Information on auditor's membership in self-regulating auditor's organizations

Full business name: **Institute of Professional Auditors of Russia**

Address: **office 812, 813, bld. 1, 14 Nametkin Str., Moscow, 117420, Russia**

Supplementary information:

Date of entering the data on the self-regulating auditor's organization in the register:

October 30, 2009 (Order of the Ministry of Finance of the Russian Federation No. 514 of October 30, 2009);

Registered with the state register of self-regulating auditors' organizations under registration entry No. 02.

Fiscal year (years among the last five complete financial years and the current fiscal years) for which the Auditor carried out an independent audit of accounting records and financial (accounting) statements of the Issuer

Accounting (financial) reporting, year	Summary accounting (financial) reporting, year	Summary accounting (financial) reporting, year
2009		
2011		

Factors that can affect the Auditor's independence from the Issuer including information on existing substantial self-interest of the auditor (officers of the Auditor) in the activities of the Issuer (officials of the Issuer).

Participatory shares of the Auditor (the Auditor's officials) in the authorized (reserve) capital (share fund) of the Issuer: **the Auditor has no participatory share in the authorized capital of the Issuer;**

Provision of borrowed funds to the Auditor (the Auditor's officials) by the Issuer: **the Issuer has not provided any borrowed funds to the Auditor (the Auditor's officials);**

Any close business relations (participation in the promotion of goods (services) of the Issuer, participation in joint entrepreneurial activities, etc.) and any sibling connections: **the Issuer has no close business relations or kinship with the Auditor;**

Information on the Issuer's officials being simultaneously the Auditor's officials (the Auditor): **the Issuer's officials are not simultaneously the Auditor's officials.**

Other factors which may influence the Auditor's independence from the Issuer: **there are no other factors.**

Measures taken by the Issuer and the Auditor to decrease the influence of the said factors:

The Auditor is not a member of the Issuer's shareholding structure, the Issuer is not a member of the Auditor's shareholding structure, the Issuer's chief accountant is not the Auditor's

employee, no loan/credit contracts have been made between the Auditor and the Issuer.

The Issuer and the Auditor will act (acted) under the applicable law, in particular in accordance with Federal Law No. 307-FZ of December 30, 2008 “On Audit Activities”, p. 1 of cl. 8 of which states that audit cannot be performed:

1) by audit organizations the heads and other officials of which are the founders (stockholders) of the audited parties, their officials, accountants and other persons responsible for the organization and keeping of the accounting records and preparation of the accounting (financial) statements;

2) by audit organizations the heads and other officials of which have kinship with (are parents, spouses, siblings, children or siblings, parents and children of spouses of) the founders (stockholders) of the audited parties, their officials, accountants and other persons responsible for the organization and keeping of the accounting records and preparation of the accounting (financial) statements;

3) by audit organizations with respect to the audited parties being their founders (stockholders), with respect to the audited parties for which these audit organizations are the founders (stockholders), with respect to the subsidiaries, branches and representatives offices of the said audited parties, as well as with respect to organizations having common founders (stockholders) with this audit organization;

4) by audit organizations, individual auditors providing audit services for restoration and keeping of accounting records and for preparation of the accounting (financial) statements to physical persons and legal entities for three years immediately preceding the audit, with respect to such persons;

5) by the auditors being the founders (stockholders) of the audited parties, their heads, accountants and other persons responsible for the organization and keeping of the accounting records and preparation of the accounting (financial) statements;

6) by the auditors closely relating to the founders (stockholders) of the audited parties, their officials, accountants and other persons responsible for the organization and keeping of the accounting records and preparation of the accounting (financial) statements (parents, spouses, siblings, children, as well as siblings, parents and children of their spouses).

The basic measure taken by the Issuer to prevent the dependency of the Issuer and the Auditor on each other is the process of thorough examination of the candidature of the Auditor for the latter’s independence from the Issuer. The Auditor is fully independent of the Issuer’s management bodies in accordance with Article 8 of Federal Law No. 307-FZ of December 30, 2008 “On Audit Activities”; the amount of the Auditor’s fee does not depend on the results of the audit conducted.

Procedure for selection of the Issuer's Auditor

Tendering procedure for the selection of auditor and its general conditions:

The Issuer's auditor was selected by Tender. To take part in Tender, audit organizations had to meet the following requirements:

- not to be under the liquidation;
- not to have the decision ordering the suspension of activity issued in compliance with the Code of Administrative Offences of the Russian Federation at the date of the approval of the application for Tender;
- not to have unsettled tax liabilities, unpaid levies and other outstanding statutory payments to all budget levels or to state non-budgetary funds from the previous calendar year, the amount of which exceeds twenty-five percent of the applicant's book value of assets as appears on financial statements for the most recent closed reporting period;
- not to meet the conditions (in respect to the Company and SDCs of IDGC Holding, JSC) listed in the paragraph 1 of the Article 8 of the Federal Law “On Audit Activities” of December 30, 2008 No. 307-FZ.

