top Priority Project, and it indeed was built at a rapid pace: as early as December 1965, the refinery received the first oil tank car, and just four months later, in March 1966, it became fully operational. After it was commissioned, the refinery helped reverse oil products shortage, which hindered economic development of the North-West of Russia. When the Yaroslavl – Kirishi pipeline was put into service in 1969, the refinery started to process oil delivered from Western Siberia fields. Located close to the Baltic ports, it benefited from exporting oil products to Scandinavia and Northern Europe.

In October 1977, the oil producing division "Surgutneft" was granted the status of the diversified production association "Surgutneftegas."

On March 19, 1993, the Council of Ministers of the Russian Federation passed a resolution to form Open Joint Stock Company "Neftyanaya Kompaniya "Surgutneftegas" (AOOT "NK "Surgutneftegas"). In the same year, PO "Surgutneftegas" transformed into AOOT "Surgutneftegas" and the Kirishi refinery transformed into AOOT "KNOS" were merged into Open Joint Stock Company "NK "Surgutneftegas".

Under the Soviet system, the Company's subsidiaries, namely Novgorodnefteprodukt, Kaliningradnefteprodukt, Lennefteprodukt, Pskovnefteprodukt, and Tvernefteprodukt, were part of RSFSR Glavneftesnab (Main Department of Oil Supplies) and supplied the corresponding regions with petroleum products. In 1993, they were also converted into open joint stock companies and incorporated in AOOT "NK "Surgutneftegas".

1996 saw the first stage of corporate structure optimization when AOOT "NK "Surgutneftegas" was formed as a vertically integrated company.

In 1997, the Company launched American Depositary Receipt 1 Level program for ordinary shares of OJSC "Surgutneftegas".

In 1998, it launched sponsored American Depositary Receipt 1 Level program for preferred shares of OJSC "Surgutneftegas".

In 2000, the Company embarked on the final stage of share consolidation, which made the oil producing entity OJSC "Surgutneftegas" a parent company of Surgutneftegas Group.

Corporate purpose: ***the main corporate objective is profit earning.***

4.5. Oil industry trend analysis.

Oil and gas industry performance results for the last 5 years (2002-2006) demonstrate high growth rate of hydrocarbon production, refinery segment development and sales market expansion.

The main drivers behind the development of Russian oil and gas industry were favorable price environment of oil and oil products markets and high demand for hydrocarbon materials.

Russian oil output grew in 2002-2006 by 26% to 480 mn tons with the Russian share increased from 10.7% to 11.6%. The main factors for higher oil output are new fields put onstream, application of advanced technologies and

production stimulation at current fields. But since 2005 the sector witnessed oil output decline: in 2002 the sector demonstrated 9.2% growth rate against moderate 2.2% in 2006.

Russian gas output grew in 2002-2006 by 10.2% and amounted to 656 bcm in 2006. Oil companies were the main contributors to increased gas output. Their share in Russian gas production for the period grew from 5.7% to 8.9% and gas output produced by these oil companies increased to 72%.

Russian refining segment demonstrates a tendency to increase the conversion depth and plants capacity through upgrading production facilities. In 2002-2006 oil refining output at Russian refineries grew by 18% with conversion rate increased by 1.7% which was encouraged by high demand for refined products.

Generally, the Russian oil and gas industry demonstrates the following tendencies: continued favorable price environment at external and domestic markets, oil output decline, higher gas output at integrated oil companies, increased output and depth of conversion at refineries.

In 2002-2006, Surgutneftegas was one of the leaders of the Russian oil industry. The Company increased crude oil production by 33%, gas production – by 10%, oil refining output – by 36% and gas – by 89%.

In 2006, Surgutneftegas accounted for 13.6% of the total Russian oil production, 2.2% of the country's gas production and 9.2% of oil refining.

Oil output in 2006 amounted to 65.6 mn tons, gas production – 14.6 bcm and oil refining – 20.2 mn tons.

The Company leads the sector in terms of prospecting works and development drilling.

4.5.1. Analysis of the factors influencing the Issuer's activity

In 3Q2007, the Company's business was mainly influenced by favorable oil and oil products price environment with a continued demand for hydrocarbon materials. In 3Q2007, world price for Brent and domestic oil price reached its maximum for the reporting year.

In 3Q2007, the Company produced 16.301 mn tons of oil which is higher than the oil output for the previous quarter of 2007..

Gas production amounted to 3.545 bcm and gas processing in the reporting quarter rose by 20% against 3Q2006 to 1.7 bn cub meters.

4.5.2. The Issuer's competitors

The main Company's competitors are major Russian oil companies such as LUKOIL, Rosneft, TNK-BP, Gasprom, Slavneft and Tatneft which are engaged in oil and gas production, oil, gas and oil products sales

Key competitive strengths of the Company in hydrocarbon production include sound resource base in Western and Eastern Siberia and availability of advanced equipment and technologies for oil production which ensure production of hard to recover deposits and enhanced oil recovery at fields.

The tax amount to be withheld from the income of the taxpayer-recipient of dividends is calculated on the basis of the total tax amount and a fraction of each taxpayer in the total amount of dividends.</i>	<i>Double taxation relief. International treaties of the RF require foreign organizations to provide the tax agent who pays income with a confirmation that such foreign organization has a permanent location in a country with which the RF concluded an international tax treaty (agreement) governing taxation issues. Such confirmation is to be certified by relevant authorities of that foreign state. If the foreign organization entitled to draw income furnishes such confirmation to the tax agent who pays income before the income payment date, such income is either exempt from taxes at the source of payment or taxes are withheld at the source of payment at lower rates.