Procedure for nominating auditors for appointment by the Meeting of Shareholders (stockholders) including management body authorized to make such decision:

In accordance with subparagraph 11 of paragraph 10.2 of the Company's Articles of Association, the candidature of the Auditor shall be approved by the General Meeting of Shareholders of IDGC of Volga, JSC.

By the decision of the Annual General Meeting of Shareholders of IDGC of Volga, JSC that took place on June 10, 2011 (Minutes No. 4/2011 of June 14, 2011) "Nexia Pacioli" Limited Liability Company was approved as the Auditor of the Issuer.

The Issuer's Auditor shall carry out an audit of the Issuer's financial and business activities in compliance with the laws of the Russian Federation and under concluded contract.

Information on the works which are carried out by the auditor within special auditor tasks is specified: The works which are carried out by the auditor within special auditor tasks, in the reporting period weren't carried out.

The order of definition of amount of remuneration of the auditor is described, the actual amount of remuneration, paid by the issuer to the auditor is specified following the results of the last complete fiscal year for which the auditor carried out independent verification of the accounting (financial) reporting of the issuer, information on existence delayed and back payments for the services rendered by the auditor is provided:

The amount of fee of the auditor confirmed by annual General meeting of shareholders of the issuer for obligatory annual check and confirmation of annual financial statements of the issuer, is defined and affirms Society Board of directors according to item 24.9. Art. 24 and subitem 14 of item 15.1 of Art. 15 of the Charter of Society.

Information on existence delayed and back payments for the services rendered by the auditor is provided: Delayed and back payments for the services rendered by the auditor are absent.

2.3.3. Issuer's liabilities for collateral pledged to third parties

Units, thousand RUR

Name of item	2012
Total amount of obligation of the Issuer from the providing, given to them	6772
Total amount of obligation of the third parties on which the Issuer provided taking into account limited liability of the Issuer according to such obligation of the third party, defined proceeding from conditions of providing and the actual rest of debt on the obligation of the third party	0
Including in the form of pledge or the guarantee	0

Obligations of the issuer from the providing provided from start date of the current fiscal year and to an expiry date of reporting quarter to the third parties, including in the form of pledge or the guarantee, components not less than 5 percent from balance cost of assets of the issuer on an expiry date of the last complete reporting period previous providing of providing: *the specified obligations in this reporting period didn't arise.*

2.3.4. Other liabilities of the Issuer

The Issuer does not have other liabilities not recognized on its balance sheet which can substantially affect its financial standing, liquidity, financing sources and conditions of their use, business performance and expenses

2.4. Risks involved in acquiring of issuable securities to be placed (placed)

The Issuer's risk management strategy:

Acquiring issuable securities by the Issuer involves certain risks that may result in incurring damages by their holders related to loss of income or invested funds as well as to loss exceeding investment amounts.

This subsection contains information on risk factors related to acquiring issuable securities by the Issuer. The list of factors presented is not limiting and only reflects Issuer's own opinion and judgments.

The Issuer considers risk management as one of the crucial elements of strategic management and internal control. The Issuer's risk management policy covers both possible adverse events (threats) and favorable events (opportunities). The Issuer constantly identifies, assesses and controls threats and opportunities, adjusts its activities as to minimize possibility and consequences of potential threats and to realize opportunities, and informs shareholders and other concerned persons of such factors.

The Issuer's risk management policy is aimed not at risk elimination but at increasing possibility of achieving strategic goals and reducing possibility of occurrence and extent of possible loss. For these purposes the Issuer establishes acceptable risk levels for each category of material risks.

The Issuer's risk management policy accounts for correlation between risks of different categories. To assess their joint impact on its activities the Issuer applies a unified approach to assessment of finance, operational and other risks.

Within the framework of the risk management policy the Issuer considers not only shareholders' interests but also possible effect of its activities on other concerned persons.

Main tasks of the Issuer's risk management policy are:

- ensuring compliance with the requirements of due corporate governance practices requiring the Issuer to pay special attention to risk tracking, monitoring and management and due disclosure of information on such issues;

- preventing situations threatening Company's strategic goals and ensuring relevant protection measures;

- ensuring coordination and integration of risk management processes relating to different aspects of business activities with the purpose of general improvement of Company management effectiveness;

- ensuring use of new opportunities for increasing value of Issuer's assets and profitability in the long-term.

The Issuer will use the best efforts to minimize the effect of adverse changes in case of their occurrence.

The Issuer's risk management system is interlinked with the process of strategic and operational planning as well as with the budgeting procedure and is used for making the most effective and economical decisions by the Issuer's management bodies.

The Risk Management Policy of IDGC of Volga, JSC approved by the resolution of the Company's Board of Directors (minutes No.20 dated June 18, 2010) is the procedural and institutional base for the Issuer's risk management system functioning. This document sets the key principles for organization, implementation and control of risk management processes at IDGC of Volga, JSC. The Policy provides for the top-priority actions to be taken for the purpose of establishing the risk management system.

An analysis of the most essential risks that may affect the Issuer's activities is presented below in paragraphs 2.4.1 – 2.4.5. In case that one or several of them occur the Issuer will take all possible measures to minimize adverse effects of their occurrence. To neutralize a part of risks the Issuer will take a range of protective actions. A plan of possible measures to be taken by the Issuer in case of occurrence of one or another risk is also developed.

However, it should be noted that the Issuer leaves open the possibility of existence of other risks including those that the Company is not aware of at the moment or considers insignificant. Previous elaborating adequate measures for response to such risks is embarrassed by the uncertainty of situation development and the scope of actions taken will rather depend on specifics of the conditions created in each particular case. Along with this the Issuer cannot guarantee that actions aimed at overcoming of such adverse changes occurred will be sufficient to remedy the situation as the factors described may fall outside its control.

2.4.1. Industry Risks

No changes observed in the content of information of the present item in the reporting quarter

2.4.2. Country and Regional Risks

No changes observed in the content of information of the present item in the reporting quarter

2.4.3. Financial risks

Risks related to revision of interest rates

Possible fluctuations of interest rates will not significantly affect finance and economic activity of the Issuer, since share of credits and loans in the financing sources structure and share of expenses to cover interests for use of borrowed funds are negligible in the total sum of the Issuer's expenses.

Credit facilities granted by the leading Russian credit organizations as of 31.12.2012 a with interest rates lower than refinance rates of Central Bank of Russia obtained from leading credit institutions of Russia in 2011 allowed to minimize the risk of growth in debt servicing costs despite of a decline in global finance markets evidenced by increase in interest rates on raised credits.

It should be noted that the Issuer is the subject of natural monopoly and selects finance and credit institutions through open single-stage tender for the right to enter into financial service agreements with regard to the provision of credit resources in compliance with the requirements of the Federal Law No. 135-FZ dated July 26, 2006 "On Protection of Competition" and the Federal Law No. 94-FZ dated July 21, 2005 "On Placement of Orders for Supplies of Goods, Performance of Works, Rendering of Services for State and Municipal Requirements".

Inflation risk

Recently the status of the Russian economy is characterized by moderate rates of inflation. The table below provides data on inflation indices for the period from December 31, 2007 until September 30, 2012.

Period	Inflation for the period*
2012	6,6%
2011	6,1%
2010	8,8%
2009	8,8%
2008	13,3%
2007	11,9%

** data of Federal Service of State Statistics of the Russian Federation (Rosstat)*

Following the results of 2012 inflation makes 6,6 %/ |For 2011 the rate of inflation makes 6.1%. In comparison with the similar period of last year the trend of insignificant increase in rates of inflation is observed.

On the whole, influence of inflation factors on financial stability of the Issuer in the future is negligible.

In the specified situation the probability of the Issuer's failure to fulfill obligations on securities in actual terms of money is low.

Risks related to fluctuations of foreign currency exchange rates

In process of investment activity, the Issuer may be purchasing goods from foreign suppliers, the cost of which directly depends on fluctuation of currencies. However, the Issuer engages into finance and economic activity exclusively in the domestic market and makes settlements in rubles. Therefore liability of the Company's financial state, liquidity and results of the Issuer's activity to the fluctuations of the currency exchange rate is minimum.

Liability of indices of the Issuer's financial statements prepared in accordance with the Russian accounting standards to influence of specified financial risks.

The following indices of financial statements are most liable to variation as a result of influence of specified financial risks:

- accounts receivable – increased turnover time;
- accounts payable – increased turnover time;
- monetary funds – less free monetary funds;
- profit from the main activity – reduction.

These risks may be mitigated using the following methods:

- elaboration of a single development strategy for various fields of finance activity in the Company;
- establishment of proper loan policy of the Company; raising credit resources to eliminate cash deficiency;
- establishment of budget policy and efficient performance of income and expenses plan;
- optimization of financial flows through strengthening of financial discipline;
- financial performance analysis in order to develop proposals for increasing profitability and improving efficiency, saving financial resources and increasing financial stability of the Company;
- optimization of costs management through reduction of expenses;
- efficient monitoring of accounts receivable and accounts payable;
- claims work with past-due accounts receivable;
- maintenance of corporate supervision over finance and economic activity of the Issuer.

2.4.4. Legal risks

No changes observed in the content of information of the present item in the reporting quarter.

2.4.5. Risks associated with the Issuer's business activity

No changes observed in the content of information of the present item in the reporting quarter.

III. Detailed information about the Issuer

3.1. History of establishment and development of the Issuer

3.1.1. Information on the Issuer's business name

The Issuer's full business name: ***"Interregional Distribution Grid Company of Volga", Joint-Stock Company***

The date of Introduction of full business company name – ***29.06.2007***

The Issuer's abbreviated business name: ***IDGC of Volga, JSC***

The issuer isn't joint-stock investment fund, the insurance or credit company, the mortgage agent

3.2.7. Additional requirements to the issuers which primary activity is mining

Primary activity of the issuer isn't mining

3.2.8. Additional requirements to the Issuers which primary activity is rendering communication services

Primary activity of the Issuer isn't communication services

3.3. The Issuer's Outlook

3.3. Plans of future activities of the Issuer

The strategic development of the Company aims to form a reliable and effective distribution grid complex that will satisfy the needs of economic and social development in the regions serviced by the Company.

To achieve the key strategic goal, the following objectives will be solved:

- improvement of the efficiency of operations of the distribution grid complex;
- upgrading and implementation of a new electric grid infrastructure based on a major innovative renewal;
- improvement of Company's attractiveness for investments.

The milestones in solving these objectives for IDGC of Volga, JSC are as follows:

- decrease in physical wear of electric grid assets down to 50% by 2020;
- improvement of the operating efficiency to match the efficiency of distribution grid companies of developed countries by 2020;
- formation of the reserve of transfer capacity of electric grids forestalling the economic development by 3 years by 2020;
- improvement of profitability of investments into the distribution grid complex to match the profitability with comparable market risks in RF;
- fund raising to launch a major renewal of fixed assets intended to improve service reliability and quality and to boost the operating efficiency of the distribution grid companies;

- implementation of innovative technologies meeting highest international standards in the field of power distribution at all stages of the technological process.

To reach the above objectives the Company needs both additional abundant financial resources and qualitative modifications in power transmission activities.

The Company will pursue the following key activities:

1. Improvement of service reliability and quality and ensuring system safety through implementation of repair and investment programs
2. Improvement of the operating efficiency through implementation of measures for cost optimization;
3. Business integration, grid consolidation and expansion of market coverage
4. Improvement of Company's attractiveness for investments.

Starting January 01, 2011, the Company switched to a new method of regulation of power transmission tariffs (RAB-based Regulation) For 2011-2015, this new tariff setting system implies a long-term tariff regulation ensuring the recovery and return on the capital of investors.

By switching to RAB-regulation, the Issuer achieved the following advantages:

- stable long-term economic and budget planning for the regions;
- relation between price and quality of power transmission and supply services;
- release of funds from recovery and return on old capital for repayment of payables;
- higher investment attractiveness owing to the transparency and guaranteed recovery and return on new invested capital.

According to the requirements of RF Government No.1178 dated December 29, 2011 applicable to all branches of the Company, in 2012 long-term parameters used for regulation of activities of the branches of IDGC of Volga, JSC were reviewed basing upon the method of Return On Invested Capital (RAB) with the earliest expiry date of July 01, 2017.

Pursuant to the Order of RF Ministry of Energy No.29 dated January 24, 2013 issued as a result of cancellation of the guarantying supplier status of Penzaenergosbyt, JSC, the Company discharges power supply functions in the Penza region starting February 01, 2013. These functions are close to the functions discharged by an electric grid company participating in the process of power supply to end consumers with the sales acting as an intermediary

3.4. The Issuer's participation in industrial, bank and financial groups, holdings, corporate groups and associations

No changes in the information of the present item in the reporting quarter were observed

3.5. Subsidiaries and affiliated business entities of the Issuer

1. Full business name: ***"Social Sphere-M", Joint-Stock Company***

Abbreviated business name: ***Social Sphere-M, JSC***

Address: ***50, Lenin Avenue, Saransk, 430003 Republic of Mordovia, Russia***

INN (Taxpayer Identification Number): ***1326185581***

OGRN (Primary State Registration Number): ***1021300973033***

Subsidiary: ***Yes***

Affiliated company: ***Yes***

Grounds for a company to be considered as a subsidiary or affiliated company to the Issuer: ***In accordance with Article 105 and Article 106 of the Civil Code of the Russian Federation the Company is considered a subsidiary and affiliated company.***

The Issuer's share in the authorized capital of the entity, %: ***100***

The share of the entity's ordinary shares owned by the Issuer, %: **100**

The entity's share in the authorized capital of the Issuer, %: **0**

The share of the Issuer's ordinary shares owned by the entity, %: **0**

Description of the core activity of the company. Description of the company value for the Issuer's activities: recreation and resort services; lodging, catering and medical treatment and prevention services. Non-core activity.

Members of the Board of Directors (Supervisory Board) of the company

There is no Board of Directors (Supervisory Board)

Sole Executive Body of the company:

Full name	Year of birth	Share of the person in the authorized capital of the Issuer, %	The person's portion of ordinary shares of the Issuer, %
Sedin, Sergey Borisovich	1961	0	0

Members of Collegial Executive Body of the company

There is no Collegial Executive Body

2. Full business name: *"Chuvash Auto Transport Company", Joint-Stock Company*

Abbreviated business name: *ChAK, JSC*

Address: *21, Promyshlennaya Str., Novocheboksarsk, 429954 Chuvash Republic, Russia*

INN (Taxpayer Identification Number): *2124021783*

OGRN (Primary State Registration Number): *1042124002117*

Subsidiary: *Yes*

Affiliated company: *Yes*

Grounds for a company to be considered as a subsidiary or affiliated company to the Issuer: *In accordance with Article 105 and Article 106 of the Civil Code of the Russian Federation the Company is considered a subsidiary and affiliated company.*

The Issuer's share in the authorized capital of the entity, %: *99.99*

The share of the entity's ordinary shares owned by the Issuer, %: *99.99*

The entity's share in the authorized capital of the Issuer, %: *0*

The share of the Issuer's ordinary shares owned by the entity, %: *0*

Description of the core activity of the company. Description of the company value for the Issuer's activities: transportation services; operation, maintenance and repair of vehicles.

The Company provides transportation services to "Chuvashenergo", the branch of IDGC of Volga, JSC.

Members of the Board of Directors (Supervisory Board) of the company:

Full name	Share of the person in the authorized capital of the Issuer, %	The person's portion of ordinary shares of the Issuer, %
Zaretskiy, Dmitriy Lvovich (Chairman)	0.00052	0.00052

3.6. List, Structure and Value of the Issuer's Fixed Assets, Information on Plans for Acquisition, Replacement and Disposal of Fixed Assets as well as All Facts about Encumbrances

of Fixed Assets of the Issuer

3.6.1. Fixed assets

Is not indicated in quarterly report for quarter 4, 2012

IV. Information on Financial and Business Activities of the Issuer

4.1. Results of Financial and Business Activities of the Issuer

Is not indicated in quarterly report for quarter 4, 2012

4.2. Liquidity of the Issuer, Sufficiency of Equity and Current Assets

Is not indicated in quarterly report for quarter 4, 2012

4.3. Amount and Structure of Equity and Current Assets of the Issuer

Is not indicated in quarterly report for quarter 4, 2012

4.4. Non-fixed assets of the Issuer

Is not indicated in quarterly report for quarter 4, 2012

4.5. Information about policy and expenses of the Issuer in the sphere of scientific and technical development with respect of licenses, patents and new investigations

Is not indicated in quarterly report for quarter 4, 2012

4.6. Analysis of Development Trends in the Issuer's Core Business Activity

The following information is based on opinions of the Issuer's Management Bodies.

Outline of development trends in the industry where the Issuer performs its main business activity:

Historically, the power industry is the key for the Russian economy. As part of the energy sector, the industry influences all industries and serves as an indicator of economic stability in the country.

The development of power industry in the period from 2000 to 2008 was primarily characterized by turnaround of negative power practices formed in mid 90s and the growth in power consumption that emerged in 1999. Rising industrial production was accompanied by the increase in solvency of manufacturers - consumers of power and heat energy, which allowed to solve the problem of non-payment in the power industry.

The country's economic growth along with structural reforms that go along with this growth sets a new goal for the power industry. At this new stage, the power industry is challenged to provide the infrastructure that would enable the creation of new or expansion of existing industrial facilities at locations required by the nature of emerging manufacturing enterprises. The achievement of this goal would require accelerated development of grid and equipment components of the power industry and its increased flexibility.

Major development trends in the industry in the period from 2002 to 2005:

- setting up infrastructure wholesale companies: System Operator "SO-CDA UES", JSC; UNEG Management Company "FGC UES", JSC; Trading System Administrator - NP "ATS";
- arrangement and commencement of the reorganization of AO-energo, establishing power generating, sales, grid (distribution and dispatch) companies;
- opening of the free wholesale power market "5-15";
- opening of the free wholesale electrical capacity market.

It is important to point out negative effects caused by global financial and economic crisis.

Positive economic growth developed in the period from 2000 to the first half of 2008 was followed by a slowdown in the fourth quarter of 2008 and then the decline in power consumption by large metal manufacturers and engineering manufactures.

Negative effects lingered throughout 2009. For instance, the amount of power supply to the grids of IDGC of Volga, JSC dropped by 8.2% for 12 months of 2009 compared to the same period in 2008.

The growth in electricity transmission started in Q4, 2009 extended to Q1, 2012. This trend is generally attributed to the increase in electricity consumption by major industrial companies as a result of overall economic improvement in Russia.

Changes in regulations in the course of power industry reorganization:

1. As of January 01, 2006, power generating companies belonging to OAO RAO "UES of Russia", emerged as a result of reorganization of AO-energo and "FGC UES", JSC, entered the wholesale power market. This led to the revision of the information exchange practices with market players and strengthening of requirements on power metering at DGCs.

2. Approval and enactment of the Transitional Rules for Retail and Wholesale Power Market as of September 01, 2006 (the Ordinance of the Government of the Russian Federation No. 529 and 530 of August 31, 2006). In addition to the transformation of the existing structure of the wholesale power market and clear standardization of the functions of each entity operating on the wholesale and retail power market, these regulations changed the payment procedures for services provided by DGCs and their relationships with customers.

3. Changes in the charging policy for services provided by "FGC UES", JSC as of July 01, 2006. Introduction of new rules for the pricing policy of UNEG (changing to announced capacity based charges) allowed DGCs to more precisely plan for the volume and cost of services provided by "FGC UES", JSC in 2006 and later.

4. Changes in the charging policy for services provided by distribution grid companies as of January 01, 2008 that introduced double-rate charges for the transmission of power including the rate for grid maintenance (per announced capacity), and the rate for covering losses (per actual amount of transmitted power).

5. Setting unified "boiler" charges for power transmission services in compliance with the requirements laid down by the FTS and the Government of the Russian Federation. Apart from setting a unified charge for power transmission services in regions, this relationship model requires DGCs to conclude contracts on power transmission to end users with every power grid company operating in their region.

Factors having significant effect on the condition of the industry: reorganization pace, availability of regulatory base in particular; solvent demand from customers; technical condition of plant and machinery.

Overall assessment of the Issuer's performance in the industry

IDGC of Volga, JSC successfully meets its objectives of nationwide importance to provide reliable and steady power supply to customers from every industry of the economy.

In 9 months 2009 the power consumption in the regions entering into a zone of responsibility of JSC IDGC of Volga, was fixed on the average at level of 89 % from the fact of 2008. In the 4th quarter 2009 electric power holiday in a network of JSC IDGC of Volga left on level "crisis" 4 quarters 2008.

The tendency of growth of volumes of transfer and electricity consumption was outlined in 1 quarter 2010 in comparison with 1 quarter 2009 which proceeded in 2, 3 and the 4th quarter 2010.

The volume of services of JSC IDGC of Volga on electric power transfer (for comparability of data useful holiday is given in borders of balance accessory of JSC IDGC of Volga) in the III quarter 2012 made 13 123 million kWh that for 1,96 % is lower, than for the similar period of 2011 and for 0,37 % lower the planned size.

Proceeds from power transmission services for the third quarter of 2012 amounted to 9,823 million rubles (VAT exclusive), that is lower planned value on 90,422 million rubles (-0,91).

Power losses for the third quarter of 2012 amounted to 656 million kW*h that conforms to the standards approved by the RF Ministry of Energy. Expenses related to loss compensation amounted to 907 million rubles (VAT exclusive).

The reasons underlying the above operating results:

Growth in electric power distribution into grids is due to the increased power consumption by large industrial enterprises.

Increase in revenue is conditioned by the growth of power consumption.

Reduced electric power losses in the grids of IDGC of Volga, JSC have been achieved through implementing comprehensive “Programs for reducing electric power losses” aimed to improve the systems of energy accounting for technical and commercial (billing) purposes.

4.6.1. Analysis of Factors and Conditions Affecting the Issuer's Activity

Factors and conditions affecting the Issuer's activity and the results of such activity, and outlook for the duration of mentioned factors and conditions:

Power industry reorganization and extensive government regulation of the industry (including charging policy) represent the major factors affecting the power industry and the Issuer's activity.

Factors and conditions that could substantially affect the activity of companies managed by the Issuer include:

- overstatement of announced (contractual) capacity factored in when calculating charges for power transmission compared to the value in a forecast balance sheet of the RF FTS; possible non-payment of customers for contractual capacity factored in when calculating charges;
- decrease in actual power consumption compared to the values budgeted when calculating charges for power transmission services;
- FGC UES, JSC refusal to perform the contracts of use of the facilities of power grid industry (last mile agreements) from January 01, 2011;
- setting limiting charges for power transmission by the Federal Tariff Service of Russia which do not fully reflect financial expenditures of the Company needed to ensure reliable and steady operation and its further growth;
- increasing emergency risk due to physical deterioration of machinery and plant. Physical deterioration and obsolescence of plant and machinery, increased requirements of reliability and safety operation, higher risk of severe accidents related to the destruction of power supply facilities, all call for emphasis on the reliability and safety issues.

These factors are components of the overall development trend in the Issuer's market. In the Issuer's opinion, they could make a lasting effect on the Issuer's activity in the mid-term.

Measures which are being taken by the Issuer and measures which the Issuer plans to take in future in order to minimize the negative impact of factors and conditions affecting the Issuer's activity:

In the Issuer's opinion, the following are the most effective ways to reduce the negative impact of factors and conditions affecting the Company's activity at present and in near future:

- cooperating with customers on formation of the scheduled balances of power applied to charges calculation which take into account the economic interests of the grid company and the participants of the sector of power supply;
- reaching an economically viable level of charges for power sources while striking a balance of economic interests between energy companies and power consumers;
- providing investment-friendly environment in the power industry;
- team working on the discussion of development plan for constituent entities of the Russian Federation to ensure more accurate and precise planning for power industry development;
- increasing the effectiveness of local power industry;
- creating an integrated power grid environment in the regions to increase the reliability of power supply;
- reaching an economically viable level of charges for power sources while striking a balance of economic interests between energy companies and power consumers.

Substantial events/factors which may have a substantially negative impact on the Issuer's

achievement of the same or better results in future compared with those achieved for the last reporting period:

- introduction of limiting charges by the Federal Tariff Service of Russia which do not fully reflect financial expenditures of the Company needed to ensure reliable and steady operation and its further growth;
- continuation of financial and economic crisis in the global and Russian economy for an indefinite period;
- progress of the Russian power industry reorganization;
- increase in prices for component parts, materials and equipment.

Probability of occurrence of such events/factors:

Since these factors are beyond the Issuer's control, the probability of their occurrence is considered by the Issuer as high.

Substantial events/factors which may improve the Issuer's performance, the probability of their occurrence and their duration:

- implementation of long-term projects, attraction long-term investments at minimal cost;
- effective allocation of risks among all participating parties;
- creation of incentives to increase company's effectiveness by cutting down costs and investing in advanced technologies;
- ensuring fair price for power supply services consistent with the reliability and quality of services;
- dramatic improvement of payment discipline of the consumers of power;
- adjusting charges for power supply to economically viable levels to ensure both proper maintenance of fixed assets and investment potential of the industry.

The growth of profit from providing power supply services can be primarily achieved by cutting down costs, minimizing losses through modernization of worn equipment and increasing the volume of services through expansion of facilities.

Actions undertaken by the Issuer and actions which the Issuer plans to undertake in future to use these factors and conditions effectively:

In order to use above mentioned factors and conditions effectively, the Issuer is undertaking and plans to undertake in future the following actions:

- ensuring a steady growth of effectiveness of all organizational components of the Company;
- implementing active investment policy aimed at the modernization of deteriorated electrical equipment, development of the power industry and commissioning of new facilities.

Measures which are being taken by the Issuer and measures which the Issuer plans to take in the future in order to minimize the negative impact of factors and conditions affecting the Issuer's activity:

In order to minimize the negative impact of factors and conditions affecting the Issuer's activity, the Issuer is undertaking and plans to undertake in the future the following actions:

- modernization of fixed assets;
- prevention of non-payment by power consumers;
- tightening of financial controls and reduction of costs.

The major factors influencing dynamics of revenue from services in transfer e/e, the following is:

- volume of useful holiday of the electric power,
- size of a sredneotpuskny tariff for electric power transfer.

The revenue size from rendering of services in electric power transfer for 9 months of 2012 made 34 013 163 thousand roubles that is lower the fact of 9 months of 2011 on 760 105 thousand roubles (-2,2%).

The main influence on increase in volume of revenue from a main type of activity rendered increase in a useful tariff at electric power transfer (for +0,8 %: with 337 rub / Mwh) that increased volume of released production by 283 097 thousand roubles.

In turn the decrease in useful tariff of the electric power at 3 % from 840,2 to 815,2 rub / Mwh decreased the volume of income received from services on electric power transportation on 1 043 202 thousand roubles.

It should be noted that the tariff-formation on a main type of activity of the Issuer, has the following key features, making essential impact on volume of the received income:

on all branches tariffs are established proceeding from long-term parameters of regulation for 2011-2015 with application of a method of profitability of the invested capital (RAB);

application of single (boiler) tariffs for services in transfer of electric energy for consumers of the respective regions considering not only necessary gross revenue (NVV) of the Issuer, but also NVV of other regional distribution grid companies and JSC FGC UES.

Thus, the income on a main type of the activity, the changes of a tariff received for the account on electric power transfer, considers schemes of mutual settlements of the Issuer with other network companies proceeding from the accepted scheme of "boiler".

Besides the factors influencing change of revenue from rendering of services in transfer to the electric power (section 4.1.2.), the volume of the expenses relating on cost of rendered services makes on a main type of activity of the Issuer as considerable impact.

The main specific weight in cost of the realized services is the share of variable expenses (the purchased electric power on compensation of losses in distributive networks, fee of the network companies, JSC FGC UES fee) which specific weight following the results of 9 months of 2012 made – 60 %/

Units of measurements, thousand RUR

№	Indicators	2011, 12 months	2012, 12 months	Deviations	
				Absolute	%
1	Cost value	44 476 3899	41 626 153	- 2 850 236	-6.41
	Variable expenses	28 603 194	24 823 904	-3 779 290	-13.21
	Among them are:				
	Expenses on purchased electric power on compensation of losses	12 997 288	8 891 128	- 4 106 160	-31.59
	JSC FGC UES services	10 009 881	9 870 735	- 139 146	-1.39
	services of the distribution grid companies	5 596 025	6 062 042	446 016	8.33
	Conditional and constant expenses	15 873 195	16 802 249	929 054	5.85

Costs of the purchased electric power acquired for compensation of losses in distributive networks, following the results of 2012 developed in the sum of 8 891 128 thousand roubles that is on 4 106 160 thousand roubles or 31,6 % lower than fact of 2011, including.

- due to decrease of losses on 303,7 million kWh (7,2 %) the increase in expenses made 938 162 thousand roubles;

- at the expense of decrease of an average tariff for the losses, caused, on the one hand, implementation of the scheme of return of the sums of «cross subsidizing» to the marketing organizations through a tariff of purchase of losses, on the other hand purchase of losses at the noncontrollable price of the wholesale market of the electric power – expenses fall on 3 167 998 thousand roubles.

Costs of JSC FGC UES fee for fact of 2012 made 9 870 735 thousand roubles that are 139 146 thousand roubles. or 1,39 % lower than the fact of 2011, including for the account:

- decrease in costs related to power transmission losses in UNEG by 264,908 th.rub. as a result of lowering of power losses in UNEG by 194.5 M rub. (9.51%) and cutting of the average tariff for UNEG losses by 1.22%.

Increase in expenses related to operation and maintenance of UNEG by 207,816 th.rub. as a result of

higher tariff for UNEG operation and maintenance (+4.09%) and lower declared capacity (-1.68%) originated from the gradual cancellation of "last mile" contracts with JSC FGC UES.

- increase in load loss cost by 82,054 th.rub. (+6.05%)

Growth of expenses for services of the distribution grid companies for 2012 in relation to 2011 made 466 016 thousand roubles that is explained by increase in the number of Territorial Grid Organizations in the regions of presence of the Issuer.

4.6.2. The Issuer's Competitors

No changes observed in the information during the reporting period

V. Detailed Information on Members of the Issuer's Management Bodies, the Issuer's Financial and Business Supervisory Bodies and Brief Information on the Issuer's Personnel (Employees)

5.1. Information on the structure and responsibilities of the Issuer's Management Bodies
